A "GOOD CHEER" CLINCHER

If good hardware management means having in stock all standard sizes of an article

WHY NOT APPLY IT TO STOVES, TOO?

That jumble of makes, styles and sizes serves but to confuse your customer, your clerk, and even yourself, but with an assortment of "Good Cheer" Steel Ranges in 16, 18, 20 and 21-inch ovens, you have ready a size to meet anyone's wants, and but one range to talk.

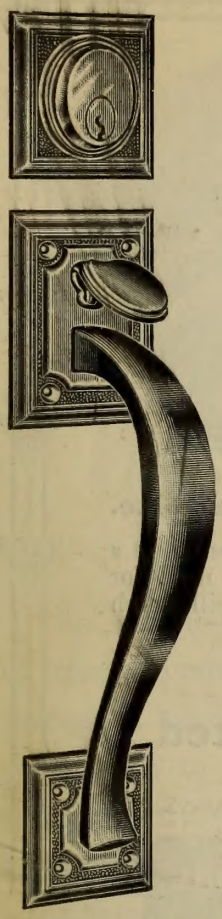
BIG Ben is the biggest thing to-day in the American alarm clock industry. He has everything in his favor—quality, looks, and style. He runs on time, he rings on time, he stays on time.

Slender, massive, richly plated, he stands seven inches tall, with well-shaped distinct hands and a big broad dial easily visible in the dim morning light.



He rings just when you want and either way you want—*five straight minutes* or every other half minute *during ten minutes* unless you shut him off.

His keys are large, strong, easy to wind; his voice deep, jolly, pleasing to hear. The movement plates are bridged like on a Waltham watch— you can change both mainsprings *without taking the movement apart.* The pivots are of hard steel piano wire $\frac{22}{1000}$ of an inch thin. The escapement is a hardened steel pallet escapement—not a pin escapement like that of other alarm clocks.

We are carrying on hand a stock of Big Ben specially put up for *Canadian* trade, 6 in a carton together with a full set of Store Selling Helps, (posters and show cards.) On an order for 12 we give a solid mahogany display stand. On an order for 24 we print your name free on dials and with an order for 48 we send a striking, electric flashing sign, just the thing for your window or counter.

The minimum retail Canadian price is $3.00, and there's a $3.00 resale tag on everyone you buy.

In case lots of 24, $1.95 each. In broken lots, $2.05 each. Less 2%.

HIGH-CLASS TOOLS

The measure of your success is governed by the class of goods you have to sell, for there is something in the appearance of a well-made tool which carries to the mind a conviction of its efficiency. *That is "Selling Force," while the actual working qualities keep it sold.*

Particularly true is this of the **Disston Saws and Tools,** and in calling special attention to the

DISSTON
PLUMBS and LEVELS

The simplicity of the adjustment feature is one which will appeal to all users. Operated by double jamb-screws, easily accessible, the adjusting requires but a moment's time, is firm and secure, there being no spring tension to get out of order, nor can the screws rust in position.

The stocks are made of selected lumber, long and well-seasoned. All brass ends are of solid drop-forged metal, not hollow castings.

you will find they stand in a class apart from others in regard to Quality of Material, Workmanship, Efficiency and Beauty of Finish.

Every Business Man Should Have a Copy of This Book in His Library

"Digest of the Mercantile Laws of Canada"

A READY REFERENCE FOR BUSINESS MEN AND THEIR ASSISTANCE. A GUIDE TO THEIR DAILY BUSINESS

IN RENTING A STORE, BUYING PROPERTY OR COLLECTING A DEBT, THIS BOOK WILL SAVE YOU MANY DOLLARS

No work ever published in Canada equals it. A veritable consulting library on this one line so universally needed. Based on Dominion and Provincial Statutes and Court Decisions. Indorsed by barristers, sheriffs, magistrates and conveyancers.
Below appears a few of the questions it answers. These are picked out at random from the book.

If you endorse a cheque which bank cashes, are you liable to the bank for the amount, if the cheque were forged or raised?—173.
(The figures after each question refer to the section in the "Digest" which gives the answer.)
Can Interest written "one per cent. per month" in a note be collected by "legal process?"—See sections 345, 185.
In going security on a note, what is the difference between writing your name on the face of the paper or on the back?—171.
Why is it that a verbal agreement to buy real estate with, say $100 paid down "to bind the bargain," does not bind either seller or buyer?—451.
If a proposition is made to you by letter and you accept it by letter, do you know the exact time when the contract is closed?—39.
How many years does it take a promissory note, a book account, a judgment or a legacy to outlaw in your province?—356, 359, 360, 367.
How long may the drawee legally hold a draft for acceptance?—209.
If a man, in the presence of witness, makes a verbal agreement to buy a wagon, say for $53, but does not take possession of it, will the sale be binding?—500.
What effect has it on a will if only one person signs it as a witness?—815.
If the wife or husband of a legatee signs the will as a witness, what is the effect?—816.
"A," **in paying off a Mortgage,** gave mortgagee a marked cheque on which was written: "This cheque is given and received as a full settlement and discharge of Mortgage No.———." Is that a legal discharge?—410.
If a person goes with his hired man to a merchant and says: "Give this man the goods he may need up to," say "$15, and if he does not pay you," say, "within thirty days, I will," will the promise bind him?—110.
If stolen goods are sold to an innocent purchaser for value, can they be taken from him?—513.
How may a person legally add "& Co." to his name, or use any special name other than his own as a firm name, without having a partner?—694.
"B" **claims** that the Canadian Bills of Ex. Act allows him two days, in addition to the day of presentment, to accept a sight draft, and then three days of grace in which to pay it—six days in all. Is he right?—209, 217.
If you rent a property for a year, the rent payable monthly, and remain on after the year expires, are you a yearly or a monthly tenant?—580, 608.
Can you garnishee a debtor's money deposited in a bank if you know it is there?—885, 295.

Forwarded direct post free on receipt of price.

Keep the book ten days, and if it is not worth the price, return it and get your money back. If remitting by cheque make **same payable at par,** Toronto. **Eastern Edition, Price, $2.00. Special Western Edition, $2.50.**
To meet the needs of subscribers in New Ontario and the Western Provinces, where land is under The Land Titles System of Registration, an Appendix of 16 pages, containing a synopsis of the Land Titles Acts, has been added to our regular edition, thus constituting a special "Western Edition." Price, $2.50.

Eastern Edition, Price $2.00 **Special Western Edition, $2.50**

NICHOLSON made FILES

You're Known By The Goods You Sell

Sell a man a file that fails to give good service — and you're digging a pit for yourself.

When you give your trade **NICHOLSON-made-FILES—you give them** files that you **know** are absolutely right. You know that each file has been inspected eight times—between every important operation. You know the finished file has been tested on tougher steel than it will ever be used on in actual service. So that when you sell a **NICHOLSON - made - FILE,** you're certain it's going to give the utmost of satisfactory service.

No "come-backs" to fight — no excuses to make. Nothing to do but "sell more files"— and take your liberal margin per sale.

9 RUNAWAY BARGES SEND 156 CRAFT ADRIFT AND SINK 7

Boats Break Loose from Tow and Sweep Yacht Anchorages.

HAVOC ALONG SHORE OF THE HUDSON RIVER

Three Houseboats, with Families on Board, Among Those Struck and Damaged.

Nine runaway barges, laden with sand, gravel and other building material, swept through the numerous fleet of yachts, motor boats, launches and other small craft moored in the Hudson River between 137th and 170th streets yesterday morning, sinking at least seven of them and sending 156 adrift, many of them damaged.

All day the owners of the craft and the harbor police were busy searching for the drifting vessels, many of them being found as far south as 100th street.

A sudden squall out of the northwest at two o'clock yesterday morning parted the hawsers by which two tugs of the Cornell Towing Company were towing nine laden barges down the river against a rising tide. The nine barges, which had been lashed together, parted, two of them being blown inshore at 138th street, while the tugs caught the other seven, towed them inside of the cove at Fort Washington Point, opposite 176th street, and anchored them while they put out to stop the other two barges.

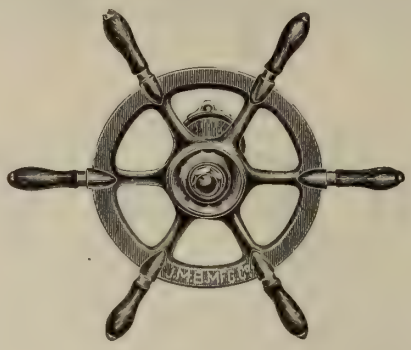
But these two barges were blown swiftly into the moorings of the Colonial Yacht Club, at 138th street, and with such force that three motor boats were sunk, forty more small craft were stripped from their moorings and the landing stage was smashed. The freed vessels started down stream. Their cabins had been crushed in by the barges, their sides scraped and their seams sprung in many instances.

The wrecking of the landing stage awa

The news story opposite goes to show how much damage may result from the parting of a rope. Viewed in this light, every poor or overstrained rope is a public menace.

A man's responsibility does not end with himself—it embraces everybody whom his dealings or actions may affect.

You, as a dealer, can do much to fulfill your responsibility by selling only Plymouth Rope, which is reliable, and by educating buyers to purchase new rope oftener.



Both these courses are also profitable—in money and good-will alike.

Spring  Fever

When it runs to Motor Boats and Yachts is a great disease for boosting the hardware business—if the dealer is shrewd enough to grab the trade.

Never a Spring but the amateur sailor, whether he sports a twelve-foot dinghy or a power cruiser, wants tackle, cleats, chocks, brass railing, flag pole sockets, or what not.

And then too the professional goes in for repairs in the Spring too.

We have a catalogue of **Marine Brass Goods** waiting for the live ones.

Just as
there are several grades of

Enameled ware

so also
there are several grades of

Aluminum ware

It pays to know why they are not "all the same"

"Wear-Ever"

The Reason Why

The enormous pressure of rolling mill and stamping machine makes the metal in **"Wear-Ever"** aluminum cooking utensils dense, hard and smooth. The "case-hardened" surface of the metal is made still harder by electricity—which makes the inside of the utensil darker, smoother, less liable to be discolored and more easily cleaned.

"Wear-Ever" Aluminum Utensils

are stamped from thick, hard sheet aluminum—are made without joint, seam or solder. The less aluminum is heated and the more it is "worked" the harder it becomes. Consequently stamped utensils are rigid, are not easily dented nor softened by being heated.

Demand for **"Wear-Ever"** utensils exists—has been increased each year for eleven years by consumer confidence, by sample-demonstration work, and by magazine advertising.

Names of Customers, Cards to be used in circularizing them, Folders for distribution, Ad Book, Window Display Book, Demonstration Book, Display Cards and Picture Slides are at the service of **"Wear-Ever"** dealers.

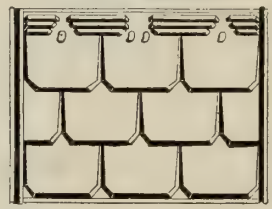
"Metallic" Brick, Stone or Metal Siding.

Sell the Farmers in your vicinity "METALLIC" Barn-Covering Materials—



Make these discerning men have cause to be thankful that they dealt with you

We have spent our whole business life—1884 to 1914—in making quality goods only. No inferior Materials have ever left the "Metallic" factory. We state this positively, because we have never allowed "Metallic" quality to deteriorate. The patented features of "Eastlake" Steel Shingles are the counter-sunk cleat and the full length telescopic side lock and gutter. If quality alone had not put "Eastlake" Steel Shingles in the lead, these fine features would have accomplished almost as great a success.

We will enable you to give the greatest value for each Dollar invested in a Barn or House.

Write for literature and terms at once—take advantage of the season.

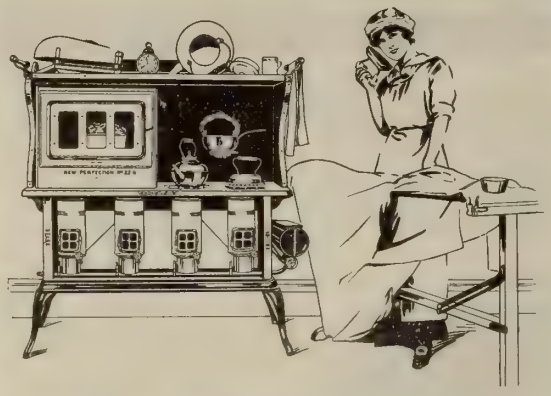
A Sunshine Furnace—a permanent investment

No question of replacing after years of service. The Sunshine is built to last from material only of the greatest durability and strength—tests extending over a generation furnish one continual proof of "Sunshine" superiority.

In the foremost rank of 1914 improvements the inclusion of American Ingot Iron in the "Sunshine" takes a prominent place. This iron, which is 99.84% purity, has made a reputation for itself for its resistance to corrosive action, and the fact that it is guaranteed rust resisting is sufficient reason why we have decided to use it in the construction of the Dome and Radiator of our Sunshine Furnace.



This feature added to the many other points of interest makes the Sunshine Furnace a specially attractive proposition to builders and architects. We therefore urge all dealers to secure full particulars by writing our nearest Branch.

MAXIM SILENCER

The Maxim Silencer has aroused more interest and received more publicity than any other invention in the firearms field for years. This insures numerous and steadily-growing sales to the dealer who sells it—and makes known to his customers the fact that he sells it.

We help you sell and demonstrate the Maxim Silencer in your store. We furnish you, without charge, with a striking store sign, folders, and other helps. And we advertise persistently in sporting and outing papers, farm journals and other publications which reach rifle owners in city and country.

You can sell a Silencer with every rifle bought in your store—in addition to selling present rifle owners in your territory. Every sale means an extra profit.

Ask your jobber; or write to us for full particulars, prices and discounts.

BOSS OVEN

GLASS DOOR

GUARANTEED

No. 750

BOSS Glass Door OVENS

Sold throughout the World. In almost every Country where Oil, Gasoline or Gas is used as fuel, you will find the Boss Oven on sale.

Its tremendous popularity is due to the fact that it is first of all a good and economical baker. We guarantee it to bake or roast satisfactorily on any good oil, gasoline or gas stove, or "money back" without argument.

The "BOSS" is made better than any other Oven. Only the best materials are used. The body is made of Mecca Lustre Polished Blue Steel. The linings of heavy Corrugated Tin Plate, having thick asbestos inner linings throughout.

Its Patented Glass Door, which we guarantee not to steam up or break from the heat, has been a universal success. More than 600,000 of this style are now in daily use.

Many patented and exclusive features are found in the Boss. The new Hinge and Door Support leave the door opening entirely free when Oven is open. No danger of burning the hands or arms by coming in contact with wires or chains.

Large variety of styles and sizes in Glass and Steel Doors are shown in our new catalogue, which will be sent on request. Write for it to-day.

Write to-day for Complete Catalog and prices.

NEW BOSS OIL STOVES

Every Vital Feature in the construction of an Oil Stove has been carefully worked out in the "New Boss." There is nothing complicated to get out of order—nothing hard to understand to operate it properly.

Simple but Substantial construction has been adhered to throughout. The extra wide top gives more room for cooking utensils. The legs are strong cast iron, making the stove very rigid.

Patented High Wick Limits or fingers are provided on the inner combustion tubes which are engaged by the wick when turned at full burning height. These fingers automatically trim the wick when chimney is revolved.

The Intense Blue Flame plays right against the cooking utensil, giving quicker results and using less oil than most other stoves.

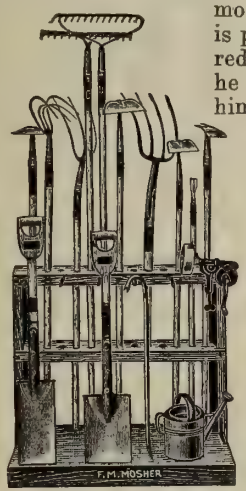
Chicago Spring Butt Company



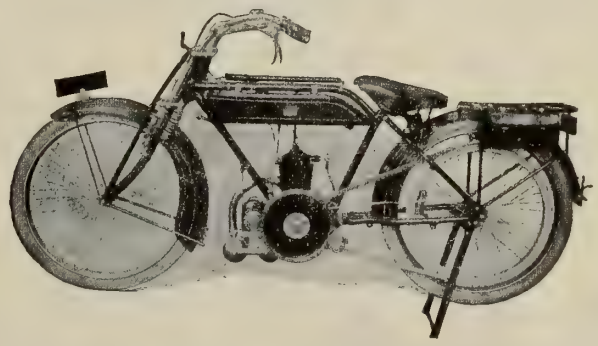
CHICAGO — NEW YORK

A salesman that never gets tired——

who will stand outside your store all day and never get cold—whose voice will not grow hoarse—and who asks no commissions on the goods he sells for you.

How about engaging him?

His name is "**the Sell-More Rack.**" He stands 30 inches high and the piece of the sidewalk that he occupies measures 35 x 17 inches. He hugs the front of your store so closely that he never contravenes the most stringent city ordinances; he is painted a fine attractive carmine red; and he is built so strongly that he will carry all you can load on him. He runs easily on substantial castors; his large flat platform is very useful for displaying small articles; and his weight crated is 35 lbs.



The only salary he asks is $4.50 f.o.b. Canton, when you first engage him. Most reputable jobbers stock him; but if yours hasn't got him he may always be found at his maker's.

HARDWARE AND METAL

Vol. XXVI. APRIL 18, 1914 No. 16

1915 Exhibition and Convention at London

At a Joint Meeting of the Executives of the Canadian Hardware Manufacturers Exhibitors' Association, and Ontario Retail Hardware and Stove Dealers' Association it Was Decided to Hold the Next Exhibition and Convention at London, Ont.

MEETINGS were held at the Queen's Hotel, Toronto, on Monday, April 13, of the executives of the Canadian Hardware Manufacturers' Exhibitors' Association and the Ontario Retail Hardware and Stove Dealers' Association. At a joint meeting held in the afternoon it was agreed by the executives of both associations that London, Ont., would be the most suitable location for the 1915 Exhibition and Convention, which will be held during the third week in February, 1915.

The choice was unanimous, and members of both associations will begin to boost for the London exhibition and convention.

That the city of London was anxious to secure the hardware exhibition and convention for next year was clearly indicated by the attitude of Mayor Graham, of London, who visited the Ottawa convention last February for the express purpose of extending an invitation to the hardwaremen to be present at London next year.

Industrial Commissioner Gordon Philip, of London, was present at Toronto this week for the purpose of boosting for London.

London should be an ideal place for holding the exhibition and convention. The exhibits will be shown in the London armories, an exceedingly large building, which will accommodate a large number of exhibits, and which is located in close proximity to the leading hotels, and main business section of the city.

The convention meetings will be held in the new Masonic Temple, a large and handsome building recently completed, and only a few minutes' walk from the armories. The various clubs of the City of London will be thrown open to the visitors, and all visitors will be well taken care of.

At the joint meeting, it was suggested that the convention be held at a later date, preferably the last week in March. The members of the Retail Association present pointed out that the month of March would not be suitable for holding a convention on account of the retail merchants just entering the busy spring season during the month of March. January is a stock-taking month, and February is the best month for holding a convention.

Meetings of the executive of the Ontario Retail Hardware and Stove Dealers' Association were held at the Queen's Hotel, Toronto, on Monday, and several matters pertaining to the business of the retail association were discussed. The question of the proposed affiliation with the Retail Merchants' Association was laid over for further discussion. In order to increase the membership of the association it is proposed to send out an organizer in the near future to endeavor to secure new members for the association. The small number of members secured last year proved rather disappointing and a campaign will be started immediately for the purpose of increasing the membership of the association.

Make Changes.

The questions of registration, and distributing of badges at the next exhibition, will be discussed by a committee selected by the executives of the two associations. In all probability the exhibition will be thrown open at all times to retail hardwaremen whether members of the Retail Association or not.

London armouries, where 1915 exhibition will be held.

Fly Preventive and Destroyer Season Near at Hand

Startling Facts Regarding the Rapid Reproduction of This Dangerous Insect—Hardware Merchants Should Begin Early in the Season to Push the Sale of Screen Doors, Windows, Garbage Cans, Fly Swatters, Meat Covers, Etc.

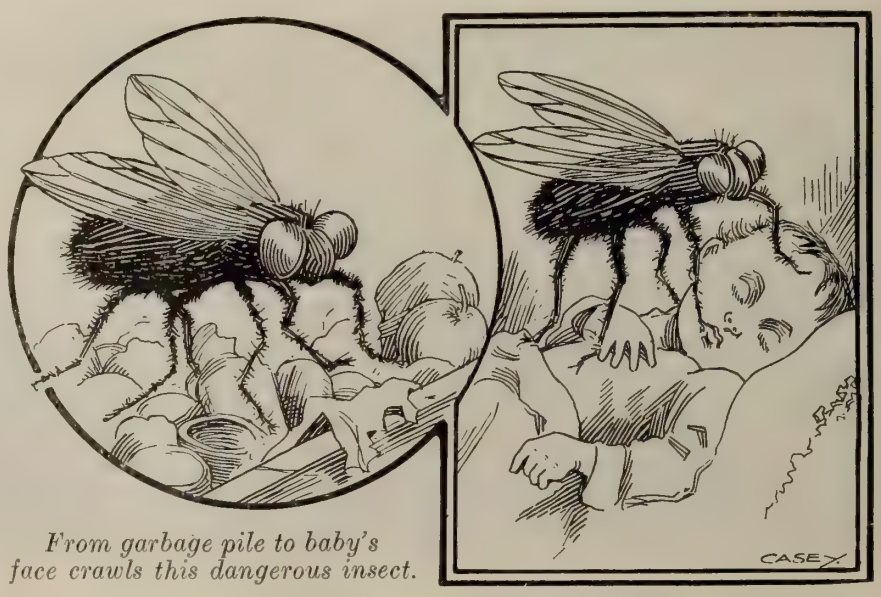
WITHIN the next few weeks the "Swat the Fly" slogan will be heard in all sections of Canada, for there are few places where the dangerous enemy the fly, does not intrude. The danger of infection with disease from this insect is exceeded only by the rapidity with which it multiplies. The enormous fecundity of the house-fly is perhaps much greater than many people imagine. The rapidity of its reproduction is due to two causes: first, the universal prevalence of substances suitable for the nutrition of larvae and in which they develop; second, their early maturity. House-flies breed in any decaying matter of vegetable or animal nature and in stable refuse if conditions of temperature and moisture are suitable. Fermentation is an almost universal condition of all substances in which the development occurs. Stable refuse, straw, old woolens, cottons, mushrooms, and garbage of decaying vegetables, fruits and food stuffs are the principal breeding grounds. Flies will breed at any time when heat and moisture conditions are suitable. This generally happens in the summer, but it is not uncommon for flies to breed in the winter when unsanitary conditions exist.

Reproduction is Startling.

It has been estimated by scientists that one female fly lays at one time 150 eggs. These eggs take about ten days to hatch and mature, and are ready then themselves to reproduce. Allowing that half of these are females, there are 75 of them to lay a second batch of eggs. If each of these 75 females lays 150 eggs, the result is 11,250 flies, which in another ten days are matured. If half of this second batch are females that will give us 5,625 to lay eggs. Allowing that each of these lays 150 eggs, we have a total of 843,770 flies, the descendants in thirty days of the one female fly with which we started. Those who have studied the matter say that each female fly produces about five batches during her lifetime. With multiplication like this going on all summer, if any danger can be attributed to flies, just think how much can be attributed to each female which is allowed to breed. It must be remembered that these figures are based on scientific observation, they are not guesswork. They have science to back them.

Now what are the dangers from the house-fly as regards disease? It has been proven that flies carry infection in two ways—internally and externally, and also that owing to the structure of their legs and bodies nothing can prevent them carrying pollution. The very materials which the fly frequents for feeding or breeding purposes are full of disease germs, and as the legs of the fly are like fine brushes, a great deal of matter adheres to them and cannot be cleaned off. Then, again, the fly while digesting its food, which is often composed of germ-infested matter, regurgitates or vomits, and in this way, besides the ordinary excretions, infected matter is left in various places that the fly may visit. "Observation has clearly shown," says a well-known Canadian authority, "beyond the shadow of a doubt, that a fly will travel over 700 yards within two to three days, giving plenty of opportunity for the carrying of infection to places at a considerable distance; and, in fact, it may safely be said that owing to its habits and bodily structure no fly is at any time free from infection."

The danger from flies as agents in carrying disease bacilli can not be overestimated. Flies have frequently been seen in summer sitting on dining tables and other places with their feet still white from chloride of lime which had been spread on stable refuse, etc., etc. That the white material was chloride of lime was proven by chemical tests. When one considers the cuspidors and other objectionable places which flies frequent, maybe some hundred yards away, and then come to sample the butter, drink of his milk, nibble his sugar, and regurgitate on our bread and meat, no decent person will feel like tolerating such insects around the house or store.



As Deadly as War.

During both the Spanish-American and the Boer Wars it was concluded by experts that flies had caused tremendous loss through infecting soldiers' food with typhoid germs. The same danger has been shown from them carrying tuberculosis germs, and flies have been examined which, twenty-three days after being exposed to infection, still carried disease bacilli. What a horrible thought, then, that the flies which are seen crawling over our meat or feeding from the butter or milk or cheese, have probably just come from the repulsive cuspidor or from a garbage-box in a nearby lane.

Where the Merchant Comes In.

Many of the lines of Fly Preventive and destroyers are sold by hardware merchants. Missionary work as regards sanitation can easily be done and large sales should result early in the season. From the information contained in this article the retail hardware merchant should be able to prepare show cards, window displays or newspaper advertisements, that would put the facts before the public and impress upon the minds of all citizens the necessity of using every

(Continued on page 66.)

From garbage pile to baby's face crawls this dangerous insect.

Getting The House Cleaning Trade

Necessity, the Mother of Invention, Has Been Responsible for the Production of Many Modern Appliances Which Have Revolutionized House-Cleaning Methods —

During recent years many new lines have been added to the stocks of Canadian retail hardwaremen. The majority of these lines consist of appliances and utensils for household use, produced principally for the purpose of lightening household duties. The majority of these lines carry a liberal margin of profit, and many of our most up-to-date hardware merchants have not been slow to take advantage of the opportunities for profits, afforded through stocking and selling the new products.—Editor.

HOUSECLEANING is likely to become old-fashioned before we know it. In the old days it was the custom, to turn the house up-side-down as it were, twice a year. The housewife got busy, the carpets were taken up, hung on the clothes line in the yard, and beaten with carpet beater, broom handle, or hickory stick until the dust was flying in all directions. In the house was all the disorder of battle, without the slaughter. The quantity of soap, both of the hard and soft variety, which was consumed was appalling.

Muscle and soap plus a great deal of misdirected energy were the principal housecleaning commodities.

In the olden days, comic papers thrived on housecleaning jokes, and cartoonists revelled in them to a much greater extent than they do to-day.

During recent years conditions have been changing in a marked degree. Housecleaning no longer strikes terror into the hearts of many of the men who in the olden days had to eat their meals in the woodshed, or eat what they could where they could during housecleaning time.

Necessity, the mother of invention, has caused the production of a large and varied assortment of housecleaning appliances.

Many of the new appliances produced have cut housecleaning work almost in two, and at the same time do more effective work than under the old system.

The writer paid a visit to an up-to-date hardware store a few days ago, and during the course of conversation with the proprietor was informed, that during recent years the stocks of many of our most progressive hardware firms have been undergoing many changes.

New lines are being added, almost every week, and the trade of the housekeeper is being sought to a much greater extent than ever before.

This dealer stated that one of the most profitable departments in his store was the one devoted to household goods and particularly the section in which was found housecleaning supplies.

This department is busy at all seasons of the year, but particularly so during the spring.

"Housecleaning," said the dealer, "is being carried on the whole year round, and although the spring housecleaning is the greatest of all, there is a ready sale for housecleaning supplies during all other seasons. We feature housecleaning supplies strongly during April and May and we are enabled to sell many lines of profitable goods during these two months.

"Many of the lines were never heard of 15 or 20 years ago, and where we were pushing the sale of nails, wire, fencing, etc., in the olden days, we are now pushing vacuum cleaners, dustless mops, dust cloths, wallpaper cleaner, furniture polish, paints, enamels, sweeping powders, wall brooms, mops, mop-wringers, water and electric power washing machines, metal polish, washing powders, curtain stretchers, clothes baskets, wringers, pails and a lengthy list of other household lines, and we are making good profits on them, too. We advertise freely in the newspapers, featuring housecleaning goods. We also use our show windows, price cards with prices in plain figures always accompany the goods on display.

"We make a large number of sales through personal contact, showing customers how certain articles are used, giving demonstrations of floor mops, vacuum cleaners or sweeping powders. Let me tell you right here, there is nothing that will get a lady customer interested in what you are selling quicker than by giving an actual demonstration. We sell more dustless mops and dusters by demonstrating them on a small section of hardwood flooring, than by any other method.

"We sell more vacuum cleaners by demonstrating them in the homes than by any other method. Large show cards are very effective in drawing attention to housecleaning goods, especially when the goods are shown on tables. I believe in having a large selection of housecleaning supplies on display, and having one section or table set aside, especially for the display during the spring housecleaning season. By using modern appliances many of the old-time disagreeable features of housecleaning are eliminated. Almost every week something new is being offered by manufacturers, to aid the housewife. I pick up many new and rapid selling lines by watching the advertising pages of the trade papers.

"You hear many people say that you have to work up a demand for these housecleaning appliances, but it has been my experience that the demand has always existed, and it is largely up to the hardwareman to stock the goods, feature them, demonstrate the various uses, and meet the demand."

HARDWARE AND METAL

VOL. XXVI. No. 16 Toronto, Canada, April 18, 1914 Two Dollars per Year

The 1915 Convention

AT a meeting of the officers of the Retail and Manufacturers' Association, held at Toronto this week, it was unanimously decided to hold the 1915 Convention and Exhibition at London, Ont. At the Ottawa Convention and Exhibition the Mayor of London extended an invitation to the two associations to hold their meetings at London next year.

The fact that London was easily accessible by good railway connections, and that excellent accommodation for holding the exhibition and convention was available had the effect of making the choice an almost unanimous one. The armories in which the exhibition will be held is located near the centre of the city, in fact only a few minutes' walk from the business section. The Masonic Temple in which the meetings will be held is a commodious building, elaborately equipped with every convenience and assuring comfort to all members visiting the convention.

Lack of proper accommodation, particularly for holding convention sessions has proved a serious drawback at many of the conventions in the past. This will be entirely overcome at London. The Temple is only a few minutes' walk from where the exhibition will be held and this is also an important point in favor of London. At the Ottawa convention it was almost impossible to get a large number of members together, owing to the poor accommodation at the exhibition building.

Owing to the disaster at Howick Hall it was impossible to carry out the original programme, and this feature no doubt had a bad effect on the Ottawa meetings. The lack of interest shown by retailers in the exhibits was regrettable, but it is hoped that better conditions will prevail at London. The date for holding the convention, the third week in February is the most suitable period for the retailers, and although it was thought that some change would have been made in the convention date, this was not found necessary. It is altogether probable that before the next convention the members of the Retailers' Association will have an opportunity of deciding whether or not they will affiliate with the Retail Merchants' Association. The general feeling appears to be that the affiliation will take place, providing suitable arrangements can be made, and that the Retailers' Association will become known as the Hardware Section of the R.M.A. Retailers should rally to the support of President Macpherson and help him to make this the most successful year in the history of the organization. There is much room for growth, and the membership should be largely increased. The present membership represents only a small percentage of the hardware merchants of Ontario. There is much work for a live association to do and it is to be hoped that the activities of the association this year will result in many measures being adopted for the benefit of the retail hardware merchants.

Sales Force Efficiency

ONE of the most difficult problems that the hardware merchant faces is the maintenance of sales force efficiency. There is so vast a drop from the height of salesmanship perfections to the depths of incompetence where so many belong who essay the role of salesman, that the success of a business depends to no inconsiderable degree on the point between the two extremes that the staff average attains. If the average is low, the business will not prosper, no matter how well it may be managed otherwise, or how high the standard of the stock carried may be.

The average salesmanship in the average big store is probably not very high. Among other qualities required to make a good salesman is ambition; and it is not often possible to infuse the spark of ambition into the whole staff. Clerks who lack the desire to get on in life seldom have the desire to run up a big sales total or to be consistently courteous and obliging to customers. With a certain number of clerks of the non-ambitious type scattered through the staff, the possibilities of creating big increases in business are seriously curtailed.

In some of the larger stores, a method is followed to overcome this. Each salesman is provided with a weekly sales record, showing what sales he, or his predecessor, made during the corresponding week of the previous year, figures being thus given to show the salesman what he has to beat; for in these stores, increases are regarded as absolutely essential and the salesman who cannot keep up his end is soon replaced. It is a hard rule and under it only the fittest survive, but it surely creates a high average of salesmanship. The weak links in the chain are soon detected. At the same time, it gives a capable clerk full opportunity to show his ability. When a salesman is showing results, his good work cannot be overlooked.

The Business Situation

DURING the past week there has been a slight tapering off in the size of orders for hardware and kindred lines. This is accounted for principally by the fact that during the first two weeks of the month large numbers of Spring booked orders were shipped, and many merchants who had previously held back Spring orders, placed for immediate delivery.

Whether the volume of business for the last two weeks will compare favorably with the corresponding period of last year remains to be seen. A large number of price changes have recently taken place and the majority have been in the nature of declines. The metal market has been weak and a number of price changes have taken place during the past two weeks. Buyers of metals are exhibiting extreme caution, principally on account of weakness in the primary markets. Commenting on the business outlook the Financial Post says:—

After discussing the business situation, following Mr. White's budget announcement and the Railway Board's decision as to rates, an eminent Canadian said: "I'm not going to worry; I'll just wait and see what happens." After the unsettling effects of the railroad rate decision and of the budget speech we can quite understand why that attitude will be generally assumed. Although in the opinion of the Finance Minister, the Dominion is now on the upward trend in so far as business revival is concerned his own figures and those of business generally are against him. Our foreign trade, both as to imports and exports, is still declining and other indices of business conditions point to further contraction. Commodity prices are declining. Dun's latest report says that out of approximately 50 changes, there are 36 declines. Of all such figures none are so depressing as the decline in railroad earnings. Although Mr. White says the worst is over, business men cannot ignore facts which daily experience is thrusting before their attention. Presentation of figures at the present juncture, respecting trade and commerce of the Dominion, by its representative, could not very well be done without to some extent disturbing business. Mr. White, apparently conscious of this, urged that the hour was one for "courage and confidence." There's need for it and justification also.

That some repairs to our tariff were necessary was quite obvious, and those which the minister announced will have a very desirable effect upon business. Those branches of industry particularly affected are important and have ramifications through which the effect of the tariff will be favorably reflected. The changes made ought to be satisfactory to the business interests of the Dominion but they will not allay the political unrest in the West.

Following the budget announcement the Railway Board's decision as to rates was made known and the changes ordered are more drastic than anticipated. Gains to shippers generally will not offset, in our opinion, the damage which the Dominion will suffer through impairment of credit inflicted by the Railway Board decision. How it affected the financial markets was quickly reflected in the action of the Canadian Pacific shares on the London market and following their sharp decline there will, no doubt, be some depression in the securities of Canadian rails generally.

The present is an unfortunate time to announce a reduction in railroad rates, inasmuch as all the roads are showing a marked decline in earnings and in consequence a smaller margin over requirements for interest and dividend obligations. Instantly the investing public of the old world, from which our railway capital has been derived, will conclude that our railways are being subjected to the same form of baiting as has made it difficult to market United States securities and even when marketed they have not secured for them the same advantageous terms as for similar Canadian offerings. We draw attention to this aspect of the rates decision because we believe that it has a very important bearing upon the business outlook for the Dominion. Our railways are the great factors in the opening up and settlement of new territory and it is from this development that so much grist for Canadian factories and mills is derived. If the credit of the railroads is undermined by untimely rate reductions the scope of their energies will be correspondingly contracted.

It is quite likely that our business men will continue to hesitate. They may not worry, but will wait and see what results rate reductions and tariff changes will have.

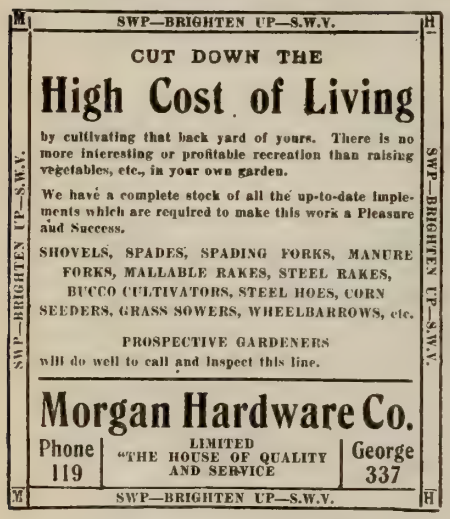
TIME WAS WHEN people avoided a new article because it was new; now they are more likely to buy because it possesses the advantage of being new. This volte face on the part of the purchasing public has made a big difference in buying methods.

Seasonable Advertising by Retail Hardwaremen

Recent Advertisements of Canadian Retail Hardware Merchants Featuring Spring Goods—Guiding Principles in Copy Writing—The Business Methods of a Western Firm.



IN glancing over the pages of a number of Canadian daily and weekly newspapers I was greatly impressed by the number of neat advertisements inserted by various retail hardware firms.

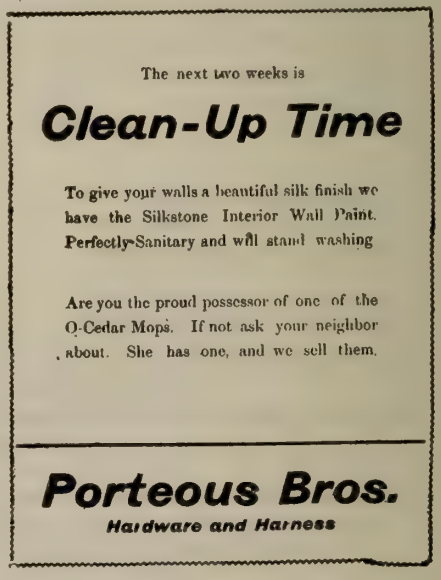
What interested me particularly was the fact that almost without exception the advertisements featured seasonable goods, lines that are in demand and are needed at this season of the year, lines that are needed by the public although the latter do not always realize they need the goods, until informed that they do, through the medium of the newspaper advertisement, show window or some other method of publicity.

There is a marked contrast between the methods of advertising employed by Canadian hardwaremen to-day, and those employed 15 or 20 years ago when little or no attention was paid to newspaper advertising. In those days it was not uncommon to see an ad. run for weeks at a time without change of copy. Many retailers believed that newspaper advertising was a waste of money, and they were no doubt correct, judging by some of the ads. that appeared in those days.

To-day we find an entirely different state of affairs, and although there are still some merchants who do not advertise in the newspapers they are yearly growing smaller in number and in many cases losing ground in the march of progress.

Reproductions are here shown, of four advertisements which have recently appeared in Canadian newspapers.

The Morgan Hardware Co. ad. features garden tools, etc., and is a direct appeal to the readers of the advertisement to cut down the high cost of living by growing garden stuff. This ad. occupied a space 4½ x 5 inches, and was well set-up, although a better effect would have been secured by using illustrations and quoting prices.



Dalgleish & Harding, whose advertisement is shown in Fig. 2, are located at Kelowna, B.C., a town of about 3,000 population. The advertisement occupied a space about 9 x 9 inches, and featured housecleaning materials, paints, fishing tackle, etc. The advertisement is well set-up, and attracts the attention of the reader. The ad. could have been made more effective by quoting more prices on the various lines of goods featured.

Porteous Bros. are located at Argyle, Sask. Their ad. occupied a space 4½ inches x 6 inches, and features "Clean Up Time." The ad. could have been made much more effective by giving a description of the mop, and telling of some of the uses for which it is intended rather than to tell the readers to ask their neighbors about it.

McCubbin's are located at Oak Lake, Manitoba, a town of less than 1,000 population. This ad. occupied a full page space and is an ad. that should draw business. The ad. has many good features. The goods featured are well described and another commendable feature is the quoting of prices on each line. The lines featured are all seasonable, the illustrations are good. The firm is not trying to work up a demand for any line of goods, they are showing the public that they have the goods on hand and that there is a need and a demand for such lines as those offered. The direct talk to the customers is also a commendable feature and clearly outlines the firm's policy as follows:—

"We believe the time has arrived when we should make ourselves clear with our customers in the matter of prices and terms on which we base our prices and ask for your business. Twenty years ago nobody thought of paying cash. The manufacturer gave the merchant long dating on his goods, and he in turn handed them out over his counter, trusting that some day he might get paid for them, and if not he had the comforting assurance that the money was always owing to him. There has been a gradual change in all business lines, and to-day you can buy a farm, a horse, a pound of tea, a monkey wrench or a mouse trap cheaper if you have the cash. This is as it should be, and although the manufacturer asks the merchant to-day to cover his account 30 days from date of invoice, the merchant benefits by getting his goods at lowest spot cash prices and in turn can pass them on to his customers at a price to meet any legitimate competition, if he in turn gets cash for his goods.

"We figure that 90c. in our till is better business than $1.00 on our books, and have decided to allow a discount of 10 per cent. for cash with order on all regular goods not marked net. This applies on every piece quoted on this sheet. Compare these with any prices with which you are familiar. Get out your catalogue if you are a catalogue house

man. Add freight and handling charges to catalogue prices. Our goods are quoted F.O.B. Oak Lake, unpacked set up and ready to be used. If you find the comparison favorable to us we ask you

to encourage home industry by dealing at home.

"To our other loyal customers who have stuck to us through thick and thin we solicit a continuance of your favors under fairer terms when you pay cash, and the same terms on a credit basis."

If more hardware firms followed out the methods adopted by this firm there would be a great deal less complaint regarding the operation of mail order houses.

Advertisements of retail hardware merchants are becoming more numerous, and more effective. Retailers are now giving more time and study to newspaper advertising than they have at any time in the past.

They realize the value of advertising in good newspapers, providing of course that the proper amount of time and thought is given to each advertisement.

Essentials of a Good Ad.

A prominent advertising manager in discussing advertising problems stated recently:

"Advertising is suggestion and sales are created by the power of suggestion. Suggestions can be conveyed by objects, illustrations or words. This being true, then the essentials necessary to the preparation of a good ad. are knowledge of the article to be advertised, how to illustrate that article, with reproductions of drawings or photographs that will attract and how to describe it with words that will most strongly suggest the benefits to be derived from its use. Certainly this sounds simple, but wait! The ability to distinguish those possibilities of the article which are of greatest interest because most practicable, how best to illustrate the article by a proper adaptation of the most suitable of the various kinds of art work and how to describe it by a choice of words that will most forcefully suggest its advantages to prospective purchasers can be obtained only by a serious study of the many good published writings relating to advertising, observation of people as applies to their conditions, requirements and ambitions and an actual practical experience in connection with successful and varied advertising and selling campaigns.

"Analysis shows that most advertisements set to 70 agate lines or under are uniformly much better constructed than those occupying larger space. This condition is due to the fact that if attention is to be secured, interest awakened, desire created and sales clinched by the use of restricted space, the best adaptation of illustration and layout and the cleanest-cut copy that can be devised by necessity are compelled. More generous space, because its large size tends to lend a certain degree of strength, oft'times inspires a freedom of illustration, layout and copy that in the final result means weakness."

How Canadian Retail Hardware Firms Feature Hunters' Supplies

Window Displays of Western Canada Hardware Firms — Eastern Canada Firm Features Sporting Goods in Newspaper Advertisements.

"HAVE you ever listened to the honk of the wild goose, or the flutter of the wings of the brant when they arrive in the spring, without feeling as if new blood had been infused in your system? To go a-gunning is the best tonic known." The foregoing was the introduction, to an advertisement by Brace, McKay & Co., of Summerside, P.E.I., featuring hunters' supplies in their newspaper advertising. The ad., which is here reproduced, is one that should attract the eye of anyone who is at all interested in shooting or out-door sport. The ad. not only attracts attention but tells the reader of various lines of guns and ammunition which may be purchased at the store of Brace, McKay & Co. Prices are quoted on all lines mentioned in the ad. The ad. occupied a space 6½ inches x 15 inches.

Another firm which is featuring the sporting goods department in a novel manner is the Sommerville Hardware Co., Edmonton, Alta.

An illustration is here shown of a window display of campers' and hunters' supplies, designed and arranged by Harold Cook, advertising manager for the firm. This window attracted a great deal of attention, and much favorable comment.

The background is a simple lattice structure with a diamond slat in the centre. The flowers used are wistaria and smilax. In the centre of the window is a birch-bark box of lilacs, air moss and ferns, and at each side of the flower box are 36-inch pedestals with a bouquet of lilacs and ferns on each.

The fixtures used are oak pedestals and slabs, plateaus, and card easels.

Down the centre of the plateau and puffed on the floor is a drape of green plush, which adds richness to the display.

A high-class showing of rifles, ammunition, camp supplies and sporting sundries, mingled with various specimens of birds, game and furs, complete the display. A number of very attractive show cards were used. The cards were prepared by Mr. Cook.

Another very attractive display of hunting goods which appeared in the show window of the J. B. Kernaghan Co., Prince Albert, Sask., is also shown.

In this window, excellent use has been made of advertising show cards and material supplied by the manufacturers.

The display is not overcrowded. A nice range of game traps, rifles, ammunition, and sporting sundries are shown in this display.

A camp stove in the centre of the window attracted a great deal of attention.

A number of stuffed birds and animals were also used and proved to be a feature that attracted the attention of many passers-by.

The methods adopted by these three firms are sure to secure business for them. The trade of the sportsman is indeed desirable. The majority of sportsmen are good spenders and if you secure their trade, the chances are that you will find your profits mounting.

The newspapers and show windows are excellent mediums to use in pushing the sale of hunters' supplies.

Excellent display of hunters' supplies by Sommerville Hardware Co., Edmonton, Alta. Designed and arranged by Harold Cook, advertising manager.

Newspaper advertisement of Brace, McKay & Co.

There is probably no other kind of window display that will attract more attention in a short time than a novel display featuring sporting goods. Hardwaremen are now taking a greater interest than ever before in sporting goods, and during the past year a large number of retail firms have added departments of this kind. There are also many of our old established firms which have conducted sporting goods departments for many years and have worked up a large trade in this line of goods.

Create an interest in your sporting goods department and you will soon find a large portion of very desirable trade coming your way.

SPRING OPENING IN HARDWARE STORE.

Large crowds of interested housewives and would-be housewives attended the second spring opening of Ingram and Davey, Limited, St. Thomas, on a recent Saturday, and thronged the big hardware store from early morn till late at night.

The store had been artistically decorated with spring flowers and the combination of bright colors were set off by the dark colors of the hardware goods which had been especially arranged with a view to effective display.

Music by the London Harpers and luncheon served by the ladies of the Elgin Humane Society gave a distinctly social touch to the occasion and the fact that the luncheon was cooked by electrical appliances added a touch of novelty which doubly impressed itself on the visitors to the store.

The following firms made special displays and had their representatives to explain the advantages of their wares.

The International Varnish Company, of Toronto, made a special display of "Lacquerette" and distributed carnation blooms.

Pinchin-Johnson Company, of Toronto, exhibited paint and distributed literature.

F. W. Bird & Son, of Hamilton, had a display of roofing.

The Allith Manufacturing Company interested the farmers by their display of barn door hangers and tracks.

Metal shingling and siding was displayed by the Metal Shingling and Siding Company of Preston.

Aluminum ware was shown by the Northern Aluminum Company, of Toronto.

A display of electrical appliances proved an attractive feature for the ladies and much interest was taken in the display of irons, toasters, coffee percolators, chafing dishes, etc.

A vacuum cleaner was shown by the Frantz Premier Company, of Cleveland.

An electrical cook stove, manufactured by the Hughes Electrical Heating Company, of Flint, Mich., did not arrive in time for the display on Saturday, but was shown later in the week.

FEATURING CARPENTERS' TOOLS.

Chatham, Ont.—With the advent of spring weather and the reopening of building, the J. C. Wanless store has been appealing to the carpenters with a window display devoted solely to carpenters' tools. The entire front window was given to the display which had some features out of the ordinary.

The central item was a carpenter's bench showing the carpenter's work actually in progress. A board was in position at one side partly planed, with the tool still in the wood. At each side of the bench was a buck, and at the left-hand side of the window a row of shelves. This gave ample opportunity to the designer to display, either on the bench, on the shelves or against the background, a complete assortment of carpenters' tools. Wherever possible the tools were shown "in action," so to speak A touch of realisticity was given by the litter of shavings on the floor Saws were, of course, given considerable prominence. The display included not merely tools of all kinds, but nail kegs, oil, sand-paper and similar incidentals, the window representing with fair accuracy a miniature carpenter shop. The display was designed by Sep. Poole, of the Wanless staff.

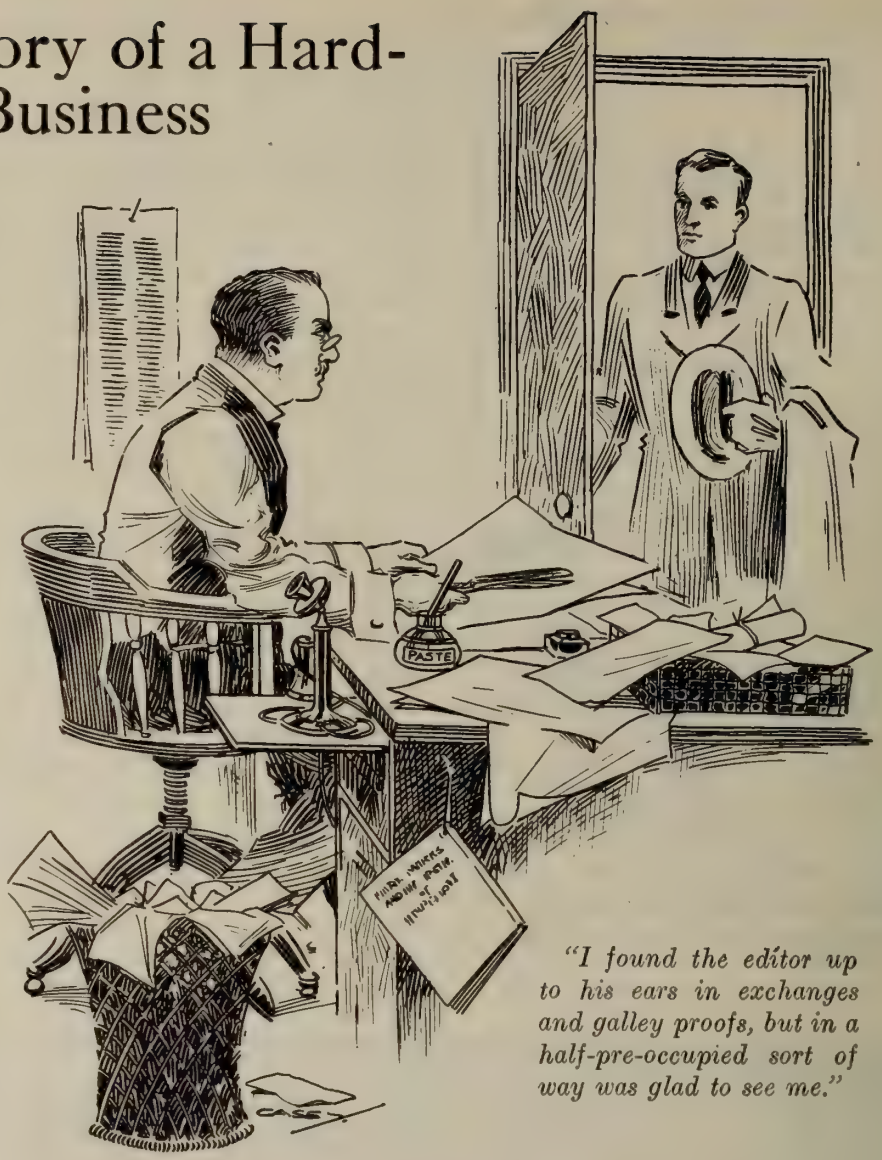
At the same time the store appealed to the carpenter trade through newspaper advertising, the aim being to have the window and newspaper advertising co-operate.

The display is stated to have attracted much attention and brought considerable business.

Splendid display of hunters' supplies by J. B. Kernahan, Prince Albert, Sask.

The Inside History of a Hardware Business

The accompanying article is the second of a series, telling how a hardwareman got his first start in the business and how he has subsequently developed it. The facts given are exactly as related by the merchant himself to the writer. Figures quoted are approximately correct. Only names and dates have been changed in order to preserve the incognito of the merchant. This and succeeding articles will tell how Hardy managed to put his rather risky undertaking on a firm financial basis.—Editor.



By Byron J. Morrow.

I ARRIVED in town to take charge of my newly acquired business in a highly optimistic frame of mind. All the way up on the train I was conjuring up difficulties and problems and then setting to work figuratively and solving them with masterly ease. I planned out special sales and merchandising "stunts" of one kind and another. Before the train pulled into the tumbledown station, I had long since passed beyond the present, and was deep into the future, a roseate future filled with big turnovers and fat profits.

But like an inflated bag, when a puncture is administered, my self-complacency dwindled with alarming rapidity when I struck A———. I went right from the station to the store and made a tour of inspection of the premises. It looked somehow or other much dingier than it ever had before. The cumbersome fixtures and the total lack of order or system in the arrangement of the goods impressed themselves upon me with a sense of the magnitude of the task before me.

What was left of my assurance went out with an expiring gasp when I looked over the books. The sales for the last week that Burton had kept the store open had been so small as to be almost negligible. He had not sold sixty dollars worth of goods.

The difficulties encountered in reviving a business that has become moribund are greater than those confronting a new venture. There is nothing against a new store while there is much against an old one in the public mind. The sins of the previous unsuccessful proprietor are visited on his successor. The store has acquired a bad name and the public must be thoroughly convinced that a change for the better has taken place before they will vouchsafe to give a share of their patronage there again. On the other hand, the newly launched business has no good will to start off with, but at any rate no odium of past failures and shortcomings attaches to it. I began to see that in playing Elisha to Burton I had fallen heir to a cloak of indifferent reputation.

"I found the editor up to his ears in exchanges and galley proofs, but in a half-pre-occupied sort of way was glad to see me."

Nevertheless, I started in to carry out my programme without permitting myself any time for doubts or misgivings. I closed the store up for three days to take stock and put things in order. Burton had kept two clerks, one a mere boy. They did not look to me like heavy stickers in the salesmanship's League—I put them down as .150 and .050 batters respectively—but I decided to give them a chance. The first night I had a talk with them and told them to come back the next day ready to pitch in and get the stock-taking through in record time.

Next morning I was down at the store at 7 o'clock sharp, and found the young clerk already there. He had been waiting ten minutes. This was a hopeful sign and I decided to give the lad every chance to show what was in him. He turned out an A1 salesman in time and became my right-hand man. The older clerk wandered in at 7.30, whistling a popular air and passed me a bland "good morning," which seemed to smack almost of patronage. He hung up his coat, combed his hair carefully and then started in to work with all the willing energy of a boy returning to the drudgery of school after the summer holidays. I had to let him go before we had been together three months. But more of that anon.

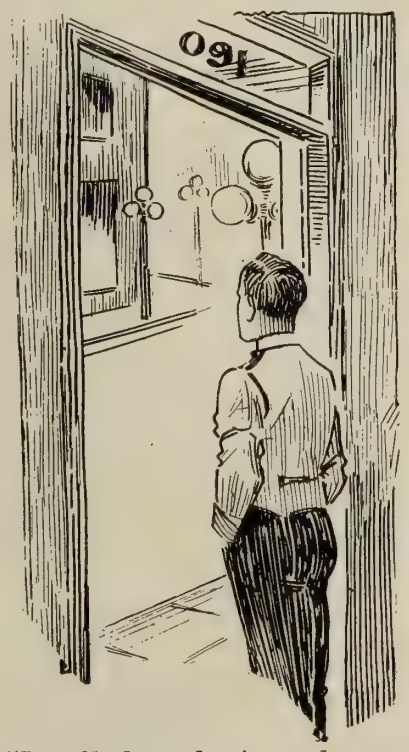
Stock Was Not Clean.

I became convinced before the end of our first day's work that the stock was not in as good shape as I had supposed it to be. Burton had not taken stock thoroughly once during the whole time that he had been running the business. Odds and ends had been accumulating. We fished out many relics on the back shelves and resurrected a great deal of almost unsaleable material. I reckoned however, that on the whole I split even with Burton on this point. If the stock was not as clean as he had represented it to be, it was at any rate larger. We brought a lot of stuff to light which Burton did not know he had in the store.

We quit work that night at 10.30 and on the way home I figured out my plan of campaign. I decided to start things off by holding a big sale. This was necessary for two reasons. In the first place I had to clean out the old stuff which Burton had allowed to accumulate on his hands; and in the second place I had to get before the public somehow. I figured that a real sale, offering real bargains and carried out on aggressive lines would go a long way toward convincing the people of A———, that I meant business.

The importance of that sale loomed up strongly in my mind. I had a "hunch"—as the saying is—that my future success depended on it. If the sale aroused public interest my effort to infuse the breath of life into the almost rigid remains of the Burton business would be accompanied by immediate success. If the sale fell flat, I had visions of a long spell of discouraging efforts to arouse the interest of an apathetic public, so you may be sure I was determined to leave no stone unturned to make that opening sale a monumental success.

I Call on the Editors.



After seeing my two clerks settled down to work next morning, Bill (the junior) in real earnest about it, and Art. (the senior) making a fairly creditable pretense at it, I left the store and dropped in at one of the two local newspaper offices. I found the editor up to his ears in exchanges and galley proofs, but in a half-preoccupied sort of way glad to see me.

"Hope you'll like the place, Mr. Hardy," he said. "When I first came here I thought this was the most godforsaken place that divinity ever forsook. But it grew on me gradually and now you couldn't pry me out of the town with a patent-double derrick. I've become really attached to the crooked, muddy streets, the houses, with their poorly-trimmed hedges and even the people with their colloquial cussedness and their narrow small-town ways. But just the same I welcome any new additions to our ranks."

"Oh, I'll like the town alright," I said. "But the question that bothers me is, will the town like me? Will the people of A——— with what you call their narrow, small-town ways take sufficient liking to me to come into my store and plank down enough coin of the realm in exchange for goods to keep me solvent? I mean will they get the habit in a reasonable time if I show them that I can give them good service?"

"I'm sure they will," rejoined the editor. "A live man can always make things hum in a dull little place like this. If you've got ideas and energy you'll soon have them piling into your store. But you don't want to run away with the idea that you have any cinch ahead of you. This man Burton was a weak-backed specimen without one grain of horse sense in his make-up and any respect that the people of A —— had for him would have to be reckoned in smaller fractions than they taught me at school. You're succeeding him and the job of successor to a pinhead is never a pleasant one. You'll have to show them the goods right at the start."

"That's the way I figured it out myself," I said. "I'm out now to make an immediate dent in the surface of A——. And I guess advertising will help some."

"I walked to the front door and looked up and down the street. One man was in sight."

"Spoken like a man and a brother!" exclaimed the editor with fervor. "If Diogenes ever finds his honest man, his joy will be nothing to what I feel in meeting a merchant—and a merchant in A——, mind you—who mentions advertising of his own free will!"

I then outlined to him an advertising scheme that I had planned. I wanted him to put in an item each day in the news columns, starting with one telling of my purchase of the business. On succeeding days I wanted him to run items telling what I was doing to change the store, the goods I was purchasing, etc. These items were to appear as bona fide news items not as the hybrid notes, which are found in so many papers with the sign "D1," or "Adv." at the end to show their advertising nature. To make sure of this I proposed to write them myself. I guaranteed at the end of the first fortnight to begin advertising in regular display space.

The editor explained that this was contrary to the policy of the paper, but he took me down to the advertising manager, and we discussed the plan. Business was not too rushing just at the time and in the end I got what I wanted.

Those items served to introduce me to the public in what I believed was an effective way. It was a quiet place and nothing much happened there from day to day so that the local columns of the paper were not what one would term thrillingly interesting. The natives, in lack of anything better, read every line that the paper offered them. I believe that every person in town read the items that I had inserted. It did not create any great rush to the store for hardware but it did what I had hoped it would do; viz., let the people know that I was going to reorganize the business and linked my name in their minds with the idea of a hardware store conducted on new lines. For that was the line of argument that I presented—a hardware store conducted along new lines.

Renovating the Store.

In the meantime I was working like a Trojan to make good my promise of a new store. By the end of the second day we had completed our inventory of the old stock and had begun to sort the new stock which was being shipped in. I had hoped to get everything ship-shape by the end of the third day, Friday, and thus take the advantage of the Saturday trade; but Friday night found us still in the throes of preparation and I was forced regretfully to postpone the opening until Monday.

That night as we were starting out for supper, dog-tired with the labors of the day, the junior clerk said to me:

"We've improved it a lot, Mr. Hardy, but the store looks pretty bad yet. Wish we could do something to brighten it up."

"A coat of paint on the fixtures would help a lot. But we haven't time for that——."

"We ought to have things straightened up pretty well by to-morrow night," suggested Billy, who was becoming a regular glutton for work under my coaching. "If we got at the painting in the evening we could probably finish it up. If not we might drop around on Sunday morning——."

"Billy," I said sententiously, "it would never do to work on Sunday."

But catching his eye, I saw an understanding twinkle there and, although nothing further was said on the subject, we knew it was settled that we would finish that painting come what might.

(Continued on page 66.)

Dealers' Profits

An address delivered by Edward M. Hagar, President of the Universal Portland Cement Co., before the National Builders' Supply Association at the fifteenth annual convention held at Chicago, February 18, 1914.

THERE is no more vital and pressing problem confronting the manufacturers of Portland cement in this country than the profits the dealers derive from their sales of this commodity, and I appear before you in the hope that a frank discussion of the subject may lead, through your co-operation, to the use of such methods as will be fair and satisfactory to all parties concerned—the manufacturer, the dealer, the contractor, or consumer.

It must be admitted that the manufacturers have too long been content to merely furnish dealers the cement required in their business, and so long as the dealer was more or less regular in placing his orders for cement and prompt about paying his bills, the manufacturer has worried very little about the dealer's prosperity, and has not concerned himself with the profit the dealer realizes from the cement end of his business.

It is now recognized by many that the margin of profit to-day in the handling of Portland cement by the majority of the dealers in this country is not sufficient to induce the dealer to go out of his way to increase the volume of his business by increasing the consumption of cement in his locality. We are advised by some dealers that they keep cement in stock for the same reason that a grocer keeps sugar—he does not care whether his customers demand much or little sugar, since the profits adds so little to his net returns. A gross profit to the dealer of five cents a barrel for handling cement is, in the majority of cases, too small to return more than a new dollar for an old one.

During the last six months these facts have become evident as never before, and have developed, in my opinion, for two reasons.

First: The better and more business-like practice of eliminating speculative purchases by the dealer, and the substitution of purchases for current shipment for the general trade, or by contracts between the manufacturer and the dealer to cover specified work actually secured by the contractor.

Second: For the first time in fifteen years the price of Portland cement in 1913 remained fairly stationary throughout the year. Whereas, in the olden days we had several years in which the mill price for Portland cement varied as much as $1.00 a barrel within twelve months, last year the average variation from high to low price was probably nearer ten cents a barrel.

Both of these evidences of the more mature and steady industry have called attention to the fact that in the past dealers have relied more upon their keen sense of prognosticating the future course of the cement market to obtain their profits than upon their ability as merchants to secure a proper margin, by making their retail price at a fair advance over the wholesale price at any given time.

As the Portland cement industry grows in size and years this tendency toward saner methods and steadier prices will proceed, and there is little likelihood of again seeing such wide variations as were encountered during the babyhood of the industry. This means that the dealers must look, as any other retail merchant, to the merchandising profit only, and not depend at all on trying to guess the course of prices.

It is being brought out by the more efficient accounting and book-keeping methods now being applied to their business by the dealers generally, that this feature has not received proper consideration.

You may ask why a large manufacturer of Portland cement, having no direct financial interest or ownership in the business of any dealer, should come before you and presume to discuss a matter apparently outside of his province, but I consider the present situation—the growing dissatisfaction among the dealers at their own returns from handling Portland cement—a grave menace to the growth of the cement industry, and, therefore, to the prosperity of the manufacturer, and I so stated at a meeting of the Association of Portland Cement Manufacturers held in Detroit in September, 1913.

I believe that cement manufacturers individually should do all in their power both by their own actions, and by consultation, each with their own dealers, who in reality constitute their agents, to insure that these dealers have sufficient pecuniary return in acting in their indispensable capacity as intermediaries, to make it to the interest of such dealers, so far as lies within their power, to increase the consumption, so that they may handle two barrels where they now handle one. We cannot expect the dealers to work to increase their own, and therefore the manufacturers' business, if it has no financial interest for them.

The Association of American Portland Cement Manufacturers and some of the larger individual manufacturers are doing a great deal of work and spending large amounts of money in the effort to increase the consumption of Portland cement by education, promotion, and publicity. This work takes a number of forms, such as literature, lectures, information bureaus, exhibitions, etc. A good deal of this work is wasted—the cement dealer in each community no matter how small, is not anxious, or even willing, in the great majority os cases, to assist in this work among his neighbors and customers by the proper use of this educational material.

I hope you are convinced that the prosperity of the cement manufacturer is largely tied up in the prosperity of the cement dealer, and that he desires, as much as you, that you may sell a large volume of cement at a good profit. It is for your benefit, as well as for that of the manufacturer, to look at this matter in a broad way, and there is much to be gained by treating the manufacturer as your friend, as you certainly are his friend.

The manufacturer and dealer are equally indispensable to each other, and with a greater recognition of the mutuality of their interests, both will profit in a marked degree.

As to the cure for the difficulty, I do not know of any simple solution that would fit all cases, or any rules that would not be wrong or unfair in their application to more cases than such rules would fit, as the conditions of the problem are so different in large cities from small cities, and in small cities from country towns. Again, two communities of the same size may present a number of reasons, some of them even topographical, for different treatment. There is no such thing as a proper margin expressed in cents per barrel. A profit per barrel that would be correct in one community for a good-sized sale would be too great in other cases, and too small in still

others. I am sure 5 cents a barrel profit is too small in almost all cases; 25 cents a barrel is too small for some sales in certain locations, and yet much too great for a number of cases that arise in the regular business of the cement dealers.

In spite of these difficulties, there are certain principles that can be enunciated; the simplest one is that manufacturers should so conduct their business, and dealers so conduct their affairs, that the dealer is permitted to and does obtain a proper return for his investment, his work, his credit risks, and the services he renders his customer and the community at large. To work out the proper details so that this principle means anything but a platitude may take time and patience. We have taken one step toward the happy solution when we realize that the present methods are far from perfect, and are injurious to both dealer and manufacturer.

The blame for the present unsatisfactory conditions rests on both the manufacturer and the dealer, and neither party to this discussion can solve the problem by himself. There is no way, either effectively or legally, that the manufacturer can compel his dealer to demand and receive a fair margin over the price paid the manufacturer, even though he may do nothing to prevent the dealer from obtaining a fair and reasonable margin. The fault lies with both, and the correction of it lies with both.

Quite recently some of the manufacturers have endeavored to at least afford some relief to the situation (although this cannot be considered a cure) by the experiment or temporary expedient of quoting all contractors and consumers, irrespective of the size of the contract, a price at least 5 cents higher delivered at the same point for the same time of delivery than would be quoted a dealer, and besides this, have increased the cash discount for payment in ten days from 1 cent to 2 cents per barrel. This permits a difference of at least 7 cents a barrel between the manufacturer's price to the contractor or the consumer above that to the dealer, as the dealers generally are in position to discount their bills and the contractors generally are not. This is not, however in most cases a sufficient margin, and the very attempt on the part of the manufacturer to protect his dealer in a good many cases tends to limiting the margin of profit to the amount of protection, and to a certain extent defeats its own object.

Again it is found that in a number of cases the dealer will not add the full 5 cents to his cost price. If a 10-cent differential should be adopted by the manufacturer so as to permit the dealer to make that much gross margin outside of the discount, the dealer on his part would not avail himself of this margin.

Unfortunately it frequently occurs that a dealer is willing to ask practically no margin on cement in order to secure business for the other commodities which he handles for a particular piece of work, and thus injures himself by reducing the margin possible to obtain for cement in other cases. It is just as bad practice and reacts as much on the dealer to sell cement at a loss or without profit, in order to secure business for other wares which he handles, as to ask a high and prohibitive margin.

Speculation in cement by the dealer, by which he might make considerable profit if the market advances (as he hoped), but might be ruined if it declines, has been largely eliminated by the modern method of selling the dealer for his warehouse trade for shipment within 30 days only, and contracting with him for shipment later than 30 days for specified amounts to cover specific work only, for which he, in turn, has contracted with the contractor or consumer; but there still remains a practice, alike inimical to the interests of the manufacturer and the dealer, and that is so-called "padding" of specific work contracts, the contracts with the manufacturer by the dealer being made for a larger amount than the work calls for; if the market goes up, the difference in quantity is taken into stock by the dealer and rarely, if ever, sold at a price based on the current market price, thus reducing the margin on this dealer's spot business, and making it almost impossible for other dealers in that town, who have been more conscientious in their contracting methods, from making any margin whatever in competition with the padding in the specific contract made at a lower figure than the new market value. If the market declines prior to the completion of the padded contract, the manufacturer is advised that the work did not require as much as the contractor estimated. This, as well as any other practice that is not fair, honest, and in accordance with the principle of "A contract is a contract" is injurious to the dealer as well as to the manufacturer.

A great deal of money has been lost, or at least failed to be made, by indulgence in local feuds with brother dealers in the same community; and in an always reprehensible and generally useless effort to eliminate certain competition. Modern ethics require competition, but not destruction. The absence of one is as much to be deplored as the presence of the other.

Cement being a heavy commodity of low value per pound, the selling price being less for the same weight than ordinary hard coal, it follows that any expense connected with handling it from the cars into the warehouse, from the warehouse to the team, by team to the job—any one of these items or the aggregate is a disproportionately high percentage of the selling price compared to commodities of greater value per unit of weight. This is a factor that is generally not sufficiently considered.

A convenient arrangement of dairy buildings. No material makes a more sanitary milk house, or milk room than cement.

The "Clean Up and Paint Up" Campaign

The Movement Has Assumed Large Proportions and is Being Taken Up in Many Places—Newspapers Are Boosting the Movement—Hardwaremen Are Also Taking An Active Part in Boosting the Campaign.

THE "Clean Up and Paint Up" campaign is off to a splendid start. Paint manufacturers had already interested themselves in the movement before Hardware and Metal took a hand but since the national weekly organ of the hardware trade swung into line, the movement has assumed larger proportions. The idea is being taken up in many new places. Hardware and Metal has received letters from a great many newspapers, some professing their willingness to help in the work; others asking for further information. And this is only a start.

Hardware and Metal is placed in an exceptionally good position to further the movement for a "clean up and paint up" campaign in all cities and towns of Canada. Published weekly and reaching hardware dealers in every place from coast to coast, it is in a position to influence the trade to taking an active part and to supply the material and information for furthering the campaign. But this is not all. Behind Hardware and Metal in the movement is the full power and influence of the MacLean Publishing Co., with its far-reaching ramifications and complete organization. One of the MacLean publications is "Printer and Publisher," a trade paper devoted to the publishing interests as the name denotes, and going regularly into every newspaper office in the Dominion. "Printer and Publisher" has fallen into line with Hardware and Metal and will work from the other end, influencing the newspapers to take up the idea, joining with the retail merchants. With this powerful influence at work, the campaign should become a widespread one and in time "Clean Up and Paint Up" week will become an annual fixture in every city and town in Canada.

It is gratifying to be able to announce that a number of hardwaremen have accepted the suggestion of Hardware and Metal and have discussed the matter with their local newspapers, enlisting the assistance of the press. First and foremost to do this has been W. F. Macpherson, of Prescott, president of the Ontario Retail Hardware and Stove Dealers' Association. Others have followed suit, but the number is not as large as Hardware and Metal had hoped to see. However, it is not too late. Why not do it NOW? The first week of May is the period set in a large number of cities and towns so that there is still time to get the movement under way in YOUR town.

As promised in previous issues, Hardware and Metal is presenting material which could be used by the newspapers in stirring up public interest. Two suggestions of this nature appear in the present issue. Literature and cartoons can be obtained from the paint manufacturers. All the ammunition is ready to hand for the newspaper which elects to help along the movement.

ACTIVITY IN MONTREAL CAMPAIGN.

ONE of the first requests to be made to the new Mayor and Board of Control of Montreal, elected April 6, will be a petition, supported by a delegation of those interested in the Montreal Publicity Association's city improvement campaign, asking that a proclamation be issued appointing the week for cleaning up and painting up Montreal, and thus giving an official significance to the work. The executives of the campaign have also decided to call a public meeting in the near future for the purpose of hearing addresses explanatory of the campaign.

At a meeting of the executive of the campaign, held last week, reports were received from the chairmen of the various committees entrusted with the organization of the work. F. A. Scroggie, chairman of the merchants' committee, reported that he had secured promises of assistance from a number of merchants. He submitted a letter which he proposed to send to the merchants of Montreal asking their co-operation in advertising the campaign. They will be required to display in their store windows all articles which can be used in a clean-up campaign, including cleaning utensils and paints. Printed slips drawing the attention of purchasers to the campaign will be inserted in all parcels.

In his report as chairman of the co-operation committee, Dr. W. H. Atherton stated he has prepared a letter to be sent to all the public bodies in the city, with the exception of stores, explaining the campaign and asking their co-operation. The object is to get all to take an individual interest in the cleaning of Montreal, and to obtain their consent to the use of their names in a petition to the city. The petition will ask that a proclamation be issued setting a date for the clean-up week, and, if necessary, that the city provide accommodation at the City Hall for those directing the week's work. Another letter will be sent to the city clergymen, asking them to explain the campaign on a certain Sunday, speaking from the pulpit of the different churches.

W. H. Kay, chairman of the operating committee, suggested that boxes and barrels be distributed to the city grocery stores, so that the stores might then give these receptacles to their customers. In this way provision will be made for the removal of the garbage. As to the incineration, the city might be asked to build two temporary incinerators, as Mr. Kay thought the present Montreal incineration plant would be entirely inadequate.

The publicity work of the campaign, which is being undertaken by E. Montet and the publicity committee, suggested the use of cotton signs on the street cars, banners and other advertisements in the streets, and special slides in the moving picture theatres. The advertisers in the newspapers would be asked to incorporate a notice of the campaign in all their advertisements.

In connection with the proposed public meeting to be held soon, a number of speakers will be obtained, and it is intended to have several thousand badges prepared, bearing the name of the campaign, these badges to be distributed to citizens. All attending the public meetings would be given a badge, and in this way interest aroused in the question of cleaning up Montreal.

Considerable interest has already been aroused in the clean-up campaign in Montreal, and it is felt that the movement will be heartily supported by the majority of the citizens.

Fire Losses.

A fire, which originated in the basement of the Ketchum Co. sporting goods store, corner Sparks and Bank Streets, Ottawa, did damage estimated at about $20,000, on April 10th. The greatest loss was in stock, especially amongst cartridges and firearms. The baseball and bicycle departments escaped without any great injury. The loss was covered by insurance.

CLEAN-UP CAMPAIGN ON A LARGE SCALE IS BEING PROMOTED

Some recommendations which the city commissioners have laid before them for consideration in regard to the city clean-up campaign will be as follows: That the first Tuesday in May be proclaimed clean-up day, and that the clean-up campaign this year be extended for the half-holiday each week by the principal business men, and that all citizens be asked by the mayor and council to co-operate to the fullest possible extent to insure at the termination of the campaign a clean, bright and healthy city.

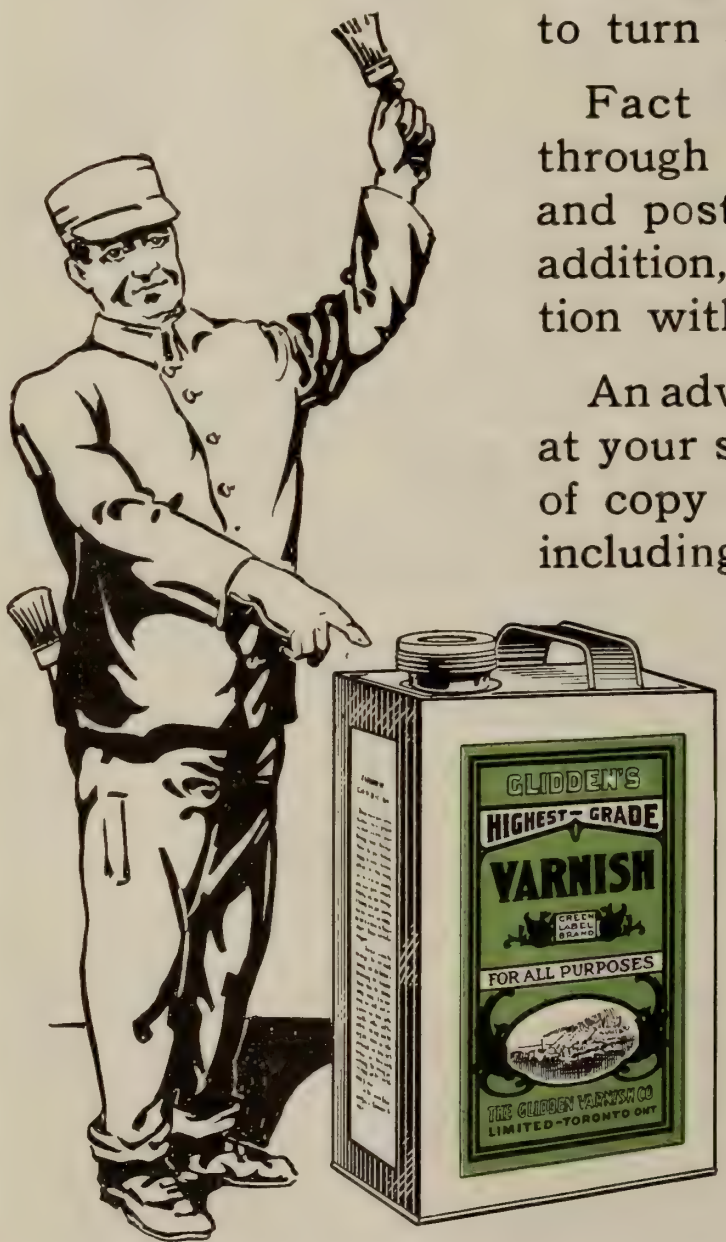
Chief Fish Organizing For a "Clean-ing-up Day" This Month.

Ingersoll, April th[illegible]



"Along with many other towns and [illegible]rities in Western Ontario," said Chief Fish to the Sentinel-Review on Saturday afternoon, "Ingersoll is going to have a Cleaning-up Day [illegible] this month. The object of the day is simply to clean up the town, streets, first day of May, clean up the yards and to make the lanes, the back yards and to make the town look better than it ever did before. I am going to make an appeal, personally, to the merchants of the town to get them to co-operate in this scheme, and I hope that the residents throughout the town will [illegible] their share in making the day a re[illegible] cleaning-up day.

Prepare for "Clean-up Day;" it will soon be here.

Glidden "Green Label" Week

A Plan to Boost Sales in the Varnish Department

HOUSECLEANING season is right here, bringing in its wake a big, healthy demand for varnishes and finishes. Never was a better time to "plump" on Glidden's "Green Label" varnishes and Jap-A-Lac than right now. And we're ready to turn right in and help you.

Fact is, we're doing it now, through our newspaper, magazine and poster advertising. Then, in addition, is our practical co-operation with the dealer—

An advertising department that is at your service for the preparation of copy for your local newspaper, including free electrotypes.

Handsome lithographed cut-outs in colors for window trims; color cards and booklets for distribution among your customers—these are features of a service that goes more than half way in providing the dealer with intelligent, effective selling help.

NOW, while interest in home decorating and home renovating is at its height, make the most of your opportunities. Display Glidden's "Green Label" Varnishes and Jap-A-Lac in your windows and on the counters. Talk Glidden products in your advertising (and don't forget those free electros). Arrange striking window trims. Tear out the full-page Glidden advertisements from the magazines and stick them up in the windows.

Make your store the Glidden headquarters for your neighborhood. Let people know that you are fully prepared to meet their "housecleaning" needs. You'll probably be surprised at the way business will pick up.

The experiment isn't going to cost you anything but a little time, and the possibilities are good for increased sales and new customers.

Write us to-day and let us know just how we can help you. We're willing to let you put the limit on it, but naturally you'll have to speak first. A post-card will do.

The Glidden Varnish Co., Limited

Where the Individual Can Help

Prepared by Hardware and Metal for use in Newspapers.

A FEW feet of land at the corner of King and Yonge streets, Toronto, to-day, would sell for a sum well up in the hundreds of thousands. A few decades ago that land was not worth any more than property around the commercial hub of the smaller cities to-day. The increase in value is due to the growth and expansion of the city.

This is one reason why every citizen should have a full share of civic patriotism. Civic growth is essential to individual progress and gain. If the town grows, the holdings of the property owner become more valuable in direct ratio to the growth of the community. A thousand increase in population means many thousands added to the volume of local real estate.

And each individual has it in his power to accelerate or retard the growth of the community. It is only by the active co-operation of the whole population of a city or town that progress can be effected. Where a town is going ahead it can be accepted as a fact that the people as a whole are earnest, progressive and full of civic patriotism. Visit any town where progress has been halted, where the wheels of industry turn in the same or in diminished measure year by year, where population and assessment totals do not vary, and you will find the people lacking in the qualities of aggressiveness, indifferent to the real interests of the community.

How can the individual help? Here is one way. Take part in the "Clean Up and Paint Up" campaign now launched. Observe the week set aside for this purpose by thoroughly cleaning up your premises. Get out the shovel, the rake, the paint pot. Put your home in tune with Nature by removing the rubbish of winter and by effacing all traces of the wear and tear of the rigorous season now passed.

A city of attractive homes is bound to progress. The reputation of any community depends very largely upon its attractiveness to the outsider; and nothing will win favor more quickly than a uniform orderliness. Do YOUR share toward gaining a good reputation for ———— by actively participating in the "Clean Up and Paint Up" Campaign.

An Advertisement and Insurance in One

SMITH was carrying home a rather bulky, cylindrical parcel when he met Jones. Being neighbors they fell into step.

"Did you know that I had gone into the insurance business?" asked Smith.

"That so?" said Jones, edging away unconsciously. People generally do edge away from insurance agents. "I hadn't heard."

"I suppose you have your house and barn insured?" continued Smith.

"You bet," assented Jones with emphasis, and finality.

"Against what?" asked Smith.

"Against what? Why — against fire, of course."

"Is that all? Now look here, Mr. Jones, do you mean to say that fire is the only thing threatening those buildings of yours? I don't know what the percentage of houses that are burned is, but it can't be so very large. And there is one danger that threatens all buildings all the time—depreciation and decay. Are you insured against decay?"

"Of course not," said Jones with a smile. "Where could I get that kind of insurance?"

"Right here," said Smith, as he brought out a can of paint. "Here is my policy—right inside this can."

Ever stop to consider just how important paint is from the standpoint of insurance?

The fact that buildings decay more or less rapidly when proper attention is not paid to them, does not require any proof. It is well known to builders and property owners that they will be found eager to adopt any measure which promises to prevent depreciation. Allow woodwork to go exposed to the air and it soon cracks and rots.

This is due to the fact that the surface has no protection. Provide it with a covering against the destructive effect of the cold and wet, and it will continue firm and solid just as long as the covering is renewed. Paint is the covering which is applied to wooden surfaces and it has been found a most effective protector against the weather. A building well painted is insured against decay and depreciation.

This is not mere speculation or sales-making exaggeration. It is a fact. Take two buildings, side by side. Have the one painted regularly, and allow the other one to go untouched. The first will remain fresh and in good condition. The second will soon fall into what might best be termed structural senility. Take a stroll through any city or town and the truth of this statement will soon be borne in upon you. You will see plenty of houses which are freshly painted and have apparently always been kept that way. How comfortable and attractive they look. If you are looking for a house to buy or rent, these are inevitably the ones you pick out.

On the other hand, you will find scores of houses which look the picture of neglect. They were probably painted in the first place, but one would never guess it, to look at them now. The woodwork is warped and weatherbeaten and sagging here and there. The whole structure looks as though it were on the point of toppling over or falling to pieces.

What a difference just a few coats of paint make!

A city of well-painted homes is an advertisement of progress. Do YOUR share to make———— a well-painted town.

Take part in the "Clean Up and Paint Up" Campaign.

DEALERS' PROFITS.

(Continued from page 51.)

Entirely aside from the interest and depreciation on the investment in land, buildings and warehouses, and in addition overhead expenses and return on working capital, it requires a number of cents per barrel profit to take care of the cost of carrying accounts of the dealer's customers, and, where necessary, of collecting, counting, shipping, and paying freight on returned sacks.

It is hardly necessary for me to state that many of these items of expense apply to carload business as well as to cases where the cement must be put through the warehouse or teamed to the job. The difference in cents per barrel asked by some dealers for delivery by team compared to the price which they pay the manufacturer f.o.b. cars at their warehouse is so ridiculously low that it can mean nothing but a loss on each barrel sold.

The time allotted to me will not permit my dwelling upon a number of factors that have a bearing, either directly or indirectly, on dealers' profits, some of which are worthy of a separate paper, such as dangerous granting of credits, economical warehouse facilities, businesslike methods in insisting upon written agreements with contractors as clear, concise and binding as those between the dealer and the manufacturer covering the same transaction, a strict compliance with the principle "A contract is a contract," both in dealings with the manufacturer and the customer; making quotations with definite dates of expiration to afford protection against advance of the market before decision is reached; even the carrying of proper stocks, and the giving of sufficient notice in advance of shipments required so as to avoid the expensive experience of having no cement on hand to meet the obligations of contracts or daily demand.

More important than any other one feature, outside of gross margin per barrel and volume of business, is that of the proper handling of cloth sacks. As careless methods in this respect will easily turn a fair profit into an actual loss in the handling of a given quantity of cement at the same margin, I shall touch on this subject in a cursory manner.

Cement sacks can hardly be considered a source of revenue to a dealer, but they must not be overlooked in any consideration of the items that affect his profits. Unfortunately, cement sacks have generally been a source of loss and expense. The dealer may not be altogether to blame for this regrettable condition, but here, as in many other cases, his salvation lies entirely within his own hands.

The root of all our sack troubles has been the old superstition that, through some strange dispensation of Providence, the cloth cement sack was a free package. It cannot be a free package any more than can a paper cement bag, or a baking powder can, or a biscuit box, because ultimately, someone has to pay for it. There are three classes of people who might be called upon to pay for cement sacks—that is to say, the cement manufacturer, the dealer, or the customer. For the purpose of the present argument we will eliminate the dealer, because I am sure that the dealer does not want to pay for these packages, and I am equally sure that no fair-minded cement manufacturer desires him to do so. The question to be settled, therefore, is whether the manufacturer or the customer shall carry this load.

There is nothing but established custom to prevent manufacturers of cement from selling their product in non-returnable packages in the same way as is done by manufacturers of canned goods, and many other commodities. In fact, we do sell a large part of our product in paper bags which are non-returnable. In determining the price to be charged for cement we add to our net price 2½ cents a bag, or ten cents a barrel, for these paper bags. The customer buys the bags, and when he has emptied them he burns them up, or throws them away, or makes any other disposition of them that he sees fit. He has paid 10 cents a barrel for the package in which he received his cement. When we sell cement in cloth, we add to the net price of the cement 10 cents a sack, or 40 cents a barrel, for the packages, but agree with the customer to buy back from him any of the packages that are in fit condition for further service at the same price of 10 cents which we have charged him for them. This means that if the customer takes good care of his sacks, and does not allow them to be destroyed or stolen, all he will have to pay for the cement packages will be the cost of handling and shipping the sacks, plus the value of the relatively small number which may die on his hands through natural wear and tear. If a man handles his sacks in this way, his package expense will be small. If he is careless with them and allows them to be lost or destroyed, his package expense will be heavy, very heavy, but you will note that this additional load will fall exactly where it belongs.

Now, supposing that the cement manufacturers should do as many of their customers would undoubtedly like to have them, and agree to buy back worthless sacks, or even agree not to make any charge for the sacks in the first place, but only to accept with gratitude such sacks as the customer saw fit to return. A policy of this kind would have two results. In the first place, it would add to the cement manufacturer's cost of making and selling his product another big item of expense for sack losses. In the second place, this expense would get larger every year, because there would be no inducement for anyone to go to the expense of taking care of his sacks, and presently cloth sacks would be making only one trip in the same way that paper bags now do. With this large and constantly growing expense on his shoulders, the cement manufacturer would have to get more money for his cement. He would have to spread this additional cost over all his customers, regardless of whether the individual took good care of his sacks or not. In other words, the competent and efficient consumer would be assessed a part of the loss which originated with the incompetent and inefficient user, and the result would be to put a premium on carelessness, and a penalty on carefulness.

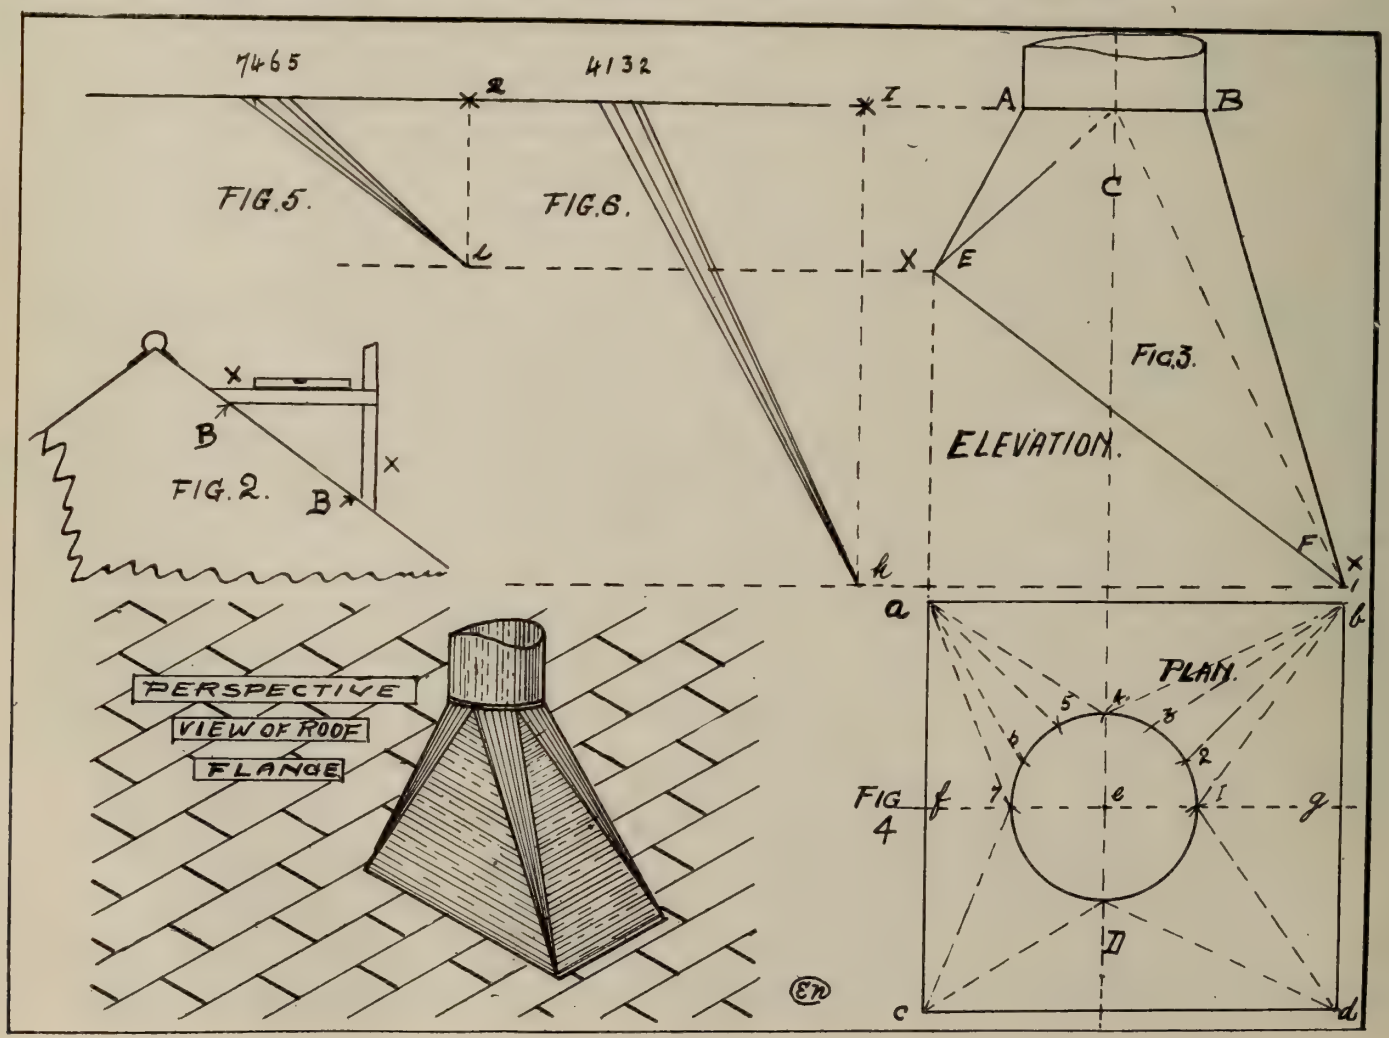
The cement manufacturer, like any other manufacturer who desires to remain solvent, must get back from his customers the complete cost of his product, plus a fair profit. If, to the cost of our product must be added a big package loss, we must get that back from our customers. Now, isn't it fairer to get that package loss back from the customers who are responsible for the loss, intead of spreading it over the guilty and innocent alike? You can see that no matter how things are arranged on the surface, the consumer of the cement must pay for the package, so the only problem to solve is the one of putting that loss where it fairly belongs. These ideas on the subject of sacks may never have been presented to you in just this way before, and it may strike you that my presentation of them has been, to say the least, straightforward, if not forcible. I want to drive these points home, because, if the cloth cement sack is ever to be anything but a source of trouble and loss to you, you must drive them home with your customers. You must make your customers understand that cement sacks are not loaned or donated to them, but the privilege of receiving their cement in returnable sacks is a privilege, and one which they must not abuse. You must make them understand that cement manufacturers have no object in buying sacks unless they can use those sacks again, so that you, in turn, are not justified in buying from your customers sacks which you cannot sell to the cement manufacturers. You must make your customers understand that the money which they lose on a few sacks is the package charge on all the cement they have handled, and you must make them understand and appreciate that even if they have to pay for a few worn out sacks, to say nothing of the sacks

(Continued on page 59.)

Problems in Sheet Metal Work

IN our April 4 issue we partially developed the pattern necessary for a roof flange, showing the various stages necessary to follow out in the development of such a pattern, and had progressed so far as to have described Figs. 2, 3, 4, 5 and 6. We will now describe the actual full pattern shown in Fig. 7.

First erect a vertical dotted line shown in Fig. 3, B.X.I. elevation and same length as B.X.I., though giving this pattern the same letters and figures as shown in Fig. 4, viz., the vertical dotted line in Fig. 7 describes g.1. then transfer the length from centre g, Fig. 4, to g. b.d., Fig. 7, and erect dotted lines as shown from b.d. to 1.



Next take compasses and describe arcs 1, 2, 3, 4 formed by using centre k in Fig. 6, and transferring to b., Fig. 7, then use stretchout measurements in circle on plan Fig. 4, and intersect the arcs 1, 2, 3, 4 in Fig. 7.

Next place the compass at 1., Fig. 5, and open up to 4, then with that measurement from an arc at a., Fig. 7. Next place the compass point at F. and open up to E., this measurement is used to intersect the arc 4.a., now draw the dotted line shown at 4.a. Next transfer the various distances shown from i. 4, 5, 6, 7 in Fig. 5, by placing compass point at a., Fig. 7. Again intersecting these arcs by the measurements found at f., 4, 5, 6, 7 in plan Fig. 7, then by placing compass point at f., Fig. 4, opening up at a. or c., and transferring the distance to a. in Fig. 7, making arc, then placing compass point at E.A., Fig. 3, transfer this measurement to f.7, intersecting arc f. in Fig. 7. Next draw the various solid lines as shown, this finishes the half pattern, the other half may be developed by simply turning the half pattern over at g.1, which will give the results shown, the outer dotted lines are necessary to fasten flange on roof and should be wider than shown. It may be stated that this pattern is always best made in one piece, though only one half-pattern is really necessary. In our next issue we will describe the easiest way to develop the necessary pieces to make up a roof hopper, which are very desirable on flat roofs.

ELECTRIC FLASHLIGHTS.

There is a rapidly growing demand for electric flashlights, and hardware dealers can do both themselves and their customers a good turn by carrying them in stock. Naturally, this idea carries with it featuring them in the show windows and in newspaper ads.

Automobilists have probably created the demand, but many others are finding them exceedingly useful and convenient to carry, and they may easily be handled with perfect safety in barns and other places where any other kind of light would be dangerous. Lanterns will always be in demand, of course, and are staple hardware stock, but the electric flashlight, if displayed and explained, will find many purchasers in any community.—Implement Journal.

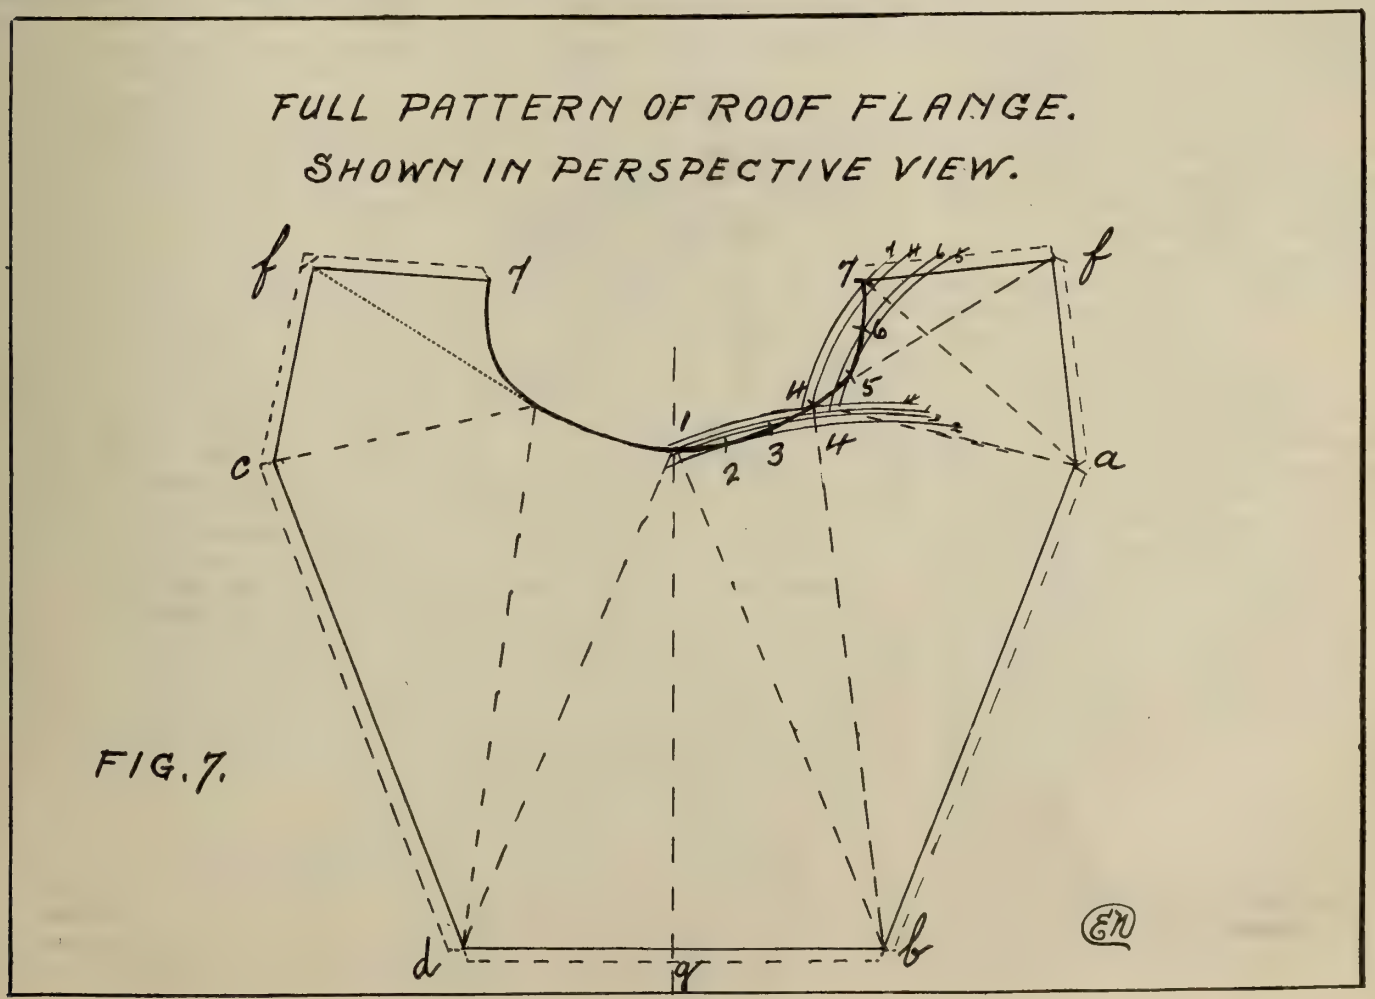
DEALERS' PROFITS.

(Continued from page 57.)

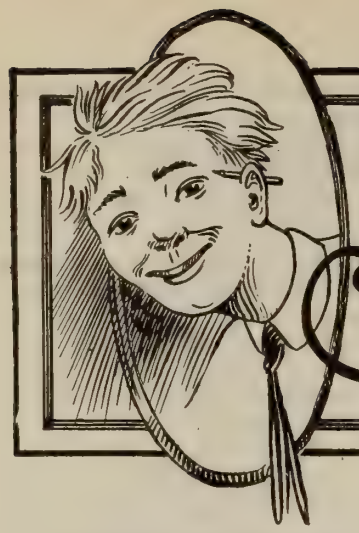
which are prematurely destroyed through their own misuse or neglect, they are still getting their cement in a cheaper and more economical package than any non-returnable package could possibly be.

This is going to be a difficult doctrine to preach, and it is going to require a lot of hard and thankless work, but if the sack end of the cement business is ever going to be anything except a source of friction and disputes, as well as loss to you, this work must be done, and the sooner it is started, the sooner will this package loss cease to be a charge against your profits. We have done a great deal to help the dealer in this educational work, but we want to do more. In this respect, as otherwise, the dealers' interests are ours, and incidentally in the long run, the ultimate best interests of your customers, the consumers, will be served by a clear and proper understanding of this package question.

Cement manufacturers are doing wonderful work to increase the use of cement for the classes of work which have existed for some time, as well as in finding and exploiting new uses. The steady increase in cement consumption in this country, in spite of the depressions that have affected practically every other industry, would not, in my opinion, have occurred had it not been for this educational work. The thousands of cement dealers in this country are in position to render great assistance to this end, and thereby improve their own financial welfare. Broad-minded manufacturers realize that their services must be enlisted, and that the desired enthusiasm must come as a result of benefit to their pocket books.



With the large amount of powerful ammunition that will be freely supplied to the dealer by the manufacturer in the shape of booklets and educational information to suit both the large and small items of cement uses in the innumerable directions in which cement is and should be used, the local dealer, with comparatively small effort, will find it easy to increase the consumption in his locality, and by so doing augment the number of units on which he will receive a certain gross profit, which will enhance the net profits in greater proportion than the increased volume of his cement trade. The greater the volume, the smaller is the necessary margin of gross profit, and the larger the volume, the greater the percentage of gross profit that may be converted into net profit.



We generally find that the dealer is not taking enough interest to educate himself sufficiently to discuss the use of cement with a prospective customer. This education is available in literature that costs him nothing.

In conclusion, the success of the cement dealer and the manufacturer largely depends upon each other, and a mutually friendly, honest feeling should exist, with a willingness on the part of both to co-operate with a real interest in each other's success.

You will find that the right-minded and broad-minded manufacturer is ready to assist by all means in his power to bring about the desired results. If each dealer will approach this subject with the manufacturer or manufacturers from whom he secures his supplies in a spirit of co-operation and confidence, I believe it will soon remove this question, at present so vexatious.

He who is temperamentally sympathetic profits more by his mistakes than the calculating man gains by his calculations. We are more lenient in our judgments of those who err through excess of humanity than of those who have never made a kindly error.

THE JUNIOR CLERK'S PAGE

MODERN PHYSIOLOGY.

By Professor Arthur Bateman.

A MAN who is 150 pounds in weight, contains sufficient ingredients in his body to equal 100 dozen eggs. There is iron enough in his system to make four ten penny nails. His body contains in a condensed form 36,954 cubic feet of gas, 25 candles, and a cake of soap. There is material enough to make heads for a sufficient number of matches to fill 8,064 boxes. Six teaspoonfuls of salt, a bowl of sugar, and 10 gallons of water are part of his 150 pounds. The hydrogen in his make-up would inflate a balloon big enough to lift him above the clouds.

When the fact is firmly grasped that every individual is 100 eggs, more or less, it is not hard to understand why some men are so easily broken up and so disastrously affected when they are beaten, and why others develop a yellow streak and turn out bad. We all have heard of persons who were addled, and of others who are hard-shelled. Also, we have often run into a man who is 36,954 cubic feet of gas. A word or two shrewdly pointed will usually tap his tank and bring on a flow which can be shut off only with the greatest difficulty. Everybody knows the man who is as "sharp as tacks," and the man with an iron constitution or a steely eye. Every one gets a little rusty now and then. It may be that when a man is said to be crooked, it is because his ten penny nails have been trying to do the work of six penny nails and got twisted. We know what happens when a fellow gets "all lit up." It is his 25 candles that furnish the illumination. Besides we know why some persons are more brilliant than others. It is because their candles are in better commission. Some folks are touchy and flare up under friction. It's because there are so many match heads in them. It may be either the candles or the match heads that make them splutter. We all go up in the air once in a while. It is nothing but the hydrogen we contain. When the hydrogen gets beyond control we live in the clouds, a state of existence more unsatisfactory to those remaining on the ground than to those aloft. When the match heads are too often agitated or the candles lighted up too frequently there is danger that the hydrogen will be set off, in which case one goes all to pieces. There are some who will think that the estimate of sugar is too low, but that is a personal matter which may be adjusted to the mutual satisfaction of those concerned. Some of us water our personal stock too much, and that accounts for the great amount of vanity in the world.

WHAT IS SUCCESS?

By Harry Gale Nye.

THEODORE ROOSEVELT'S idea of success is a drug store on the corner, whose wide portals are always crowded by a maelstrom of newly-threatened fathers clamoring for the doctor.

The millionaire's idea of success is a castle wherein he may keep the biggest assortment of beautiful pictures, painted by artists whose names he cannot pronounce, and rare books, in editions de luxe, which he never reads! The millionaire couples wealth with a sense of power and a commiseration for the lowly, mellowed somewhat by a pain in his stomach and a covetous longing for the appetites of the hoi polloi.

His commiseration, at times, takes the form of enlargement of the heart, as a direct result of which the Polinskies on Squalor Street get a meal of canned salmon and pass the can on to the goat. Then the rich man goes down to his office and stirs up the distant relatives of the Polinskies and makes more in five minutes than he gives to charity in a year!

After having stormed the bastile, he goes out to luncheon with a fellow-conspirator, fills himself full of lobster, pate de foie gras and tantalizing fluids, and pays a check that would keep the entire Polinsky family in canned salmon for three weeks.

The food makes him mad after it begins to matriculate inside him, and indigestion grabs his vitals in both hands and wrings his internal mechanism until he yells for quarter. He calls his chauffeur, goes home in his $12,000 touring car, finds his wife gone to a bridge game, and cusses accordingly. Miserable and lonely he sits down to unpleasant dreams!

A bricklayer shuffling by the castle, with an empty dinner bucket in his hand and a gnawing in his stomach like a four-year-old rat eating a lath out of the ceiling at two o'clock in the morning, looks in at the windows and sighs.

"Ah, t' be rich," he muses, "must be th' greatest t'ing in th' hull wur-rld!" And the rich man, affectionately stroking the button of his vest and feeling for his appendix, dodges another pain with a contortion wonderful to behold, and says:

"Oh, heavens! What is success?"

Success is happiness!

The man who is happy, though he be poor or rich, is successful.

We are too apt to make the mistake by looking for success through gold-rimmed eye-glasses. We expect to find success in a ravishing Worth gown, with jewels on her hands and with gems in her hair. Often we lose sight of the real ingenue—the shy lassie with the brown eyes, with the glow of health and beauty in her cheeks and the bunch of wild crab-apples at her throat, as we pass hurriedly by in our mad rush for the frou-frou and the glitter and the route of the imitation woman with the false curls and the walk like a kangaroo!

Take it from me: Money has nothing to do with success! Success is only a condition of mind—the condition that makes a man happy. Some of the most unhappy people in the world are the richest and some of the most disconsolate are the most famous.

* * *

Some men do most of their worrying over the success of others.

New Goods Offered Canadian Hardwaremen

METAL GARAGE.

The Pedlar People, Ltd., Oshawa, Ont., are offering the trade the new metal clad auto garage here illustrated. The garage is claimed to be fireproof and the makers claim that the building is hand-

Pedlar Metal Garage.

some in appearance, durable, and can be put together in one day at very reasonable cost. It is also said that the garage is weather-proof and rust-proof.

THE ROTARY AUTOMATIC SUCTION CLEANER.

This is a new device that has recently been introduced on the market and made by the Rotary Mfg. Co., of Cleveland, Ohio, U.S.A. Its construction is an aluminum case or outer covering, and its interior is made of aluminum and steel and is a very ingenious mechanical construction, generating its own power from the traction wheels that are so geared as to operate the rotary fan that it is claimed in ordinary use will generate 6,000 revolutions per minute, creating a most powerful suction. Being entirely a hand machine it accomplishes the work of a sanitary remover of dust from carpets and rugs, without the use of electric power, and hence has no cost for operating.

It is made with ball bearings at every point, which reduces friction to a minimum making it easy to operate.

The cleaner is being marketed by the Hawthorne Sales Corporation, 220 W. 42nd street, New York.

HANDY HOME TOILET CLIPPER.

A unique toilet clipper, retailing at the price of 60 cents, was put on the market about six weeks ago by the Chicago Flexible Shaft Company.

The manufacturers claim that this clipper will do good work and stay sharp.

The Handy home toilet clipper is made up of but five parts—viz., cutter, comb, handle and two screws. The handle is of spring steel formed so as to afford a good grip, and at the same time it acts as the spring for making the return sweep of the cutter. It also furnishes the proper tension between the cutter and the comb.

The cutter, instead of having the same number of teeth as the comb, has but one large tooth that moves back and forth over the comb cutting the hair between each two teeth of the comb in order, instead of engaging all of the hair taken up by the comb at one time. On this account it requires much less strength, and there is no danger of pulling, which are important features, as these clippers will be used mostly for home use.

The manufacturers believe that a good clipper at the above price can be sold extensively for home use.

The Handy home toilet clipper is furnished dealers in counter display cartons containing one dozen. Each clipper is in an individual box.

Home Toilet Clipper

Large display hangers are being prepared that will illustrate the various uses of the clipper, such as cutting a boy's hair, a man trimming his own hair, a wife trimming the hair on her husband's neck, etc.

KYANIZE LINOLEUM FINISH.

The Boston Varnish Company, Everett Station, Boston, Mass., has added to the "Kyanize" line a linoleum finish.

"Kyanize" linoleum finish is said to be a tough, durable varnish for linoleum and oil cloths. It dries quickly with a durable, glossy surface, and makes an old linoleum or oil cloth look like new. It is claimed that it lengthens the life of the linoleum so that it wears much longer than if it is not refinished in this way.

The "Kyanize" linoleum finish is put up in round friction top cans, handy to use, and is to be applied as it comes in the can. An attractive steel counter display stand with a small sample lot is furnished by the company. Two pieces of oil cloth are also shown on this stand, one finished with "Kyanize," and the other unfinished, illustrating just what can be accomplished with the "Kyanize" linoleum finish.

The J. H. Ashdown Hardware Co., Winnipeg, are Canadian representatives.

Catalogues and Booklets

Braby's Handbook.

Frederick Braby & Co., Peter's-hill Road, Glasgow, with export office, 110 Cannon St., London, E.C., have issued Braby's Handbook of 144 pages, for engineers and architects. The handbook features sheets, plates, ridging, steel gutters, pipes, steel structures, tanks, wheelbarows, etc. The book is attractively gotten up and a large number of half tone illustrations have been used.

Automatic Washers, Etc.

The Automatic Electric Washer Co., Newton, Iowa, have issued a very attractive catalogue featuring their line of automatic electric and power washers, wringers, mangles, etc. Copies will be mailed on request.

CANADA'S EXPORTS.

The United Kingdom took more of Canada's exports than any other country in the fiscal year, 1912-13, the total being worth $178,000,000 against United States imports from Canada of $167,000,000. Exports to other countries are comparatively small. In imports, however, Canada took by far the greatest value from the United States, the total being $411,000,000, compared with $139,000,000 from the United Kingdom, which ranked second. France was the third greatest exporter to Canada, while Germany ranked fourth.

This country exported more agricultural implements in 1912-13 than she imported by a substantial margin. They were $3,288,866, compared with $2,080,529. The United States took a large proportion of Canadian made farm machinery.

Current News of the Hardware Trade

Honored With Royal Warrant.

Escare & Denelle, Ltd., 129 Wardour W., have recently been honored with the Royal Warrant of Appointment as manufacturers of electrical fittings and bronzes to his Majesty King George V.

Additions to Plants.

The L. Martin Co., with main offices at 81-83 Fulton street, New York, announce the completion of a large brick addition to its Philadelphia works, which will be used entirely for the manufacture of high grade lamp blacks. Plans have been drawn for still further enlargement of this plant. The London, Eng., branch of the company is also being enlarged considerably.

C. E. Harrison Married.

Chas. E. Harrison, department sales manager Steel Co. of Canada, Hamilton, was married on April 8 to Miss Bessie Peebles, daughter of C. H. Peebles, clerk of Division Court, Hamilton. Mr. and Mrs. Harrison left on a trip to New York and Washington.

Mr. Harrison, who has been associated with the Steel Co. of Canada for a number of years, was presented with a handsome chair and silver service by the staff at the head office.

Opening of Camp Eeh-Nis-Kim.

The Great Sachem of the Order of Eeh-Nis-Kim has issued a call to the four thousand braves and medicine men of the mysterious organization of hardwaremen, announcing that the annual camp on the banks of the historic Niagara River, will be opened June 27, and will close the last day of August. Any hardware dealer or salesman is eligible to membership in the organization. Complete information may be secured by addressing the Great Sachem of Eeh-Nis-Kim, Council Lodge, Niagara Falls, N.Y.

Changes in Old Established Firm.

Acting under the advice of his physician, A. M. Bell, founder of the old-established firm of A. M. Bell & Co., Ltd., Halifax, has retired. Ralph Bell has also retired and will engage in another line of business. The management of the business will in future be in the hands of three of its recent directors, A. B. Wiswall, who is now president, H. H. Dalton and A. W. Morton. Mr. Dalton who has been associated with the firm for the past 29 years, will have charge of the purchasing department. Mr. Morton has been appointed sales manager of the company.

Banquet to H. W. Johns-Manville Co. Branch Managers.

A very fitting close of the annual meeting of the managers of the electrical departments of the H. W. Johns-Manville Company, located throughout the United States and Canada, was the banquet given to those in attendance at the above meeting by the management of I. P. Frink.

The details of the banquet were planned and very pleasingly directed by W. H. Spencer and was given in the Gold Room of the Imperial Hotel, New York.

G. F. Spencer, manager of I. P. Frink, performed the duties of toastmaster.

J. W. Perry, general manager electrical department, H. W. Johns-Manville Co.; W. H. Spencer, asst. manager, I. P. Frink, S. G. Meek, asst. general manager electrical department, H. W. Johns-Manville Co., and many of the visiting branch electrical department managers added much to the pleasures of the evening and their responses had many touches of humorous and serious oratory. Bassett Jones, a well-known illuminating engineer was also present.

Miller-Morse Convention.

The spring convention of the Miller-Morse Hardware Co., Winnipeg, opened on Monday, March 6, all the travelers being on hand. The opening address was delivered by Lewis A. Blackwood, who spoke at considerable length on topics of general interest to the trade. He introduced J. J. Corbett, credit man, who spoke on "Co-operation between the sales and credit department from the view-point of the credit man." Mr. Lynch and Mr. Marr also spoke.

Among those present at the convention were P. B. Buchannan, who travels out of Yorkton, Sask. He will shortly be appointed specialty man, selling cutlery and builders' hardware, for which he will cover the West. He will be succeeded by C. H. Read. Others present were H. S. Prowse, Winnipeg; O. C. James, Neepawa, Chas. G. Johnstone, who has been with the firm nine or ten years, and is one of the veteran hardwaremen of Western Ontario.

W. O. Labelle, who represents the firm at Edmonton, was also at the convention. He was formerly in business for himself at Peterborough, Ont. Others at the convention were: Stanley D. Peacock, Lethbridge; Morley P. Barnes, Dauphin, Man.; Norman A. McGratton, Brandon; H. C. Curry, Saskatoon; Joseph Cassidy, Assiniboine; Clayton W. Groff, Moose Jaw; Fred C. McCarthy, Regina; J. R. Bouttillier, Winnipeg; E. T. Parkinson, Stettler, Alta.; L. C. Marr, sales manager; G. S. H. Williamson, Winnipeg; Cecil H. Prest, J. G. Herman, H. Fargie, John McGuire, John Walsh, and John Brown.

The convention proceeded throughout the week. Mr. Johnstone speaking of conditions in Saskatoon, to Hardware and Metal, stated that three hardwaremen had recently been sold out there which would help matters somewhat for the others. Mr. Cassidy said that west of Shaunavon he expected a boom this year.

Personals.

W. F. Macpherson, Prescott, Ont., president O. R. H. & S. D. A., was a visitor in Toronto this week.

Alex. McKenzie, Eastern Ontario representative McClary Mfg. Co., was a business visitor in Toronto this week.

The friends of N. R. Turner, Asst. manager Toronto branch McClary Mfg. Co., are congratulating him on the arrival of a daughter.

James Reid, of Caverhill, Learmont & Co., Montreal, who was confined to his home last week, is again able to resume his duties.

H. W. Aird, manager Canada Paint Company, Montreal, is spending a few days in Vermont, and is stopping at Waterbury Inn.

The following representatives were calling on the Montreal hardware trade during the week:—O. B. Surplus, Surplus, Dunn & Co., New York, N.Y.; G. W. Carter, Eagle Lock Company, Geneva, Ohio; J. F. Ling, Chicago Flex. Shaft Co., Chicago, Ill.; E. S. Duryea, Lane Brothers Co., Poughkeepsie, N.Y.

Members of the executive of the O. R. H. & S. D. A., who were present at the meeting held at Toronto this week were:—D. A. MacNab, Orillia; W. W. Bennett, Gananoque; C. W. Conn, Tillsonburg; Albert Wideman, Markham; A. J. Wright, Hamilton; J. McGregor, Oakville; E. J. Creeper, Owen Sound; H. Occomore, Guelph.

Among the out-of-town hardware manufacturers and representatives who are members of the executive of the Canadian Hardware Manufacturers' Exhibitors' Association, and who were present at the meeting at Toronto on Monday, were:—President Adam Taylor, of Taylor-Forbes Co., Guelph; J. W. Moncur, Ontario Lantern and Lamp Co., Hamilton; T. D. McFarlane, McFarlane, Douglass Co., Ottawa; A. M. Smith, McClary Manufacturing Co., London; Chas.

E. Stewart, Jas. Stewart Manufacturing Co., Woodstock, Ont.; H. P. Hubbard, E. C. Atkins & Co., Hamilton; L. W. Smith, Canadian Tap and Die Co., Galt; F. M. Tobin, secretary-treasurer, Woodstock.

Western Notes.

C. A. McNutt, Seaman, Sask., was in Winnipeg last week calling on the trade.

E. E. Dollar, Marquette, Man., was married recently to a Winnipeg young lady.

William Crawford, sales manager of the Sheet Metal Products Co., Winnipeg, is visiting Alberta points.

C. W. Gimly, Eyebrow, Sask., has sold out his business to W. L. Black, who was formerly station agent there.

J. L. Welshon, representing the Reading Hardware Co., Reading, Pa., called on the Winnipeg trade last week.

Geo. H. Mackley, representative of G. F. Stephens Paint Co., Winnipeg, at Regina, visited the head office last week.

J. H. Mackenzie, city traveler for the G. F. Stephens Paint Co., Winnipeg, left last week for Chicago on a business trip.

The Miller-Morse Hardware Co. sales convention ended last week, and the travelers are now back on their grounds.

Harris & McNaughton, Prelatt, Sask., are adding hardware to their stock. Mr. Harris was formerly in the implement business.

W. E. Melena, Verwood, Sask., is starting business at Ravenscrag, Sask. He is a young man, and a new one at the hardware.

W. T. Cox, Winnipeg representative of A. C. Leslie & Co., Ltd., Montreal, left last Monday on a month's business trip to the Coast.

Jas. E. Yates, Brandon, Man., returned lately from a trip to the East, where he went to see the latest things in heating and ventilating.

F. Morton Morse, of the Miller-Morse Hardware Co., Winnipeg, leaves for Europe about the 10th of this month, and will combine business with pleasure.

A. C. Leslie & Co., Ltd., whose Winnipeg branch has for some time been located in the Phoenix Building, has moved to 407 Nanton Building, corner of Main and Portage.

L. C. Stephens, of the G. F. Stephens Paint Co., Winnipeg, has returned from a trip to Calgary and Edmonton, and reports both cities doing big buisiness in paint line, especially the latter.

The Moose Jaw Hardware Co., Moose Jaw, and the Manville Hardware Co., Ltd., Prince Albert, have both put in complete stocks of sporting goods, including bicycles, baseball, tennis goods, etc.

The Imperial Oil Co. have been appointed exclusive selling agents for Canada for the Gilbert and Baker Mfg. Co., Springfield, Mass., who make gasoline and coal oil storage tanks, and self-measuring pumps.

The Miller-Morse Hardware Co. have been re-decorating their premises in Winnipeg. They have also installed electric time clocks for checking goods coming in and going out.

John M. Taylor, Traverse, Alta., has just placed his opening order for hardware. This town is located on the Suffield-Blackie line, and is a thickly populated district. Mr. Taylor is an experienced hardwareman who has lived there for years.

E. F. Clendenan, the Edmonton representative of Wood-Vallance,Ltd.,Winnipeg, was at headquarters for a few days last week. He says he is finding business fairly good. He reports a hard snow fall in northern Alberta recently, which helped the hardware business wonderfully. He also says the hog industry is helping business in Alberta.

In New Offices.

The Chamberlain Weather Strip Agency, who were burned out in the recent fire at the Scott Building, Winnipeg, have removed their office to 819 Somerset Building.

Moncrieff & Endress, Ltd., dealers in hardware specialties, who were burned out in the fire which consumed the Scott Building, Winnipeg, are now located on the main floor of the Galt Building, corner of Princess and Bannatyne.

Business Changes.

Montreal, Que.—Bacon Bros. (registered) have dissolved.

Taber, Alta. — The Taber Hardware Co. are advertising a selling-out sale.

Okotoks, Alta.—L. H. Allen has purchased the hardware business of Geo. Thompson.

Halkirk, Alta.—It is reported that the Halkirk Hardware Co. is discontinuing business here.

Conquest, Sask.—Mitchell Bros. have succeeded to the hardware business lately owned by the Pattison & Gunn Co.

Montreal, Que.—Bacon Bros., registered, wholesale hardware and commission agents, have changed style to F. Bacon & Co.

Ottawa, Ont.—Chas. Watt, hardware merchant, announces through a selling-out sale ad. that he is retiring from the retail hardware business.

Moose Jaw, Sask.—Edmond Worden, hardware merchant, has taken over the plumbing and heating business of the Scott Plumbing and Heating Co.

Davidson, Sask.—The Pioneer Hardware Co. have disposed of their business to Messrs. H. M. Curtis, J. H. Griggs and Stanley B. Feltis, three local men, who comprise the personnel of the new joint stock company which will be known as the Pioneer Hardware Co., Ltd.

New Firms.

Mazenod, Sask.—Winter & Sons have opened a hardware store.

The Pas, Man.—Moran & Girouard have opened a hardware store.

Domremy, Sask.—Scott & Saunderson have opened a hardware store.

Lamont, Alta.—Sanofsky Bros., hardware, have commenced business.

Fire Losses.

Chatham, Ont.—Canadian Wolverine Brass Co., plant, was destroyed by fire.

CLEAN-UP WEEK IN SHERBROOKE.

The Sherbrooke Record of Sherbrooke, Que., in April 14 issue, says:—

The first meeting of the council of the Board of Trade since the appointment of the new secretary, J. J. Fitzgerald, was held last night. Various subjects in connection with the work of the board was discussed, particular attention being given to the plans for "Clean-up Week." The Board of Trade will cooperate in every way possible with the city officials, and, while it will be the object of these to see that the law is enforced, the Board of Trade, through the secretary and the public health and civic improvement committees, will endeavor to urge the citizens to action through a spirit of civic pride. All public institutions and industrial concerns will be asked to give good example in being the first to take up the movement, and the city officials intend leading the way by cleaning all public places. The clergymen of the city will be asked to make a direct appeal from the pulpit. Educational slides will probably be shown at the moving picture theatres. Dr. Pariseau has offered to give lectures under the auspices of the board, and these will immediately be inaugurated. The secretary and the committees interested will use every effort to make a success of the week and make Sherbrooke a clean city.

Complete and definite plans preparatory to the formation of a housing association in Sherbrooke are under consideration, by aid of which every citizen may have an opportunity to make a start towards the owning of his own home.

The housing problem will be made the subject of a general meeting of the board at an early date, and it is hoped to have an address by some expert upon the subject, from some of the cities which have already dealt with the housing problem.

A new jewelry factory, an airship concern, and a company making wrenches, pipe cutters, vises, etc., are among the immediate industrial prospects.

Weekly Report on Market Conditions

Statements From Buying Centres on Prices and the Trend of Demand—Full Reports Dealing with Hardware, Metal and Stove Lines.

THE MARKETS AT A GLANCE.

Business with the hardware jobbers has tapered off slightly during the past week. In the metal markets business is still rather quiet and a number of price changes, mostly declines, have taken place. Buyers of metals are very cautious at the present time. Price changes are expected in certain sizes of iron pipe, and brass goods. Paint manufacturers report business as being very satisfactory. One firm has announced an advance in the price of ready-mixed paints. Price changes are reported in ammunition, lead pipe, copper, tin. Collections are fair.

MONTREAL.

MONTREAL, Apr. 15.—Business this week has been a little quieter than usual and there is not the same demand for spring lines that has been in existence for the past few weeks. Although the travelers are out on the road again just as thick as in previous years the same amount of business is not forthcoming. This is considered to be a very wise plan by most of the local dealers, as they would sooner see fewer orders and more money. Dealers throughout the country should be very cautious for a little time to come. By this we mean to infer that they should not buy any more than they can pay for at the terms by which they buy. At the present time there are a number of dealers all through the country who have a store full of stock and no money. Naturally when their paper comes due it cannot be met. Everyone should work to eliminate this feature. A man gets a far better price and is better thought of who does not ask for further accommodation. The real reason for such a request is due to the fact that the retailer is allowing credit anywhere from one month to nine. This fact alone makes it almost impossible for him to pay for his own stock at 30 days, unless, of course, he has a good fat bank account. If a wholesaler or manufacturer is asked to extend credit on a bill of goods sold at 30 days it just puts him in a hole too, as he has been depending upon the money. This feature is one of the real reasons why money is so tight to-day. Retailers should not buy more than they can pay for within the time they state when placing the order. If necessary, buy small and oftener, but try to meet the paper when it comes due. This is what we mean by saying "Be Cautious."

Collections are not what they should be. There are people asking the local firms for accommodation at present who have never been forced to do so before. The general impression is, though, that the worst is over, and conditions generally will improve from now on.

Ammunition.

There has been an increase in 22 cartridges and the new discounts are quoted herewith. This fact is due to the recent increase in the U.S. and as the makers claim that they have been selling at a loss in Canada they have increased their prices accordingly.

22 short black	50 %	off list
22 long black	"	" "
22 2 smokeless	"	" "
22 short smokeless ...	55 & 5	off list
22 long rifile, black ..	40 & 2½	" "
22 long rifle smokeless..	40 & 2½	" "

All other prices remain the same.

Lead and Lead Waste Pipe.

There has been an additional 2½% allowed off the list price, the discount now being 7½ per cent. The list price is 7½ cents and 9 cents per pound respectively for lead and lead waste pipe.

Wrought Iron Pipe.

Owing to the recent change in the tariff there will be new prices issued for pipe from 4½ to 10 inches. The duty was 15% until the new tariff went into effect, but is now 30%, an increase of 15%. The prices will be increased accordingly.

Screws.

Although there is a firm feeling in the market for screws this is not wondered at considering the prices now in existence. The market is quite steady at present figures.

Builders' Hardware.

There has been a better feeling in this market during the past week and the demand is improving slowly. Locally there are quite a number of houses under construction, and as they were started pretty early in the season the hardware demand is just beginning to be felt. Practically all the trade is from local buyers.

Metals.

The demand at present is quite small for all lines and the local houses are not anticipating anything much in the next few weeks. There have been no changes in any of the markets, with the exception of tin, which has declined one cent. since last week. All other markets remain unchanged.

Tin.

There has been a further reduction of one cent from last week and the price now in effect is 42½ to 43 cents. The demand is not more than seasonable, if that.

Spelter.

There is simply a fair demand in this market and the quotation of $6.00 to $6.25 is still given by local jobbers.

Lead.

There is no change in this market and the business passing is very small for this season of the year. The quotation of $5.25 to $5.50 given last week is still in effect.

Copper.

This market also is much the same as one week ago and the amount of business passing at the present time is very small. There has been no change in the quotation of $16.50 which was given last week.

Antimony.

The market remains weak and the price of $9.00 quoted for the past few weeks still remains under a very slow and small demand.

Iron.

The market for pig is much weaker than one week ago and although there has been no price changes the situation is anything but firm.

TORONTO.

Toronto, April 16.—Business with the hardware jobbers has tapered off slightly during the past few days, although trade since the first of the month has been good, almost as good as during the corresponding period of last year. Whether the balance of the month will show up equally as well remains to be seen.

Metals.

There appears to be a downward trend in the metal market quotations. The prices of metals have declined severely

in the primary markets, and as a result of this, buyers are in a cautious mood. The volume of business passing at present is not large, although conditions are improving gradually. Tin has declined ¼ cent per pound. Lead is unchanged and in good demand. Pig iron and spelter have shown no change since last week.

Copper Situation.

Copper has declined at Toronto, the latest decline amounting to 25 cents per 100 lbs. Business is rather quiet, and buyers are cautious. Commenting on the copper situation, the American Metal Market, under date of April 14, stated as follows:—

The copper market received a blow to-day from London, the quarter that has been responsible for the advance of the past two weeks. Standard in London declined to-day £1 8s 9d to £64 5s, or back to where it was March 20th, at which time the price for Electrolytic was 14⅜. The sales were large, amounting to 500 tons spot and 1,900 tons futures. The explanation seems to be that Europe is impressed by the unsatisfactory reports regarding trade conditions in America that have accumulated over the holidays, and are not prepared in absence of a revival in copper consumption to buy heavily as they have lately been doing. The change in sentiment there, as shown by to-day's decline, will test whether our large exports were really needed abroad, or whether they were more or less speculative, and made in anticipation of higher prices. Usually the foreign buyers are very clever in foreseeing an improvement, and protecting themselves in advance, and their heavy purchases were believed by many to have this foundation.

The following prices are now being quoted at Toronto:—Tin, 39c to 41c lb.; lead, $4.85 to $5 per 100 lbs.; copper, 15½c to 16½c lb.; antimony, 8¾c to 9c lb.; zinc, 5½c to 6c lb.; ingot brass, red, 13c to 15c lb.; ingot brass, yellow, 11½c to 14c lb.; half-and-half solder, 24c to 26c lb.; pattern aluminum, 23c to 24c lb.; ingot aluminum, 19c to 20c lb.; acme solder, 19½c lb.; easy wiping solder, 20½c lb.; star extra, 22¼c lb.; wire solder, 27c.; tinkers' bar solder, 28c lb.; lead wool, 8c lb.

Wire Nails.

Toronto dealers are still quoting $2.10 base on wire nails. The demand at present is fair.

Builders' Hardware.

There is an improvement in the demand for builders' hardware, and a fair amount of building is under way. Price-cutting is still going on in cheap inside lock sets. Mortise sets, with one-piece knobs, are quoted at $3.75 per dozen sets.

Rope, Twine, etc.

The rope trade is showing improvement, although the volume of business passing is not yet as large as desired. Toronto quotations are as follows:—

Best Pure Manila	15c lb. base.
British Manila	11c lb. base.
African Hemp	11c lb. base.
Sisal Rope	10½c base.
Lath Yarn Single	9¾c lb.
Lath Yarn Double	10¼c lb.

Other lines are shown in current market quotations.

Binder twine prices are:—650 ft. twine, 13½c lb.; 600-ft. twine, 11c lb.; 550-ft. twine, 9¾c lb.; 500-ft. twine, 9¼c lb.; ⅛c per lb. allowance on 5 tons and over; ¼c lb. allowance on 10 tons and over; delivery allowed on 300 lbs. and over.

Building Trades.

A very fair amount of building is now under way in various sections of the province, and the demand for building materials is growing. Cement and cement workers' tools are in very fair demand. Quotations remain as follows:—

Portland cement, $1.55 per barrel, f.o.b. cars; $1.63 per barrel in car lots delivered. Less than car lots, $1.85 per barrel delivered.

Fruit Jar Rings.

Rubber rings are offered at 35 cents per gross for pint size and 40 cents per gross for quart size.

The Stove Trade.

The demand for gas ranges, oil and gasoline cook stoves, etc., is becoming more pronounced. Business in other lines of stoves is rather quiet at present.

Enamelware and tinware are in fair demand.

WINNIPEG.

WINNIPEG, April 14.—There has been a let-up in business all round to a small degree, which is only natural after the splendid demand for the past four or five weeks. Business in spring lines of hardware has been very brisk. The paint business has been good, too, and the fact that sorting business is up to the average is mainly due to vigorous clean-up paint-up campaigns being waged throughout the Western provinces. There are many lines that are not showing up so well, principal among which are stoves and ranges. The stove business is admittedly quiet throughout the West. The average hardwareman in the country had a bad season last year, and carried over a lot of stock. Consequently, with the present money conditions, he is not buying much, and what he is buying is chosen from the cheaper lines. Business in stove repairs has not dropped off at all while it has in other stove lines. The demand for electric stoves is growing better. Gas ranges are moving slowly. Practically the only market in the West is around Winnipeg, where they have gas.

While the total amount of building permits issued in Winnipeg up to date exceed three million dollars and are considerably away ahead of last year, the feeling is held in many quarters that only a percentage of these will go ahead this year. Dealers in plumbing and steam-fitting supplies are inclined to be a little pessimistic, and are somewhat annoyed at the publicity being given by the local press to the amount of building permits being issued. On the other hand, there are many who believe that 1914 will be a good year for building, and that the demand for builders' hardware will be good.

One thing that is affecting business somewhat is the backwardness of the season, the warm weather being two weeks behind that of last year. Collections compare favorably with those of last year. While it is lower in dollars, in percentage of outstanding accounts collections are ahead of last year.

There is likely to be a reduction in the price of bar iron shortly, in order to meet American competition from Chicago, and from Cleveland, as soon as navigation opens. The changes in tariff made at Ottawa last week will affect the price of a number of lines. One of which local jobbers have been advised is in coil chain, the price of which will be advanced shortly owing to the duty placed on wire rods.

The sale this year of horse-clipping machines has been unprecedented. Many of the jobbers sold their stock out completely, and were compelled to re-stock. Another line that has sold well this year is bluestone, the season for which has been an extended one. Stocks are mostly cleaned out, whereas stocks are usually held over. The demand for rope is fair. Washing machines have sold unusually well. A noticeable increase in business is noticed in high class machines, particularly gasoline and electrically operated washers. Those driven by gasoline go to the farm, and electric machines sell in the cities. Most farmers are to-day installing labor-saving household devices, such as churns, washing machines, etc.

Sporting Goods.

Business in baseball, tennis goods, and fishing tackle has begun with the arrival of spring, and in this, too, the season is somewhat delayed. Small bore metallic ammunition and small bore rifles are selling freely to farmers for gopher shooting. Winnipeg jobbers have been notified of an advance in both American and Canadian .22 ammunition, and local firms will meet during the week to fix their new prices.

Paints.

Sorting business in all lines of paints is reported to be good. Dealers are beginning to feel the effect of the clean-up paint-up campaigns all over the country, and the wide distribution of advertising matter is having a good effect on the output. The demand for Paris green has not yet commenced, and dealers will have to wait until the potato season creates a demand towards July. Small assorted glass is having a fair sale, but this is not a glass season.

Oils.

The market on oils and gasoline in Winnipeg is governed very much by Eastern prices. The general tendency is for a decline in prices of refined oil and gasoline. Several reductions have taken place in all points in Western Canada. The latest reduction took place to-day, and there was one last week. Gasoline is selling 5c a gallon cheaper in Winnipeg to-day than it was a year ago. To-day it is 22c a gal., whereas a year ago it was 27c. The reduction to-day was a cent a gallon on both gasoline and coal oil. Lubricating oils remain about the same.

An advance of three cents is announced on linseed oil. Raw oil is quoted at 68c a gal. and boiled oil at 71c. There are two firms making this oil in Winnipeg, using Western flax seed, and the market is regulated by the flax seed market. It is understood that the demand is increasing, the supply of flax seed decreasing. The price should remain up until the new crop next fall.

INSIDE HISTORY OF A HARDWARE BUSINESS.

(Continued from page 49.)

By Saturday night we had rearranged the stock and felt tolerably well satisfied with the result. The store was a wide one and gave us plenty of room for arranging goods to advantage.

All goods which were to be offered for sale had been arranged on tables in the centre of the store. I had the tables divided into sections and goods of the same price were placed in one section with a large ticket giving the price. This idea is now as old as the hills in places where agressive merchandising principles are followed, but I found that it was a distinctly new idea in A——— at that time. People made their first real acquaintance with that gingery salesman, Mr. Show Card, during the two weeks of my opening sale; and they seemed to take to him at once. Other merchants scoffed at me as a combination of quack and rogue. They were a conservative lot, the merchants of A———.

However, I am anticipating somewhat. Billy and I put in about ten hours on the painting contract and we did a pretty good job. We hardly knew the old store on Monday morning when the store was thrown open for the grand rush.

Our Advertising Campaign.

In the meantime I had been carrying out a rather elaborate advertising scheme. I had prefered a three-column display ad. for the evening papers and Saturday evening found this preliminary "Splash" in all the homes of A———. That same afternoon the mails contained some six hundred circulars that I had sent out, announcing my advent into the hardware field, inviting custom and making mention of my Monday opening sale. Most of these circular letters were addressed to the heads of the house, but about two hundred were sent to a selected list of housewives. This again was an innovation. I don't suppose that up to that time, the idea had entered the head of any woman that a hardware store could possibly prove a place of interest to her. I will vouch for it at any rate that the idea had not entered the heads of either of the other hardwaremen.

Included in the goods which I had bought from my old house were many lines of household goods which I knew would appeal to the feminine part of the population. I was counting on those lines very largely to help me in tripling the turnover of the store—which I deemed to be necessary if I were to make a success of my venture.

Here was the situation I found myself in when I opened up store that memorable Monday morning: I had about fifty dollars in the bank. During the succeeding four weeks it would be necessary for me to make payments amounting to nearly $4,000. The store had a reputation for carelessness and indifference in service and for poor selection of stock. The public would not come to me unless I corrected that opinion in record time.

I opened the store at 8 o'clock. At 9.15 not a person had entered the place. I walked to the front door and looked up and down the street. One man was in sight.

(To be continued in next issue).

REMARKS OF THE JUNIOR CLERK.

The man who borrows trouble generally gives his peace of mind as security.

* * *

The setting hen may be a loafer, but she delivers the goods.

* * *

Don't place too much faith in the early bird; he may have been up all night.

Twenty Years Ago
In the Hardware Trade

The following items were taken from the issue of Hardware and Metal of April 28, 1894:—

H. Walter Dorken, proprietor of the firm of E. Heuser & Co., is making preparations to amalgamate his business with that of his brother, J. Dorken, Montreal, who represents several large foreign manufacturers. A younger brother, now on the way from Germany, will also enter the new firm. The style of the new firm will be Dorken Bros. & Co., and will commence July 1, 1894.

Editor's Note.—Dorken Bros. & Co., are still located at Montreal. During the past twenty years the firm has worked up a large connection in Canada.

* * *

Cyrus A. Birge, Hamilton, general manager Canada Screw Co., Hamilton, visited the Toronto branch last week.

Editor's Note.—Mr. Birge is associated with the Steel Co. of Canada, with which firm the Canada Screw Co. amalgamated.

FLY PREVENTIVE SEASON.

(Continued from page 40.)

possible means to prevent the multiplication of the fly. Point out to prospective customers the fact that one fly killed at the beginning of the season means several million less later on. Also point out the danger from flies gaining admission to the home. The public today realizes more than ever before, the danger from the fly pest, but much more missionary work is necessary. Hardwaremen should help in the missionary work by advocating the use of screen doors and windows, meat and dish covers, sanitary garbage cans, milk containers, refrigerators, fly traps, fly swatters, screen wire, fly destroyers, etc.

Inform your customers of the coming danger, making use of the figures and data here shown, to point out how flies multiply, and the dangers which accompany them. During the next few months, especially, when the "Clean Up and Paint Up" movement is in full swing, the demand for doors, windows, etc., should be greatly stimulated. Do your share, Mr. Hardwareman, in getting the public interested, and your sales will increase accordingly.

Easier and Quicker Sales

Everything in Nature follows the line of least resistance. The brook, with its many curves and turns, winds its way according to this law of Nature.

Martin-Senour 100% Pure Paint is the line of least resistance in paint selling—and after the first sale, the satisfaction received makes future sales a matter of order-taking.

Purity is the standard when buying White Lead, Zinc Oxide, Linseed Oil, or Turpentine, and purity is the standard of the great majority of people when buying paint.

It is easier—quicker—more profitable to sell 100% Pure Paint to pre-convinced buyers than to argue half an hour about the efficiency of a paint that is not 100% Pure.

PAINTS & VARNISHES

MONTREAL CHICAGO WINNIPEG LINCOLN
TORONTO HALIFAX

The Seal of Approval

For over half a century dealers who handle the best have been selling Berry Brothers' architectural finishes. With various ends in view—lasting service, greatest beauty, the customer's approval, or the certainty of satisfaction—they choose Berry Brothers' varnishes.

Our records show that Berry Brothers' Varnishes have been used in many of the finest buildings of the country. City "skyscrapers," government and municipal buildings, the most pretentious clubs and residences as well as small buildings and modest homes of all sorts—have been beautified and made more attractive and lasting by the use of Berry Brothers' finishes. Among the best known are these varnishes:

Liquid Granite—a floor varnish whose name suggests its wonderful durability.
Luxeberry White Enamel—For white interior finishing. A white enamel that stays white.
Luxeberry Spar—(It's Waterproof)—for marine uses and for all kinds of outdoor finishing exposed to the weather. Will not turn white, crack nor check.

To specify Berry Brothers' Varnishes is to insure absolute satisfaction to your customers.

Weekly Market Report---Paints

MONTREAL.

MONTREAL, Apr. 15.—Business keeps up steadily in this department and the local men claim that there has not been any let-up with them for some time past. The idea of the "clean up, paint up" movement has created quite a lot of interest throughout the country and all the manufacturers as well as the daily papers and civic officials here are co-operating in order that there will be no hitch in the proceedings. It means a cleaner and better city all through and every dealer throughout the country should do his utmost to increase the already rapidly growing feeling of interest which has been awakened. There are quite a number of orders being held for shipment on the opening of navigation and there will naturally be quite a movement in paint circles in a couple of weeks' time. The weather is becoming more and more like spring and although up to the present it has not helped the demand at all. in fact it has hindered it, there should be a steady business carried on from now on.

Collections are far from being satisfactory.

White Lead.

There is still the same consistent demand in evidence with the same prices ruling, as follows: Ton lots are quoted at $8.05, while less than one ton lots are quoted at $8.25, with open prices for quantity lots.

Linseed Oil.

The demand is steady and the market seems to be firm at the present figures. Practically all the local men are quoting the following figures. Last week. it will be remembered, they were split in their quotations. The business passing at present is considered to be seasonable.

Raw Linseed—

1 to 4 barrels	62c per gal.
5 to 9 barrels	61c per gal.
10 to 25 barrels	60c per gal.

Boiled Oil—

1 to 4 barrels	65c per gal.
5 to 9 barrels	64c per gal.
10 to 25 barrels	63c per gal.

With open prices for carload lots.

Prepared Paints.

There is quite a lot of paint going forward at the present time but the amount being held for shipment at the opening of navigation breaks all previous records. There is the same firm feeling in this market and business is as good as it ever was.

Glass and Putty.

Glass is starting to move a little, but the real movement has not started yet and will not for another three or four weeks. This market seldom gets very busy until the first of August, when business is at its best.

Putty is governed pretty much by the demand for glass and as this is quiet at the present time there is no change in the condition of this market. The same prices rule.

Turpentine.

One of the local dealers reports to-day that they are all out of "turps" and will not have any for at least ten days. This is indicative as to the firmness of the market. There is still a very good demand and prices rule the same as one week ago.

5 gallons	72½
Half-barrels	70½
1 barrel	67½
2-4 barrels	66½
5-10	62½

Gasoline.

Contrary to the general run of the market at this season of the year there is more or less of a weakness in the market. The amount of gasoline being sold and that being held for shipment is not quite up to the average, although heavy. Usually at this time of the year we see bigger prices, but last week we reported a decline instead. It is not thought that there will be much change in these figures until the opening of navigation at least.

Barrels, in wood	23½c gallon
In steel and drums	20c "
Tank wagon (100 gals.)	19½c "

INCREASE IN SELLING PRICES.

The Sherwin-Williams Co., of Canada, Ltd., Montreal, have sent out the following notice dated April 15:—

Owing to increased cost of linseed oil and other important raw materials we find it necessary to make the following increase in our selling prices, taking effect from this date until further notice of change:—

Sherwin-Williams Paint Prepared (SWP)—All colors, with the exception of whites, advanced .10 per gal.

SWP Gloss White & China Gloss White—Advanced .5 per gal.

SWP Prepared Inside Varnish White—Advanced .10 per gal.

SWP Prepared Flat White—Advanced .10 per gal.

S-W Porch Floor Paint—All colors advanced .10 per gal.

TORONTO.

TORONTO, April 18. — Paint is moving freely and spring business is gradually opening up. By the end of the month paint business, as far as the retailers are concerned, should be in full swing. Large numbers of attractive paint window displays are in evidence in all parts of Ontario. The "Clean Up and Paint Up" campaign is creating a great deal of interest and promises to be one of the greatest boosters for the paint business ever attempted in Canada. Manufacturers, retailers and newspapers are taking a lively interest in the movement.

Advances in Paint Quotations.

Firmness has been exhibited in ready mixed paint quotations and a notice re an advance in price from one paint manufacturer appears in the accompanying panel.

White Lead.

White lead quotations remain unchanged and the ruling quotations in Toronto at present are:

Less than ton lots	$8.40 per 100 lbs.
Ton lots	8.20 per 100 lbs.

For larger quantities prices are open.

Linseed Oil.

Reports of price cutting in linseed oil have been quite frequent in Toronto during the past week. It appears as though some firms who bought heavily when oil was very low are now trying to unload some of their stock at lower quotations than those generally quoted. The ruling quotations in Toronto at present are:

Raw Linseed Oil—

Single barrels	65c gallon.
3 to 5 barrels	63c gallon.
6 to 9 barrels	61c gallon.

Boiled Linseed Oil—

Single barrels	68c gallon.
3 to 5 barrels	66c gallon.
6 to 9 barrels	64c gallon.

Oil in less than barrel lots, 7 cents per gallon. Cans are charged at: 5 gal. cans, 50 cents each; 10 gal., 75c. each.

Turpentine.

Turpentine is in fair demand at last week's quotations, which are as follows:

Single barrels	69c Imp. Gal.
2 to 4 barrels	68c Imp. Gal.
5 gallon lots	76c Imp. Gal.

The Painters' Mainstay

is good paint, that he knows is dependable and right. It lessens his labor, eliminates risk, adds to his reputation for good work and makes it easy to please his patrons.

B-H "ENGLISH" PAINT

exactly meets the requirements of the practical painter, and in looks and service completely satisfies the property owner.

The paint that pleases everybody must be the most profitable paint for the dealer to handle in the long run. When you sell a can of B-H "English," the first sale is never the last; it is the foundation upon which you build up a steady and growing trade.

When you take the agency for B-H products, your interests are ours and we aid you most effectively in developing trade. You are furnished many selling helps and assisted directly in following up paint users, while our Publicity Campaign creates a general demand.

Our proposition is a profitable one to every dealer. Write us for details, and learn what we have to offer.

BRANDRAM-HENDERSON LIMITED

Montreal Halifax St. John Toronto Winnipeg

Current Hardware and Metal Quotations

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figure being for large quantities and prompt pay. Large buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate. Retailers desiring to get in touch with firms selling any articles on which quotations are made can do so by writing the editor.

Owning and Operating P. D. Dods & Co., Limited

Make New Friends— Keep The Old!

Doing things "twice over" is the biggest profit-cutter of all. Selling paints that take a lot of time in the selling and a lot of excusing after they're sold is a mighty poor return for your time even though there seemed to be a bigger-than-usual profit in the transaction.

Sell Lowe Bros.' "High Standard" Paints—they're the once-sold-always-sold kind. They last, and their friends last. They're the paints the people want. Fine and even in texture, lustrous, long wearing, true to color, full weight—and linked with an advertising proposition that pulls like a six-cylinder Packard. Fifty years' experience in high-grade paint making in every can.

To-day is the day to write us.

An Open Letter To Our Merchants

Dear Sirs:—House-cleaning time is here again and your customers will be coming in crowds for Muresco. How is your stock? Look it up now and mail your order at once.

We built a large addition to our plant last year, but owing to the enormous increase in the demand for Muresco, we are building another addition this year. We would therefore urge you to send your order now and not wait for our salesman.

Write for beautiful designs and new color card.

BENJAMIN MOORE & CO., LIMITED, WEST TORONTO

Sole Manufacturers of Muresco, the best wall finish

Do you sell it?

Are you in line for big paint profits in 1914? Have you made sure of a prosperous paint year by stocking

"SILKSTONE"

(COPYRIGHT)

the smooth as silk—hard as stone, flat wall color.

It means profit and good-will to you, to be a Silkstone Dealer.

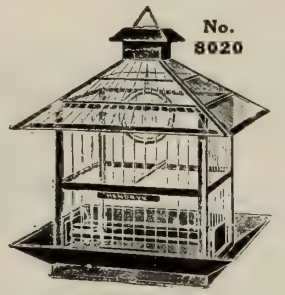
Ask us about it now.

G. F. STEPHENS & CO., Limited

WINNIPEG, CANADA **Branch at Calgary, Alta.**

The Only "HENDRYX" Mission Cages

A WORD FOR QUALITY

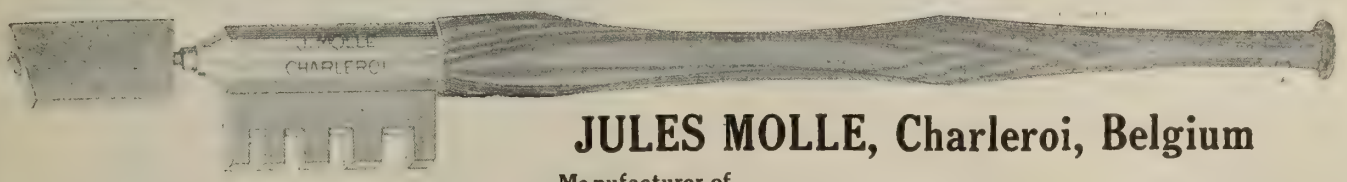


Made of solid brass throughout and done in dull finish, polished brass or antique copper, with sliding draw base and porcelain cups.

No. 8000

Patented Sept. 29th, 1908

No. 8020



The new style mission cage has an open wire roof, and the brass bands narrower.

The cups are set in opposite corners and protected by a sliding guard.

The cage can be furnished with a guard either of brass wire or of glass.

The Big Brighten Up Campaign is On

The S-W Agent in each town is the man who hands out the Brighten Up Club Buttons and the optimistic creed of the Brighten Up Club.

His store is bound to be the popular store of the town. Enterprise wins public recognition, and the S-W Agent who promotes the "Clean Up and Brighten Up Week" will gain much goodwill. So get busy, S-W Agents, don't let the other fellow get in ahead of you. You have got the best opportunity—You have got the best and most complete stock of Paint in town, the S-W Line. The Sherwin-Williams Co. are behind you ready to give an extra push when you're headed in the right direction.

Here is the first thing to do. If your storefront needs paint, paint it. Use SWP. Brighten Up your entire store, yard, and stock. Clean Up and Brighten Up your property, and then you are ready to tell the other fellow he ought to do it too. Read the articles Hardware and Metal are publishing regarding the Brighten Up Campaign. Read over the last SWP again. Go into this Brighten Up Campaign with enthusiasm and you will take more pride in your town, in yourself and in your store, and make more profits from your business.

SHERWIN-WILLIAMS PAINTS & VARNISHES

A FINISH FOR EVERY PURPOSE

For a Quarter of a Century

Calcimo has been the Standard by which all other Wall Coatings have been judged.

Write Us!

Our Dealers' Proposition will more than interest you. It means bigger sales, bigger profits, better prestige.

Our Advertising Service

Is yours for the asking. We co-operate with you at every turn to earn a larger margin of profit.

Be A Wise Dealer

And anticipate the benefits to be derived from handling Calcimo. The demand has been created — You have but to supply it.

Push Calcimo Wall Coating

And increase your profits. The painter uses it and so does the householder. It is so easily applied and the possible pleasing effects are unsurpassable. The energetic dealer in your town will make money on this line. Will it be you?

Write for detailed information.

More Customers Will Enter Your Store

If your window is inviting.
Now we can't give you the display inside the window, but we **can** give you the store front display outside.
In our EASY-SET Store Front System, we believe we have perfected the most inviting and attractive kind of store front being manufactured to-day.
We build these EASY-SET Store Fronts in brass, burnished copper and combinations of brass and copper, with leaded and plate-glass.
The price of the front is low and will return interest upon the investment immediately.
Write for full particulars now. We'll send and give you an estimate without any obligation whatever upon your part.

Sandusky Power or Electric Washer

Here is a thoroughly practical Washer, one that will do a family washing right at home, under sanitary conditions and save from $1.00 to $3.00 each week, enough to pay for it in a short time.

Every Dealer who has stocked it has found it exactly as represented—first-class in every respect and a splendid seller.

Every woman is captivated by the way it starts automatically and by the perfect condition of the clothes and their snow-white cleanness after washing. You will find it

A Trade-Bringer

worth handling, because every woman who gets one recommends it and sends more customers to you.

One big selling point which takes with prospective buyers is the novel wringer device. It permits wringer to be started, stopped, reversed or swung to any position. And while the washing is going on, the wringer will wring from the rinse water to the bluing and from the bluing right into the basket. The construction of the entire Washer is the best possible.

Space won't permit full details, but if you'll write we send them and tell you about our Guarantee Certificate plan which helps you make quick sales. Our proposition is worth sending for. Don't neglect it.

Sell Your Customers The MAXWELL "Puritan" Motor Washer!

A PERFECT and complete self-washer which runs by water power from the ordinary pressure obtained from the faucet. Requires no attention and does the work in a fraction of time required by any other method. Simple and easy to operate. No delicate parts to break or get out of order.

MAXWELL'S "PURITAN"

Motor is of the reciprocating type—the most reliable and satisfactory of all styles of water motors. Valves built to resist action of grit or sand. Write to-day for Catalogue.

MAXWELLS LTD. - St. Mary's, Ont.

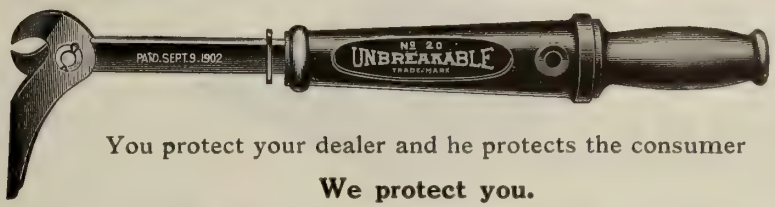
Dealers—Handle this Fence

YOUR success in the sale of fencing does not depend so much on your sales ability as on the fencing you sell. It's fence service—not price—that brings you customers. Ours is a fence of service—a fence of repeat orders. We have letters from dealers all over the Dominion substantiating these statements.

Peerless Ornamental Fencing

not only protects, but beautifies property as well. Every stay is made of strong, stiff wire that will not sag. Our fencing is made from galvanized wire and in addition, is given a coating of zinc enamel paint, thus forming the best possible insurance against rust. Peerless fence is easy to erect and will hold its shape for years to come. We also build a full line of ornamental gates.

Send for Dealers' Proposition



Get our literature showing many beautiful designs for lawns, parks, cemeteries, etc. Also ask about our farm fencing and gates.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

The Long Green
Lasting

Has the strength, the body and the consistency that are essential to re-orders

There are paints and paints — but "Bronzite" is the green that is different—it lasts, it wears and holds its color.

We make a specialty of our green — give it nearly all our time and attention — been experimenting, testing, proving and bettering it for ten years and more.

A test of this paint under actual working conditions is all that is needed to prove its exceptional merits.

Write for color cards and particulars.

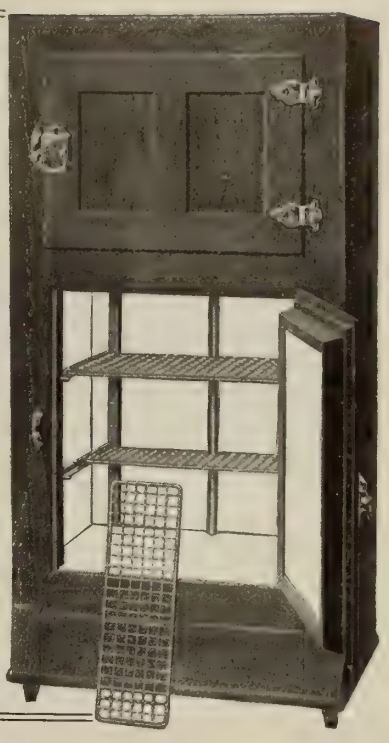
Used on all work where a green paint is needed.

Colonial Works Inc.
225-237 Norman Ave.,
BROOKLYN, N.Y.

Sanderson-Harold Refrigerators

make ice go further and prolong satisfaction BECAUSE

They are insulated with MINERAL WOOL, **the best known non-conductor of heat or cold.** Mineral wool does not decay or cause odors.



Materials are the best obtainable. Lumber is seasoned in our own yards, where we carry over a year's stock of Ash, Oak and other hardwoods. All are thoroughly kiln dried before cut up.

There is perfect circulation of **pure, dry air** at all times.

Design and finish are exceedingly attractive. **We guarantee** to remit purchase price and take back the refrigerator if not **exactly** as represented by us.

SEPARATE SEALED TENDERS addressed to the undersigned will be received at this office until 4.00 P.M., on Monday, April 27, 1914, for the supply of "Brooms and Brushes," "Chain," "Hardware," "Hose," "Oils and Greases," "Packing," "Paint, Paint Oils, etc.," "Manilla Rope," "Wire Rope," and "Steam Pipe, Valves and Fittings," for the departmental dredging plant in Ontario and Quebec.

Each tender must be sent in a separate envelope and endorsed "Tender for Hardware, Ontario and Quebec," "Tender for Chain, Ontario and Quebec," etc., as the case may be.

Tenders will not be considered unless made upon forms furnished by the Department and in accordance with conditions contained therein.

Combined specification and form of tender can be obtained at this Department and at the offices of A. E. Dubuc, Esq., District Engineer, Montreal, Quebec; J. E. Sing, Esq., District Engineer, Toronto, Ont.

Each tender must be accompanied by an accepted cheque on a chartered bank, payable to the order of the Honorable the Minister of Public Works, for the amount mentioned in the tender.

By order,

R. C. DESROCHERS,
Secretary.

Department of Public Works,
—55673. Ottawa, April 6, 1914

DOMESTIC ELECTRICAL WORK, BY WILliam A. Wittbecker. Concise and Practical Explanation for Plumbers and Hardware Dealers, on How to Wire Buildings for Bells, Alarms, Annunciators, and for Gas Lighting From Batteries. The information given is practical, and with a close observance of the directions laid down, any one, though entirely ignorant of electricity, should be able to do the work described. Illustrated with 22 diagrams. Price, in paper, 25c post paid. Price, in cloth, 50c. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE WINDOW DRESSING—THIS is the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE STORE BUSINESS METHODS —The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business, Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10 postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

THE "WANT AD."

The "want ad." has grown from a little used force in business life into one of the great necessities of the present day.

Business men nowadays turn to the "want ad." as a matter of course for a hundred small services.

The "want ad." gets work for workers and workers for work.

It gets clerks for employers and finds employers for clerks. It brings together buyer and seller, and enables them to do business though they may be thousands of miles apart.

The "want ad." is the great force in the small affairs and incidents of daily life.

Keep in mind the dominant fact that mankind from its first appearance on the earth has been schooled by nature to look for signs; for invitations to taste; for suggestions as to what to wear. Tell your story briefly, forcibly, truthfully, and address it through the proper media and you can successfully apply advertising as a means to increased distribution.

Interested?

In Buying a Business
In Selling a Business
In Engaging a Clerk
In Securing a Position
In Buying a Typewriter
In Selling a Showcase
In Disposing of a Desk
In Selling Tinsmith's Tools
In Securing Shelf Boxes

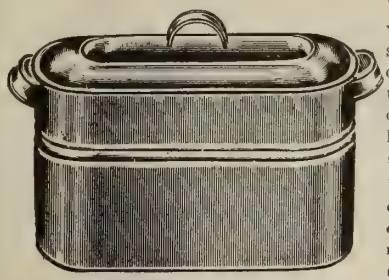
Then Use
A Hardware and Metal Want Ad.

It should find for you among the thousands of Canadian hardwaremen AT LEAST ONE individual who is vitally interested in your proposition.

HARDWARE AND METAL reaches the retailer, the wholesaler, the manufacturer the clerk and the traveller, the men to whom you wish to sell or from whom you would buy.

No Other Paper Reaches All These Men

RATES:



(PAYABLE IN ADVANCE)

Mercury could not have made collections better

despite the fact that he is supposed to have had winged feet, and to be able to travel with the greatest of speed.

No, not even Mercury could have got around with a collection book and collected more money than this silent, stationary McCASKEY ACCOUNT REGISTER.

And the reason that the McCaskey is such an efficient collector is because it appeals directly to your customer's sense of fair play —to this instinct to do the right thing. Because it shows him his account, steadily growing before his eyes; because it gently prompts him to pay it off before it gets too large.

These are a few of the reasons why Mercury could not have done any better, probably would not have done as well as the McCaskey does, in the collection business.

If you're having trouble with your collections; if profits are leaking mysteriously away—mark and mail the coupon NOW!

"THE PROOF OF THE PUDDING IS IN THE EATING."

No.1 Fire Pot
Price Each, $7.80 Net

A trial of the No. 1 Fire Pot will convince any mechanic that he can do his work easier and quicker, with a large saving of fuel expense, for the No. 1 Fire Pot is not an experiment. It has stood the test and is known everywhere as the greatest general utility Fire Pot on the American market.

A pot of lead can be melted or a pair of soldering coppers heated at the same time, if desired. The top section is removable, permitting an open fire—often a great convenience.

All leading jobbers will supply at factory price, or we will ship direct if cash accompanies the order.

Send for Catalog—it's free.

STEEL FOLDING SAW VISES

No Loops over top
With this vise, one shift only is made.
Length 14 ins.
Weight 2 lbs.

Length 28 inches.
Weight 4 lbs.
Patent Pending.
NO SHIFT.

Folded, 14 x 1 x 2 inches.
ALL-STEEL BUCKEYE.

Folded, 14¼ x 2 x 2 inches.

NO LOOPS OVER TOP
allowing the saw to be jointed and filed without changing the position of the vise.
With this vise a saw can be filed and jointed the full length WITHOUT SHIFTING, as it is 28 inches long. It folds up in a space of 14¼ x 2 x 2 inches, and takes up no more room in the tool chest than a hammer. Being made of steel it is very light for its size, weighing only 4 pounds. We manufacture the BUCKEYE PLANE; also the old style Saw Vises, Chain Drills, Hollow Augers, Spoke Pointers, Bench Vises, Emery Wheel Dressers, Plane Gauges, Cabinet Scrapers, Etc.

BUCKEYE SAW VISE CO.
2050 W. 55th Street, Cleveland, Ohio.

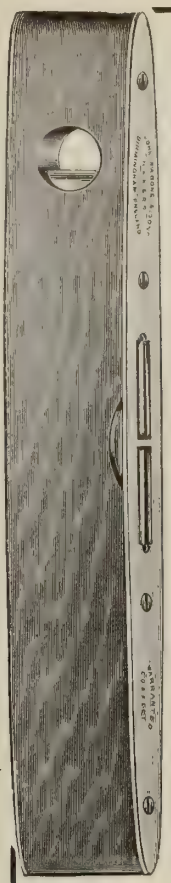
Every Horse Owner Buys at Sight



The Kling Hame Fastener holds the hames tight and uniform at all times. A child or woman can hitch up as easily as a strong man. Only takes a second to put on or take off, yet the horse can never open it or break it. Lasts longer than the harness. Costs the dealer $2.25 per doz. Any jobber. Write for circular.

Look for "Kling" on the lever.

The National Safety Snap Co., Inc., Dept. 33, Wilmington, O., U.S.A.

Sole manufacturers of the Klingsnap and Kling Hame Fastener.

D. C. Ross & Co., 56 Colborne Street, Toronto, Ont. Canadian Distributing Agents.

The most complete range of LEVELS

made by any firm is produced by John Rabone & Sons, who have been making Levels and Rules for 130 years in Birmingham, and possess the largest and most scientifically equipped factory existing for this purpose.

The Rabone Line includes

A Level for Every Mechanic

Every Mason, Builder, Engineer, or other user of a spirit level, if he examines the RABONE Catalogue, will find exactly the tool for his needs, made in the finest way from the best materials.

Every Dealer in Canada

will eventually stock Rabone Levels.

YOU BE AMONGST THE FIRST!

CHICAGO STEEL BENDING BRAKES

This Brake is the result of years of experience and a thorough knowledge of the requirements of Sheet Metal Workers.

Any information concerning the work turned out by these machines, their adaptability, etc., will gladly be given on request. **Work quickly and easily.**

The Steel Bending Brake Works Ltd., Chatham, Ont.

FACTS

We can perform more functions by our modern wire carrier system, and with a greater degree of dispatch and certainty than can be accomplished by any other of this type of machine, all of which means that we can reach more points in a store and do so in a better and more satisfactory manner than has been accomplished heretofore. Remember our ten days' trial. You are invited to put us to the test. Send for our new catalogue G.

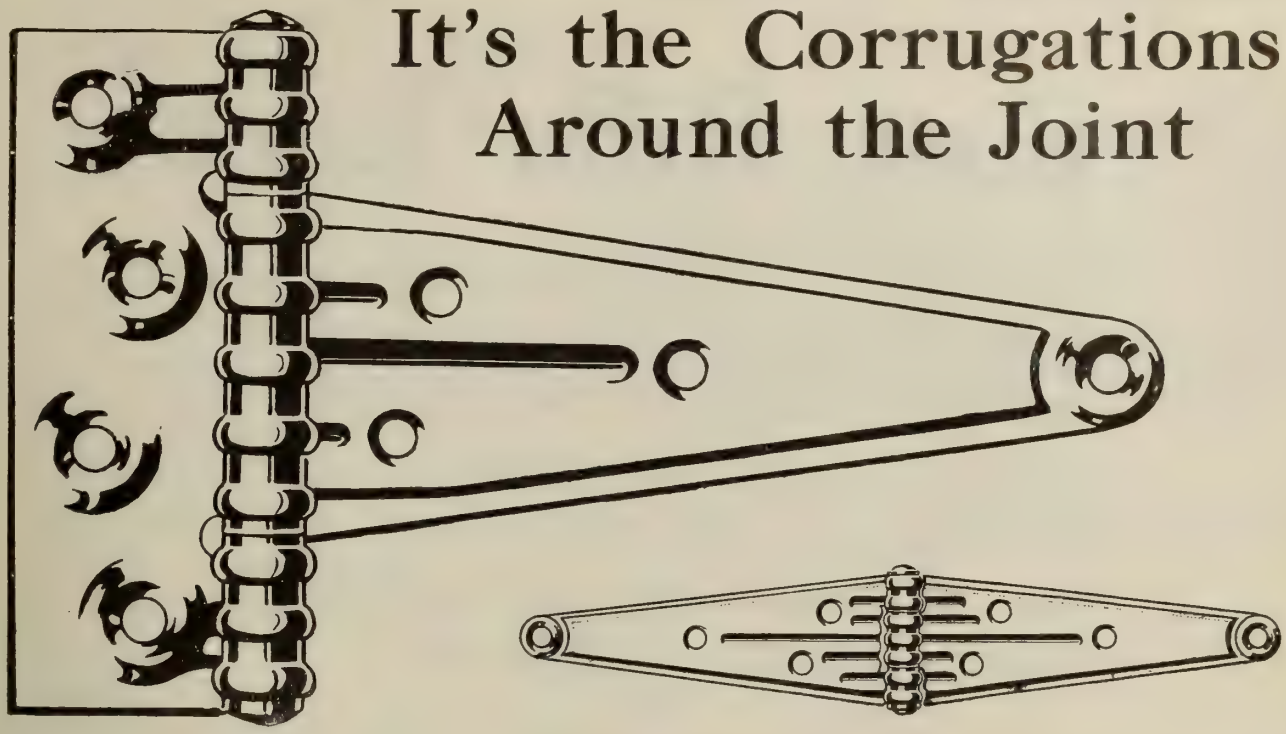
ARE YOU THE MAN AT THE HELM?

Are you running your ship of business along the shortest and safest course to the harbor of success? Or are you going a roundabout way, scratching and scraping along the rocks of loss and failure.

Get in the right course, be on the lookout for new thoughts, ideas, schemes, etc., and you will have a successful run.

STORE MANAGEMENT COMPLETE



is a guide that will show you how to get the maximum trade and profit out of your busines. This book is written by Frank Farrington (a companion book to "Retail Advertising Complete.") It tells all about the management of a store. The following is a synopsis of one of the chapters:

CHAPTER V.—THE STORE POLICY—What it should be to hold trade. The money-back plan. Taking back goods. Meeting cut rates. Selling remnants. Delivery goods. Substitution. Handling telephone calls. Courtesy. Rebating railroad fare. Courtesy to customers.

"Store Management—Complete" is bound in cloth, contains 272 pages, 16 full-page illustrations, and 13 chapters. $1.00 brings this book to you postpaid. Money refunded within 10 days if not satisfactory.

TECHNICAL BOOK DEPARTMENT
MacLean Publishing Co.
143-149 University Avenue **TORONTO**

It's the Corrugations Around the Joint

THAT MAKE

Stanley's Corrugated Hinges

so much stronger than the old style strap and T-Hinges.

Instead of binding on the pin and breaking soon after they become rusty, Stanley's Corrugated Hinges, because of their construction, never bind and consequently are not subjected to the uneven strains that even the toughest steel can not long withstand.

STRONGER, LIGHTER IN WEIGHT, NEATER IN APPEARANCE

it is not surprising that Stanley's Corrugated Hinges are becoming more and more popular every day.

In ordering specify **Stanley's**

No. 935 Corrugated Heavy Strap Hinge
No. 937 Corrugated Extra Heavy T-Hinge

Sizes, 4 to 12 inches.

Besides the plain steel, these hinges are also made in Japanned and Galvanized finishes, or Galvanized with Brass Pins.

Packed in barrels, **or one pair in a box with screws.**

Manufactured by
THE STANLEY WORKS
NEW BRITAIN, CONN.

TRADE S.W. MARK

Ross Rifle Luck

Users of "Ross" Rifles invariably comment on their good luck, because the power is such that judging of distance is scarcely necessary, so if game is **seen**, it can be **hit** and **bagged**. Dealers are wise to order early, as, despite increased facilities, it is difficult to keep up with orders.

REMINGTON

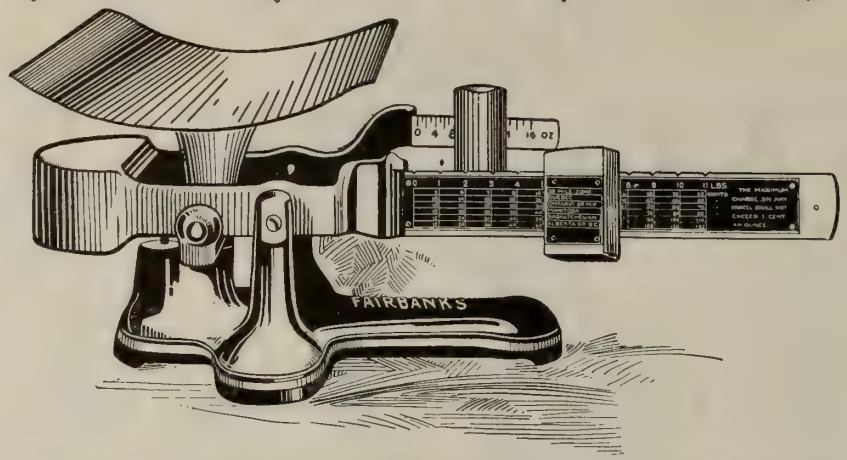
To Young Men About To Open New Stores:

Whether you start on the best business street in a city or on a country cross-roads, with big stock or little, with bank backing or no backing but your good name—

Remember this great success fact in merchandising: **Link Your Store with Standard Products in All Lines.**

If your father and grandfather were in the sporting goods business, they sold Remington-UMC arms and ammunition to customers who demanded the modern, dependable things of their times.

Since 1816—when James Madison was serving as fourth President of the United States—Remington arms have been winning increasing appreciation among sportsmen of this country and of the world. For half a century, Remington-UMC ammunition has shared this favor.



True, arms and ammunition may not bulk greatest in your sales totals, but more men **know** arms and ammunition than know almost any other hardware item.

Your judgment on arms and ammunition—if right—will lead many customers to take your word on all of their purchases at your store.

Tie to Remington-UMC arms and ammunition and you link up at the start with a century of experience and a century of progress.

Ask us to suggest a quick selling stock for YOUR locality

THE COLONIST BANNER

This is the latest addition in cast iron ranges to the "Banner Family." It fills a place as a new low-priced stove of fine appearance with all the appointments in keeping with the times, neat and attractive in design, constructed to give the best results.

Fire Box of good dimensions, fitted with a three-section corrugated cast lining.

Grates are of the duplex pattern.

Ash Pit is large and is fitted with large pan.

Flue Construction. The flues are large, thereby permitting easy operation. They are so arranged that the fire encircles the entire oven, distributing an even temperature of heat, thus making a perfect operating oven.

The Reservoir is large and roomy and is fitted with a tin-lined copper tank.

The bands and oven door shelf are removable.

NICHOLSON MADE FILES

You're Known By The Goods You Sell

Sell a man a file that fails to give good service — and you're digging a pit for yourself.

When you give your trade **NICHOLSON-MADE-FILES**—you give them files that you know are absolutely right. You know that each file has been inspected eight times—between every important operation. You know the finished file has been tested on tougher steel than it will ever be used on in actual service. So that when you sell a **NICHOLSON - MADE - FILE**, you're certain it's going to give the utmost of satisfactory service.

No "come-backs" to fight — no excuses to make. Nothing to do but "sell more files"— and take your liberal margin per sale.

The Finish, the Quality and the Distinctive Mechanical Features of

TAYLOR-FORBES LAWN MOWERS

result in ready sales and pleased customers

We are the only firm in Canada making a specialty of this line.

Our name on every machine represents highest quality and efficiency, and the guarantee is shown herewith.

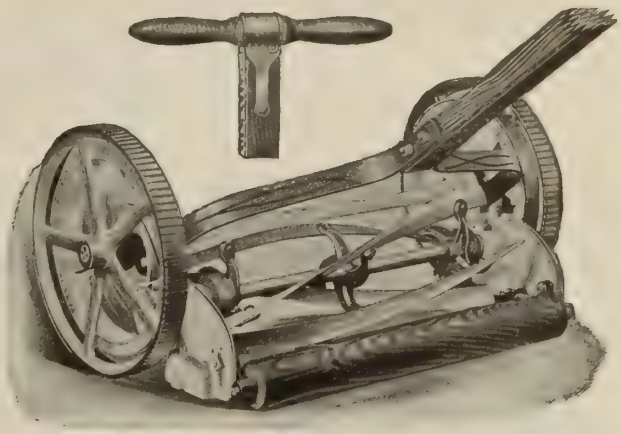
The excellent material and workmanship used on our mowers in former years is continued and will be continued as long as we make this line.

Our aim has always been to produce the most perfect lawn mowers on the market, and judging from our experience and the enormous demand we certainly have succeeded.

Our line includes: **Empress, Woodyatt, Star, Philadelphia, Adanac, Ontario, Mayflower and Daisy Mowers.**

THE LAWN MOWER SEASON IS PRACTICALLY HERE. IF YOU DELAY ORDERING YOU'LL LOSE SALES.

If your jobber cannot supply you—write us.



We'll send our 1914 catalog immediately upon receipt of your request.

DYED BURLAPS

Made in widths of 36, 54 and 72 inches only.
A Good Variety of Shades.

LENGTH OF ROLLS, ALL LINES, 30 and 60 Yards

How Our Burlaps Are Made

CANVAS: Every yard of the Jute Canvas used in the manufacture of our Burlaps is specially woven for us in Dundee, Scotland, from yarns of uniform counts and standard strength. After being woven the Canvas is super-calendered, stretched and made unshrinkable.

OIL: The only Oil used in our Burlaps is pure Linseed Oil, crushed from Western Canada seed of a high grade; further this Oil is made under our personal supervision, kettle boiled and tested on our own premises.

MACHINERY: We have taken advantage of every improvement in the way of modern machinery that has been brought to our attention and in addition we have the benefit of the experience of engineers who have been in our employ for more than a quarter of a century; the facilities of our immense plant for the manufacture of Oil Cloths and Linoleums are at our disposal for similar operations in the manufacture of Burlaps, and these additional features of machinery and special equipment utilized in our other departments and available for our Burlap manufacture place us in a unique position in this field, hence the cost of production is kept at the lowest possible point and purchasers of our lines get the benefit.

WORKMEN: The use of Burlaps as a wall covering is of comparatively recent origin, although we have been manufacturing this line for upwards of twelve years, but in our employ are scores of men who have been handling Jute Canvas, Oils, etc., for thirty years and more;—having the services of men with such long experience in this work gives us an unquestioned right to claim a unique position in the manufacture of Decorative Burlaps.

Handled by Leading Jobbers of Wall Papers, Paints, etc.

LUNDY
SHOVELS

It isn't just by chance,

that Lundy Shovels have become a standard wherever shovels are used in Canada.

No, Sir! There's more back of it than that—it's their many points of superiority that have earned for them their enviable place. For instance—

The strap and blade point are made of crucible steel, and are extra strong, thus ensuring long service and durability, from those parts that usually give out first.

This is only one "Lundy" advantage. To fully appreciate their value as business-getters, you must handle them.

They'll be found at your jobber's, most probably; but if he hasn't got them write to us direct.

SOLE AGENTS FOR CANADA

B. and S. H. Thompson & Co., Limited, Montreal

This is the first time the portrait of Sam Oven, Foreman, has ever appeared in print, but not the last.

"Nobody buys Gurney-Oxford Stoves because our plant is large—our plant is large because they buy Gurney-Oxford Stoves."

—SAM OVEN
Foreman

What's the size of the factory got to do with the quality of the goods?

Oh, not much, perhaps!

But what's the quality of the goods got to do with the size of the plant?

Oh, that's different!

There wasn't a stove made in Canada when the Gurney Foundry started some 70 odd years ago.

Canada was not a big industrial factor in those days.

There weren't many people, and they didn't have much money.

Anyway, the Gurneys started in "premises" that wouldn't hold a day's supplies for the present works.

The stoves they made were crude affairs, that is compared with to-day's models—but they were the best stoves of their time at that.

People bought them, and liked them.

So other people bought them.

More people came to Canada and found stoves better than they had left at home, in England, U.S.A., Germany, France, or wherever they came from.

The factory seemed to grow small as the demand grew larger. So more factory was built.

The factory made the stoves: the stoves made the factory, as it were. The stoves were both the cause and the effect.

If we sometimes say "the Gurney Foundry is the largest," it's the pride of achievement, not of possession.

Those who buy Gurney-Oxford stoves don't care about the size of the foundry.

But they do want fuel economy: ease of operation: cooking results: durability—that's why they buy Gurney-Oxford stoves, as their mothers did before them.

And the factory wouldn't have been the largest if the stoves didn't supply these features.

And the Gurney-Oxford was never such a good stove as it is to-day

—SAM OVEN, Foreman

GLASS DOOR

GUARANTEED

No. 750

BOSS Glass Door OVENS

Sold throughout the World. In almost every Country where Oil, Gasoline or Gas is used as fuel, you will find the Boss Oven on sale.

Its tremendous popularity is due to the fact that it is first of all a good and economical baker. We guarantee it to bake or roast satisfactorily on any good oil, gasoline or gas stove, or "money back" without argument.

The "BOSS" is made better than any other Oven. Only the best materials are used. The body is made of Mecca Lustre Polished Blue Steel. The linings of heavy Corrugated Tin Plate, having thick asbestos inner linings throughout.

Its Patented Glass Door, which we guarantee not to steam up or break from the heat, has been a universal success. More than 600,000 of this style are now in daily use.

Many patented and exclusive features are found in the Boss. The new Hinge and Door Support leave the door opening entirely free when Oven is open. No danger of burning the hands or arms by coming in contact with wires or chains.

Large variety of styles and sizes in Glass and Steel Doors are shown in our new catalogue, which will be sent on request. Write for it to-day.

Write to-day for Complete Catalog and prices.

NEW BOSS OIL STOVES

Every Vital Feature in the construction of an Oil Stove has been carefully worked out in the "New Boss." There is nothing complicated to get out of order—nothing hard to understand to operate it properly.

Simple but Substantial construction has been adhered to throughout. The extra wide top gives more room for cooking utensils. The legs are strong cast iron, making the stove very rigid.

Patented High Wick Limits or fingers are provided on the inner combustion tubes which are engaged by the wick when turned at full burning height. These fingers automatically trim the wick when chimney is revolved.

The Intense Blue Flame plays right against the cooking utensil, giving quicker results and using less oil than most other stoves.

AGENTS WANTED

There Isn't any Guess-Work in the Manufacture of Wilt Twist Drills

In the selection of the steel that goes into WILT TWIST DRILLE expert metallurgists from the most prominent steel mills in the world came to the Wilt factory.

They spent weeks of time in the testing of drills under actual operating conditions in order to determine exactly the proper hardness and drawing temperatures.

Hundreds of drills were used—thousands of holes were drilled. And as a result of it all a set of standards was established pj to which every WILT TWIST DRILL must measure before it can pass inspection.

This is probably the most elaborate series of tests ever undertaken by a drill manufacturer.

It is simply in line, however, with the WILT TWIST DRILL Company's determination to eliminate guess-work from its manufacturing processes.

We are not guessing when we tell you W I L T T W I S T DRILLS are right.

We KNOW they are right. WILT TWIST DRILLS are made by a new automatic process that completely machines the drill at a single chucking.

This insures absolute accuracy and uniformity—it insures the perfect contour of the grooves and ample, well-defined clearance. And—combined with the scientifically accurate hardening it enables us to offer you the most efficient and economical drills that have ever been produced.

Ask your supply man or write direct for literature.

Vol. XXVI. APRIL 25, 1914 No. 17

How the Campaign Has Taken Hold in One City

Hardware Merchants of London, Ont., Are Alive to the Possibilities of the "Clean-Up and Paint-Up Movement"—Ads. Which Appeared in One Issue of a London Daily Paper.

WHEN Hardware and Metal commenced to boost the "Clean Up and Paint Up" movement a few weeks ago, letters were sent to a large number of Canadian newspapers asking for their co-operation. Among the many replies received was one from the London Advertiser, London, Ont., stating that they were interested in the movement, and that they believed, "anything that will benefit a community is good business for a newspaper to take hold of." The Advertiser lost no time in featuring the movement and the result was that a great deal of local interest was immediately manifested by citizens and merchants.

The accompanying illustrations show the ads. of four London hardware firms. These ads. all appeared in one issue of the Advertiser, and show that the London hardware merchants are not slow to take advantage of a good thing. In the same issue one of the editorial notices urged the women of London to take part in the campaign. The editorial read as follows:

"Can women play any part in the spring 'Clean-up Day' of a city? Judging by New York, Minneapolis, Victoria and other cities where a clean-up day has been inaugurated, the answer is 'yes.'

"In Tifton, Mo., the members of the Twentieth Century Library Club have just completed Clean-up Week. The women conceived the idea and enlisted the sympathies of the mayor and council. Each member of the club was chairman of a committee whose duty it was to see that the block in which she lived was given a thorough cleaning. As a result of Clean-up Week, Tifton claims to be the cleanest and tidiest town in the southern states.

"Last year the Housewives' League of New York occupied a prominent part in the spring cleaning of the metropolis. During the campaign the league issued 25,000 circulars quoting from the sanitary code laws regarding cleanliness in

Westman's Hardware ad. occupied space 4½ x 7 inches.

stores, and a marked improvement in conditions resulted.

Johnnie and Tidiness.

"Mothers and women teachers can accomplish much in influencing children in tidy habits while on the street. Instead of throwing away the empty candy bag, or the wrapper off his scribbling book, persuade Johnnie that it would be much better to tuck the paper in his pocket until a waste box or basket could be reached. Life is so largely a matter of habit that probably after only a few "forgettings" on Johnnie's part, he will take it as a matter of course that waste paper should not be thrown on the pavements or lawn.

"One would like to see some of the women's clubs of London take to heart this matter of clean-up day. There are in the city any number of vacant lots, which by the end of summer are most unsightly with long grass, burrs and other weeds. In many instances, these spaces are not available for building lots for several years, because perhaps of legal tangles, lack of title deeds, etc. In the meantime why should they be allowed to remain so unsightly when each one might become a miniature park or beauty spot? One feels certain that the owner would in some cases be more than willing to have his property kept in order and beautified.

Beautify Vacant Lots.

"The Union Mothers' Clubs would be a fine organization to take hold of such a proposition. A trial might be made, at all events, on, say, two or three lots in different parts of the city. Two or three days' work on the part of a capable man would do much towards getting the lot into shape, and—let the children do the rest. Once enlist the sympathy of the neighborhood boys and girls in such a plan, and they will be eager to help. The beautifying need not be elaborate, but what an improvement to see a sward of green grass, a well-kept flower-bed, and a riot of gay nasturtiums clinging over the fences in place of what now exists.

"Is the idea not worth taking into consideration, Mothers' Clubs of London?"

The ads. of the hardware firms occupied considerable space.

London is not the only place that has taken up the "Clean Up and Paint Up" movement. Hundreds of towns and cities throughout the Dominion have taken a hand in the movement. In many places the week of May 4 to 9 has been set aside for "Clean-up Week." The mayors of various municipalities have issued proclamations calling upon citizens to join in the movement. In one town a half-holiday has been proclaimed and the citizens of the town are going to turn out in force to assist in the movement to make their town a better place to live in.

J. G. Steel & Co. ad. occupied space 4½ x 4½ inches.

The "Clean Up and Paint Up" movement is worthy of the support of all classes of people and the results so far have been beyond the expectations of those behind the movement.

PAINT UP HOUSTON.

(An editorial in the Houston, Tex., Post.)

The Post is here to boost business and the incidental purpose of this comment is to promote the paint trade in this locality, and to stimulate activity among the painters. Houston is the biggest paint market in Texas. It buys more paint than any other town in the State and sells more, but the trouble is, not enough is sold to the people of Houston, and we should like to see the local trade hum for about six weeks as it has never hummed before.

The time has come, you observe, when the carnival managers are telling us of the great attractions they are securing for the annual carnival. It reminds us that the carnival is not so far away that any of us can neglect preparations for it, and one of the preparations is to paint the many rusty and dingy spots of the town which we should dislike very much for visitors to see. We are hoping, of course, that Houston will make this year the very best appearance it has ever made. It is desirable to have the old town as bright and clean as possible, and nothing can add so much to appearances as fresh paint.

We have despaired of inducing the owners of the rotten, ramshackle frame awnings in the business district to tear them down and install something modern, but maybe they can be induced to buy a little paint. That would help some. Then there are some ancient brick shanties in the business district that are as filthy without as they are within. A coat of paint on the outside would at least save the eyes of the visitors.

The time has long since gone when paint could be regarded as an extravagance or luxury Paint is one of the necessities. Paint is a preservative. Therefore, it is economy to paint. Paint is sanitary. Paint destroys the countless millions of germs that infest wood. A rotten timber can produce enough dangerous germs in a day to keep a doctor busy for a month. Hence, we conclude that if Houston were given a general painting, the health of the community would improve so much that half the doctors could go over to North Carolina and enjoy a month of gout without in the slightest degree neglecting the interests of their patients.

It is natural for visitors to size up a town by appearances. A dirty, rusty town appeals to nobody, and we must keep Houston from such unsightliness as will cause people to think we are on the down grade. With the municipal authorities repairing and cleaning the streets, and individuals painting their houses and cleaning their premises, we can count upon commanding the admiration of the many thousands who visit the city.

This ad. of Cowan Hardware occupied a space 6½ x 9 inches.

In appealing for patronage for the paint dealers, we are far from attempting to advise the public as to the merits of the various brands of paint. We are merely certain that the poorest paint made can greatly improve the appearance of many of the rusty shacks and dingy walls in Houston, to say nothing of many pretentious structures that were considered attractive before they were permitted to become dirty through the neglect of owners who have failed to learn the manifold virtues of paint.

WAR AFFECTS BUSINESS.

Cleveland, Ohio, April 23.—The Iron Trade Review to-day says:—The opening of hostilities at Vera Cruz has distracted attention from business to a very large extent, and has caused no end of speculation as to the effect of a war in Mexico on the great industries of the country. So much will depend upon the proportions which the Mexican war assumes that it is idle at the present time to attempt to predict whether business will be improved or not.

At the present time dullness continues, with a tendency in the case of some products toward lower quotations. Coke is quiet, and many ovens have been placed out of commission. There is very active competition in sheets.

Purdon Hardware Co. ad. occupied space 8 x 15½ inches.

The Town That Got the New Factory

Prepared by Hardware and Metal for use in Newspapers.

SEVERAL years ago a party of three American manufacturers visited a number of cities and towns in Western Ontario. They were looking for a suitable location for a branch factory. The nature of their business made it necessary for them to find a place where cheap power was obtainable and where shipping facilities were of the best. After an exhaustive tour of inspection, the choice narrowed down to two towns, both of which offered all the advantages that were so urgently required.

All other things being equal, the manufacturers settled on the town which had pleased them most. One was a town of neat homes, well-kept lawns, well-trimmed trees—one of those home-like appearing places which seem to literally exude comfort and which appeal to the stranger with a promise of comfort and happiness. The other town was a straggling place, with muddy streets, few shade trees and a general appearance almost of squalor despite the fact that, as communities go, it was a fairly wealthy place.

Need it be added that the first town landed the new industry?

It is worth noting that this industry to-day employs over one hundred hands, all skilled men, and has done much to increase the prosperity of the town.

It is not necessary to adduce any proof of the fact that a good appearance is the greatest asset that a town can have. An attractive place draws new residents and new business; an unattractive town repels.

It becomes, therefore, the duty of each and every citizen to do all in their power to make the home town attractive. The share that each individual can bear in the work consists largely in making the home comform to the general rule of attractiveness. Keep your yard clean, your home well painted and in good repair, your lawn neat and well-trimmed.

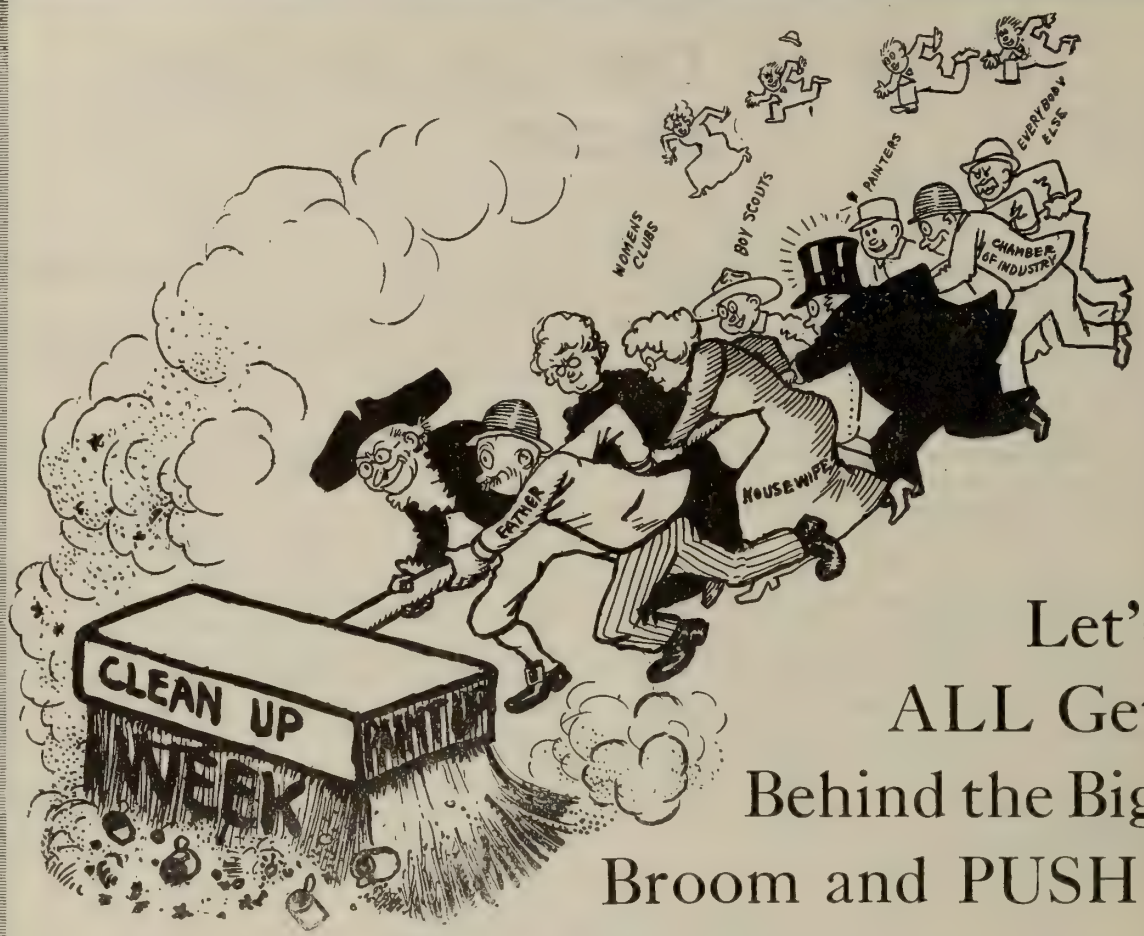
And start in to do it NOW. Make sure that you will have the neatest home in town by the end of "Clean up and Paint up" week.

Everyone Should Take Part in Campaign

IF by giving a little time and a little energy you could help to make this city a more desirable place to live in, raise the value of property and incidentally increase your own personal store of wealth, would you hesitate about it?

Then, here's your chance.

The "Clean up and Paint up" campaign will help to improve the town to make it more attractive and to raise its reputation with the outside world. If the enthusiastic support of every citizen can be enlisted it will do more toward improving the town than the expenditure of large sums of money on parks and public improvements.



Are YOU going to do your share?

This question is addressed to everyone—householder, housewife and school child. Everyone in town from His Worship the Mayor to the tots in the primary classes can do their share of the work.

In many American cities "Clean up and Paint up" campaigns have been started and carried through almost entirely on their own initiative by women's clubs. They have organized themselves into committees, secured publicity for the movement in various ways, enlisted support in all directions and during the week set aside for the purpose, have taken an active share in the work. This shows what an important part the women of a town can play in this movement for a cleaner and brighter A———. As for the school children, they can do their share by helping to clean up their yards. Here is a suggestion which might be carried out with good results. Let the children also help by carrying out plans for the improvement of school yards. School yards are often among the least tidy and attractive places to be found. Arrange with the pupils to stay after school some afternoon, and allot a task to each. Set them to raking and leveling the playground, planting flower beds and so on. Their interest might be raised to such an extent that they would endeavor to keep the playgrounds attractive the whole year around.

The support of every person in A——— is needed to make the "Clean up and Paint up" campaign a success.

Support it yourself and get others to support it.

Let's ALL Get Behind the Big Broom and PUSH!

LET'S make Cleanville more beautiful, more healthful, more progressive, more livable. Let's stimulate business and civic pride. Let's make ourselves better satisfied with our own hearths and our own little city. Let's be "All Together" in this big "Clean Up and Paint Up" campaign and BOOST!

Just see what a difference a little paint will make in that store front, porch, verandah, window sill or garden fence.

See how easily you can transform that front lawn, back yard and alley into your own little beauty spot that will radiate good health and happiness.

Then there's the cellar that's virtually crying for broom and whitewash brush. The garden gate that probably only needs a few nails and a strip of wood, and the weatherstained front door only a little varnish.

Get out your brooms, your brushes, your rakes, your hoes and see what a big difference you can make in *your* home; see what a really beautiful, livable city we can make out of our own little Cleanville.

But much of the work cannot be done single-handed. If there is some improvement about your home or store that you cannot accomplish yourself, just let us know about it and a corps of eager, energetic citizens will soon be around to give you assistance.

And in this respect we need your own, personal co-operation—we need the co-operation of every man, woman and child in Cleanville. Two-hour squads are being made up to handle the larger, more stupendous work. Get in on one of these Clean-Up Squads and get the fullest enjoyment and personal satisfaction of seeing our little city the most beautiful and healthful in Canada. Just fill in the Volunteer's Coupon herewith and let us know the two-hours' time you can best devote to this co-operative work. Send in the Coupon *to-day*.

HARDWARE AND METAL

VOL. XXVI. No. 16 Toronto, Canada, April 25, 1914 Two Dollars per Year

The Value of Display

ELSEWHERE in this issue a hardware salesman tells how he re-sampled a large section of a tool department during spare time. For the salesman or merchant who wishes to succeed, there is probably no better method for employing spare time, than by re-arranging the stock and displaying the various lines of goods in such a manner that they will appeal to the public. One merchant who has made an exceptional success of his business, attributes much of his success to the fact that he devoted his spare moments to re-arranging his stock, and devising new ideas for displays. His store is always attractive, and he has built up a large trade through attractive displays. The first feature of display is to get the goods where they can be seen without looking for them. The better you show the goods the more you will sell. Displays should always be attractive and inviting. During the busy seasons some merchants and salesmen are inclined to think that they have not the time to spend in arranging stock and keeping it clean. We know that it requires a great deal of time and effort to do this work when other duties are urgent, but we also know that the majority of really successful merchants or salesmen have always been able to find time for work of this kind.

Do not be afraid to make changes in your store in order to display your goods more attractively. You might as well chain your body to a post, as to chain your business to an immovable and unchangeable policy. A good, clean display is a good salesman, always ready to create sales. This fact has been borne out by the experiences of the salesman who contributed the article on display, found elsewhere in this issue.

The Business Situation

BUSINESS in some lines appears to be moving along at a pace slightly under the speed of a year ago. During the first two weeks of the month, business with hardware jobbers was very brisk, principally on account of the shipping of spring booked orders. During the past week business generally has tapered off slightly, but this condition is usually experienced at this season of the year. Business will no doubt be greatly accelerated when better weather conditions prevail. Hardware jobbers appear to be quite optimistic, and while admitting that business is harder to secure this year than last, they expect that the business of the year will turn out satisfactory. The metal markets have shown no change and only a limited amount of business is passing. Buyers appear to be cautious and are only ordering in small lots. There have been many recent declines in the prices of hardware and kindred lines. Paint manufacturers report that business with the retail hardware trade has been up to normal and in some cases better than last year. In the larger cities there still appears to be a large number of unemployed. The situation with regard to the unemployed has been relieved to some extent by the commencement of building and municipal improvement in many places. It is interesting to note that many of our principal cities are looking forward to development of exceptional character during the coming summer, and in many Eastern and Western cities there will be expenditures which will be reasonably termed somewhat exceptional.

Our cities therefore have not any reason to look upon the coming summer months with any degree of gloom. In so far as the agricultural classes are concerned, they are still enjoying very high prices for their products, that is, those who have given attention to mixed farming. In the West where the inclination now is to give some attention to the raising of cattle and hogs a very decided change is taking place. Hogs and bacon products are being shipped eastward, whereas a year ago the east was shipping many cars every day to the West. To the increased product of live stock the farmers this year will be in a position to add the product of a largely increased acreage.

Seeding operations have already started. The next few weeks will be watched with keen interest as they have in them a very important factor in shaping the trend of business. The temperature in the West has been steadily improving as indicated by official returns. As the season advances there should be an all-round general improvement in conditions.

Destruction of the Fly

RATHER startling statistics were presented in last week's issue on the rapidity with which the dangerous housefly reproduces. One healthy, normal fly—and they are all apparently the picture of health—that emerges safely from winter quarters, means that before the summer wanes there will be a million or more from that one ancestral stem.

Some one has said that the greatest exponent of the multiplication table is the guinea pig. But surely the housefly deserves the honor—or rather, the distinction.

From a health standpoint the fly is undoubtedly dangerous and it lies within the power of the retail hardware merchant to do a great deal to overcome the ravages of the fly. The article in last week's issue was a timely one, as the fly season will soon be here. The time to sell fly destroyers, swatters, traps, etc., is not in midsummer when the numbers have reached countless proportions, but now when the few flies that have braved the vigors of winter can be easily killed. Retail hardware merchants cannot be urged too strongly to do everything in their power to overcome the ravages of the fly. Hardware men can do their share by featuring, and pushing the sale of sanitary garbage cans, milk containers, meat and dish covers, refrigerators, fly traps, fly swatters, poisons, exterminators, screen doors, windows, etc. In addition to making profits, the merchant will be doing the public a good service by showing how the fly pest can, to a great extent, be exterminated. A hundred flies destroyed now means millions less in August. The housewife should be informed of this, and when she once realizes it, the merchant should have no difficulty in selling fly destroyers now, and screen doors, etc., a little later on.

"Clean Up and Paint Up" Campaign

THE "Clean up and Paint up" movement has spread throughout Canada with surprising rapidity. The expectations of Hardware and Metal have been more than realized. The campaign promises to be one of the greatest boosters for the paint business ever attempted in Canada, and the success being met with this year will urge manufacturers, newspapers, the public and ourselves to even greater efforts next year.

The "Clean up and Paint up" movement will from now on be an annual event in Canada. When Hardware and Metal commenced a few weeks ago to boost the "Clean up and Paint up" movement in Canada, letters were sent to a large number of Canadian daily and weekly newspapers, asking for their co-operation in the campaign. We received a splendid response, and we now have in our office hundreds of editorial clippings boosting the movement, taken from various newspapers published in Canada and extending from coast to coast. In many instances reading matter prepared by Hardware and Metal has been used. We fully realize that Canadian newspapers are willing to do their share in assisting in any movement that promotes cleanliness, thrift and civic pride. We were also fortunate in securing the assistance of "Printer and Publisher," a sister publication, published by the MacLean Publishing Co., publishers of Hardware and Metal. "Printer and Publisher" is a trade paper devoted to the publishing trades as the name denotes, and goes to every newspaper office in the Dominion. "Printer and Publisher" has fallen into line with Hardware and Metal and is working from the other end, influencing the newspapers to take up the idea, joining with the retail merchants. With "Printer and Publisher" reaching the newspapers, in addition to the weekly letters being sent out by Hardware and Metal, and with Hardware and Metal going out weekly to the Canadian hardware trade, it can easily be seen that there is a powerful influence behind the campaign.

But that is not all. Municipal authorities in many places have been approached, and in several towns and cities proclamations have been issued calling upon the citizens to lend a hand in the "Clean up and Paint up" movement. In one town a half-holiday has been proclaimed for the purpose, giving all the townspeople an opportunity of joining in the movement. Boards of Trade, Boards of Health, Fire Departments, Women's Clubs, and Police Departments in many places are actively engaged in carrying on the good work. Retail hardwaremen have also fallen in line and hundreds of special advertisements are being issued in the newspapers. Elsewhere in this issue, we show four ads. which appeared in one issue of a daily paper.

The movement is not confined to the cities, but is being featured in many of the small towns and villages. The fruits of the movement will be reaped from now until the end of May. Let all hardwaremen do their duty.

In this issue we are showing prepared advertising suggestions which may be used by hardware merchants. Take them to your local newspaper and have them inserted next week. Now is the time to reap a rich harvest of paint and cleaning necessity sales. Hardware and Metal is not looking for publicity in this campaign. Our idea in starting to boost the campaign, was to get the newspapers interested, and to create sales for the retail hardware merchant. We believe that we have succeeded in creating a greater interest in this campaign than has ever been attempted in Canada, in a campaign of a similar nature. We are receiving our reward in the hundreds of newspaper clippings and advertisements of hardware merchants, that are daily reaching our office.

THE RETURNS FROM a retail business are in a great degree proportionate to the amount of goods sold above the actual demand.

How to Keep Mail Orders at Home

Mail Order Competition Cannot be Combated by Attacking the Methods of Mail Order Houses—To Give a Black Eye to Mail Order House Encroachment, the Ideal Merchant Will Apply Scientific Salesmanship to His Business.

SINCE the mail order business developed to such proportions we have seen schemes galore, of every conceivable nature, professing to meet mail order competition. This competition is being met, and successfully met, too; but those who are meeting it are apply-

Don't Cry Thief! Thief!

ing scientific salesmanship to their businesses. There is no use denying the fact that the mail order houses are wonderful merchandisers. But competition cannot be combated by attacking their methods because they are successful, or arguing about price because they sell at a low price. To give a black eye to mail order house encroachment in any community the ideal merchant will apply scientific salesmanship to his business. That is all that is necessary — nothing more.

The greatest profession in America to-day is merchandising—selling goods. Everywhere merchants are calling loudly for more salespeople who know how to sell goods. A high percentage of clerks, both in large and small stores, do not apply modern methods to their selling. They have not been taught how. They need instruction. They need a full knowledge of what they have to sell, mixed with good old common sense.

Demonstrate that a dollar buys a full dollar's worth at your store.

There is no open mind that it is not desirous for improvement, regardless of previous training or years of service. There is nothing so fascinating as salesmanship when the spirit is once grasped. Every man who comes in contact with men is bound to develop this spirit if it is once begotten. Every merchant can make more money by systematically training clerks to sell goods—which, of course, means how to treat customers.

Don't Knock.

You can't stop mail order houses from running off with your business by crying "Thief! Thief!" Talking loudly about the "unfairness" of these outsiders only draws attention to them and their prices. Anger, jealousy and open antagonism disgust people and make them shy off from your side of the road. If a man has bought fair stuff from a catalogue house, he will not believe you if you call it "rotten." There is a better way to use your breath.

Go at it this Way.

You've got to compete on a quality basis. You can't meet price with price.

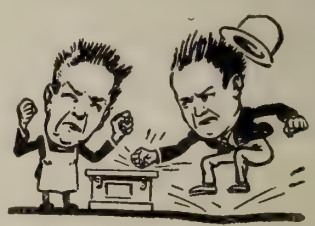
Apply Scientific Salesmanship to your business.

Create confidence in the goods you sell by stocking only good goods bearing real values—articles which the manufacturers stand behind and you back up. Lowest priced merchandise is not cheapest in the long run. Educate customers to pay your price by not talking price. Sell the quality; price is secondary if you prove the superiority of your goods. Show that you are selling honest merchandise—sound to the core. Demonstrate that a dollar buys a full dollar's worth at your store.

Face to Face.

This point is in your favor. You come in personal contact with your customers, while the mail order house must sell by the printed page or printed letter. They can talk just as alluringly about a hundred-dollar piano as about a thousand-dollar one; or about a jackknife that is made of tin as about one that is made of the finest Sheffield steel. But "absent treatment" cannot convince like face-to-face talk right in your own store—right under your influence. You can personally explain the advantages of your goods and demonstrate them. You can personally prove

Tell the people you have the goods.



quality. You can personally meet objections. Your customers can actually see and feel the goods; nothing needs to be taken for granted.

Some Practical Examples.

Here are suggestions for "selling talk" to use when you meet your customers face to face.

Your customer asks: "What fabrics have you that are suitable for a house dress for myself, and that are equally suitable for dresses and play suits for my children?"

You explain: "We have several, madam, but I recommend ——— galatea. Here it is. Feel of it: see how soft it is, yet how firm and strong it feels. That's because it's made of long-staple cotton and is close woven. Then, too, madam, you know that ——— galatea has been the standard for years—no one has succeeded in making a better quality. Here are the blue striped effects; and here are some dainty checks. The striped goods will make a pretty home dress for you, and you couldn't

Don't get into an argument over price.

get a handsomer and more durable piece of goods for a girl's dress or a boy's play suit than this check. Yes, the colors are fast—wash them all you want to—you'll find that this galatea is the best wearing material you ever bought."

Or you are selling a hoe, and you say: "Here's a fine hoe! Examine this handle; it's straight grained, made of tough, seasoned ash and bent into shape, not sawed with or across the grain. Does not split off when you give a good, stiff stroke.

Advertise in Your Newspaper.

"This hoe is made of best tool steel, tempered just right—not so soft that it will lose its edge, and not so flinty that you will break a piece out of it every time you strike a stone.

"It's the right weight, has the right 'set,' the right 'hang,' and it feels right in you hands. It's made so you can do the most work with it, and do the work easily. Not the 'cheap' kind, made just to sell. It's a hoe you can depend on."

All the selling points you advance about any goods demonstrate to the customer that you know your business. It begets more confidence. Every manufacturer with whom you are doing business will be glad of the opportunity to furnish you the salient points about their articles which you have on sale. Write to them for needed information, and you will find how ready they are to help you sell.

Be a Salesman.

Learn to be a seller, not a delivery clerk. "Tending store" will never put a clerk's name over the front door. Get out of the "take-it-or-leave-it" style of talk. Don't say, "There it is, over there"—take your customer to it, and tell him all about it.

Keep looking up new and better selling arguments. Learn your stock between customers' visits. Learn to know value. Keep busy. Keep enthusiastic. Keep everlastingly at it. Don't get discouraged because some few customers buy from mail order houses. You can hold your old customers and make a host of new ones.

If a customer comes into a store and the clerk sells him only what he came into the store to buy, that is not salesmanship. To sell this customer something else, to influence him to come again, to make him feel that the clerk is doing him a service in serving him, that is salesmanship.

Encourage your clerks to read all salesmanship literature that they can possibly get. Influence them to read the folders and booklets sent you by manufacturers. They will undoubtedly use on customers the arguments set forth in this literature. Talk to them collectively and individually about salesmanship. Saturate them with the spirit of selling. The largest stores in the largest cities hold sales conventions for the benefit of their employees. They train them: they try to make them worth more money to themselves by making more money for the house. The same principle should govern every store in America, even though there is only one clerk employed. Even if the owner does all the work himself, he should use the same opportunities for his personal improvement.

The Cleveland Stone Co., Cleveland, Ohio, has published a very interesting booklet entitled "How to Keep Mail Orders at Home." We find in the booklet, many items which will be of interest to our readers, and worth reproducing. The illustrations have also been appropriated from the booklet.—Editor.

Manufacturers Will Help You.

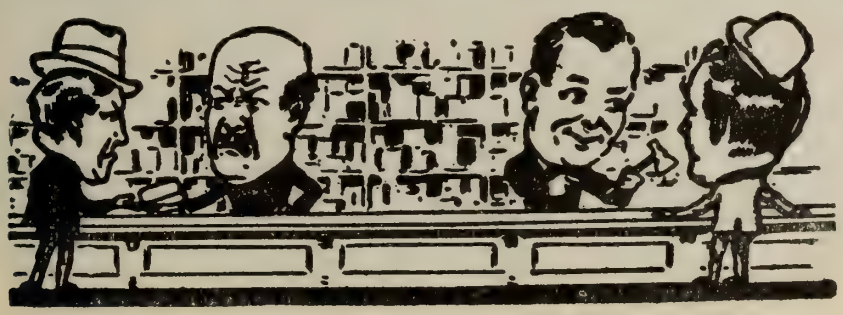
As you study line after line of the guaranteed goods you are selling, read all the literature which each manufacturer sends to you. Have you been throwing away their booklets, folders, circulars and letters? Quit it. You've been losing some of the strongest arguments to overcome mail order invasion.

Manufacturers are spending fortunes to get dealers and consumers to know the processes of manufacture, the high quality of materials, the perfection of finish of their nation-known merchandise. This well written, finely illustrated, convincing printed matter is invaluable to the merchant or salesman who is after "big game." Besides these, you probably receive bright, neat store cards, window trims, counter displays and similar busines bringers. By all means put these up prominently, for they tell that you sell the goods customers see advertised in their favorite magazines or farm papers.

Suppose your manufacturers haven't given you enough information. Ask them for more! They are always glad to tell you additional selling points of their goods. You will find the facts mighty interesting—as will your customers. And interest makes sales! Try this method on every line of goods.

By all Means Advertise.

Again We Say—Preach Quality.



No salesman should ever get into an argument over price. It is the value of the goods that you are selling. If customers are convinced of value, then price is secondary. If the quality of the article is not presented correctly, and with conviction and enthusiasm, selling goods does become a matter of price. Under such conditions the clerk who is handling the transaction lowers himself to the level of a slot machine or an auctioneer. A customer never went into a store and talked price unless allowed to do so by the clerk. It is perfectly natural for a man to say he can buy the same goods cheaper. Yes, and he could buy his clothes cheaper! But he bought his clothes because he thought he was getting his money's worth. It is safe to believe he will buy your goods, if you convince him that he is getting his money's worth.

Your Store is a Salesman.

Do you know that your store either draws or repels customers? Do you realize that a bright, clean store, well stocked, well kept and conveniently arranged half sells the goods?

Look around! Is your store inviting? Do your customers find fresh stocks of well-known goods evenly placed and prominently displayed? Have you a full assortment of sizes and styles? Have you plenty of salespeople to fill orders quickly Remember, you must get folks into your store before you can sell to them, just as the mail order house must get its catalogue (its store) into people's hands before it can sell to them. You know how bright-colored and alluring those catalogues are. Therefore, copy the "enemy's" tactics—have bright and sunshiny surroundings—keep things systematized—

Be a Salesman, not a Delivery Clerk.

810 Samples on Box Fronts in One Department

Salesman With Purdom Hardware Co., London, Ont., Tells How He Re-sampled the Tool Department During Spare Time—A List of the Goods Displayed.

Written for Hardware and Metal by George A. Steer.

A REPRESENTATIVE of Hardware and Metal asked me to let the readers of his paper know how I re-sampled 450 boxes, showing 810 samples, during spare time in the month of February.

Stock-taking in the store was completed by the end of January. I started on Feb. 1 to take off the dull-looking samples, and after having repainted the box fronts the traditional "hardware green," I commenced to re-sample. I might state that the sale of tools has almost doubled as a result of my labors. The attention of customers is attracted by the bright samples and freshly-painted boxes. It is quite a common occurrence for customers who are in the store purchasing other lines, to step over to the tool department and examine some tool, which has been brought to their attention on account of the sample being shown on the front of the box. This move on the part of the customer gives the salesman a chance to show his selling ability. Mechanics very often come into the store and spend considerable time looking over the samples. In many instances direct sales are made as a result of the assortment shown.

I find it an easy matter to keep the tools in a clean condition. A paint brush is preferable to a feather duster or cloth duster for dusting samples. With a paint brush you can dust behind the samples and also remove the dust from crevices. The samples should be dusted out at least three times a week during spring, fall and winter, and every day during the dry and dusty weather, if possible. Great care should be taken to watch for and remove finger prints on the bright samples, such as chisels, hatchets, etc.

In undertaking to re-sample the boxes, I realized that I would have to do the work in sections in order to prevent confusion, and at the same time keep as many samples as possible on display during the period of time necessary for the work. On the first day I took the old samples off about one-third of the boxes in the first tier. I started about 4 o'clock in the afternoon, and by six o'clock had the samples off and the box-fronts painted. The paint was dry by the following morning and I then started to spend my spare time in re-sampling. This plan was followed out day after day until I had completed my task.

I started on the first tier to the left of the picture, as I considered it would take the longest to do, there being sixty boxes to paint, and 130 samples to be put on, the same taking me the best part of the first week.

After No. 1 tier was finished the rest came faster as the boxes and samples got bigger towards the end tier, and the whole job was finished on the 26th of the month, taking me almost the whole of February to do it.

As my work progressed, I found more than one of an old-fashioned article that

GEO. A. STEER.

had to be re-sampled, and by cleaning it with crocus cloth made it appear as if were new.

The dull and shop-worn samples I took off I placed back in the box after having cleaned them, and in this way they are disposed of at the regular price, they being the first articles to be taken out whenever that article is asked for.

A great deal of care should be taken in sampling, because poor sampling means poor sales. How much more impressive it is to look at a picture with a good perspective than to look at one that has that "I don't care" view to it. "Take it from me," the one with the most redeeming feature will be picked out every time.

Only a few weeks ago while looking through a magazine I ran across what might have been a first-class display of sampling, but alas! it looked as though some great shock had loosened the samples from their moorings and they were clinging to the boxes at all angles.

Nine out of every ten men know a straight line when they see it, so the slogan is, "Sample on the straight line."

One object I accomplished to my satisfaction was not over-crowding the samples. It isn't necessary, and what would make the sampling appear crowded and heavy is done away with. For instance, look at the first tier to the left; the calipers vary in length from 3 to 8 inches, and by placing a small pair to the left and as large a pair as the front of the box will allow, to the right, you form a combination that is hard to beat. The same rule can apply to all samples.

In pricing goods on the sides of the sample boxes, the same plan can be followed out. Have the cheapest price to the left, and towards the front of the box. It is an old rule to follow but a good one; it saves time and time is money.

The accompanying illustration shows only one section of the tool department. This section is 25 feet long and 9 feet high above the ledge. In this space there are 450 boxes of various sizes and 810 samples are shown. Re-sampling is therefore not a small task but nevertheless it is worth the trouble any time. Below the ledge are cases equipped with sliding doors. These cases are all equipped with electric lights controlled by a switch at the end case. In these cases large and heavy articles such as vises, pipe tongs, etc., are displayed.

The Goods Sampled.

There are ten tiers above the ledge and four cases equipped with double sliding doors below the ledge. The arrangement of the samples and stock is as follows:—

In tier No. 1 to the left are sampled calipers, scribers, pocket scales, depth, centre and thickness gauges, speed indicators, pocket levels and level glasses, steel tapes and all makes of belt punches, moulders' slicks, steel figures and letters, lock washers, tire tape, stenciling letters, all shapes of sewing-needles, pinking irons, nail and rivet sets, roller and spring skates, skate parts, brace jaws, bit levels and gauges, saw swedges, wand cutters, trade em-

blems, screw plates, drill chucks, tap wrenches and bitt gauges, etc.

In tier No. 2.—Washer cutters, trammel points, counter sinks, reamers, auger shell taper, centre, gimlet, expensive, car and mach. bitts, eye augers, scratch awls, hdld. cabinet scrapers, bench stops, trail blazers and meat axes, etc.

In tier No. 3.—Many makes of rule, file card gauge and common glass cutters, tie bevels, various sizes and makes of plane knives, bricklayers' beading tools, caulking irons, cape and cold chisels, plumb bobs, steel cabinet scrapers, steel and cotton tape-lines with various covers, and all makes of saw sets, gauges and pointers, etc.

In tier No. 4.—Tanged, socket, beveled and gun metal chisels, wood carving tools, steel dividers, spoke shaves, emery wheel dressers, brick chisels, mortise making gauges, etc.

In tier No. 5.—Saw, chisel, file and screwdriver handles; awls, screwdrivers, rifflers, mat hooks, automatic drills and screw-drivers, soldering irons, axe and hammer wedges, etc.

Tier No. 6 is devoted exclusively to various makes and shapes of pliers.

Tier No. 7 to wrenches and clamps.

Tier No. 8.—Hammers, lathing and shingling; hatchets, carpet stretchers and tack pullers, etc.

Tier No. 9.—In the case at the bottom we have taper, straight and bit-stock drills; stove, plug and machine taps, and stocks and dies for same.

Above the case hack saw frames and blades, all lengths, mortar and plastering trowels, etc.

Tier No. 10.—Slim and taper files, all makes; draw-knives, piano wire, mach. hammers, carpenters' pencils, lumber crayons, soap pencils and oil stones.

Below the ledge in case No. 1 on the left are sampled planes, wood and iron, of every size and shape.

Case No. 2.—Every make of vise from the small hand to the large 4½ in. jawed bench vise.

Case No. 3.—All sizes of flue cleaners, chain pipe wrenches, large iron and door clamps, nail pullers, all sizes of ripping bars and hdld. mach. hammers.

Case No. 4.—Wire and steel belt lacing, cement workers' tools, brick and sledge hammers, track mauls, and all sizes of flat, half rd. and rd. and special shapes of files and all makes of rasps.

On the shelf at the top of the cases all the way along is kept the reserve stock as much as it will hold. The shelf is 1 ft. wide, while the cases are 3 ft. high 4 ft. long, and 2½ ft. deep.

A want-book hangs at the end of the ledge, and by entering the wants in it before we are out of any line, say when we have a sixth or a quarter doz. left, that much-dreaded and oft repeated saying, "We are just out," is entirely done away with.

Always have a supply on hand and your customer will always come back to you, knowing that he can get what he wants when he wants it.

There's always the fellow who is in a hurry, and hasn't time to wait until you get it for him. Then you have to listen to him say, "I'll go to another store," which can't help but hurt the feelings of the live salesman.

Keep your stock up. Show samples whenever possible. Keep the samples clean and bright, and the chances are that the tool department of your store will become the mecca of a large percentage of the mechanics of your town or city, and the surrounding districts.

Sectional View of Tool Department in Purdom Hardware Co.'s Store, London, Ont.

KEEPING MAIL ORDERS AT HOME.

(Continued from page 45.)

in "apple-pie" order. Many a merchant whose stock is first class, loses sales because of a poorly lighted, dusty store.

By All Means Advertise.

Every merchant in the small town should be an advertiser. He has the same opportunity to tell the community what he has for sale as the big city merchant, only using different mediums. The principle of good advertising is identically the same, but it must be applied differently.

Here's where the manufacturer again shows his willingness to co-operate. He will send you complete advertisements—picture and text—all ready to add your name and insert in your local daily or weekly newspaper. Or he will send you cuts of the article you want to push, and you can write the descriptions yourself.

This plan has proven a wonderful business getter all over America. If the catalogue houses can draw all their business through advertising, you can surely draw extra trade by the same means.

Draw a Circle Around You.

In order to determine your field of sale, draw an imaginary circle around your store, reaching out as far as you can hope to influence customers. This gives you your field of sale. Then get the name of every possible customer in the circle to whom you want to sell. You undoubtedly know every one of them or they know you. Your influence in the community means something or you would not be a merchant. As you compile this list you may be reasonably sure that mail order houses are flooding the same homes with printed matter and letters, trying to make sales. These houses are calling the attention of your customers and possible customers to the same kind of goods that you have in your store. They are talking to them alluringly about each article, giving

(Continued on page 62.)

Doing Retail Business on a Strictly Cash Basis

An Interesting Story, Telling How a Manitoba Hardware Firm Has Been Doing a Cash Business for Eleven Years — Cash Discounts Pay for Help—Experience of Another Dealer.

A REPRESENTATIVE of Hardware and Metal called at the store of Moody & Son, Selkirk, Man., last week, and while he was standing at the counter, a wagon drew up and delivered a consignment of glass. It developed during a conversation that this glass was ordered and paid for by a customer, and was just arriving from the manufacturer. This was so unusual a procedure in a Western Canada store that Mr. Moody was asked the why and wherefore. "We run a cash business," he replied, "and we have been running it for eleven years. We found that we had not the sizes of glass required for that customer, so we measured up his requirements, took his fifteen dollars, and ordered the glass. That's the best way to do business."

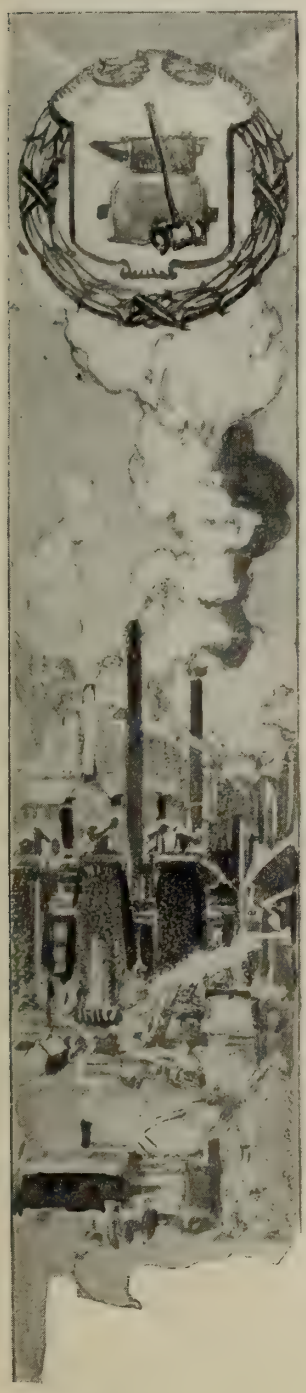
Mr. Moody smiled as though he had discovered a cure for some formidable disease. He smiled like one who had found a smooth track to run in. And that's what it amounted to. James Moody, eleven years ago, made a bold experiment. Prior to that he had always given credit; he decided to run his business on a cash basis, and it is still running. This will be interesting news to many hardwaremen in the West who have tied themselves down with a credit system. For their benefit Hardware and Metal's representative asked Mr. Moody for further particulars, and these he gave willingly.

About thirty years ago, Mr. Moody became manager in the department store of Captain William Robinson, at Selkirk, and one of their principal lines was hardware. After holding this position for six years, he built a store for himself, and began business under the name of Moody & Sutherland. Later he sold out to Mr. Sutherland, who sold the business to Pook & Son, who, with Robinson's and Moody's are the only three hardwaremen in town.

Mr. Moody received six thousand dollars for his share in the Moody-Sutherland business, and with that he purchased the corner of Manitoba and Eveline streets, spending every cent he had on this building. He sold the front to a bank, and opened up for himself in the other part in the hardware and other lines. To do this, he had to get credit from the wholesalers for he had no spare cash of his own, having invested it in the building.

It was at this time—in 1903—that he resolved in future to do business only for cash. He decided to buy stock and keep it there to look at, if he could not sell it, and would keep it there until he did sell it. But the business came. There were people in Selkirk who knew James Moody, and knew him to be a business man, from whom they could get a square deal. Gradually he was able to pay off his wholesalers, and it was not long before he owned the store and the stock as well. And to-day, as he said to Hardware and Metal, "if it rains for a month, I've no need to worry, for I have no payments to make. Bookkeeping keeps me in the store only a few hours each month.

"Of course," he went on, "there are other tradesmen in town to whom I have to give credit, who require their accounts rendered once a month; and there's the Government. I get some nice orders for the asylum here, some from the Dominion Government for public works, and some from the Indian Department. I give the Government credit, but I never lost a cent doing business with them. And while I give other tradesmen in Selkirk credit, there are some of them I do not give it to."

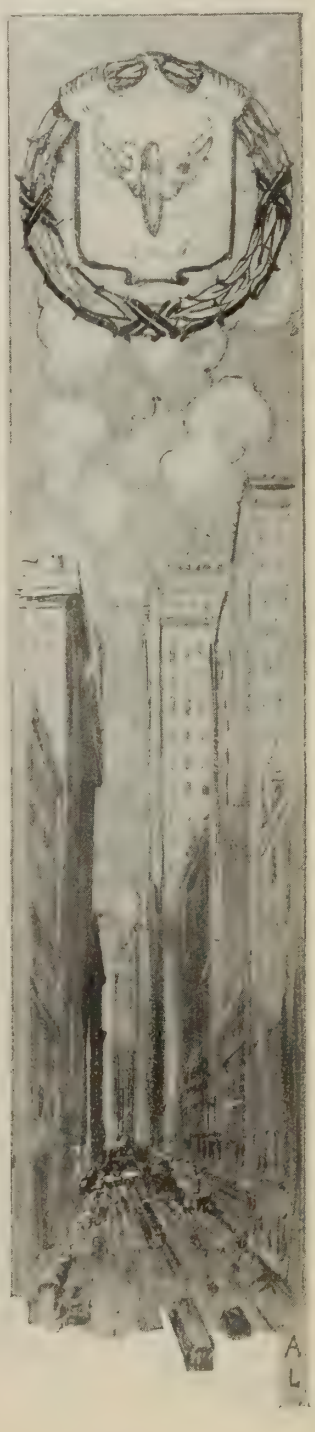


View in store of Moody & Son, Selkirk, Man. Mr. Moody, Jr., is behind counter.

Thinking that Hardware and Metal might not be believing all this, Mr. Moody went to the back of his store and produced his books. Opening them, he pointed out that all accounts with manufacturers and jobbers were paid off immediately, and cash discount credited. Mention of cash discount caused him to turn to a page on which he had been totalling his discounts, to see whether they amounted to anything or not. "They pay for my help," he confided to the representative of this paper.

It was suggested to Mr. Moody that Selkirk being a mixed district, and not purely farming, it might be easier for him to do a cash business than for a hardwareman further west, located in a purely farming com-

(Continued on page 53.)



Efficiency of the Individual

By GEO. H. SHEPARD

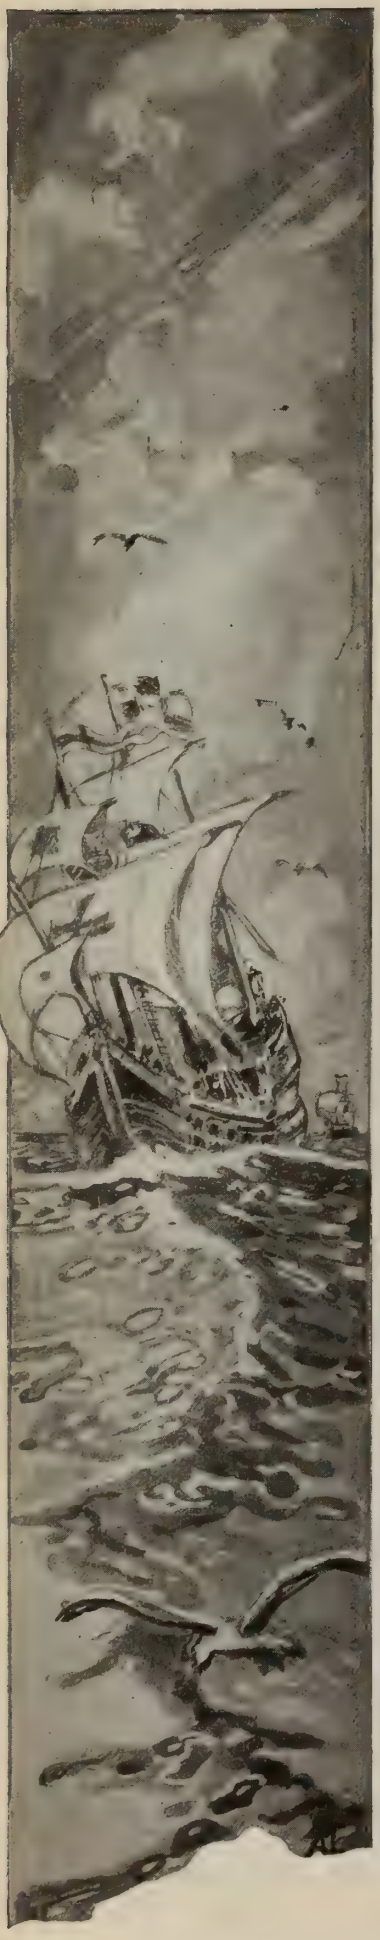
Illustrated by A. LISMER

AN Englishman once said that the American business man leads a life of intense activity. He rushes to his office, after a hasty breakfast, reading the morning newspaper at the table or in the car, for lack of time to read it otherwise. He opens his mail, reads it hurriedly, and dictates the replies. He snatches a quick lunch in ten or fifteen minutes or goes hungry. He posts off to another part of town, attends a business meeting or two, meets representatives of several other concerns, hurries back to his office, reads and signs his mail, and hurries away to an evening meeting. Said the Englishman, "He has not been idle fifteen minutes all day, and he has not thought fifteen minutes about anything."

Such strenuous, intense, driven lives fill early graves and recruit the mad-houses, while they show little in the way of achievement in comparison to their enormous outlay of energy.

In exceptional cases men of unusual endurance drive themselves like steam engines and attain wonderful success; but there are at least well known instances where men of that type, in the physical slump that comes to men in later middle life, have gone down completely.

For the hurried, driven, and overworked there is relief.



The effects of the application of the principles of efficiency in industry are well known. As a general average based on American practice, the possible results may be roughly stated as a thirty per cent. reduction of unit costs, excluding materials.

These economies are the sum of detail results throughout the business, of savings of the time of this worker, of the labor of that one, of reduction of waste of material on this article, of economy of power on that machine, of reduction of idle capital here, of effective use of waste room there.

These economies of time, labor, and money in a business are, after all, obtained only as the sum of such results in the cases of many of the persons in its service.

It is proposed, in these articles, to apply the lessons of industry for the benefit of individuals.

Results are obtained by the application of a few definite principles, as follows:

Ideals; personnel, scientifically selected and organized; higher common sense; discipline; fair deal; standards; conditions and work adapted to each other; doing things the best way; instruction; planning; despatching; immediate, adequate, and reliable records; efficiency reward.

I should advise any one who wants to increase his personal efficiency to begin by memorizing thoroughly the above list of principles. They should be learned so thoroughly that they become subconscious, that is, so that it becomes second nature to apply them without conscious thought, just as one walks without any attention to what his legs are doing.

The rest of this series will be devoted to an explanation of every principle in turn in its application to the individual. As the meaning of a principle becomes plain, it should be put into personal application. As soon as a violation of a principle is recognized, it should be corrected. By so doing the application of the principles will become habitual and subconscious.

IDEALS

It is desirable to set forth some ideal which will be universally accepted.

The most civilized philosopher, the most ignorant savage; the ascetic religious devotee, the gay votary of pleasure; the busy man of affairs, the dawdling idler; the gentlest woman, the most hardened criminal; all have one ideal in common. Each in his own way and according to his own light, desires and seeks happiness.

I would, therefore, set forth happiness as the supreme and all-inclusive ideal for the individual.

We are so made that we find happiness permanently only in altruistic service. This is a law of nature against which we rebel, but to whose obedience we are driven back by those severe penalties which nature visits upon all violations of her laws.

Let a man adopt any egoistic ideal and his efficiency, though it may be great in quantity, becomes negative in sign.

Like the ancient Hebrew king who gathered silver and gold and all delights, so that he was great and increased more than all that were before him, but who gave himself successively to the ideals of pleasure, of greatness, of wealth, and finally even of wisdom; for him shall be the cry:

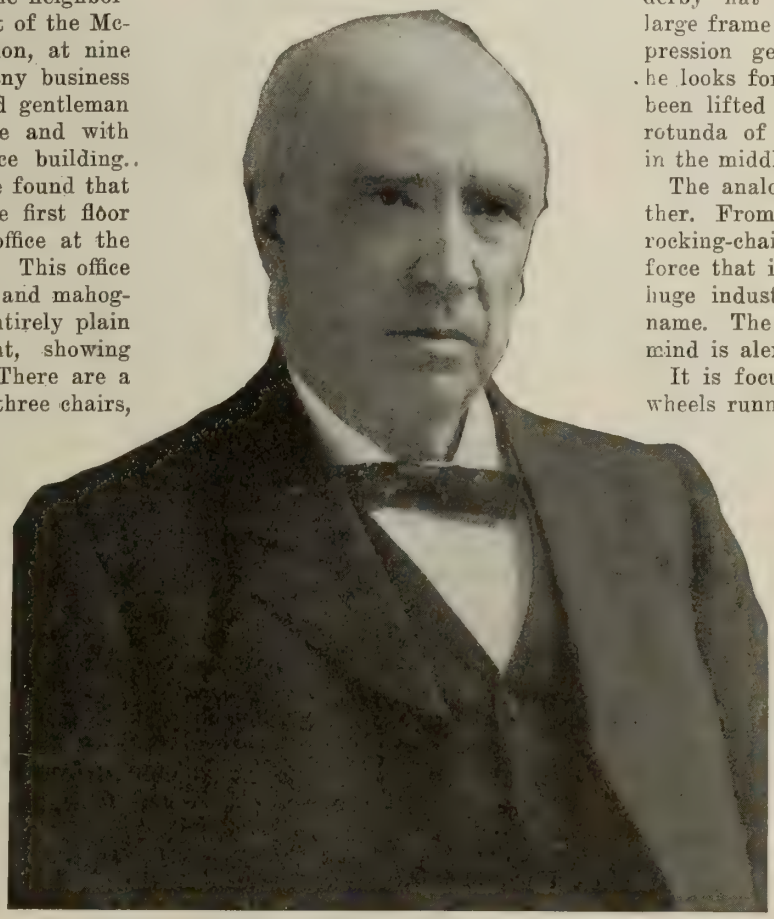
"Vanity of vanities, all is vanity. What profit hath a man of all his labor which he taketh under the sun? . . . . Therefore I hated life; because the work that is wrought under the sun is grievous unto me; for all is vanity and vexation of spirit."

Most happily, in late adolescence develop both the altruistic feelings and the attraction between the sexes. The natural result of the latter is marriage and family life and cares, in which one's altruism finds immediate and stimulating exercise, and in which most of us find the only real happiness that we ever know.

The happy result of the altruism into which nature, before we realize what she is about, thus forces us, sets forth as a corollary to the proposition that happiness is our supreme ideal, that the immediate secondary ideal is altruistic service, even though one's circumstances may limit his practical application of that ideal to the support of his own family.

The ideal of service includes all other right ethical ideals. "Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy mind. This is the first and great commandment. And the second is like unto it. Thou shalt love thy

(Continued on page 57).



Eighty-Six Years Old, Still at Helm*

How John McClary Found the Elixir of Perpetual Efficiency. The Career of a Canadian Manufacturer.

By W. A. CRAICK

IF one happens to be in the neighborhood of the big city plant of the McClary Mfg. Co. in London, at nine o'clock in the morning of any business day he likely will see an old gentleman step out of an automobile and with sturdy step enter the office building. Follow him up and it will be found that he mounts the stairs to the first floor and passes into a private office at the front overlooking the street. This office is no place of Turkish rugs and mahogany furniture. It is an entirely plain and commonsense apartment, showing signs of constant use. There are a couple of desks and two or three chairs, with portraits of Lord Roberts and the old gentleman himself on the wall.

Having divested himself of his overcoat, but still retaining his hat on his head, he stands forth, a stout figure of a man, rather over middle height and still fairly erect in bearing. The face, which is of a heavy cast, is clean-shaven. He wears an ordinary pair of glasses and is dressed in a plain and democratic suit of gray. His motions, as he passes from one part of the room to the other or sallies out into the big general office, are quite easy and rapid for a man of his years. In short there is about him an expression of alertness and keenness that challenges attention and lets the onlooker know that this man, who is of course John McClary himself, is still a force to be reckoned with.

John McClary, at eighty-six, remains actively at the head of the business he has built up so successfully.

In a day when the stress and strain of business life wears out many a man before he is sixty, when there is so much talk about pensions, annuities and superannuation, and when the control of great enterprises seems to be passing into the hands of a still younger set of men, the record of John McClary of London, the octogenarian manufacturer of stoves and tinware, affords an example of virility that is a welcome relief to the accustomed experience. For sixty-six years, with but a slight break, Mr. McClary has been engaged in business in the Forest City.

What manner of man is he who has thus been able for over half a century to direct the affairs of a large industrial plant? What has been the reason for his business success, what the secret of his continued physical strength and keen mentality?

The truth can be found in a study of the man himself. Concentration, foresight, the power to discriminate wisely, a proper regard for the laws of health conservation, are among the qualities which have enabled John McClary to remain an efficient executive head of a large corporation for sixty-six years.

The purposeful strength of the man does not manifest itself on a cursory glance. His typical pose seems to hint at relaxation rather than concentration. Among its other furniture the private office contains a capacious rockng-chair, swung well out into the middle of the floor. Into this comfortable piece of furniture the octogenarian manufacturer of stoves and tinware customarily thrusts himself, leaning well back, one leg crossed heavily over the other. He rocks back and forth very gently, at times almost imperceptibly. With his derby hat pulled over his eyes, his large frame reclining at ease and his expression generally exceedingly solemn, he looks for all the world as if he had been lifted bodily from the piazza or rotunda of some big hotel and placed in the middle of a business office.

The analogy however extends no further. From the depths of that self-same rocking-chair there emanates a dynamic force that is still powerful to drive the huge industry that bears the McClary name. The body may lounge but the mind is alert and active.

It is focused on the task of keeping wheels running smoothly and preserving the prosperity of the business. The veteran's interest is not confined to that of a superannuated manager, who is permitted a little diversion in the form of pretended supervision. It is a real and dominating influence felt in all parts of the works.

With clearness and deliberation that makes repetition unnecessary John McClary dictates correspondence and memoranda to his secretary. He possesses a flow of language that wonuld be the envy of many a less-gifted business man, while his words are well arranged and his sentences quite grammatical. Customarily he sits with a pad on his knee on which, as he dictates, he draws all manner of hieroglyphics; occasionally he makes notes in a hand which is almost undecipherable, for penmanship was never one of his strong points.

Of course, while it is true that his personality still dominates the great industrial mechanism and his word continues to be all-powerful, a large proportion of the detail of management has been handed over to Lieut.-Colonel Gartshore, the company's vice-president and John McClary's son-in-law. Colonel Gartshore has won the entire confidence of the founder of the business just as he has gained the esteem of all his business associates, and to him must be attributed a great deal of the prosperity of the industry during recent years. Mr. McClary's present interest is confined very largely to the financial end of the company's affairs, though he keeps an eye on all departments of its activity.

*Reprinted from MacLean's Magazine

His punctuality has become proverbial. Precisely at nine o'clock every morning, he climbs out of the automobile which has brought him from his house to the general offices of the company and goes upstairs to his room. Exactly at eleven o'clock he leaves for home. The stroke of three sees him back again at his desk and at four-thirty to the minute his day's work, so far as the office is concerned, is done. He sticks to this routine with the utmost regularity and will not alter it except for the most important reasons. It is also a part of his established programme to walk through the works every morning and make a personal inspection of everything that is going on.

John McClary is proud of two things. One is the success of the business undertakings, to which he has devoted his life. The other is his family connection. The McClarys are an old family, whose ancestry, thanks to the veteran's fondness for working out genealogies, has been traced back for many centuries. On the paternal side he is the descendant of a Scotchman who came to America many years before the Revolutionary War. His grandfather, who took part in the War on the American side, married a grandneice of John Adams, the second president of the United States, and through her was related to John Quincy Adams, the sixth president. His father, John McClary, Sr., was born in New Hampshire in 1784, but moved to Pennsylvania in early life and there engaged in the lumbering business. He married Miss Sally Clark, a descendant of General Stark of Revolutionary fame, and had a family of twelve children, of whom John McClary, Jr., was one of the youngest members.

In 1813, during the war between England and the United States, the Pennsylvania lumberman had the misfortune to lost a large cargo of timber; which was seized and burned by the English. The disaster crippled him financially and he determined to move to Upper Canada and there seek to restore his fortunes. He accordingly transferred his household goods to the Township of Westminster in Middlesex County and settled near the village of Nilestown, where he carried on the joint occupations of farmer and lumberman. At the parental home on January 22, 1829, the present John McClary was born.

The great adventure of John McClary's life took place when he was a young man twenty years of age. He had left home two years previously and had apprenticed himself to a tinsmith in London, under whom he learned his trade. The excitement of the great gold rush of 1849, however, captured his fancy and he set off for California. He traveled by the Panama route, a circumstance which doubtless accounts partially for his present keen interest in the Panama Canal, and, arriving in San Francisco, decided to set up as a tinsmith. He opened a small shop and remained in business with varying success until a terrific conflagration destroyed the greater part of the city and reduced his premises to ashes.

At a loss to know what to do, he was persuaded by a couple of friends to accompany them to the diggings. The account of this expedition as related by himself is full of intense human interest. The trio had to tramp many miles on foot, carrying their belongings on their backs. After enduring many hardships and being almost worn out with fatigue, they reached their goal. But luck was against them. It just required three days to convince them that the enterprise was hopeless. In those three days and in Mr. McClary's own words they did not find ten cents' worth of gold, and being unable to maintain themselves on such small scrapings, betook themselves back to the Coast. John McClary did not remain longer in California. He returned to London and resumed the occupation which had been interrupted by the wild-goose chase to the gold fields.

It was now that the firm of J. and O. McClary was formed in a very humble way, the returned gold seeker being joined by his brother Oliver. Their first undertaking was the manufacture of tinware. John superintended the industry, while Oliver set out to peddle the products of their small factory, through the country. These were the halcyon days of peddling and peddlers with their carts were familiar figures on the country roads. Soon the business began to expand and presently the brothers had set up no fewer than forty of these old-fashioned commercial travelers. Then to their output they added plows and for a time produced large quantities of implements. At last they made their most important departure by undertaking the manufacture of stoves.

To relate in detail how the business developed from very small beginnings to its present important proportions is unnecessary. Growth was the outcome of hard and persistent work. Neither of the brothers dissipated their energies in other directions. Society had no charm for them and social ambition was not in their line. They lived plainly and most abstemiously, devoting all their attention to the progress of their business. John McClary, though younger than Oliver, took the lead and being shrewd and far-sighted, carried along the growing enterprise with great success. Today surviving his brother by several years, he can look forth and see two immense manufacturing plants humming with industry and giving work to over 1,200 hands; large warehouses, filled with the products of these factories, situated in all the chief trade centres of Canada; and a fine, well-built city surrounding his works and called into being largely as a result of his endeavors. Surely no mean achievement this for any man.

To-day, John McClary, fourscore and six years old, is just as plain-living and unpretentious a man as was that young John McClary, the tinsmith's apprentice, sixty odd years ago. He may be proud of his achievements and of his descent, but this pride does not exhibit itself in any manners of superiority or attitude of greatness. He is well-known to the workmen in his factories, and among the older employees at least, he is on terms of personal friendship.

Quite a typical incident of his thoughtfulness of others, is related. Recently an addition was put up to one of the plants. John McClary recalled that an old carpenter who had helped to build practically all the buildings occupied by the company, was confined to his house, unable to do any more work. It occurred to him that it would please the old artisan to be remembered on this occasion. He accordingly sent his motor for the old man, brought him to the new building and had him drive a few nails, so that he might be able to say that he had taken part in building every part of the plant.

Incidents such as this might be multiplied. Perhaps in no other industry in Canada has welfare work been so much emphasized as in the McClary plants in London and while Colonel Gartshore deserves much credit for its elaboration, yet without John McClary's interest and support, the present splendid system could hardly have been developed. He has shown a real concern for the well-being of his employees and in endeavoring to keep the flow of work at an even level, alike through periods of prosperity and depression and through summer and winter, has done much to maintain them in comfort and prosperity. He has always adopted the principle that so long as a man is doing his best, his efforts will be appreciated.

Wrapped up as he has been in his business, he has had no time and little inclination for social intercourse. He is not a club man, has never gone actively for politics and has taken no part in sports. His sole diversion is a game of cards and to card-playing he is strongly addicted.

Transportation is probably Mr. McClary's pet subject, because it concerns his business most nearly. He will discuss the effect of the opening of the Panama Canal, the enlargement of the

(Continued on next page).

DOING BUSINESS ON A STRICTLY CASH BASIS.

(Continued from page 48.)

munity. He replied: "I believe you can train farmers to see the advantage of trading with a firm who pay cash, and can thus give them the advantage of their discounts. It is a mistake to start a credit business. It induces people to live beyond their means. We run an undertaking business in connection with this store, and we even get the cash for funerals before we deliver the goods."

A delivery wagon is employed, and orders are taken on the phone for C. O. D. Care is taken to send cash with every order to supply change for a five or ten-dollar bill, so that there can be no kick from that direction. Then there is nothing for the delivery man to do but to get the money, or bring back the goods.

"It's short, but sweet," said Mr. Moody, Jr., commenting on the system. It was time for him to put in a word to substantiate what his father was saying, so he told a story of a relative of theirs who ran a credit business out by Portage la Prairie somewhere. He used to come over to Selkirk and "kid" them about being so slow with their old-fashioned cash system. He was doing a big credit business, and had accounts amounting to $12,000 on his books. He decided to sell the business, but although it is several years since his business changed hands, he still has $5,000 on his books which he finds it hard to collect. The time he has spent collecting that $7,000 he could almost have made it. Now he has decided to go into business again for himself, "and this time," said Mr. Moody, Jr., with a twinkle in his eye, "he's going to try out another system."

At the close of the interview, Mr. Moody, Sr. remarked: "It's a mistaken idea to do a credit business. Unless a man's capital is as big as his stock, he can't do it. I realized this when I started in without a cent of cash."

BIG GAME HEADS.

Miller, Morse Hardware Co., Winnipeg.

O'er the stairway landing, in Miller-Morse Hardware Hall, a group of heads are hanging which confronts you from the wall. A fine and old "Bull Buffalo" who many a tale could tell, of mighty herds and wanderings ere to the gun he fell. The "Big Horn" of the Rockies, a King 'mongst crag and peak, who baffled many an enemy of those who did him seek. A wise and lofty wisdom could he no doubt propound; his learning was the highest till he was brought to ground. And then we have the stately "Moose," the Elk and Black Tail Deer. Each led a noble, dauntless life, without a sign of fear. Entrusted to their tender care was the guarding of the frail. In all they make good stories of hunter, gun and trail.

EIGHTY-SIX YEARS OLD.

(Continued from page 52.)

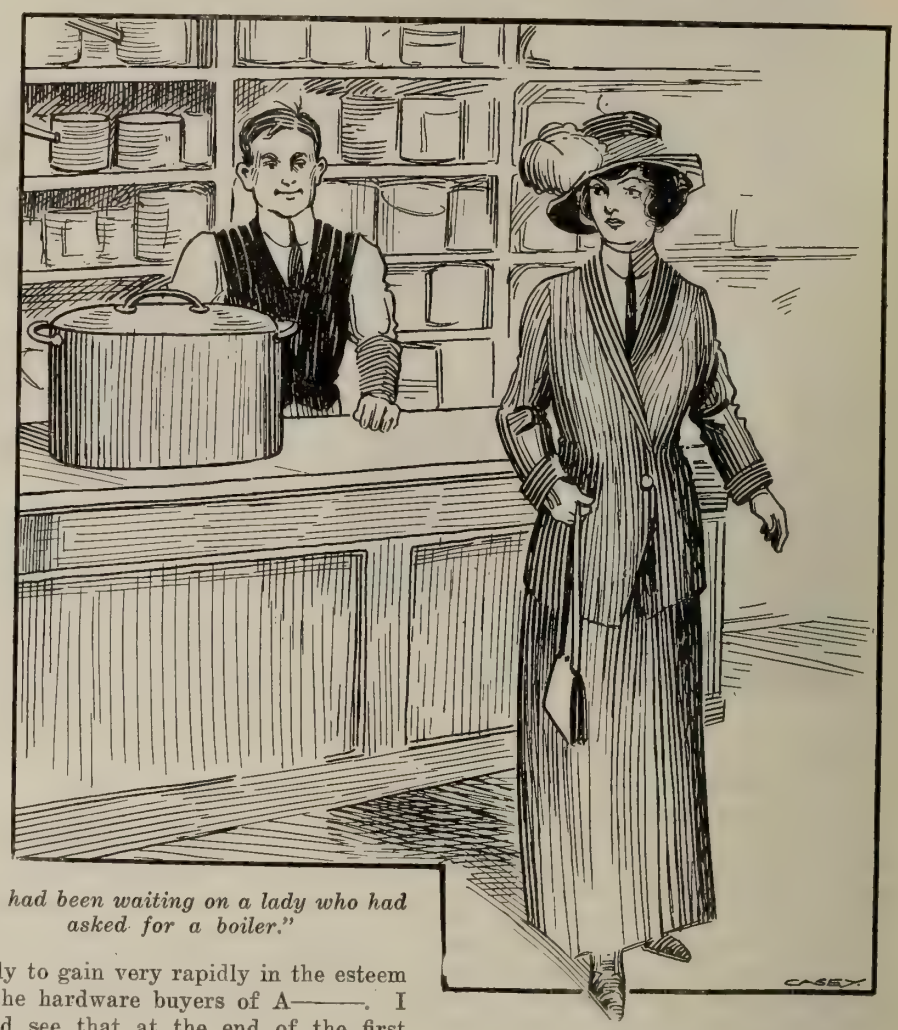
Welland Canal or the widening of the Erie Canal, with intimate knowledge of the situation, and in the recent agitation in London for the electrification of the London and Port Stanley Railway, he was a tower of strength to those who favored the scheme. Not only in speeches, mostly to mass meetings of his employees, but also through letters to the press, did he make his opinions known.

Mr. McClary no longer takes any exercise but he makes up for this lack by frequent massages. To this treatment he attributes his continued good health, which is really a matter of remark in one of his years. He also contrives to sleep a good deal and is so regular in his habits that he is like some well-balanced machine.

There is an attribute of John McClary's which commends him to all with whom he comes in contact, and that is his laugh. He has the heartiest laugh that one could well imagine. It bursts out at the mention of some amusing incident and resounds through the whole office. So entirely spontaneous is it that one can scarcely mark its coming. At one moment the heavy face will be immobile. Next instant the eyes will twinkle and out will come the almost boisterous laughter. He is a man who is quick to grasp the funny side of a situation and who thoroughly enjoys a good joke, which may be another reason for his longevity.

The Inside History of a Hardware Business

The accompanying article is the third of a series, telling how a hardwareman got his first start in the business and how he has subsequently developed it. The facts given are exactly as related by the merchant himself to the writer. Figures quoted are approximately correct. Only names and dates have been changed in order to preserve the incognito of the merchant. This and succeeding articles will tell how Hardy managed to put his rather risky undertaking on a firm financial basis.—Editor.



By Byron J. Morrow.

THE opening day was not a great success—at first. In fact, the first day it could not be called a success at all. We had a few customers in, but at no time during the day did we have what could be termed a rush. The cash in the till when we closed up was just five dollars short of what I had reckoned would make an average day's sales.

And in that way it continued for a week. I advertised regularly during the week and could probably credit what business I did get to that source. We were selling goods at prices which should have appealed to the close-fisted burghers of A———. We were giving good service and trying in every way to please our customers. But the people were not coming, nevertheless.

This phenomenon I put down to a deep-seated conservatism, a disinclination to change and a distrust of anything new. My methods were novel. My prices were low, but the men of A——— were more than half inclined to think that there was a fake somewhere. And then they had fallen into the habit of dealing either at Dilling's or Brown's. There were always two or three customers hanging around the door of Dilling's hardware and this put shopping there almost on a social basis. One was always sure to meet an acquaintance, to discuss crops or politics with, and down at Brown's the same personal element served to draw trade that way. Brown was an alderman, a pillar of the Methodist church and a regular attendant at three lodges.

Now Burton, my predecessor, had never made friends. He had gained the reputation of being a crabbed, self-opinionated man with no personal interest in the town or its people. It had been no pleasure to deal with Burton; and so the men had just naturally drifted to Dilling and Brown. I am not what one would term a "hail-fellow well met," myself. Never during the time that I had been on the road had I landed a dollar's worth of business that I knew of on the sheer basis of personality. I had plenty of good friends among my customers, it is true, men who respected me highly and who remember me to this day, but I lacked the expansive, friendly temperament that "gets across" at the first meeting. Laboring under the handicap of Burton's unpopularity, I was not

"He had been waiting on a lady who had asked for a boiler."

likely to gain very rapidly in the esteem of the hardware buyers of A———. I could see that at the end of the first week.

But I did not allow myself to get very badly discouraged. "There's a way to get these people to change their opinion of my store," I said to myself. "Just what the way is I don't know, but it won't take me long to find out."

I was sure of this much: That I would have to take a different way of winning favor than the personality route. And the way to do it dawned on me one afternoon during the second week as I was walking back from the post office. I had to pass both of my competitors' stores on the way and one fact about them impressed itself very strongly on me. A group of men blocked up the entrance, which was small enough in any case in either store. In order to enter one would have to press through the group of loungers and customers.

"No woman would even make an effort to get into those stores," I said to myself. "And it's the same at any time of the day. No wonder that the men do all the buying of hardware in this town."

I kept thinking along that line until the idea became fixed in my mind that I could establish a new order of things. "I'll let the men go hang," I said. "Instead of trying to get them away from Dilling and Brown, I'll build up a trade with their wives. I have the stock and the store to do it."

It is, of course, a fact that the hardware store caters primarily to men and no business can be made a success unless the favor of the male element of the community is won. I knew this well enough, but I was basing my operations not on a law of business but on a law of human nature. Get the wife trading at a certain place and you are bound in time to get the husband as well. My experience certainly proved the accuracy of this presumption.

And so I started in to win the attention of the good wives of A———. I had promised to make my store a new hardware store run on new lines and this was carrying out the pledge with a vengeance. I prepared my advertising copy with the one idea, in mind, talking to the ladies always and never getting away from the subject of household goods. I kept the store windows filled with all varieties of household lines, spending a good deal of time in the arrangement of each display. Every week

I sent out a letter to a selected list of housewives, in which I described articles of a special nature which were being offered. These letters always contained references to the special facilities that our store offered, pointing out that no lady need hesitate to pay us a visit.

It was a risky policy to adopt, as things stood, but results soon began to manifest themselves. Inside of three weeks I found unmistakable evidence that my campaign was beginning to succeed. We began to have calls from quite a number of women each day. I made it a point to get the name of every woman who entered the store for the first time and that night I wrote her a personal letter, thanking her for calling and inviting her back.

Business in household goods grew apace. In the other departments things languished but I did not mind this so much as my volume of business was large enough to enable me to keep the store afloat and to meet payments as they came along. I wasn't buying much those days. The other hardwaremen were inclined to scoff at the way I was going about getting business. "The ladies' store" was the name they gave my place.

It was not long before results of a more substantial kind began to manifest themselves. The wife of a contractor who had called in several times, making purchases on each occasion, came into the store one day to look at an aluminum saucepan—and her husband was with her. They had been down town shopping together and, when she saw the kind of saucepan in one of our windows that she wanted, the two of them came into the store.

I waited on them and took the opportunity to talk to the man about the building trade. He had extensive interests, I found, and bought a great deal of hardware. For some years he had given all his business to Dilling and did not seem inclined to change. However, I had studied the builders' supply question pretty thoroughly and I succeeded in interesting him. We talked for twenty minutes after his wife had completed her purchase of the saucepan. I had planted a few original ideas in his mind by that time.

"Next house you build, let me have a look at the specifications," I said, as he went out.

"Alright," he said. "I will."

He fulfilled his promise; with the result that I got the contract. And I have secured a good share of his business ever since.

This instance was duplicated in various ways. By getting the housewives interested in hardware and by associating the word hardware in their minds with A. Hardy & Co., I got their husbands interested in time.

An important part of our campaign had been to make the store just as attractive and inviting as the other two hardware establishments were dingy and uninviting. A good share of the credit for this belonged to the junior clerk. He was an ingenious lad with a natural talent for the arrangement of goods, a trait which I discovered quite early.

"Bill," I said to him one day, "you're going to have a new title. From now on you can call yourself Display Manager."

"You mean that I'm to have charge of the window displays?" he said, quite pleased at the prospect.

"You're to be just what the title implies," I replied. "You will be responsible for the appearance of the store as well. I want you to concentrate on this part of the business. If we're going to get a classy trade we must have a classy store."

"Right," said Bill.

To do him full justice, he soon proved his worth. Every spare moment he put in fixing up things and he soon had the place looking neater than any hardware store I had ever seen. It was quite an eye-opener to our customers who were used to what might be termed the mesozoic type of store—one that dated back about 200 B.C. I raised Bill's salary after the first month.

But as for Art, the senior clerk, I soon discovered conclusive evidences of his unfitness. He was quite ignorant of the first elements of salesmanship and absolutely devoid of any sense of responsibility to the business. I judged from his attitude that he thought he was doing me a favor by staying in my employ and drawing his $14.00 a week. Sometimes he made suggestions to me in an off-hand sort of way, as much as to say: "You won't last here long, but perhaps this will help you to hang on a little longer." His suggestions were generally very vague and always more or less worthless.

He got down late in the mornings, and never committed the mistake of working a second over time. He fell into the habit of ragging Bill about the way he was working. I stood this patiently for a time but one day he provoked me too far—and that finished him for good and all.

He had been waiting on a lady who had asked for a copper boiler. She went away without buying although the merest effort on his part would have landed the order. I could see that but, being busy with another customer, I could not step in. Art did not even accompany the lady to the door, but with the utmost equanimity drew a handkerchief from his pocket and started to polish his finger nails, whistling cheerfully the while.

I left my customer and walked over to him.

"You lost that sale," I said grimly. "Is there anything in that to look so blamed cheerful about?"

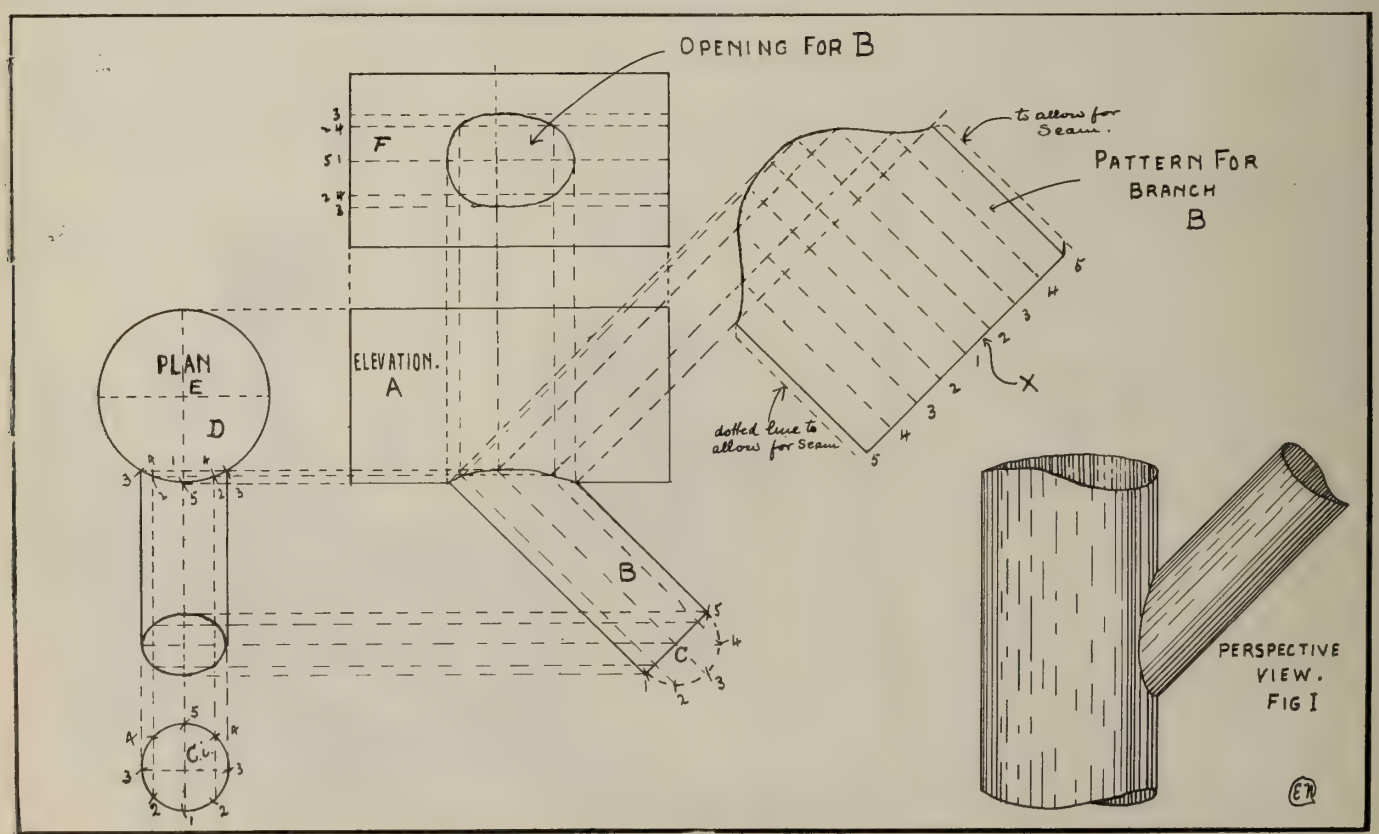
"Well, there's nothing to be gloomy about anyway," said Art. "It's not the first sale that's been lost."

"It's the last you'll lose for me," I declared. "I could have forgiven you letting the customer go when she wanted the article, but your whistling settles it. The trouble with you is that you don't give a darn whether you sell goods or not. This will be your last week with me."

(To be continued in our next issue.)

"This will be your last week with me."

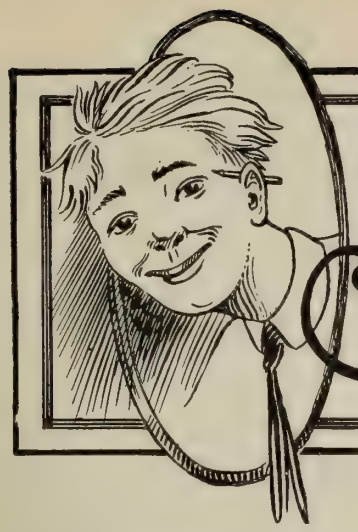
Problems in Sheet Metal Work



IN this issue we will describe how a branch may be made at 45 degs. with a main pipe, such as is shown in Fig. 1. Many tinsmiths and sheet metal workers when placing a smoke pipe branch into an already existing one will simply make a square branch similar to an ordinary tee. Such a branch may do all right in a stove pipe, but in furnace or boiler work any branch is better when made into the existing or main one at about 45 degrees.

The first step would, of course, be to determine the sizes required and draw an elevation of same, as shown in A, which is seen by the solid outline. This example does not take in any particular size, as sizes are not necessary in showing how a pattern of this nature is to be developed.

Having drawn the elevation, determine the centres of A and B; then form half-circle C on the branch and full circle on, as shown in plan D. Next place compass at E in plan and transfer the diameter of branch, and in that way determine full plan of both the main cylinder and branch. Next erect the centre line, as shown, and form small dotted circle. Next divide C^1 in equal parts, as shown, transferring same measurements to half-circle C, shown on branch B. Next draw dotted lines, shown at C^1, 1, 2, 3, 4, 5, 4, 3, 2 upwards until same intersects the circle D, and repeat the operation at C, 1, 2, 3, 4, 5 on the branch B. Next draw lines, as shown, from where dotted lines intersect plan to where they will intersect the dotted lines drawn at C, 1, 2, 3, 4, 5.



The next step will be to draw a section of elevation where the pattern of opening may be developed. This is done by extending lines upwards, as shown at F, and it may be stated this opening may be drawn on a small piece of material and afterwards scribed out on the larger sheet, which would be used on the actual job. Next transfer the measurements from C_1 to section F, beginning with the centre measurements 5, 1, until all have been transferred; then extend these measurements, as shown across section F. Now erect dotted lines upward from elevation at points where dotted lines from plan D and branch B intersect, and in doing so another set of intersections are formed in F, and at points where these lines intersect is shown the pattern of opening, as described.

Our next step will be to develop pattern of branch. This is done in exactly the same way as a square elbow pattern developed, except that the points of intersections are used which has been formed by the various intersected dotted lines from plan D, branch B, and vertical lines to section F. Next draw a solid line, as shown in pattern at X, and stretch out measurements from half-circle C on B, beginning at 5, 4, 3, 2, 1, and 2, 3, 4, 4, as shown. It will be seen points 5, 5 are the shortest measurements and point 1 the longest. Next erect dotted lines from the stretch-out X upwards until they intersect the dotted lines last drawn. Then by connecting the various points intersected the pattern the branch is completed.

NEW WAREHOUSE AND OFFICE.

The Pease Western Foundry, Ltd., manufacturers of steam heaters, ventilators, steam and hot water boilers, etc., 287 Donald street, Winnipeg, have erected a large new warehouse and office building, with an approximate floor space of 30,000 square feet, and provision for adding two more storeys when necessary. The new premises are on Midland street, near Notre Dame street, west, where a larger and more complete stock of furnaces, registers, boilers, etc., will be carried.

THE JUNIOR CLERK'S PAGE

METHODS THAT MAR SALES.

WHAT would the average salesman, or any salesman in fact, think, says a writer in Business (Detroit), if a prospect or a customer suddenly started to tell the salesman that he knew nothing about the art of selling goods? Wouldn't the salesman, whether he was a star man or otherwise, feel perturbed, annoyed and insulted if the prospect explained in detail why he thought that the salesman did not know how to sell goods? Certainly. Such a procedure would undoubtedly end up in an argument that would not be conducive to further business between the two or effectively kill any possibility of opening of an account.

With that point settled beyond any doubt comes another and more important one. How can salesmen expect to do business when they act in precisely the same manner toward the retailer. It must be vexing to a successful and experienced dealer to have a young salesman come into his store or office and try to parade his knowledge of the dealer's business—try, in fact, to tell the dealer that he does not know his business. Such really is the case. Not only this, but many salesmen cultivate habits and mannerisms that effectively choke off custom and then when their goods are turned down the salesman wonders what can be wrong.

A young salesman for a well-known collar concern recently stepped into a men's outfitting store and after introducing himself to the storekeeper he said: "Will you allow me to see one of your collars?" The storekeeper opened a box, took out a collar and handed it to the salesman, who, in turn, took it to the doorway to get the benefit of the stronger light. First he examined it with the naked eye and then by the aid of a pocket microscope. He turned it inside out, bent it back and forth as though testing the quality of the interlining, then after sundry other moves he restored it to its natural shape by bringing the button holes together to see if it was a true fit.

Walking back to the counter he handed the collar to the storekeeper with a pitying smile and shaking his head with a "I thought so." "What's the matter with it?" asked the storekeeper. "Poor material—cotton top—only threefold and badly shaped through poor cutting. I am surprised at you handling such a line."

"Well, the reason I handle it," said the storekeeper, "is because it is a good seller, my customers like it, ask for it—and I like it myself. I have tried out other brands and none have given my trade such satisfaction as this line. What you say may be true, but so long as its fit, durability and comfort suit my customers I guess I will keep it in stock."

This salesman effectively blocked the way to even a small order of sample sizes by useless disparagement of a line which the storekeeper had proved to be good. Not only did he fail to convince the storekeeper on the collar question, but he raised doubts as to his reliability in other directions. Probably this dealer would have been hard to sell in any case, but rather than convey the suggestion that he had been a foolish, incompetent buyer, it would have been better had the salesman tried to open an account by the offer of something worth consideration—advertising material free, longer time on payment or a slightly bigger discount. Disparagement of a line is a direct insult to the dealer's buying ability. The dealer looks at it in that light and, such being the case, salesmen should realize that "every knock is a boost" as far as his competitors' goods are concerned.

EFFICIENCY OF THE INDIVIDUAL.

(Continued from page 50.)

neighbor as thyself. On these two commandments hang all the law and the prophets."

As a principle of efficiency, a secondary meaning of the ideal is a definite purpose which must be pursued resolutely, courageously, and without hesitation or vacillation.

The man without a purpose is a drifting derelict, useless to himself and a menace to others. The man who resolutely follows a set purpose is the ship with the strong hand on the tiller and the eye of the helmsman on the compass.

In all history there is hardly a more pathetic figure than Columbus, dominated by his ideal of sailing westward to India, going from court to court seeking a backer for his enterprise, for years meeting only discouragement and rebuffs, but always pursuing his ideal. What a reward was his when, first of all the watching companies of his three ships, he at night saw lights ahead on the shores of the New World, and felt that his ideal has been attained! Nor was the world wholly ungrateful. Today, sainted by the Roman church, the first of a ducal family, honored annually by a great republic, the name of Columbus is a monument to the fact that even one's fellow-men give their rewards to the man who chooses a noble ideal and unswervingly pursues it.

In even the smallest detail of one's work, the first requisite is a clear idea of what is to be accomplished and then a concentration of effort upon it.

Lack of purpose is the cause of innumerable failures. The ordinary man goes to work at the end of his school days with no idea of the kind of life for which he is fitted and with no definite ideal beyond the weekly pay envelope. Work assigned to him by his superiors he does indifferently because he sees beyond it no inspiring ideal. He is through life an opportunist and a failure.

If any course of action is itself incorrect, the determined pursuit of it is mere obstinacy, and is certain to lead to failure.

This illustrates the general truth that the application of any one of the principles of efficiency may be abused into a vice.

Current News of the Hardware Trade

Severs Connection.

Frank Gould, on April 20, severed his connection with Henry Disston & Sons, Inc., Philadelphia. For some time past Mr. Gould was sales manager of the hardware department.

The Fireco Range Co.

The Fireco Range, Ltd., capitalized at $50,000, head office, Hespeler, has obtained charter. The new company is composed of Oscar Zryd, Z. A. Hall, A. W. Boos, J. F. Greig, K. B. Zryd.

Universal Tool Steel Co.

Universal Tool Steel Co., capitalized at $10,000,000—head office, Toronto—has been incorporated to carry on the trades or businesses of iron masters, steel makers, to deal in and manufacture iron, steel, etc.

Business Changes.

Cargill, Ont.—Fred Balston, London, has purchased the hardware business of A. J. Ross.

Conquest, Sask.—The Pattinson & Gunn Co. have been succeeded by Mitchell Bros.

Belgrave, Ont.—L. J. Williams has sold his hardware business to D. & J. McCallum Bros., who take possession on May 1.

New Firms.

Russel, Man.—Albert Phizachlea has started a hardware business.

Hanover, Ont.—Arthur C. Helwig has opened a new plumbing, heating and metal work business.

Toronto, Ont.—The Watson Cycle-Car Co., Ltd., capitalized at $100,000, has been incorporated.

Eyebrow, Sask.—The hardware business of C. W. Gimbly & Son, has been purchased by W. L. Black.

Personals.

Hull, Que.—Kelly & Leduc have succeeded J. A. Bonette.

D. A. O'Connor, Whitby, Ont., has joined the staff of May Bros., West Toronto.

Hull, Que.—Edward Carriere has taken over his father's business, and is making a number of changes in the store.

W. H. Wiggs, president of the Mechanics' Supply Co., Quebec, has returned from an extended trip to Cuba and Jamaica.

John Elliot, buyer of household furnishings at the Russell Hardware Co., Toronto, was presented with a ring by fellow-employees on the occasion of his leaving to take charge of his brother's store near Bowmanville.

Frank W. Dart, representing Andrew B. Hendryx & Co., New Haven, Conn.; A. W. Peck, jun., of Stanley Rule and Level Co., New Britain, Conn.; Roger M. Cox, of the Bromwell Brush and Wire Goods Co., Cincinnati, O.; and Mr. North, of O. B. North & Co., New Haven, Conn., were calling on the trade in Montreal this week.

John Hurtibuise, assistant buyer in Starke, Seybold, Ltd., Montreal, was married April 21 to Miss Barsalou, of Montreal, and left with his bride for a trip to Washington, New York, and Atlantic City. The employees of the firm made him a presentation of a set of silver and the firm sent him a substantial check.

George Williams, representative of the Canadian Yale & Towne Co., who was taken ill while at Freeman's Hotel, Montreal, several weeks ago, and has since been in the Royal Victoria Hospital, is reported to be convalescent, and expects to return to his home next week. Mr. Williams' father and mother went to Montreal from their home in Clarksburg, Virginia, in order to be with their son, and Mrs. Williams has been in constant attendance at the hospital. Mr. Williams' friends will be glad to learn of his recovery.

Western Notes.

Rivers, Man., has started a clean-up campaign.

Moore Park, Man.—J. Rutley has started a hardware business.

Winnipeg, Man.—Bernthal & Gordon have opened a hardware and furniture store.

Glenboro, Man. — G. R. Thair has purchased a hardware business at Keyes, Manitoba.

Waskada, Man.—G. R. McLean has purchased the hardware stock of T. S. Perrin.

Pense, Sask.—B. L. Van Slycke, hardware merchant, has sold out to H. McGillivray.

Govan, Sask.—Dickey & Anger have dissolved partnership; R. Dickey continuing.

North Vancouver, B.C. — D. McNairnie, hardware merchant, has sold out to C. Y. Griffin.

A. B. Bittues, Canadian general manager of the Gillette Safety Razor Co., was in Winnipeg last week.

R. P. Buchanan, the Prince Albert representative of Wood, Vallance, Ltd., Winnipeg, was in the city this week.

C. C. Ballantyne, president of the Sherwin-Williams Paint Co., was registered at the Royal Alexandra Hotel, Winnipeg, last Monday.

Vancouver, B.C.—Allison, Higgins & Ford, dealers in electric supplies, have dissolved partnership. Simon Ford has retired from the business.

F. M. Richards, formerly with the Moose Jaw Hardware Co., Moose Jaw, Sask., for several years, is starting up in the general hardware business for himself at St. Louie, a new town on the G.T.P., some distance west of Moose Jaw.

Joseph Bradley, who has been in the hardware business at Tompkins, Sask., for a year or more, and was formerly in business at Amulet, Sask., died at Manitou, Man., last Sunday afternoon at his brother's residence. The deceased took ill several months ago, and went to the Winnipeg Hospital for treatment, remaining there until recently. He felt much better, and decided to pay his brother a visit before returning to work, and died there suddenly.

W. J. Lockwood, veteran traveler for John H. Graham & Co., New York, hardware brokers, paid a visit to Winnipeg last week. He has been coming to Winnipeg for the past thirty-three years. When he first came to Winnipeg there were only two wholesale houses to call upon, many of the present large houses then being in the retail business. Since that time Mr. Lockwood has seen some big changes in the hardware business in Western Canada. On one of his early trips to the coast over the C.P.R. some of the large centres, such as Moose Jaw and Calgary, he says, were merely hitching places for cowboys. His visits to Western Canada now are confined to Winnipeg, where he is well known in the hardware trade.

The Miller-Morse Hardware Co. have organized an athletic association for their staff, and have secured grounds of 15 acres at River Park. A general meeting was held last week, and the following officers elected:—Hon. president, F. M. Morse president, S. C. Morse; secretary-treasurer, William Kenyon. A committee of the following was appointed:—W. E. Gordon, representing the office; F. Cliff, representing the shipping department; and E. Cook, representing the warehouse. It was decided

that the games most suitable for the grounds were tennis, basketball, baseball, and football. Such games as hockey and curling will be provided for in season. It is intended to enter the various leagues, but not to devote all their energies to that. One week there will be a tennis game for the girls, and so on. The firm aims to keep it among themselves, and to let everybody from the office boy up have a whack at something. The colors green and white have been decided upon.

RETIREMENT OF F. H. GLIDDEN.

At the last annual meeting of the Glidden Varnish Company, F. H. Glidden, its founder, and who for thirty-one consecutive years had filled the office of president, sprung a surprise to the board of directors, by tendering his resignation.

In so doing and in words of deep feeling Mr. Glidden expressed his gratitude to those present for the many years he had been honored with their confidence in the management of the company's business. He made it clear that the prosperity of the Glidden Varnish Company was due more to the able assistance and co-operation of the competent young men and his four sons who had given so faithfully the many years of their best service in the upbuilding of the company.

Mr. Glidden who is now past eighty years of age, but still active and enjoying good health, said it was time to give way to the merits of the younger element and declined to be re-elected president. The board of directors in appreciation of the long service rendered by Mr. Glidden, created the new office of chairman of the board of directors, to which office he was unanimously elected. The following officers were then elected, namely:—

President—Fred A. Glidden.
Vice-President—F. K. Glidden.
Treasurer—W. J. Glidden.
Secretary—R. S. Leonard.

The new president is not only popular with all his associates in the business but also with the trade he has so vigorously helped to build up, and it is assumed that with his thorough knowledge of the details of the extensive business, that the Glidden Varnish Company will continue indefinitely its march of progress.

BRIGHTEN UP CAMPAIGN.

The Sherwin Williams Co. of Canada are boosting their "Brighten Up Campaign" in the S.W.P. Magazine. The "Brighten Up" number contains many suggestions for the retailer, showing how he can push the sale of ready-mixed paints during the campaign season. In the "Brighten Up" number an announcement is also made of the prosperity window dressing competition.

The Brighten Up creed is as follows:

To Brighten Up myself—to be optimistic, cheerful and good-natured.

To Brighten Up my home and spread the Brighten Up spirit among my neighbors.

To Brighten Up my business and take pleasure as well as profit from it.

To Brighten Up my town and promote its social, industrial and commercial progress.

To promote the love of Nature, sunshine and fresh air.

To adopt Brighten Up as my slogan.

TAKE CHARGE OF DEPARTMENT.

Western hardwaremen will be sorry to learn that Mr. W. L. Cordingley, who for years has been visiting them in the interests of the sporting goods department

W. L. CORDINGLEY.

of the Miller-Morse Hardware Co., Winnipeg, will not in future be a regular visitor. All will be glad, however, to know that it is Mr. Cordingley's advancement which prevents his visits. It has been found necessary for Mr. Cordingley to remain steadily at the home house, directing from there the work of other travelers from the sporting goods dept.

Mr. Cordingley's advancement may well serve as an inspiration for young men in the trade. In 1903, after leaving St. John's College, he started with the Miller-Morse firm as office boy, and has now been placed in charge of the sporting goods department—which he as a traveler did much to develop.

NEW BULK SALES ACT.

A new Bulk Sales Act has been introduced into the Ontario Legislature. Its chief clauses read as follows:

> Before making any sale in bulk within the meaning of this Act, the vendor or transferor shall give his creditors fifteen days' notice by registered mail of his intention so to sell, and every disposition made of the purchase money, or of any note or other security therefor, in the absence of such notice or before the expiry of fifteen days from mailing of such notice, shall be fraudulent and void; provided, however, that if all the creditors of the vendor or transferor consent in writing to the said sale, such notice shall not be necessary.
>
> Nothing in this Act contained shall apply to or affect any sale by executors, administrators, receivers or assignees for the benefit of creditors, nor by any public official acting under judicial process.

It is introduced by W. D. McPherson, a West Toronto member, the man who introduced the Bulk Sales Act last year which was thrown out.

Price List and Sample Booklet.

The Wearwell Paint and Varnish Co., St. Lambert, P.Q., has issued a 20-page catalogue and price list. The new list is neatly gotten up and gives list prices as well as general information regarding the products of the company. A neat color card, gotten up in book form has also been issued, showing samples of the various colors comprising the line of ready mixed paints now being manufactured by the company.

Guelph, Ont.—The Munder Tungsten Lamp Co. has obtained charter. The new company is capitalized at $50,000.

DO YOU RECEIVE PROMPT DELIVERY?

Subscribers to Hardware and Metal who do not receive prompt and regular delivery, each week, will confer a favor by reporting the matter to us. Hardware and Metal is mailed regularly in Toronto Friday afternoon, and should reach every town within 12 hour's run of Toronto, on Saturday morning.

Weekly Report on Market Conditions

Statements From Buying Centres on Prices and the Trend of Demand—Full Reports Dealing with Hardware, Metal and Stove Lines.

THE MARKETS AT A GLANCE.

Although trade in the hardware line is not quite as brisk as it was during the first two weeks of the month, a large volume of business is passing. The metal markets are still quiet with only a fair amount of business being done. With the arrival of warmer weather there will be a revival in business and the hardware trade in general is looking forward to a large volume of spring business. The "Clean up and Paint up" movement is spreading, and has been taken up in many places throughout Canada. It is expected that this movement will be one of the greatest boosters of the paint business ever attempted in Canada. Many price changes have taken place recently, several in a downward direction.

MONTREAL.

MONTREAL, Apr. 22.—Business has not been overly brisk, due largely to the cold and backward weather. Spring lines have been moving well so far as the wholesale trade is concerned but retailers report that the unseasonable weather has affected their sales to a very marked extent. Usually at this season there is a call for lawn mowers, rollers, etc., for the annual spring tidying up, but so far this year there has been a very slight demand for these goods. It is expected, however, almost any day now will see a change for the better and with grass growing and shrubs sprouting lawn and gardening tools will be moving freely.

There is a scarcity of houses in Montreal this year and rents are soaring almost beyond reason. It is estimated that some 30,000 families will be changing their abodes in Montreal this May day and naturally this will initiate a big demand for cleaning materials and utensils. The scarcity of houses has also stimulated building operations and builders' hardware is moving well. There has been a particularly strong demand for cheap lock sets on account of the many tenement houses of cheaper construction that are now in process of building.

Out through the country business is showing signs of improvement and generous orders have been placed for seasonable lines such as barbed wire for fencing, roofing, paints and garden utensils. A number of country merchants have been in the city during the past week but on account of the bad roads the visitors have not been as numerous as they usually are at this time of the year.

Sporting goods are reported more active. As the fields dry up the small boy is getting out with baseball and bat, and these goods, with the various equipment considered necessary to a complete enjoyment of the game, are moving quite freely. Tennis rackets, croquet sets, lacrosse sticks, bicycles and other varieties of spring and summer goods are being brought to the front by progressive retailers.

Collections have shown some improvement during the past week, but conditions are still far from ideal. The jobbers exhibit a more hopeful spirit, however, and it is confidently expected that if crop conditions are good, or at least normal, that a big fall business will be the result.

Ammunition.

In addition to the new prices quoted in last week's issue for Dominion ammunition, the following new discounts are listed for American ammunition:

22 short black	40 & 5	off list
22 long black	40 & 5	" "
22 long rifle	30 & 5	" "
22 short smokeless ...	40 & 20	" "
22 long smokeless	40 & 5	" "
22 long rifle smokeless	30 & 5	" "

This is an increase in price of 33 1-3% on rifle cartridges, 14% on long and short black and long smokeless, and 10% on short smokeless. All other prices remain unchanged.

Lead and Lead Waste Pipe.

The list price remains unchanged at 7½ and 9 cents per pound for lead and lead waste pipe. There is a possibility of a further change, however, owing to the unsettled state of the metal market on account of the Mexican situation.

Wrought Iron Pipe.

No change has yet taken place in the price of lapweld pipe. It was thought at the time of last week's report that new prices would be issued almost immediately for pipe from 4½ to 10 inches on account of the increased tariff. It seemed so sure that prices would be increased that quotations were withdrawn. It now appears, however, that owing to a quiet market no change in prices will be made at present and the public will be allowed to benefit by present quotations for a time at least.

Screws.

There has been a fairly steady demand and as the American price is still low there is no immediate prospect of an advance. It is possible that the new tariff may have an effect on the price of brass screws and that it will also affect lock sets where there are brass or bronze trimmings.

Builders' Hardware.

Buying has been quite brisk in this department owing to the large amount of construction work under way. It is also noticeable that building operations increase the sale of explosives, as most of the building around the city is on very rocky ground where blasting is absolutely necessary.

Metals.

There has been little change in any of the markets and the demand has been about as usual. The Mexican situation has caused an unsettled feeling in several lines, particularly in lead, which enters so largely into war materials. It is anticipated that a change in prices will come at any time now. The amount of business passing in lead at present is very small and prices have been marked down from $5.25, $5.50 to $5.00 -$5.25.

Tin.

There has been no change since last week when the price declined one cent. The market is weaker but the price remains at 42½ to 43 cents.

Spelter.

The quotation of $6.00 to $6.25 stands, with only a fair demand. This market is very quiet just now.

Copper.

Conditions in this market show no change from the reports of the past few weeks. The quotation of $16.50 still holds with only a limited amount of business passing.

Antimony.

The weakness that has characterized this market for several weeks continues and the price of $9.00 remains unchanged. A small amount of business has been done.

Iron.

Though like all the other metals, this market has been weak for some time there has been no alteration in price and the figure of $19.00 per hundred is still in effect.

TORONTO.

TORONTO, April 23.—Business with wholesale hardware firms continues fair, although not as brisk as during the first two weeks of the month. Retailers report an improvement in conditions. With the steady improvement in weather conditions the demand for hardware lines should become more pronounced.

There is little or no change in the general condition of the metal market, which is still weak. Buyers are still cautious and orders are rather small.

A number of price changes have taken place during the week. Bar iron and tin have declined. Wrought steel butts have declined in price. Ammunition has advanced. Wire nails will likely advance in the near future.

Decline in Bar Iron.

Toronto hardware jobbers are now quoting bar iron at $2.00 base F.O.B., Toronto, and $1.90 base F.O.B., factory points in Ontario.

The Nail Situation.

Referring to the wire nail situation in Hardware and Metal of April 4, said:—

"Much speculation exists as to what effect the tariff changes will have on the nail market. Toronto dealers think that an advance will take place. Toronto quotations have been very low lately. Considerable price-cutting has been in evidence. The ruling quotation has been and is at the time of writing, $2.10 per keg base, although some lower prices have been in evidence. Several Toronto firms believe that the imposition of a duty on wire rods will have a tendency to advance quotations in the finished product."

Since the above was written, the ruling price on wire nails has remained at $2.10 base, and nails are being quoted ever, that there will be an advance in wire nails within the next week or ten days.

The Metal Markets.

There is no change in the general condition of the metal markets. The orders coming in are not large, and buyers are still exhibiting caution. Weakness in the primary markets has been quite evident for the past two weeks. Spelter has advanced 5 cents per 100 lbs. at Toronto. Copper remains unchanged, and is fairly steady. Lead remains unchanged, while tin has shown a decline of ½ cent per pound. Pig iron remains unchanged. The ruling prices in Toronto are as follows:—Tin, 38¾c to 41c lb.; lead, $4.85 to $5 per 100 lbs.; copper, 15½c to 16½c lb.; antimony, 8¾c to 9c lb.; zinc, 5½c to 6c lb.; ingot brass, red, 13c to 15c lb.; ingot brass, yellow, 11½c to 14c lb.; half-and-half solder, 24c to 26c lb.; pattern aluminum, 23c to 24c lb.; ingot aluminum, 19c to 20c lb.; acme solder, 19½c lb.; easy wiping solder, 20½c lb.; star extra, 22¼c lb.; wire solder, 27c.; tinkers' bar solder, 28c lb.; lead wool, 8c lb.

Decline in Price of Butts.

Wrought butts have declined in price and there appears to be price-cutting going on at the present time. The ruling quotations are:—

No. 840 wrought butts..... 70-5%
No. 804 wrought butts 70-5%
Other numbers 60-10-5%

Advance in Ammunition.

An advance has taken place in Toronto quotations on ammunition, and the new discounts are quoted herewith:—

Dominion	B.B. 22	50-10-2½%
"	C.B. 22	50-2½%
"	22 short black	50%
"	22 long black	50%
"	22 L. smokeless	50%
"	22 L. rifle black	40-2½%
"	22 L. rifle smokeless	40-2½%
"	22 shot black	40-20%
"	22 shot smokeless	55-5%
"	rim fire other sizes	44-2½%
"	C-F pistol sizes	20-2½%
"	C.F. sport. & military	10%
Brass shot shells		45-12½%
Primers		10-2½%
American	22 short black	40-5%
"	22 long black	40-5%
"	22 L. smokeless	40-5%
"	22 L. black rifle	30-5%
"	22 L. rifle smokeless	30-5%

Rope Twine, Etc.

A decided improvement is noticeable in business in rope, twine, etc. Binder twine booking continues in a very satisfactory manner. Toronto quotations are as follows:—

Best Pure Manila	15c lb. base.
British Manila	11c lb. base.
African Hemp	11c lb. base.
Sisal Rope	10½c base.
Lath Yarn Single	9¾c lb.
Lath Yarn Double	10¼c lb.

Other lines are shown in current market quotations.

Binder twine prices are:—650 ft. twine, 13½c lb.; 600-ft. twine, 11c lb.; 550-ft. twine, 9¾c lb.; 500-ft. twine, 9¼c lb.; ⅛c per lb. allowance on 5 tons and over; ¼c lb. allowance on 10 tons and over; delivery allowed on 300 lbs. and over.

Stoves, Etc.

Trade in gas stoves is piling up splendidly and Toronto stovemen report that business in the gas range line is all that could be desired for this season of the year. Trade in other lines is rather quiet at present.

WINNIPEG.

WINNIPEG, April 21.—Continued cold weather has caused somewhat of a setback in the hardware business, business now being only just fair, with no rush, and so far not nearly so good as in March. The colder weather is keeping people from getting out and doing gardening, building, etc., on which the spring hardware business depends to a very great extent. Business in builders' hardware is also suffering proportionately.

Of late there has been a heavy demand for wrought iron pipe, all the wholesale houses experiencing this. Why there is such a brisk demand this spring local brokers are unable to explain. There is also a pretty good demand now for galvanized sheets, which are selling in small lots to the country stores. Nails have been very quiet of late. There has been a fairly brisk demand throughout the West for agricultural implements, hardwaremen having been sorting their stocks to be ready for the big demand when it comes along. Among other seasonable goods that have enjoyed a good demand are pumps, poultry netting, wire cloth, and mosquito netting. The demand for the last of these has been so great wholesalers have been compelled to repeat their orders.

A large Winnipeg wholesale house, who have a large staff of travelers in the field, have been informed by their men that farmers are seeding all along the line, and travelers are of the opinion that business before long will be exceptionally favorable. A representative of this firm stated that everything depended on the weather and the way the crop went in. The fine business enjoyed in March they accounted for by the fact that January and February were lean months, most of the hardwaremen in the country having delayed their buying to see how things panned out. The large amount of business done in March was a great surprise to most hardwaremen.

Changes in Prices.

A reduction of great importance was made recently in the prices on certain lines of enamelware, which wholesalers believe will keep out German lines. The reduced price is in dish pans, preserving kettles, tea kettles, tea pots, coffee pots, sugar bowls, rice boilers, lipped saucepans, pudding pans, both round and oblong, round milk pans, chambers, wash bowls, soap dishes, water buckets, water pitchers, dippers, and pie plates. The reductions vary from 5 to 20 per cent., and affect Sheet Metal Products, Pearl and Diamond brands, McClary's Imperial and Canada, and Davidson's Colonial and Premier wares.

Among changes in prices recently

made are Alberta barbed wire, now f.o.b. Fort William, $1.70, and Winnipeg, $1.98. Harvest tools are reduced, the new discount being 50 off, instead of 50 and 5. A slight reduction has also been made in the price of padlocks. All prices of iron pipe and galvanized pipe are down.

Stoves.

Business in stoves and ranges is still reported as quiet, and wholesalers are are not surprised that it is quiet. Summer lines in refrigerators and oil stoves are beginning to move rather briskly now.

Paints.

One of the large Winnipeg paint manufacturers reports this week that the last seven days have been exceptionally brisk in the paint business. Fine weather is of great importance, and this firm informed Hardware and Metal's western representative that a drop-off in trade can be noticed with every wet day that comes along. Sorting business has been good so far, with some restrictions. There have been no changes in paint prices here following the change made last week in Montreal. Local houses reduced their prices several months ago, and all are pretty much alike now.

Linseed oil is selling slowly, but business in this is expected to become brisk before long. There is a pretty good demand for white lead, with little doing in turpentine or glass. The glass business may be expected to open up again in two or three weeks. Putty during the past two or three weeks has been selling freely in casks.

NEW WINNIPEG QUOTATIONS.

The attention of the Western Canada trade is drawn to the new prices, here shown, which arrived too late for change to be made on current market quotation page:

Iron pipe: blk. ¼ *in.*, $2.50; ⅜ *in.*, $2.60; ½ *in.*, $3.20; ¾ *in.*, $3.75; 1 *in.*, $5.50; 1¼ *in.*, $7.45; 1½ *in.*, $8.90; 2 *in.*, $12.00; 2½ *in.*, $19.25; 3 *in.*, $25.15; 3½ *in.*, $30.25; 4 *in.*, $35.50; 4½ *in.*, $42.35; 5 *in.*, $49.75; 6 *in.*, $66.40.

Galvanized iron pipe: ¼ *in.*, $3.00; ⅜ *in.*, $3.60; ½ *in.*, $4.20; ¾ *in.*, $5.00; 1 *in.*, $7.35; 1¼ *in.*, $9.90; 1½ *in.*, $12.00; 2 *in.*, $16.00; 2½ *in.*, $25.60; 3 *in.*, $33.45.

Linseed oil: raw, per gal., 68c; *boiled, per gal.*, 71c.

Harvest tools: 50 *per cent.*

Alberta barbed wire: f.o.b. Fort William, $1.70; *f.o.b. Winnipeg*, $1.98.

Sporting Goods.

New prices are announced by western houses on 22 ammunition, on both Dominion and American. They are as follows:—

22 short black Dominion 47½ per cent. and American 40 per cent. off list.

22 long black Dominion 47½ per cent. and American 40 per cent. off list.

22 long smokeless Dominion 47½ per cent. and American 40 per cent. off list.

22 short smokeless Dominion 55 per cent. and American 50 per cent. off list.

22 long rifle black Dominion 35 per cent. and American 33 1/3 per cent. off.

22 long rifle smokeless Dominion 35 per cent. and American 33 1/3 off.

A new Savage rifle is on the market, model 1914, 22 calibre, price $13, Winnipeg.

KEEPING MAIL ORDERS AT HOME.

(Continued from page 47.)

minute descriptions. All of this is going on while the average merchant is sitting in his store, hoping that the people will drop in and ask to be shown something.

Tell Them You Have the Goods.

Don't wait. Take your list of names, write each one a personal letter, specializing on some one seasonable article in your store, telling them in a convincing way that you have something important you want to say to them about this particular article the first time they are in your vicinity. They will come then, and see the article you want to sell. Make a lot of intelligent suggestions about other articles that the customer could use to advantage. Describe each one of these lines in detail, bringing out strong points about quality and serviceability. You can do this better in personal conversation, with the goods before you to demonstrate, than any writer for any mail order house can possibly do. Fight the mail order house with its own weapons. That is what you will be doing when you demonstrate your merchandise correctly. You will be beating them at their own game. They have no such opportunity as you for personal contact.

Make it a rule to get a sales letter, or some kind of descriptive printed matter into the hands of every possible customer at least twelve times a year—once a month. Keep this system up. It will run a mail order house from your community. The cost is not great, either.

Advertise in Your Newspaper.

Call attention of the women to the little specialties that will appeal to them. Strive to sell to every family all of its requirements. Don't let your customers split their busines with the mail order house or with your competitor. Write the advertising just as you would talk to a customer. Imagine that you are talking, and you will have a good advertisement. Conduct your advertising so that no one who resides in your vicinity will ever say, "Why, I did not know you had that article!"

Have Special Sales.

Adopt the same principles that the big stores do. Have special days, Saturdays or Mondays, or the time that suits best in your particular community, to conduct special sales. Don't give anything away in such a sale, but specialize on some article that everybody wants. You will get the people in the habit of coming into your store. Other goods will be sold besides the one article advertised. If your clerks are trained as suggested, the sales will jump like weeds in a cornfield on a wet day. Tell the clerks frankly to sell more goods, and you'll boost their salaries. The more efficient your salesmen, the more money you will make; therefore the salesmen are entitled to an amount in keeping with the service rendered. Never let a customer go away dissatisfied. Put yourself in the customer's place, and an equitable adjustment can always be reached.

It's Up to You.

The manner in which the boss and his clerks treat customers will determine where those customers buy. You must have faith in your goods and faith in yourself. Forget mail order competition, and "sail in" to study your stock—and your customers, too!

Be courteous—businesslike—sincere—accommodating. Learn how to approach men; develop a compelling personality, a genial presence; learn how to convince and sell; turn interest into desire and desire into sales. Attempt bigger results than ever before. Put grit and go-to-it-ness into all your actions. Remember, "where there's a will there's a way." And remember, also, that you will get only what you work for.

You can be the merchant prince in your vicinity, as Marshall Field was, and John Wanamaker is, in their fields. The very principles and systems that built their businesses will increase yours. Practice scientific salesmanship and you will outsell the other fellow.

QUOTATIONS ON RAW FURS.

Hardware and Metal has recently received requests from a large number of hardware merchants, asking that prices being paid for raw furs be published in our weekly market reports. Commencing with our next issue, quotations will be given on the lines of furs usually obtained by retail hardwaremen.

Easier and Quicker Sales

Everything in Nature follows the line of least resistance. The brook, with its many curves and turns, winds its way according to this law of Nature.

Martin-Senour 100% Pure Paint is the line of least resistance in paint selling—and after the first sale, the satisfaction received makes future sales a matter of order-taking.

Purity is the standard when buying White Lead, Zinc Oxide, Linseed Oil, or Turpentine, and purity is the standard of the great majority of people when buying paint.

It is easier—quicker—more profitable to sell 100% Pure Paint to pre-convinced buyers than to argue half an hour about the efficiency of a paint that is not 100% Pure.

THE MARTIN-SENOUR CO.

LIMITED

PAINTS & VARNISHES

MONTREAL CHICAGO WINNIPEG LINCOLN
TORONTO HALIFAX

Back of every Berry Brothers Dealer are sure sales-forces that help him sell Berry Brothers' Varnishes. Berry Brothers' Varnishes move fast over the counter. They are the most active stock a dealer can handle.

Berry Brothers' Varnishes have a reputation of satisfaction for over fifty years. People know about them — they know that the dealer who sells and recommends Berry Brothers' Varnishes is giving them honest, lasting varnish values. This reputation helps you sell Berry Brothers' Varnishes.

Berry Brothers' advertising is another sales-force that brings folks into your store. For years we have been telling the public about the qualities of our Varnishes. We have educated them to ask for Berry Brothers' Varnishes—to know this name as one that stands for varnish satisfaction. Berry Brothers' Varnishes are easy to sell because of this.

And the Berry Brothers dealer gets more than the profit out of Berry Brothers' Varnishes. They help him to build his business reputation for selling high-grade goods.

If you haven't Berry Brothers' Varnishes on your shelves, let us tell you more about them.

Weekly Market Report---Paints

MONTREAL.

MONTREAL, Apr. 22.—The annual spring clean-up spirit has set in and in consequence there has been quite a marked increase in the demand for all kinds of paints, but chiefly house paints, both interior and exterior, and enamels, varnishes and stains. The jobbers and retailers, and also the manufacturers are looking forward to a considerable increase in business when the "Clean-Up and Paint-Up" campaign starts the latter part of May. Preparations are being made by many retailers to take advantage of the publicity given the movement to get up some attractive window displays and to hitch up to the general advertising of the movement.

Jobbers anticipate an accelerated demand for paints with the opening of navigation when cheaper freight rates will be in effect. A large number of shipments are now ready to be sent out on the first boat and judging from the way the river is breaking up it will not be long before the goods are on their way to their destination. The cold and backward weather is the only thing that has held the people back thus far and now when a period of finer, warmer weather seems at hand there will doubtless be a big impetus in all lines of brightening up materials. While there has been some improvement in collections the situation still leaves much to be desired.

White Lead.

While there has been no change in prices the amount of business is considered satisfactory, being about the average for this time of year. Prices quoted are: ton lots, $8.05; less than ton lots, $8.25 and open prices for quantity lots.

Linseed Oil.

The amount of business is about as usual. The demand has been pretty steady and the quotations of the past few weeks have been maintained as follows:

Raw Linseed—
- 1 to 4 barrels ..... 62c per gal.
- 5 to 9 barrels ..... 61c per gal.
- 10 to 25 barrels ..... 60c per gal.

Boiled Linseed Oil—
- 1 to 4 barrels ..... 65c per gal.
- 5 to 9 barrels ..... 64c per gal.
- 10 to 25 barrels ..... 63c per gal.

With open prices for carload lots.

Turpentine.

Turpentine stocks are none too large with many of the jobbers. The demand is expected to keep good for some time to come. There has been no change in prices. Montreal quotations are as follows:

- 5 gallons 72½
- Half-barrels 70½
- 1 barrel 67½
- 2-4 barrels 66½
- 5-10 ..... 62½

Gasoline.

Gasoline prices are still quoted the same as last report. A considerable quantity is being sold at present and it is anticipated that business will increase right along now. Prices now are:

Barrels, in wood	23c	gallon
In steel and drums	20c	"
Tank wagon (100 gals.)....	19½c	"

TORONTO.

TORONTO, April 16.—Paint of all kinds is moving freely and a very fair amount of outside work is now under way. The busy season for the retailer will not really commence until the first week in May. There are, however, many retailers who have had to send in good sized repeat orders. The effects of the "Clean up and Paint up" movement will be felt during the early part of May, and it is expected that large quantities of paint will be sold by retail hardwaremen during the first two weeks. One jobber reported that the volume of business so far compared favorably with the volume during the corresponding period of last year, but that orders were rather hard to get.

Decline in Turpentine.

The turpentine market is rather weak. The primary markets have been exhibiting weakness and Toronto quotations have declined 2 cents per gallon. The ruling quotations now are:—

Single barrels ....69c per Imperial gal.
2 to 4 barrels.....68c per Imperial gal.
5 gal. lots .....76c per Imperial gal.

Linseed Oil.

No change has taken place in linseed oil quotations and the ruling quotations in Toronto are:—

Raw Linseed Oil—
- Single barrels ..... 65c gallon.
- 3 to 5 barrels ..... 63c gallon.
- 6 to 9 barrels ..... 61c gallon.

Boiled Linseed Oil—
- Single barrels .....68c gallon.
- 3 to 5 barrels ..... 66c gallon.
- 6 to 9 barrels ..... 64c gallon.

Oil in less than barrel lots, 7 cents per gallon. Cans are charged at: 5-gal. cans, 50 cents each; 10-gal., 75c. each.

White Lead.

There is still a fair demand for white lead at the following quotations:—

Less than ton lots ..$8.40 per 100 lbs.
Ton lots ... . 8.20 per 100 lbs.
For larger quantities prices are open.

TRENDS IN THE IRON INDUSTRY.

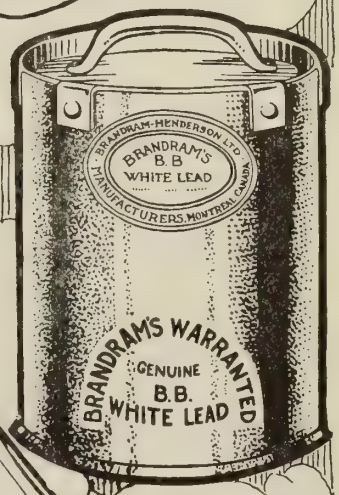
Connellsville coke production as reported weekly by the Courier shows a decline of 2 per cent. from the maximum, which was in the week ended March 21st. The Courier figures of shipments, a better indication of iron conditions, shows a decrease of 9 per cent. from the maximum, in the week ended March 7th, but the shipments in that week were exceptionally heavy.

Pig iron production, as reported by the Iron Age, shows an increase of 25 per cent. from the recent minimum, the average of January, the percentage being substantially the same whether one takes the average production in March or the rate of production on April 1st.

The coke figures indicate that the most recent trend has been downwards, but thus far only a little ground has been lost. The pig iron figures hardly reflect any decrease, unless one take it that there was an increase early in March and a decrease later in March, making the rate at the end of the month equal to the average of the month.

The pig iron rate on April 1st was 18 per cent. below the maximum rate ever attained, in February, 1913. At that time the steel works were operating substantially full. It would appear that the steel works blast furnaces have been making pig iron at substantially 80 per cent. of their capacity.

Our current estimates of steel production, derived from a variety of sources, indicate that finished steel production is now at between 55 and 60 per cent. of full possible capacity, against a rate of between 70 and 75 per cent. from 30 to 60 days ago, this being the recent maximum.



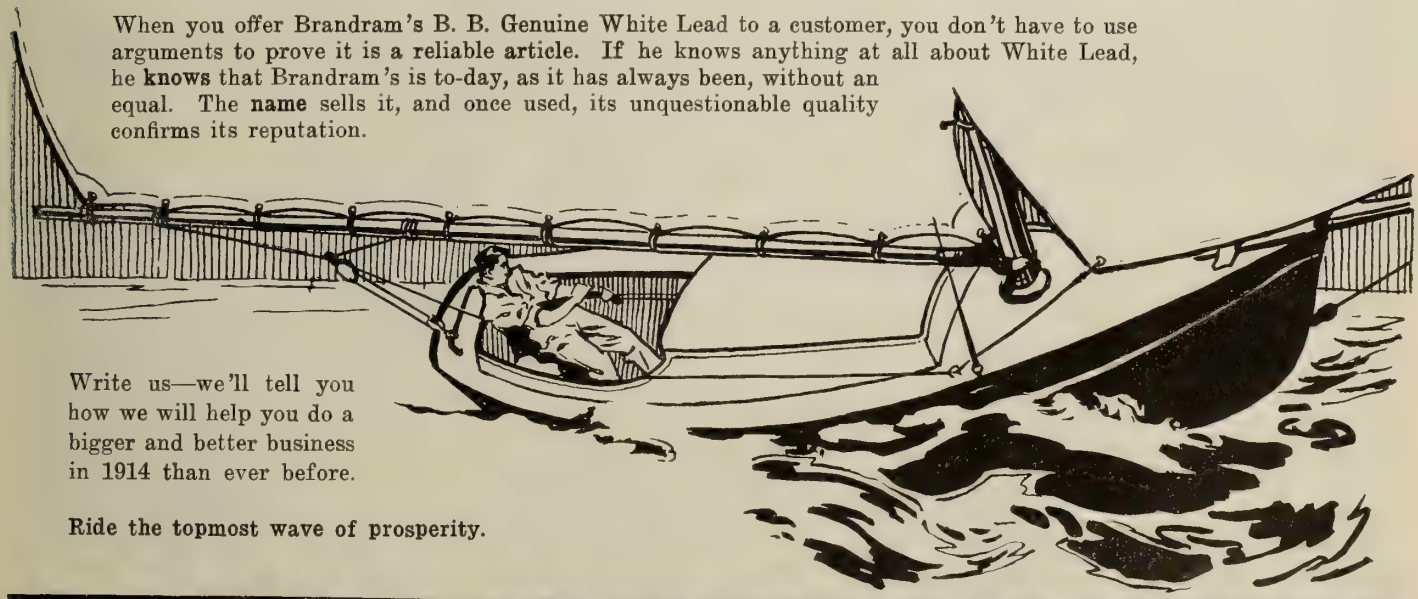
Thus the trends are somewhat mixed, coke showing a slight decrease lately, pig iron apparently no decrease, and finished steel a considerable decrease.

Perhaps the more important showing of these figures is that they serve to discredit certain estimates being published in some quarters, that the steel industry is operating at less than 50 per cent. of its capacity. The condition cannot be as bad as that. There is much room for suspicion that intentionally or otherwise the present dullness is being exaggerated.—American Metal Market.

We Will Carry More Sail

Big Sales for 1914

during 1914 than ever before, pushing our business ahead with a bigger, broader and better planned Publicity Campaign than ever before in our history.



This will help dealers who sell

BRANDRAM'S B.B. GENUINE WHITE LEAD

and other B-H products. The trade in White Lead is constant and growing, particularly for the better grades, and nothing offers the dealer a better opportunity for profitable business than Brandram's.

Brandram's has, in a superlative degree, that element that never fails—**Quality.** Made by an original process that passed the experimental stage over a century ago, and used for generations by painters generally both in England and this country; it has behind it the prestige of uniform success—a reputation that is a valuable asset to every dealer who handles it.

When you offer Brandram's B. B. Genuine White Lead to a customer, you don't have to use arguments to prove it is a reliable article. If he knows anything at all about White Lead, he **knows** that Brandram's is to-day, as it has always been, without an equal. The **name** sells it, and once used, its unquestionable quality confirms its reputation.

Write us—we'll tell you how we will help you do a bigger and better business in 1914 than ever before.

Ride the topmost wave of prosperity.

BRANDRAM-HENDERSON LIMITED

Montreal Halifax St. John Toronto Winnipeg

Current Hardware and Metal Quotations

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figure being for large quantities and prompt pay. Large buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate. Retailers desiring to get in touch with firms selling any articles on which quotations are made can do so by writing the editor.

Jamieson's Ready Mixed Paints and Varnishes

will satisfy the most exacting demands of your paint customers, both in quality and price. A satisfied customer means that he will come back for the same brand every time he wants paint, which, with a good, profitable line, means a successful paint business.

WILL YOU BE OUR AGENT IN YOUR TOWN?

R. C. Jamieson & Company, Limited

ESTABLISHED 1858

MONTREAL and VANCOUVER

OWNING AND OPERATING P. D. DODS & CO., LIMITED

Turn random buyers into loyal, steady customers!

Good-will is the biggest asset any store can have. It is usually built on trifles that are hard to define and probably costs the proprietor absolutely nothing. Yet the store that has the people's good-will is "like the house founded on a rock."

You can secure the good-will of your paint customers by selling them something just a little better than they thought they'd get —Lowe Bros.' High Standard Paints.

This is the paint that has 50 years of brains and experience behind it—years of use of the most advanced paint-making machinery of the times—years of absolute knowing how to make good paint and of determination to live up to the golden rule in so far as it is humanly possible to do so.

People who use Lowe Bros.' High Standard Paints through your store will be saying: "Well, they're nice people to deal with," maybe long after they've forgotten about the individual transaction. But good impressions linger. They mean "good-will."

At that, we do two-thirds of the selling—you only one-third. Ask us.

An Open Letter To Our Merchants

Dear Sirs:—House-cleaning time is here again and your customers will be coming in crowds for Muresco. How is your stock? Look it up now and mail your order at once.

We built a large addition to our plant last year, but owing to the enormous increase in the demand for Muresco, we are building another addition this year. We would therefore urge you to send your order now and not wait for our salesman.

Write for beautiful designs and new color card.

BENJAMIN MOORE & CO., LIMITED, WEST TORONTO

Sole Manufacturers of Muresco, the best wall finish

Do you sell it?

Are you in line for big paint profits in 1914? Have you made sure of a prosperous paint year by stocking

"SILKSTONE"

(COPYRIGHT)

the smooth as silk—hard as stone, flat wall color.

It means profit and good-will to you, to be a Silkstone Dealer.

Ask us about it now.

The P&L Spring Advertising is Hitting Hard in Your Town

BANG! Bang! The cannon are roaring, the bombs are bursting — the big Pratt & Lambert Spring Advertising Campaign is in action. Your town is the scene of action. Already word comes from the firing line: "We have met the varnish buying public and they are ours." Individual consumers, home-builders, painters, architects and contractors — every class to which varnish is sold are yielding to the mighty persuasive force of "Pratt & Lambert Advertising," and are buying Pratt & Lambert Quality Varnishes. Study the bursting bombs and you'll know why.

Are *you* getting this business in *your* town?

Write for the Pratt & Lambert Dealers' Proposition.

The paint and the trade-mark that will build a reputation for your paint department and bring you more profits.

CANADA PAINT is the last word in paint-making. The materials used are the highest quality—The Canada Paint Co. ensure this by making the most important of them in their own factories. Modern paint-making machinery and scientific formulas produce this product. These are the reasons CANADA PAINT gives maximum protection at a minimum cost per year.

Trade-marked goods are advertised goods. That is a guarantee that the manufacturer is proud to stand behind them. It means good-will for the merchant who sells them. Property owners in all parts of CANADA are becoming more familiar with the CP trade-mark, and what it represents, every day, and that begets confidence in the CP line. CP advertising is more effective and extensive than ever; it reaches more people and brings their trade to the CP dealer. The CP trade-mark represents a full line of paints and varnishes that will build and hold business for your store. It is worth your while to investigate a proposition that will help you to make your business a greater success—the CANADA PAINT proposition will do this. Shall we send our representative to explain it to you? It puts you under no obligations whatever.

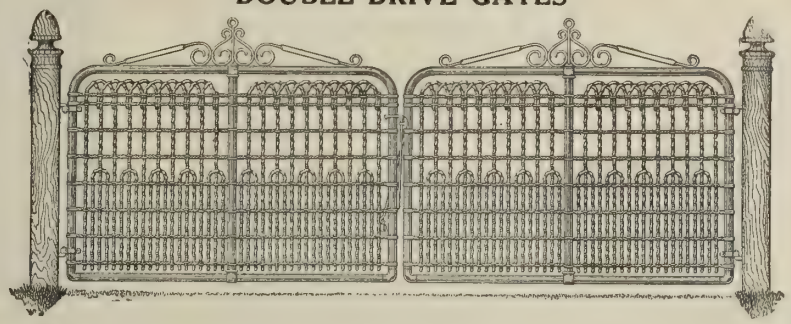
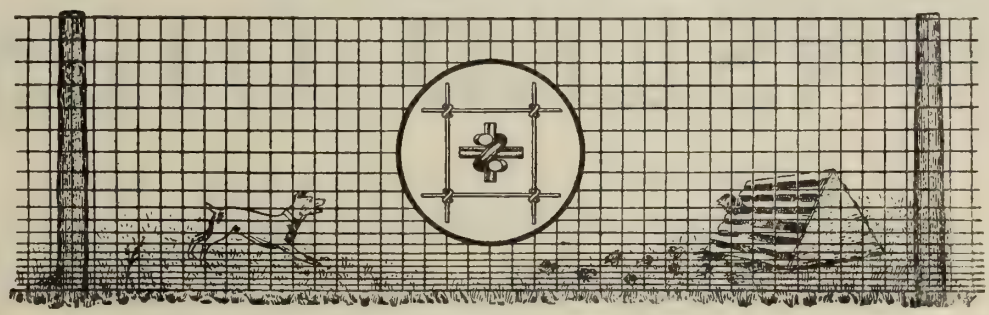
"THE BIG WINNIPEG HOUSE"

MAY IS THE BIG MONTH FOR LAWN FENCE



WE SHIP PROMPT MAIL IN YOUR ORDER NOW

STYLE Z LAWN FENCE



The uprights are corrugated No. 9 heavy galvanized wire, spaced 2⅞ inches apart, with an extra upright of No. 9 interwoven at the bottom, giving a spacing of 1⅜ inches. The cables, or horizontal wires, are heavily galvanized, twisted, and spaced 6 inches apart, except the two top cables, which are spaced 2½ inches apart. The bottom meshes are close enough to turn even small chickens.

DOUBLE DRIVE GATES

Frames are of high-grade tubular steel, with malleable corners. Hinges are high-grade malleable iron. Wrought iron scroll tops. Fitted with heavy centre-hook, which holds one or both gates (as desired), secure and firm when closed.

BLUE RIBBON POULTRY FENCE

Actual comparison shows that the total cost (including all labor and material) of a 10-rod Blue Ribbon Poultry Fence, means a saving of from $8.00 to $10.50 over that of the ordinary hexagon poultry netting.

The line wires at bottom of Blue Ribbon Fence are only one inch apart, the spaces gradually increasing towards the top.

Did you receive that Special 1914 Circular of Fencing we are mailing to dealers ?

Don't overlook Fencing-Pliers, Post-hole Diggers and Post-hole Augers, Fence-Staples too.

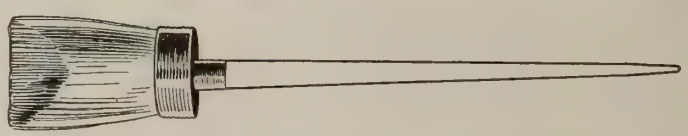
RAMSAY'S PAINTS & VARNISHES
SATISFIED CUSTOMERS APLENTY
YOUR PERFECTLY GOOD PROFIT

That's a pretty good line up, and you can't do any separating—those three always stick together.



More than 70 years ago Ramsay's started to make good paint, they kept it up, and now the Canadian public know it.

Any man who comes into your store for paint and gets Ramsay's will come again when he wants more, because every brush of paint out of the can helps to write a good advertisement for Ramsay and for you.

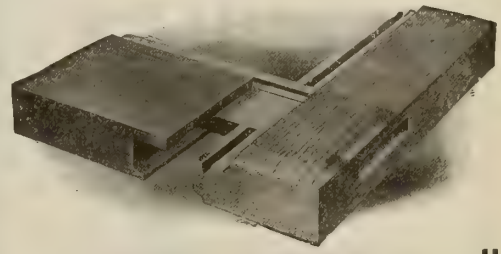
Screen Doors

That Will Not Warp—Will Sell

Past history has shown that it is about as difficult to purchase a screen door that will not warp as it is to discover a fish that will not swim.

Time, however, has overcome many obstacles that seemed almost unsurmountable in the past—Screen doors, like everything else, have undergone great improvements, and we offer you these doors that are the best, in every respect, that modern science can construct.



Don't take a chance on selling a customer an inferior door and thereby lose his confidence in the balance of your stock for all time to come. Be in a position rather to recommend a door that will please your patrons and that will increase their reliance on your recommendation by proving itself to be all that you claim of it.

Note The Construction

Our doors are all mortised and tenoned construction as shown in the accompanying cut. This is conceded to be the strongest and only correct construction for screen doors. We pride ourselves on the workmanship and jointing of every door—the corners fit perfectly and snugly. All moulding is set in flush and mitred at the corners. Doors are made ¾ inch longer and ¼ inch wider than regular sizes to allow for trimming.

Save Both Time and Freight

We carry three complete stocks of screen doors and window screens—at Winnipeg, Saskatoon and Swift Current. Order from our nearest branch. If you have not full details, a postal inquiry will bring you our 1914 price list and design book by return mail.

This Cut shows our Mortised and Tenoned Joint

Screen Door Hardware

A Good Profit-Maker in its Season

Our assortment of this line is the largest and most varied in Western Canada. We have lock sets, door catches, pulls, door checks and anti-slam sets in wonderful variety of finish and style. Owing to the shortness of the season, however, your stock must be in shape at the proper time. Our hardware catalogue and price list will assist you in making a selection. Write for it.

Red Tip CALKS

Let us tell you some of the reasons why RED TIP CALKS are rapid sellers and bring profit to the dealer.

MATERIAL—RED TIP CALKS are primarily a safety device and therefore there is no choice between them and cheap, unworthy substitutes. *Safety demands the best.* They are made by skilled labor, of the highest grade material, carefully analyzed and tested by schleroscope and are rigidly inspected before leaving the factory.

TEMPER—RED TIP CALKS are tempered exactly. There is no guesswork about it. The heat being regulated by electric pyrometers is even, and the last calks in the lot have the same temper as the first. Every box of 50 contains 50 *good* calks. Horse owners know this.

EFFICIENCY — RED TIP CALKS are made as here shown with a pin of high-carbon steel inserted in an outer shell of softer metal. Time has shown that this is the only way to make a calk.

LABOR AND TIME SAVERS—RED TIP CALKS when worn down can be removed and a new set inserted in 20 minutes by the aid of a simple wrench, thus eliminating long waits at the Blacksmith Shop.

COST—RED TIP CALKS cost far less than the old-fashioned way of sharpening, besides putting the user in readiness to travel at all times.

CAN CHANGE IN TWENTY MINUTES.

PROFIT—RED TIP CALKS pay a large profit to the dealer. They are quick, easy sellers, being widely advertised and as widely esteemed.

GUARANTEE—RED TIP CALKS are guaranteed to be as represented. They are guaranteed to wear sharper and last longer than others. They are guaranteed to be perfect in thread and temper. We market no seconds under any brand.

Genuine Neverslip Calks have Red Tips. Beware of Imitations.

Neverslip Manufacturing Co.

MAXWELL "HOME 65"
FOOD CUTTER

one of the best selling lines you ever handled.

The "Home 65" is a new machine embodying all the latest principles. Made in the standard family size and much stronger than the ordinary type of machine. Cap fits close, rendering the machine quite watertight. The open-end cylinder makes it easy to clean. Supplied with different cutting plates.

Maxwells Ltd., St. Mary's, Ont.

"Competition Is a Word of the Past to Peerless Agents"

That's the way Peerless dealers speak about their agency. Read what this experienced dealer says about Peerless fencing. Note his Peerless sales ran six times greater than that of other fencing. Look—

The Banwell-Hoxie Fence Co., Hamilton, Ont. Middlemiss, Ont., Jan. 8, '13.

Gentlemen:—I have been selling fence for the past seven years and in that time have represented several different firms. It gives me pleasure to say that I took the agency for your fencing for 1912 and have sold in that one year more fence than in the other six years of my business, and the best of it is I have not had one complaint in any way against Peerless fence. Different from most fences it stretches flat and all wires of even length; the lock is tight and strong and the quality of the wire is of the best. There is very little other fence used in this district and competition is a word of the past to the agent for Peerless fencing.

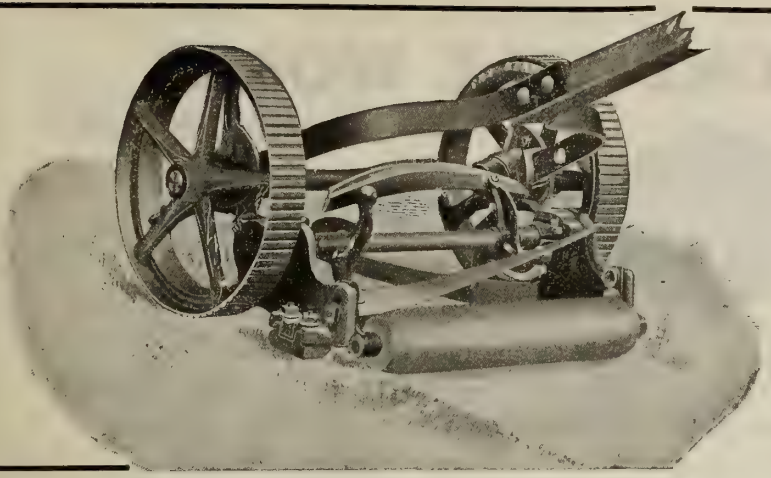
Yours truly, J. A. McDONALD.

This is but one of many similar dealer's letters in our files. Everyone is enthusiastic about his Peerless agency. Everyone has nothing but praise for Peerless fencing—the fence that saves expense.

Peerless Poultry Fence

is made of the best Open Hearth steel fence wire—tough, elastic and springy—and will not snap or break under sudden shocks or quick atmospheric changes. Our method of galvanizing prevents rust and will not flake, peel or chip off.

The joints are securely held with the "Peerless Lock" which will withstand all sudden shocks and strains, yet Peerless Poultry Fence can be erected on the most hilly and uneven ground without buckling, snapping or kinking.



The heavy stay wires we use prevent sagging and require only about half as many posts as other fences.

We also build Farm and Ornamental Fencing and Gates.

Do You Want the Peerless Agency?

We still have some valuable territory open to good reliable dealers. Do you want it? Do you want to be the leading fence dealer in your locality? Then write us. Ask for our dealer's proposition now before someone else gets ahead of you.

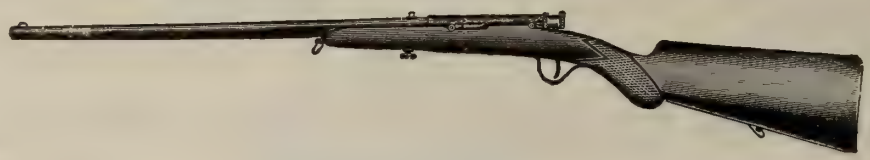
Housewives Want An Easy-Running, Strong and Serviceable Washer

The "THERMO"

Fills The Bill And Pays A Good Profit

This washer is as easy to operate as a bicycle, the power being applied much the same way. Can be used with either the forward motion or up and down motion, simply by changing the lever. The two lever rachets make this possible.

The Thermo Washer is built to wear and is solid and substantial. The tub is extra heavy and constructed in the best manner.



Legs are cross braced and absolutely rigid. Top is made double to prevent warping. The few working parts are simple and are not liable to get out of order.

Write for complete description. This washer wins trade.

HOW YOU CAN REACH
the Paint Consumer
SUCCESSFULLY
Not "GET AT" Him

But reach him with convincing proof that you are giving him the best paint and varnish values that can be obtained.

MAPLE LEAF
Paints and Varnishes

appeal to the best class of paint trade, and when they do reach it they hold that trade through the sheer merit of their service and satisfaction.

Some people may be appealed to and reached through pride or prejudice, others through influence, some respond to friendship. But everybody responds to the convincing value and pocket-saving services of MAPLE LEAF LINES.

With such a universal basis of appeal you can rapidly build and maintain the best paint department in your town with

Maple Leaf Paints and Varnishes

Our Decorative Aid Department continually scours the country developing paint business in the interests of our agents. This service helps agents in many ways, oftentimes putting them in touch with paint consumers in a most surprising manner. You had better write and look into this feature of our Sales Development.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

BRONZITE

The Permanent Green Paint

Will Multiply Your Sales

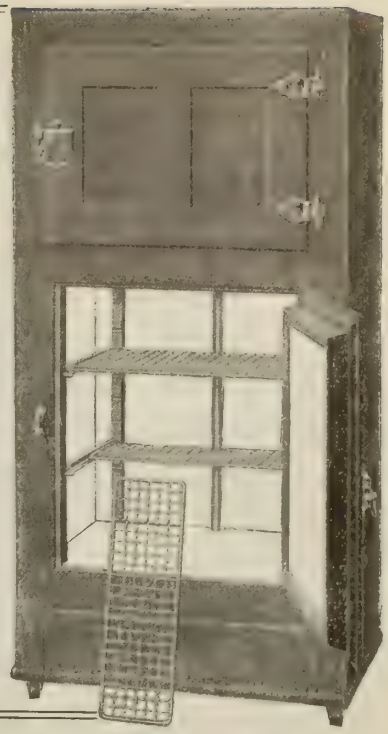
There is a certain sale for Greens in every town in Canada. Bronzite has the largest sale of any Greens in the world. It is a wonderful Green that is manufactured from the Ore of Kolonite. It is different from all other Greens, in that **it may be depended upon to withstand, for an indefinite time, the action of sun and water.** ¶ Our travellers will soon be on their Spring trip through Canada. **Drop us a card and they will call on you.** Used on all work where a green paint is needed.

COLONIAL WORKS Inc.
225-237 Norman Avenue, BROOKLYN, N. Y.

Sanderson-Harold Refrigerators

make ice go further and prolong satisfaction BECAUSE

They are insulated with MINERAL WOOL, **the best known non-conductor of heat or cold.** Mineral wool does not decay or cause odors.



Materials are the best obtainable. Lumber is seasoned in our own yards, where we carry over a year's stock of Ash, Oak and other hardwoods. All are thoroughly kiln dried before cut up.

There is perfect circulation of **pure, dry air** at all times.

Design and finish are exceedingly attractive. **We guarantee** to remit purchase price and take back the refrigerator if not **exactly** as represented by us.

Drop a card for catalog.

DOMESTIC ELECTRICAL WORK, BY WILliam A. Wittbecker. Concise and Practical Explanation for Plumbers and Hardware Dealers, on How to Wire Buildings for Bells, Alarms, Annunciators, and for Gas Lighting From Batteries. The information given is practical, and with a close observance of the directions laid down, any one, though entirely ignorant of electricity, should be able to do the work described. Illustrated with 22 diagrams. Price, in paper, 25c post paid. Price, in cloth, 50c. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE WINDOW DRESSING—THIS is the first book ever written devoted exclusively to Hardware Display. There are 254 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. Size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE STORE BUSINESS METHODS —The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business, Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10 postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

Faults in Canada's Immigration Policy

Canada's rural population has suffered from the exodus of many of the best young men. The policy of our immigration authorities has not brought in the desirable rural Briton to take their places. This fact is brought to our attention by a careful writer and thinker in the May issue of "MacLean's Magazine." He has travelled and lived for some time in Australia and has observed the systems employed in each Dominion and the results that are obtained. His conclusions are irresistible.

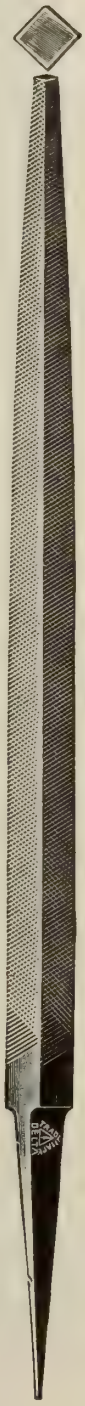
There is reason in his assertions and the comparisons are well worth the study of every Canadian.

Besides this, the May issue fairly bristles with interesting sketches, all superbly illustrated by some of the best Canadian talent. Here are a few of the subjects that are treated:—

The Peace River Kingdom,
Canadians at Harvard,
86 And Still At It (a McClary Study),
The Law and the Motor,
A Little Stage Princess,
A Plea For Lacrosse,
The Business Outlook,
The Youth's Best Book,
Efficiency in the Individual,
Genius of Germany Electrical Forces.

With an unusually choice quota of choice stories by such authors as Alan Sullivan, Britton B. Cooke, Robert E. Pinkerton, L. R. Rorke, and Quentin Quarren.

The Review of Review department and the illustrations are stronger than usual. Dudley Ward's drawing, "Nothing New Under the Sun" is a clever one. Order now.



Send us a postcard and have your name placed on our subscription list.

Subscription $2.00 a year. *Twenty cents a copy.*

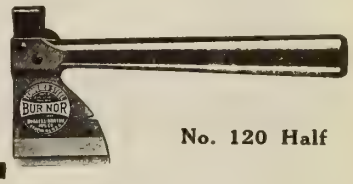
No. 2-A Closed



Why Use Screen Doors, If They Don't Shut Tight?

Bur-Nor Catches will hold the doors shut, prevent warping and sagging. Also strengthens weak hinges. Made in two styles, Plain and with positive locking attachment. Put them on your show-case, they sell themselves.

Our Hatchet proposition will also interest you. Bur-Nor Hatchets are 50% stronger than other styles.

May we send you catalogue and prices of both?

BURGESS-NORTON MANUFACTURING CO.
GENEVA, ILLINOIS, U. S. A.

No. 120 Half

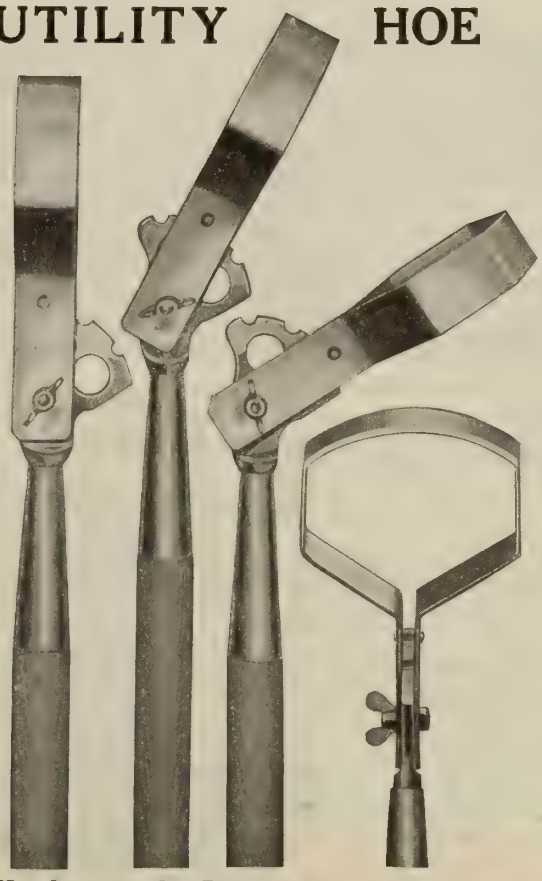
John Wanamaker says that advertising doesn't jerk — it PULLS. He ought to know, and yet some men think that advertising should go against all rules and precedents and jerk them to success with one tremendous yank.

Pedlar's Perfect Metal Shingles

Give absolute protection against fire, wind, snow, rain, storm and lightning.

Get after the big business waiting for you, right in your own locality. You should write for catalogue 22-H.M., giving full details and prices on the big "GEORGE" SHINGLE (24" x 24") for barns and large buildings, and on the "OSHAWA" SHINGLE (16" x 20") of identical pattern and design for houses, outbuildings and sheds.

The shingle with the positive four-side lock.
Write for Catalogue No. 22 H.M.



This is a large, well-illustrated book, showing our whole line in detail, and you should have it on your desk.
Headquarters for round and square Conductor Pipe—Eavestrough either Ogee, Round Lap Joint or Round Slip Joint, single and double bead, and all Trough and Pipe Fittings—made of best open hearth steel, or anti-corrosive

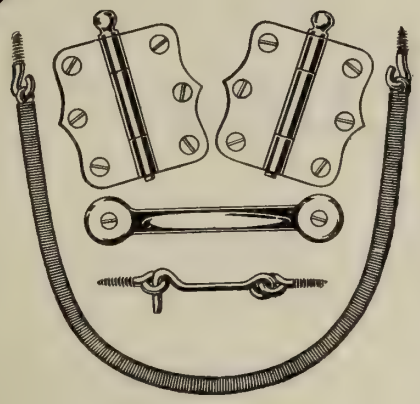
The "BEST" Fuel Chute



IS PROVING A GOOD SELLER WITH LEADING DEALERS EVERYWHERE

It sets flush with the wall, on the outside of building and is 28 in. long on top. The Frame and Door are Cast Iron, the tube is made of No. 16 steel.

The cover is held open by the hook on the door engaging with the hook on top of frame; the door opening up protects the siding of the house. The "Best" has a flange overlapping the top of door, thus preventing the rain from running down the Chute and rusting it out.

Write for prices and full particulars.

Sterling Foundry Co.
STERLING, ILLINOIS

Set No. 1750.

STANLEY

WROUGHT STEEL

Screen Door Hardware

COMPLETE SETS
IN CONVENIENT PACKAGES

Set No. 1750 is made up of one pair of 3x3 ornamental, loose-pin butts to screw on the surface of the door; one five-inch wrought steel pull; one high-grade No. 3 spring, of much better quality than is usually used on screen doors; one gate hook and eye. Each set is packed neatly in a neat, strong, telescope carton, with screws of the proper size and finish, ready to be handed to the customer.

These sets are finished handsomely in Japan, Antique Copper, Dull Brass, or the Rust-Proof "Stanley" Sherardized finish.

A less expensive set, No. 1752, is also put up with 2½x2½ butts, and a No. 2 Spring. It is made of good materials, handsomely finished, and is fully equal to other sets on the market.

Send in your order for Stanley Screen Hardware, and be prepared for Spring business. Write us, if your jobber cannot supply you.

McKinnon Folding Chairs

Will sell like hot cakes to campers, autoists and boating enthusiasts. They will appeal to your trade because of their simplicity, strength and attractive finish. Their curved back and padded waterproof upholstering make them luxuriously comfortable. They fold so compactly that you can put them on your shelves with other sporting goods or auto supplies. Only floor space for one chair required. Made of steel, they are stronger, yet quite as light as the better wooden chairs.

Just the thing for

A Confidential Chat With Our Readers

"For practical knowledge and suggestions, Hardware and Metal cannot be beaten."

So writes a Saskatchewan hardware merchant, in renewing his subscription to Hardware and Metal. And, as our staff is experienced in business as well as in journalism, readers will find that the suggestions made in Hardware and Metal are always practical.

The editor was recently talking to a traveler for a big hardware jobbing house, about the buying hints which are given from time to time in Hardware and Metal.

"You certainly struck it right on those special door sets a few weeks ago," said he. "I noticed you had an item that one house was offering door sets at a special price, and you advised buying, as the value was exceptional. However, I didn't press my customers to purchase the line just now, as I thought I would still be able to offer them at the same price on my next trip.

"When I got into the house Friday night, the first thing they told me was that the special price on these door sets had been withdrawn."

A Practical Test of Hardware and Metal's Value.

Another evidence of Hardware and Metal's value to its readers has come to light through a study of business mortality in the hardware trade during the past five or six months of depression.

Hardware and Metal's Circulation Department kept an accurate record of the failures, in the hardware trade throughout Canada, to ascertain to what extent readers of Hardware and Metal suffered from the tight money conditions which were forcing many business firms to the wall.

The result was nothing short of amazing. For, though only 10% of Canadian hardware merchants are not subscribers to Hardware and Metal, it was found that of the hardware firms who had been forced into liquidation or a compromise with their creditors, 75% were not subscribing to Hardware and Metal.

Among those who were driven to the wall was a large British Columbia hardware firm, whose subscription we had been anxious to secure for years. They practically gave as their reason for not taking Hardware and Metal, that they knew all there was to know about the hardware business and Hardware and Metal could not teach them anything. But, that there were some things they might have learned to their profit is seen from the sequel.

Studying Methods of Display.

That hardware merchants are carefully studying better methods of storing and displaying their goods is shown by the interest readers are taking in the big quantity of this kind of information given them by Hardware and Metal.

A few months ago an illustrated article was run, describing the very effective methods of W. Walker & Son, 1228 Yonge St., in displaying builders' hardware.

Mr. Walker says that he has been constantly hearing about the article ever since.

"I never realized before," said he, "how widely Hardware and Metal circulates among the hardware trade. Why, I have had letters from merchants all over Canada asking my advice about certain phases of my system. And, the other day, a hardwareman from Saskatoon dropped in to look over my builders' hardware room. He said he had read about it in Hardware and Metal and wanted to get some ideas for his own store."

One of the most valuable services rendered its readers by Hardware and Metal is the description of successful methods of selling, displaying goods, advertising or buying, as the case may be. These methods nearly always bear the stamp of the merchant's own personality. They were designed to meet his own peculiar problems, and, without modification, they might not exactly fit the situation of many other merchants.

But these plans, successfully worked out, whether in Portage la Prairie or Smith's Falls, contain the germs of similar plans which would work just as well in Cranbrook, B.C., or Amherst, N.S. And so any hardware merchant who is at all adaptable may get ideas from every issue of Hardware and Metal, which will make more money for him than any other investment of the same amount of money and time.

Back Into the Hardware Business.

Did you ever notice how the hardware business "gets" a man? It seems to possess an attraction similar to that of railroading—a life proverbial for the spell it exercises over those connected with it.

Nearly every hardwareman "comes back." He may sell out, go into some other line of business, or retire altogether. But it is not long before he yearns to get back into hardware. It is almost a case of "once a hardwareman, always a hardwareman."

Last week one of the new subscriptions to Hardware and Metal was from an old friend who had kept a hardware store in a Grey County town some years ago. He sold out and went West, going into another line of work.

But the lure of hardware had been upon him all that time, and now he is opening a hardware business in one of the most rapidly developing districts in Toronto.

Even before his store was in shape for business, he subscribed for Hardware and Metal."

"I liked Hardware and Metal so well," he remarked, "that I disliked dropping my subscription even when I gave up the hardware business. Now that I am back in the game, one of my keenest pleasures will be to read Hardware and Metal again every Saturday. But I must say that your paper shows vast improvement. You are certainly keeping pace with the development of the country."

9 RUNAWAY BARGES SEND 156 CRAFT ADRIFT AND SINK 7

Boats Break Loose from Tow and Sweep Yacht Anchorages.

HAVOC ALONG SHORE OF THE HUDSON RIVER

Three Houseboats, with Families on Board, Among Those Struck and Damaged.

Nine runaway barges, laden with sand, gravel and other building material, swept through the numerous fleet of yachts, motor boats, launches and other small craft moored in the Hudson River between 137th and 170th streets yesterday morning, sinking at least seven of them and sending 156 adrift, many of them damaged.

All day the owners of the craft and the harbor police were busy searching for the drifting vessels, many of them being found as far south as 100th street.

A sudden squall out of the northwest at two o'clock yesterday morning parted the hawsers by which two tugs of the Cornell Towing Company were towing nine laden barges down the river against a rising tide. The nine barges, which had been lashed together, parted, two of them being blown inshore at 138th street, while the tugs caught the other seven, towed them inside of the cove at Fort Washington Point, opposite 176th street, and anchored them while they put out to stop the other two barges.

But these two barges were blown swiftly into the moorings of the Colonial Yacht Club, at 138th street, and with such force that three motor boats were sunk, forty more small craft were stripped from their moorings and the landing stage was smashed. The freed vessels started down stream. Their cabins had been crushed in by the barges, their sides scraped and their seams sprung in many instances.

The wrecking of the landing stage awa

The news story opposite goes to show how much damage may result from the parting of a rope. Viewed in this light, every poor or overstrained rope is a public menace.

A man's responsibility does not end with himself—it embraces everybody whom his dealings or actions may affect.

You, as a dealer, can do much to fulfill your responsibility by selling only Plymouth Rope, which is reliable, and by educating buyers to purchase new rope oftener.

Both these courses are also profitable—in money and good-will alike.

Many Thousand June Brides Will Receive

"WEAR-EVER"

ALUMINUM UTENSILS

There are nearly 85,000 weddings in Canada in one year.

Showers, Weddings and Anniversaries—each spells "Opportunity" for the **"Wear-Ever"** dealer.

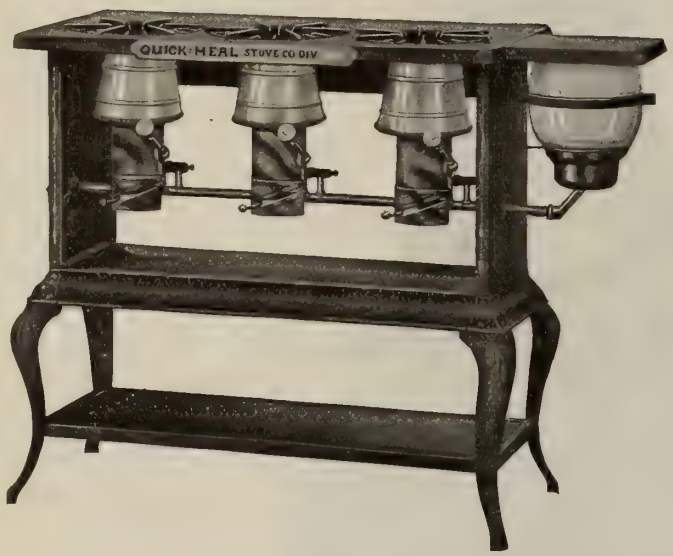
Make note of announcements of engagements and weddings and send out letters inviting inspection of stock; do what H. C. F. Koch & Co. of New York City did—and which other dealers have done with success—sell "Sets" of **"Wear-Ever"** utensils assembled in trunks ready to be shipped; or do what another merchant did, ask each woman who comes to the aluminum counter whether or not she is interested in getting aluminum for Miss So-and-So's shower or Mrs. So-and-So's anniversary—the excuse for inquiry being "I ask because I am keeping a list of articles bought by her friends so no two will give the same utensil."

A "Set" of **"Wear-Ever"** utensils will cause friends to be remembered when many anniversaries have come and gone.

Suggestions for window displays, weddings and showers will be found on page 26 of the **"Wear-Ever"** Window Display Book—which will be sent upon request.

Just as there are different kinds of enameled utensils, so there are different kinds of aluminum utensils.

The enormous pressure of rolling mills and stamping machines makes the metal in **"Wear-Ever"** utensils dense, hard and smooth. The "case hardened" surface of the metal is made still harder by electricity—which makes the inside of the utensils darker, smoother, less liable to be discolored and more easily cleaned.



"Wear-Ever" aluminum utensils are stamped from thick, hard sheet aluminum—are made without joint, seam or solder. The less aluminum is heated and the more it is "worked" the harder it becomes. Consequently stamped utensils are rigid, are not easily dented nor softened by being heated.

Write now for printed matter. It will be worth your while.

The Man Who Can Tell a Good Saw

He looks down the "gutter" to note the set and the sharpening. Then he grasps the handle to see how the saw "hangs"—and if the handle fits the hand, as it should. He notes the symmetry of the lines and the quality of the wood.

He makes sure that it bends regularly and evenly from point to butt in proportion as the width and gauge of the saw varies. He notes that the blade is not too heavy in comparison with the teeth, for that means less labor in using. His experience has proven to him that the thinner you can get a stiff saw the better, for it makes less kerf and takes less exertion to drive it.

This is how the man who knows can test the merit of a saw. But he seldom uses his knowledge, for he has learned by his own experience, as well as the experience of others, that the best way to judge a good saw is to look for the Disston Brand.

Dealers should take advantage of this confidence. Isn't it easier to hand out what is wanted rather than to waste time arguing over what is not?

This is one of the set of five signs FURNISHED FREE.

Do you use Lantern Slides?

We send a set of four without costs to you.

3 Strikes and Sold!

Some things sell themselves.

I can't think what these things are at the moment, but there must be something that people look at and buy without an argument.

But stoves don't belong in that class.

A stove costs considerable money. Not so much as an automobile, perhaps, but more than a lamp chimney or a wringer.

So a stove buyer wants to be shown, and is entitled to be, too.

So in order that you can show those who come into your store stove-hunting, why not learn this simple three-pointed diagram that we show at the head of this page, off by heart?

The person who sees a Gurney-Oxford on your floor will be impressed with its appearance. That point is O.K.

Arrow No. 1 (from the right) points to the Gurney-Oxford Economizer, a system of regulating the fire that is so simple AND EFFECTIVE that no other stove can compare on this point.

Arrow No. 2 calls attention to the Gurney-Oxford grates that give such a large surface of air to the fire that the coal burns to the last ounce, instead of smoldering as in some stoves. That is an exclusive G-O feature.

Arrow No. 3 points to the divided flue, a famous G-O arrangement that leads all the heat from the fire around the oven. This is the feature that gained renown for the G-O as a sure and efficient cooker.

Familiarity with these three points should enable you to sell 99 out of every 100 stove-hunters that enter your door, and that percentage means prosperity. I'm not talking theory. I sold stoves retail for—but that's another story and until I get time to tell you about it, will you take my word?

Sam Oven.

Patronage-Creating Forces

Whenever an inexperienced person sees a large factory that manufactures a line of goods that is not for daily consumption, he wonders where they all go.

MERIT CREATES PATRONAGE from the raw materials of increasing population, the ability of people to wear out the most sturdy utilities and the fact that no commodity on the market yet enjoys more than a fraction of its possible patronage.

"The Survival of the Fittest" is the governing law of articles of manufacture as well as of persons—a significant statement when you consider that the Bissell is the only survivor of pioneer sweeper days and the only universally recognized carpet sweeper in the world.

Other important factors in the increasing demand for the Bissell sweeper are its constant improvement; a sound and sincere sales policy which comprehends standard prices, liberal co-operation with retailer and jobber and continuous advertising; and above all, as demonstrated by the constant growth of our business, its acceptance by the public as the most **handy, inexpensive cleaning device for everyday use.**

GLASS DOOR

GUARANTEED

No. 750

BOSS Glass Door OVENS

Sold throughout the World. In almost every Country where Oil, Gasoline or Gas is used as fuel, you will find the Boss Oven on sale.

Its tremendous popularity is due to the fact that it is first of all a good and economical baker. We guarantee it to bake or roast satisfactorily on any good oil, gasoline or gas stove, or "money back" without argument.

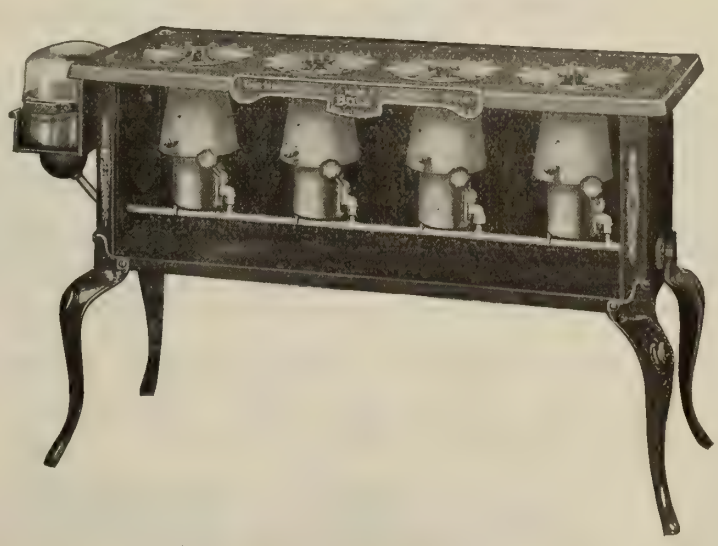
The "BOSS" is made better than any other Oven. Only the best materials are used. The body is made of Mecca Lustre Polished Blue Steel. The linings of heavy Corrugated Tin Plate, having thick asbestos inner linings throughout.

Its Patented Glass Door, which we guarantee not to steam up or break from the heat, has been a universal success. More than 600,000 of this style are now in daily use.

Many patented and exclusive features are found in the Boss. The new Hinge and Door Support leave the door opening entirely free when Oven is open. No danger of burning the hands or arms by coming in contact with wires or chains.

Large variety of styles and sizes in Glass and Steel Doors are shown in our new catalogue, which will be sent on request. Write for it to-day.

Write to-day for Complete Catalog and prices.



NEW BOSS OIL STOVES

Every Vital Feature in the construction of an Oil Stove has been carefully worked out in the "New Boss." There is nothing complicated to get out of order—nothing hard to understand to operate it properly.

Simple but Substantial construction has been adhered to throughout. The extra wide top gives more room for cooking utensils. The legs are strong cast iron, making the stove very rigid.

Patented High Wick Limits or fingers are provided on the inner combustion tubes which are engaged by the wick when turned at full burning height. These fingers automatically trim the wick when chimney is revolved.

The Intense Blue Flame plays right against the cooking utensil, giving quicker results and using less oil than most other stoves.

Mr. ROOFING DEALER— Read What Johns-Manville Roofing Service Does For You.

It gives you the exclusive sale in your town of J-M Asbestos Roofing, and J-M Regal Roofing. That means NO COMPETITION, for the reason that they stand in a class by themselves and you don't have to sacrifice profits by cutting prices.

J-M Asbestos Roofing, made of alternate layers of pure Asbestos and genuine Trinidad Lake Asphalt, is the standard acid-proof, no-paint, no-repair roofing that gives perfect fire protection. These roofings are widely advertised, favorably known everywhere, and in steady demand.

J-M Regal Roofing is the highest type of rubber roofing; not to be confused with low-grade, short-service roofings.

By making you our SOLE dealer in your town and backing you up with such goods, such an institution and such service, don't you see how we build up your trade and fatten your bank account?

Another thing, you don't need to carry much stock. Our branch house near you does that. Whenever you run low, just order from them and they'll ship immediately.

Now Read What Johns-Manville Service Does for Your Customers

Johns-Manville Service gives your customers the world's standard roofings manufactured by a five million dollar concern, with more than fifty years' experience in the study and solution of roofing problems. It also gives them the benefit of helpful suggestions and a cheerful willingness to make right anything that goes wrong.

This is real, worth-while Service—the Johns-Manville kind. It means a satisfied customer; it means more business from **that** customer, more customers, and more profit.

Consequently, when you link your name to J-M Roofing Quality and Service you are actually building up your business on the strength of our resources and reputation for reliability and square dealing.

Break away from Cut-Throat Competition and become a J-M Exclusive Dealer.

Break Away from Cut-Throat Competition and Become a J-M Exclusive Dealer.

Do it NOW. Write our Branch nearest you TO-DAY and get our Special Dealer Proposition. **Some** progressive dealer in your town will get the benefit of J-M Roofing Quality, Service and Advertising—WHY NOT **YOU**?

Vol. XXVI. MAY 2, 1914 No. 18

Subjects and Speakers for Alberta Convention

Beginning May 5, Calgary Will be Mecca for Many Merchants—Government Legislation, Pure Food Laws, Early Closing, Taxation of Retailers, and Many Other Topics on the Slate—Growth of the Organization.

CALGARY, Alta., May 1.—(Special).—As already announced, the Retail Merchants' Association convention of Alberta will be held on May 5, 6 and 7.

To give an idea of the progress that has been made in establishing a branch of the Retail Merchants' Association in the Province of Alberta, it is only necessary merely to state that the branch was formed last August, and since that date there must have been some tall hustling done to bring the organization to its present size and influence. There are now in the Province of Alberta eighty branches of the Association, and they are represented in no less than 100 towns and cities.

The branch set out with a dozen objects in view, the achievement of which would help considerably to raise the standard of business in Alberta. Firstly, the association would protect the commercial interests of all retail merchants, and enlist the co-operation of manufacturers, producers, wholesalers and retailers in securing better trade conditions. Among other objects are the simplification of legislation for the collection of debts, the abolition of gift schemes, such as new forms of trading stamps, coupons, etc.; the reporting of delinquent customers through the credit reporting department, and the prevention of manufacturers or wholesalers from selling direct to retailers' customers. The Retail Manufacturers' Association is also endeavoring to enforce the Transient Traders' Act, to enforce and improve the peddlers' license system, and to make it a criminal offence to advertise goods different to what they are, or to stamp them with false marks.

SPECIAL REPRESENTATIVE THERE.

This convention will be covered by C. W. Byers, the Western Canada editor of this paper. Mr. Byers left Winnipeg recently on a trip through the West via Saskatoon and Edmonton to Calgary. All readers, Eastern as well as Western, interested in Association work should look forward to the complete report of the Alberta R. M. A. convention in the next two issues.

This body also aims to keep its members posted on any proposed legislation, Dominion or Provincial, that will affect their interests, encourages buying in the home town, and claims equality for all, and privileges for none.

The Provincial Officers.

At the first meeting of the new new branch held in Calgary last August, J. F. Glanville, a dry goods and clothing merchant, Calgary, was elected provincial president; Alfred Hinds, butcher, Calgary, was appointed provincial first vice; James Patterson, grocer, Calgary, second vice; R. Burns, Calgary, provincial secretary; and J. A. Bucknall, the provincial treasurer. Arrangements were made for holding the first annual convention. Early in April, an official call was sent to all members, and others, to attend the convention, calling attention to the fact that if each branch, of which there are 80, sent its quota of representatives, it would be possible to show such a gathering of retail merchants as has never been seen in the Province of Alberta.

All the other provinces have held their annual conventions, and it was left to

(Continued on page 64.)

A view of Calgary taken from the North hill.

Three Display Windows in 16-foot Front

Toronto Hardware Firm Has Three Separate Display Windows in a Store Front 16 Feet Wide—Three Different Lines of Goods Displayed at One Time.

THE accompanying illustration shows the 16-foot store front of Prince & Co., hardware merchants and sanitary engineers at 526 Bloor Street W., Toronto. This store front is a model in many respects, and demonstrates that, although a store is very narrow, there is no excuse for a firm not having an up-to-date store front and show window for display purposes.

This store front has an individuality, and stands out prominently among the other stores in the locality. The majority of hardware merchants agree that a 16-foot frontage is very narrow, but when you come to examine the store front here illustrated, you will find that three distinct and neatly-arranged displays are shown, and you begin to think that 16 feet is not so narrow after all if properly used. The full width of the store front is sixteen feet. The entrance is 4½ feet wide at the narrowest point, and widens to seven feet as you approach the entrance door. The two front windows measure 6 feet each in width, and taper towards the back of the window. The illustration does not show up all the details of the store front.

The woodwork, including the paneled ceiling over the entrance, is grained and varnished. An electric light is suspended from the ceiling. The tile floor at the entrance is shown in the illustration. This floor is a commendable feature, and adds greatly to the general appearance of the store front. Above the plate-glass a neat design of leaded art glass has been used.

The interiors of the display windows have also been neatly finished, the floors grained, and the sides and backs paneled off and fitted with beveled mirrors. In the evening the windows are exceedingly bright on account of a large number of overhead incandescent lamps, which are used for illuminating. Three displays here shown were in the windows when Hardware and Metal's photographer called. These displays will give the reader an idea of the high order of displays which appear in Prince & Co. display windows.

The window on the left was devoted to sporting goods, principally baseball goods. A nice range of mitts, gloves, balls, bats, masks, etc., was shown, also a line of footballs, roller skates, etc. The goods were all marked in plain figures, and the presence of a number of neat price cards made the display doubly interesting.

The window on the right contained an exceedingly neat display of painting materials, brushes, color cards, etc. The display was not overcrowded, and was one that attracted much attention.

The third display was one of aluminumware. This display, although not as close to the sidewalk as the other two, was none the less attractive, and the

Store front of Prince & Co., Bloor S t. W., Toronto, showing three displa y windows in 16*-foot front.*

New Western Freight Rates Under Analysis

Benefit to the Provinces West of Manitoba — Retailers Should Reap Considerable Advantage — Reduction of About 7½ Per Cent.—Some Interesting Figures.

THAT the retail merchants of Alberta, Saskatchewan and British Columbia will be materially benefited by the decision of the Dominion Railway Commission in the Western rates case is evident after a study is made of the application of the new rate schedules, although in the general tendency towards unsettled prices, in the West at the present time, the proportion of benefit to the consumer and to the retailer may not be definitely defined. To the wholesaler there is little change, although there is evidently a direct saving to eastern houses of about one cent per hundred pounds on western orders, this being the reduction in the rate between the head of the Lakes and Winnipeg.

To summarize the order of the commission briefly it may be stated that the principal provision is to put the rates for Saskatchewan and Alberta on the same basis as Manitoba, and to make an even more substantial reduction on the proportionately higher rates in British Columbia. The lower Manitoba rates, officials say, were responsible for the whole inquiry inasmuch as the cities further west objected to any discrimination.

Dates Back to 1901.

The Manitoba rates were on the same basis as the other prairie provinces from the year 1882 until 1901; during the latter year the Canadian Northern sought Government aid in bond guarantees to take over the Northern Pacific and the price of this assistance was fixed in a rate agreement providing for a reduction of about 7½ per cent. in the province, and the C. P. R. of course adopted the same schedule.

With Alberta and Saskatchewan on a rate schedule showing a 7½ per cent. reduction, the benefit to the retailer is evident as the Winnipeg trade basis may be expected to hold so far as wholesale prices are concerned; the further west of the Manitoba boundary the greater the reduction.

The decision is evidently received with considerable satisfaction in the West. It is not all that had been asked for; western rates are still higher than eastern, and Manitoba gets no reduction, but the attitude generally seems to be that a half loaf is better than none and the example established of the way the Railway Commission may be expected to use its powers is significant.

Passive Disapproval.

The attitude of the railways may be taken as one of passive disapproval. An appeal might be made to Parliament but the Grand Trunk and Canadian Northern are not likely to do so in view of what they are already seeking at the Capital, while the C. P. R. would hardly take the initiative in view of its strong financial position, which the West claims it has been responsible for largely at its own expense.

Generally speaking, from the financial standpoint, however, the decision is affecting the standing of Canadian railway stocks, as might be expected. Not only is the reduction likely to prove a considerable factor in profits but there is the significant precedent established of the powers of the Railway Commission in regard to freight rates—powers which the members have shown an inclination to make use of.

Eastern wholesalers generally sell to the western trade on the Winnipeg market basis, so that on the rate west of the Manitoba capital there will be no benefit to them, but from the Lake terminals to Winnipeg there is a slight reduction,—1st, 2nd and 3rd classes 1 cent per cwt.; 6th class 2 cents per cwt.; 10th class 1 cent per cwt. This reduction should come to eastern houses. However, up to the present the new schedule has not created much interest among Ontario wholesalers, and it will be some time yet before the railroads will be in a position to announce the readjusted tariffs.

The new schedule bears no significance to the wheat transportation but the lower rates on coal should be of considerable benefit to manufacturers and other heavy consumers. There should be a benefit also to the household consumer, as coal being sold by the ton permits of price changes readily, whereas it is almost impossible to work out the proportionate benefit on small articles.

Manufacturers will be permitted commodity rates on goods shipped from their plants. The reductions will be granted on proper representations being made, with full information as to quantities to be shipped, etc.

Special distributing tariffs on a lower basis are authorized from recognized distributing centres, the reduction from the standard tariff of each territory being 15 per cent. of the prairie standard scale. The following first-class rate examples indicate the character of the reductions, the other classes being proportionately scaled:—The first-class rate from Winnipeg to Regina is reduced by 8 cents, to Swift Current by 9, Calgary 12, Revelstoke 15, Saskatoon 13, Edmonton 16, Lethbridge 10 cents per 100 pounds. From Regina the first-class rate is reduced: To Broadview by 3, to Swift Current 6. Medicine Hat 7, Colonsay 13, Saskatoon 6, and Wilkie 18 cents per 100 pounds. From Saskatoon the first-class rate is reduced: To Hardisty by 7, Wynyard 4, Davidson 4 cents per 100 pounds. From Calgary: To Regina 10, MacLeod 3, Edmonton 4, Lethbridge 3, Cardston 4, Fernie 8 cents per 100 pounds. From Edmonton: To Saskatoon 4, Camrose 6, Wetaskiwin 6, Calgary 4, High River 7, Lethbridge 9 cents per 100 pounds. Similar reductions are made from other prairie jobbing centres. From Vancouver to Ashcroft 14 cents, Kamloops 20, Revelstoke 26, Nelson 15, Calgary 7 cents per 100 pounds.

EXAMPLES OF NEW RATES FROM THE LAKE TERMINALS.

Classes—		1	2	3	4	5	6	10
Regina	Old	154	129	102	77	68	59	34
	New	146	122	98	73	65	56	33
Moose Jaw	Old	159	132	106	79	71	61	36
	New	153	128	102	77	69	60	35
Calgary and Edmonton	Old	224	186	149	112	102	90	52
	New	213	178	142	106	95	85	49
Saskatoon	Old	175	146	116	87	78	68	40
	New	164	137	110	82	74	64	37
Lethbridge	Old	215	179	142	107	96	85	49
	New	201	167	133	100	90	79	46
Nelson and Revelstoke	Old	303	253	202	158	140	133	73
	New	251	209	167	126	115	104	61

Rate reduction between head of lakes and Winnipeg should be deducted to give net western benefits to trade—1c per cwt. on classes 1, 2, 3 and 10, and 2c cwt on class 6.

HARDWARE AND METAL

VOL. XXVI. No. 18 Toronto, Canada, May 2, 1914 Two Dollars per Year

The Business Situation

ALTHOUGH the spring has been rather late and has to some extent affected the business of the retailers, hardware jobbers and manufacturers report a very satisfactory movement in spring goods. Certain lines have been rather slow and in their endeavor to secure business some manufacturers have resorted to price cutting. With the advent of warm, bright weather an improvement in business will be noticeable immediately, and retailers are quite optimistic regarding the future outlook. The metal markets are still quiet and orders are only for small lots.

Several paint manufacturers report that business is good, although orders are harder to get than during the same period last year. The opening of navigation is giving many of the wholesalers an opportunity to ship orders placed for delivery by boat. In commenting on the business outlook the Financial Post says:—

"In Ontario spring is somewhat late. This, however, is not altogether a disadvantage providing that the weather from now on is favorable. When the big crop is produced, however, the general reports are eminently satisfactory, the weather being on the cool side, but not so much so as to interrupt the progress of seeding.

"These excellent conditions with respect to the fundamental industry of the Dominion should offset the depressing influence of external conditions as in Mexico, and hardening money in Europe, and the somewhat unsettled state of our local security market.

"At the close of the week the bank statement was issued and it indicated that Canadians were at any rate saving some money, and it also indicated that during March the commercial loans of the banks had shown a normal expansion. After a period of severe monetary stringency it is comforting to know that the banks are in a better position than normal in so far as cash resources are available. With a good seeding season, and our banks in excellent condition, there does not appear to be any reason for looking for further depression. If any change does take place it is likely to be for the better. Navigation has opened and that has had a tendency to freshen business, but the amount of actual traffic offering is not as large as usual, and has been somewhat disappointing.

"Although the extent to which building permits are being taken out in the West would indicate that the amount of construction work was large, the fact is, conditions are about normal. Supply houses state that the demands on them are not at all commensurate with the amount of the building permits issued. Plans may be under consideration for large buildings and permits for them may have been taken out, but it would appear that actual work is not proceeding to an extent that could be considered as above normal. We have to bear in mind, however, that the years immediately past have been abnormal and as yet Canada has not become accustomed to what is normal. In building, as in other lines, we feel confident that liquidation is about completed, and the next change will be towards greater activity. Domestic conditions are not unpromising and a change for the better will follow the removal of depressing external factors."

Failure of a Municipal Store

CHICAGO'S municipal store has proven a rather disastrous failure. In commenting on the causes which led up to the rather sudden crumbling of the enterprise, a contemporary says:

"Since its opening on February 19th its daily business has amounted to the average of $9.11 per day. Its object was to furnish needy people with goods at cost. As a general proposition that ought to produce large sales, if nothing else. Chicago has a lot of needy people, and everybody likes to buy at cost. Several reasons are assigned for the failure. First, the store doesn't deliver goods; but there are privately owned stores that adhere to this rule and succeed handsomely. Secondly, a rigid investigation is made of each prospective purchaser. Only persons out of work and who are not owners of property are eligible as customers, but it has been found that many persons would rather trade elsewhere than be investigated as though they were charity patients. This seems to be the experience with most methods of government aid that have been proposed."

It is becoming more apparent with every attempt that the operation of stores on the basis of municipal management or co-operative handling is foredoomed to failure. Worthy as the object behind the Chicago store was, it failed absolutely where a private store would almost surely have flourished. It is being recognized that the retail merchant is so necessary a cog in the scheme of distribution that no way will ever be found of replacing him.

And further: When failure is the outcome after enterprise after enterprise which is introduced with every seeming reason for success in the retail field fails, is it not time that the public reconstructed its idea of the retailer's difficulties and profits? If it is so easy to make money in the retail business, why do these co-operative enterprises fail?

The New Things Under the Sun

FREDERICK WEYERHAEUSER, who owned 2,000,000 acres of timber land when he died, and was reputed to be one of the richest men in the country, worked in a sawmill when he was a youth. The difference between him and tens of thousands of other youths of his time lay in the fact that he did not say that everything worth while had been done and he must be content with drudging along in the rear of the procession. Instead he looked over the field in which he was working, saw its opportunities, and became in time, the dominant force in the lumber industry. Since he started, other men, with initiative and faith in their ability to do something that had not been done before, have made millions in new industries.

Once there was no petroleum in the market, but now there are petroleum millionaires. Once there was no such thing as an electric light or an electric motor outside of a college laboratory, but now there are men who have made enormous fortunes selling electric light to displace gas lamps, as gas lamps had been sold before to displace oil, but oil and gas are used more extensively than ever, and there are electric light millionaires and millionaires who have made their fortunes out of electric traction. Once there were no photographic cameras, but now almost everybody has a camera, or wants one, and there are camera millionaires with fortunes rivaling those of the electric light men. The telegraph and the telephone and the automobile have come from the empty air because men of imagination knew that all the things had not yet been done, and set about doing some of the new things that had not been thought of.

And the wonder of it is that the men who have been pioneers in the new fields are now regretting that they have grown old and cannot do the thousand and one other things that they see waiting to be done. But some young men, with the genius of their elders, will see the things and go about doing them, instead of wasting their time in futile complaint that there are no more opportunities left for a man who wishes to get on in the world.

Should Be Self-Sustaining System

RETAIL associations contend, and rightly too, that the parcel post service should pay its own way or be discontinued. It is a fact that the big mail order houses are using parcel post to the fullest extent and they are the people who are reaping the greatest benefit. If, therefore, parcel post does not pay its own way, it is evident that the retail merchants as well as the rest of us have to put up the balance. In such a case we would actually be putting money into the hands of the mail order houses. Where, too, would there be any reduction in the cost of living to the consumer if those who do not benefit by the system have to help maintain it?

Over in the United States the retail trade is wondering if the deficit in the post office department is due to the operation of parcel post. A report shows that for the first quarter of the fiscal year, that is, from June 30, 1913, to Sept. 30, 1913, the department was run at a loss of $2,735,413.64. It covers a period when the parcel post was first inaugurated and before Postmaster-General Burleson had become active in extending its scope by raising the weight limit to 20 and later to 50 pounds. The deficit for the whole fiscal year from June 30, 1912, to June 30, 1913, was only $4,551,984.32, or less than twice the total deficit for the first three months of the present fiscal year.

The figures embodied in the report are the only ones available at the present time, no report having as yet been made for the second and third quarters. When issued much larger deficit, due to the extension of the parcel post, will undoubtedly be disclosed. If only the ratio of loss shown in the auditor's report is kept up, the deficit would amount to nearly $12,000,000, or practically three times greater than the previous year.

Our own system should be watched closely; and while every merchant should take full advantage of it at all times, yet the protest ought to be a strong one just as soon as it is found we are helping the Government maintain a system for the chief benefit of the big competitors of the retail trade.

Selling Paint and Brushes Through Glass

The Show Window Can be Made to Play an Important Part in Making Paint and Brush Sales During the Month of May—Three Excellent Displays—A Suggestion for Spring.

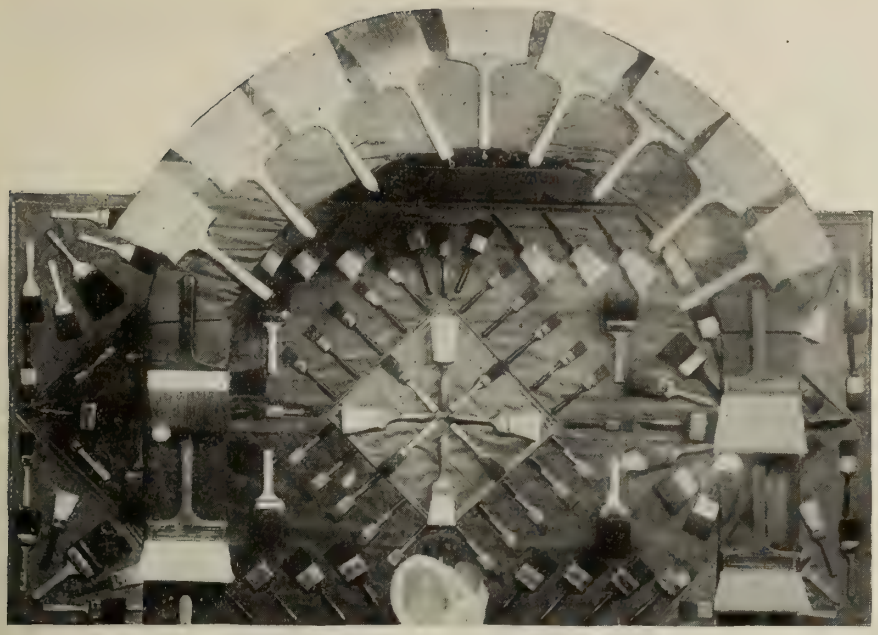
By David G. George

I DO not think I will be exaggerating, nor do I think my statement will meet with contradiction when I say that there are this week, the first week in May, more displays of paint in the show windows of retail hardware firms throughout Canada, than there ever has been during a given period in any past year.

There are several reasons for this highly desirable state of affairs. Probably the chief reason is that the trade in general realize to-day more than at any time in the past, the true value of the show window as a medium for creating sales. A highly successful merchant in a large city told a representative of Hardware and Metal a short time ago that he allowed his window-trimmer to spend a reasonable sum of money each month to secure new fixtures and material for window displays and that he believed it a good investment. Another merchant said, "I wish we could get as big returns from other forms of advertising as we get from the money put into window displays." This man is alive to the fact that the attractive window display catches the shoppers and the lookers, and pulls people into the store.

Another reason why so many displays are in evidence at the present time is the interest and enthusiasm which has been stirred up in many municipalities in connection with the clean-up and paint-up movement, a movement that deserves the support of all classes of citizens because it promotes cleanliness, thrift and civic pride.

Still another reason may be found in the fact that the paint manufacturers have taken a big part during recent years in urging hardware merchants to display painting materials in the show windows. In many instances liberal prizes have been offered for the best arranged display and this has had a tendency to raise the standard of the display shown.



Another important factor has been the part taken by trade journals in endeavoring to get the hardwaremen sufficiently interested to arrange attractive paint displays during the spring and also during other seasons of the year.

Hardware and Metal has for twenty-six years been urging Canadian hardwaremen to give time and attention to their display windows. During that time many hundreds of suggestions have been offered, and excellent display reproduced. These have had a good effect and the settings for many excellent displays have been based on ideas gleaned from reproductions appearing in this paper.

There are a few merchants who still neglect their show windows, but they are greatly in the minority and their number is growing smaller each year, you usually find

Excellent display of paint by Fred J. Mills, with Mills Hardware Co., Hamilton.

Suggestion for Window Display Background.

them complaining about business or kicking about the big and successful stores. They forget that if it pays the largest store in the largest city to put time, energy, and money into its window displays, it will pay the smallest store in the smallest city in degree equally as well. These neglectful merchants are not all located in the small towns, you will find them in many of the larger cities as well.

If this article meets the eye of any merchant who has not yet featured his spring paint display, I cannot urge him too strongly to get busy. If you want to make the most of your opportunities, make your window work for you.

In arranging a display do not forget to display paint brushes. You can often make more profit on the sale of a brush than you can on a quart of paint.

The accompanying illustrations show three excellent displays. Fig. No. 1 shows a paint display by Fred Mills, with the Mills Hardware Co., Hamilton. This display is one that created sales. The display is not overcrowded, the fixtures are inexpensive. The background was made of a framework with three panels of beaverboard painted in three colors. You will also notice the very suitable upper trim panels. While the colors do not show up in the photo, they were very brilliant and attracted much attention.

Another feature in this display is the absence of posters of any description in the display or on the plate glass.

The arrangement of the goods is very neat and many valuable pointers can be gleaned from a display of this nature.

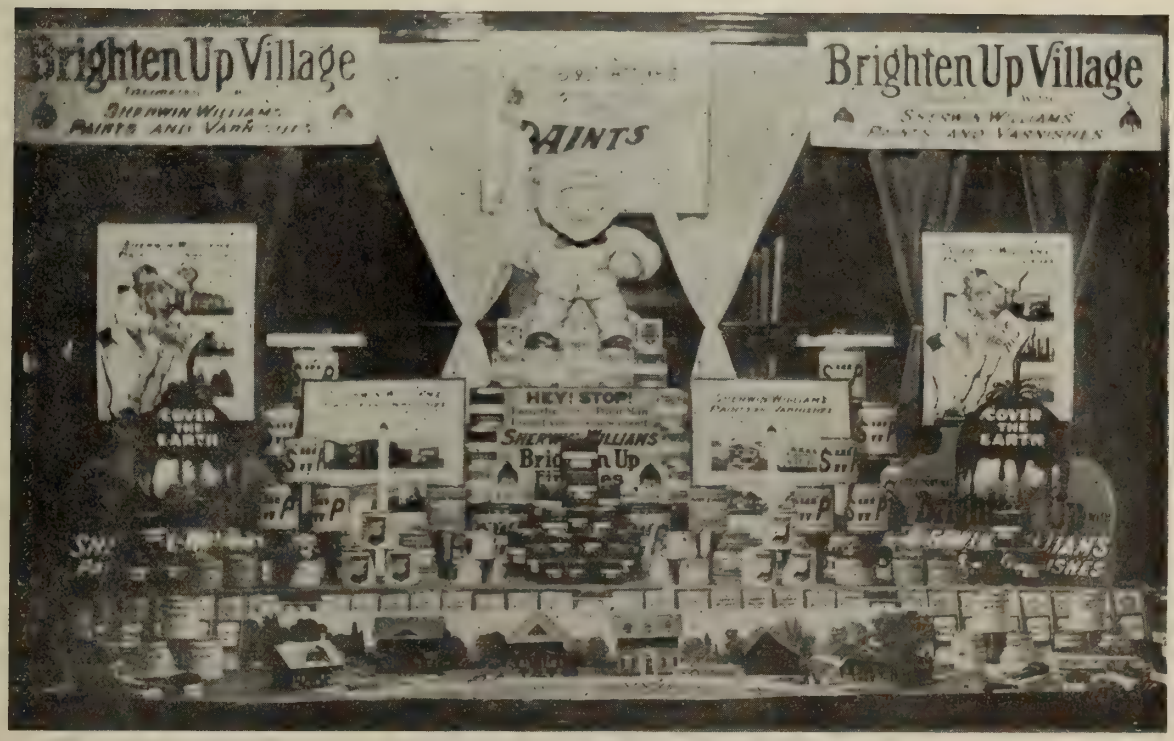


Figure No. 2 shows a suggestion for a neat background for a paint window. On this background oral and flat paint and varnish brushes and kalsomine brushes are shown.

Figure No. 3 shows a very attractive display of paints and varnishes, and is one that would stop and interest the passer-by. You will notice the neat arrangement of the packages and the equal balance of the display. Large display cards have also been used with good effect. Displays of the nature of those here shown are displays that make sales and profits.

Mr. Merchant, do not be afraid to put brains and hard work into your windows.

If you know how to arrange an effective window display you have a gift that

(Continued on page 66.)

Neat and attractive window display of paint.

The Inside History of a Hardware Business

The Last of a Series Telling How a Young Hardwareman Turned a Business That Was on its Last Legs Into One of the Most Flourishing in His Province.

By Byron J. Morrow.

I HAVE heard young men starting out in business say: "I don't see any reason why I shouldn't make things go. I know hardware from both the buying and selling ends."

It is not merely knowing how to buy and sell goods that makes a successful merchant. The real test is in a man's ability to finance his business. When I took over the Burton store in A——, I knew hardware from brass tacks to threshing machines and naturally thought that I could run that business to perfection. But my knowledge of finance was fearfully and wonderfully scant. I thought it was merely a case of selling goods, putting the money in the bank and issuing cheques when your bills came due. It looked just as easy as that to the unsophisticated young hardwareman who figured as the head of Hardy & Co.

Well, I was soon in financial difficulties. This was inevitable, of course. I had started business on a shoe string and had to carry heavy financial obligations. And then business came very slowly at first.

During the third month I discovered I had payments coming due that I couldn't meet. According to my agreement with the wholesale house supplying me with my chief line of credit, I was paying off a certain sum each month and was supposed to settle up for fresh purchases on a thirty-day basis. I was supposed to pay the house something like $700 in two weeks' time and there was a cash balance at the bank of $97.02. In addition I had bought a few tempting assortments from glib travelers who had dropped in with fine lines of goods to show and a still finer line of talk to back them up. Several amounts were due in a short time as a result of my miscellaneous purchases —and some of the lines secured in this way were not selling very well, either.

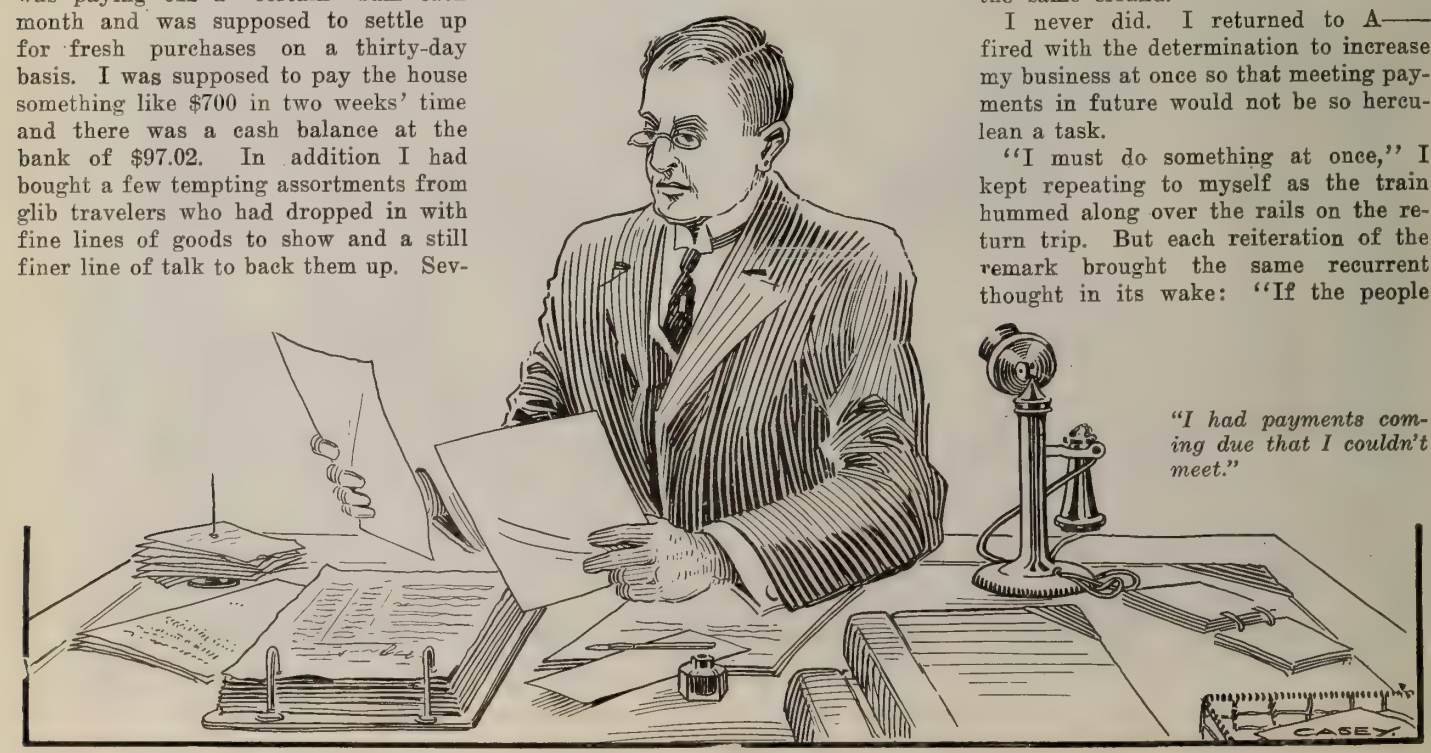
I sat down at my desk one evening and figured it all out. No matter how I figured it, there was no possibility of scaring up enough real money to cover all my obligations. I could see that. Reckoning on the usual amount of business for the two weeks left me, I was going to be about $400 short.

There was no way of stirring up more business in the time at my disposal. Special sales did not make a hit in A——. The people were not educated up to bargain sales. The only kind they knew were bankrupt sales and it made them suspicious when any store talked sale without the all sufficient reason of bankruptcy therefor. I believe the general impression was that Hardy & Co. would be holding a bankrupt sale before long. The opposition hardwaremen had never been friendly to me and in many ways they were doing their best to force me to the wall. They were quite ready to nail down the lid of my business coffin; but I proved a pretty lively corpse and in the sequel I burst out the lid so forcibly that the voluntary undertakers were considerably damaged.

Realizing my position fully, I posted up to the city at once and laid my case before my old chief. He was very good about it. He even smiled a little when I walked in as much as to say: "Well, I've been expecting you."

"How's business?" he asked.

"That all depends," I replied. "If I can arrange my finances and keep things going, business is going to be fine. There's a grand opportunity for a live hardware store in A——. But the question of immediate financing——"



"Show me your figures," said the Chief, abruptly.

I went into the whole business with him, showing him everything I had done. I had even brought along some photographs of the store, taken since the process of rejuvenation had been more or less completed, and, by way of contrast, photographs of the two rival stores. When I had finished he did not take more than a second to reach a decision.

"We'll carry you," he snapped out. He always talked in a harsh, abrupt way when he was doing one a favor. If he had turned me down, he would have done it in a smooth and unctuous way. "You have a good chance there and—well we know you and what you can do. But look here, Hardy, don't come back on the same errand."

I never did. I returned to A—— fired with the determination to increase my business at once so that meeting payments in future would not be so herculean a task.

"I must do something at once," I kept repeating to myself as the train hummed along over the rails on the return trip. But each reiteration of the remark brought the same recurrent thought in its wake: "If the people

"I had payments coming due that I couldn't meet."

won't come to the store, what am I going to do?'' Gradually, of course, my mind followed the thought through to its logical conclusion and I made the following decision: ''If the people won't come to the store, I must go to the people.''

Turn of the Tide.

And from the time that this decision was reached, dates my real success in the retail hardware business. It brought about the turn of the tide.

A few days later I took a run back to the city again, gunning for local agencies. The town of A—— and the neighboring vicinity had not been worked very hard for prepared and metallic roofing, wire fencing, cream separators, etc. Neither Dilling nor Brown had gone much into what they were inclined to term ''side lines.'' They had agencies but they did not push for orders or budge five feet from their office stools to get business. Accordingly I had no difficulty in getting agencies and returned to A—— ready for an active campaign.

Many days we were far from busy in the store. Sometimes we wouldn't have more than two or three customers in an hour's time. On such days I formed the habit of getting my samples and driving out around the country. I called on every farmer within a radius of ten miles in the next six months and, although my success was very slight at the start and never what you would call spectacular at any time, the business gained in this way was what brought about the turn for the better in my business affairs.

The fact that the district had never been ''worked,'' was what made it so difficult to sell at first. They were not accustomed to having reputable merchants call on them in that section of the country. Peddlers they had by the score, book agents buzzed in the neighborhood like flies around a molasses barrel, and lightning rod salesmen bothered them a-plenty. At first they were inclined to extend the same prejudice toward me that they treated the peddler fraternity to; and it took me some little time to wear down this impression. When I finally succeeded in removing the prejudice, business began to come my way in real earnest. But it was certainly a hard uphill fight.

There was one reason why this outside business benefited my financial standing to so marked a degree. It required no capital investment. I secured a commission on what business I placed without having to invest a single copper. There was no risk to it whatever. Furthermore it did not add to my overhead charges. Everything that I made, literally speaking, was ''velvet;'' and the state of my finances was such that plenty of the velvet was needed to keep the frail bark from breaking up every time we bumped into a rock —which was pretty often.

And still further, my visits around the country put me in touch with the farming community and won for me a clientele which grew larger all the time. The farmers I met on my trips came to know me and in time, I believe, to like me. And when they drove into town they would drop in to my store for what they needed.

Yes, ''outside salesmanship'' was the real foundation on which my business was built.

I Build Up My Staff.

One of the main reasons why I have succeeded and made money in the business is because I have always made it a rule to have good men with me. It is impossible to always have good men if yo are continually changing your staff. Accordingly I have always endeavored to keep my good men. There are two men with me today who have been in the store for many years. One of them I inherited from Burton, my predecessor—Billy, the junior clerk of previous installments of this story. The other I found when I had been in business six months. How I happened to find him is worth telling.

There was a parcel delivery system in town and there were times when I had to depend on them for the distribution of my goods. The driver who handled my parcels was a little Irishman with a turned-up nose and mustache that had something inexpressibly comic about it. For the first week I couldn't help laughing every time I set eyes on Maurice. (What a name for an Irishman!) He had a large family and was earning, I found, the princely stipend of $7.00 a week. As a result poor Maurice looked like a Robinson Crusoe in dire straits, so patched and worn were his clothes. His one sartorial flight above the level of sheer dilapidation was a pair of buckskin gloves, several sizes too large for him. But they, alas, had seen better days, and, when I first made his acquaintance, were decidedly more skin than buck. But Maurice O'Toole was always in a happy frame of mind, and his line of conversation was crammed with more original funnyisms and more straight-from-the-heart optimism than—well, even than Sam Weller's.

One day I said to him: ''You can't raise your family on the money you make in the parcel business, O'Toole. Why don't you get different work?''

''Is it a job you're offering me?'' he asked.

I certainly had not intended to offer him a job. Maurice O'Toole, down-at-heels ragamuffin that he looked, as a salesman in a hardware store! Banish the thought! And yet I needed a man, a good man, badly. Ever since the day when I had sent packing the senior salesman that Burton left on my hands, I had been changing and shifting around without getting a man worth his salt. The young fellow I had at that time was a ''sporty'' young gentleman who was strong on the use of boxing gloves and fishing poles but weak on the sale of them. Maurice O'Toole had the gift of the gab in more generous degree than any man I had ever known, but there wasn't the slightest offensive strain in his blarney. Could he use that persuasive brogue to sell enamelware and stove pipes? I decided to take a plunge.

''You're on, O'Toole,'' I said. ''Quit your job and come on with me and I'll make a salesman of you. I'll guarantee your account down at the clothing store so for Heaven's sakes get a respectable suit of clothes!''

Make a salesman of him? I was too late for that job. He was born a salesman. It was not long before he was demonstrating things about the fine art of ''persuading people to purchase products at a profit''—as friend Sheldon hath it—that I had never imagined before. He worked early and late, and pretty soon he knew quite a lot about hardware. You can't learn the hardware business in a day, but Maurice beat all records at acquiring a hardware education. And to hear that tongue of his going, jabbing arguments at his customers from every possible angle, while his twinkling little eye was studying the customer's face with a fine shrewdness for effect; I tell you it was, and is, a treat.

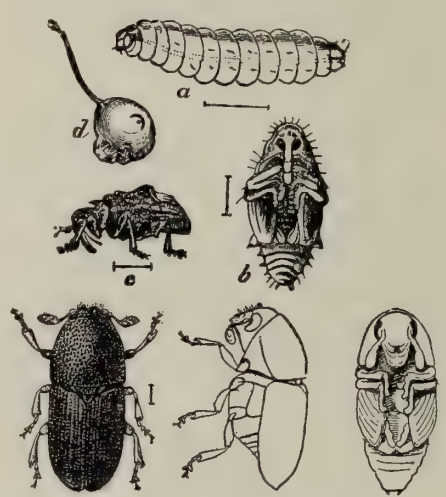
For Maurice is still with me. He was born a salesman and nothing could ever have prevented him from making a good one. But he wasn't born a business man and nothing could ever pound executive ability into him. Accordingly a salesman he will remain all his life—with me, I hope. I pay him $25,00 a week and he's worth every cent of it to me. The little O'Tooles are getting good educations and Maurice himself has become a real stylish dresser.

There is not much more to tell. After the first nine months were over, my financial worries became less and after the first year I had no difficulty in meeting payments. From that time on, the business grew on much the same lines as any other hardware store. There are several principles that I have always adhered to. Quality is the main plank in my merchandising platform. ''A square deal for the customer,'' is my motto first, last and always. I believe in displaying goods prominently and in showing prices. I advertise.

This sums up briefly my general policy and I can heartily commend every feature of it to any young hardwareman just starting in business.

(The End.)

Getting Business from the Fruit Growers



The Hardware Merchant is in a Position to Supply a Need Which is Evident in Many Parts of Canada—The Proper Care of Orchards Means Increased Profits for the Orchard Owner and the Hardwareman.

ARE retail hardware merchants inclined to overlook the possibilities for sales of tree pruners, sprayers, spraying materials, fertilizers, mixtures, etc., or are the hardware merchants securing their share of this business?

The question is not a hard one to answer. There are some retailers who are doing a big business in these lines, and there are other merchants who are doing very little. Investigation shows that the merchants who are doing the big business are men who keep closely in touch with conditions in their locality, and are men who study the ailments of the fruit trees, and the pests which retard growth or the development of perfect fruit. A hardware traveler recently stated that in one district where considerable fruit growing was in evidence, he sold to several merchants who purchased large numbers of pruning saws, pruning shears, sprayers, spray pumps, syringes, etc., and large quantities of spraying materials. In the same district he sold to other merchants, who only bought small quantities of each line, simply because they did not go after this class of business and paid little or no attention to conditions existing throughout the fruit districts. There are of course sections in Canada where fruit growing is not carried on to any great extent and the possibilities for sales are limited. On the other hand there are many sections where you will find neglected orchards, which can be made a source of great profit to the owners. In these sections there is much room for educative work among the owners of orchards, and the hardwaremen should be ready to do a fair share in pointing out to the orchard owners the possibilities before him. The fruit-raising industry should be encouraged by the retail hardware merchants, because, with the development of the industry comes a demand for a large and varied assortment of goods that are, or should be, sold by the retail hardware merchants. Too many hardware merchants put in a stock of sprayers, pruners, spraying material, etc., and instead of pushing the goods by window displays, talking to the farmers or orchard owners, newspaper advertising, and the distribution of literature supplied by the manufacturer, they allow goods to remain on the shelves, or hid away under the counter until the pruning and spraying seasons are past, and then bewail the fact that there is no demand or need for such goods in their locality. There is certainly a need, and a great need, in many localities and the retail hardware man can create the demand by showing up the need. The best way to show-up the need is to show the goods which have been produced to meet the need.

There is a movement on foot in various parts of Canada for better orchard management and this movement should have support of hardware merchants for it will mean big business for them later on. As an example the following from the annual report of the Ontario Fruit Growers' Association will be interesting:

"In view of the fact that so many of

They create business for the hardware dealer.

the old orchards in the Province of Ontario were being seriously neglected, a campaign for better orchard management was commenced in the Spring of 1911 in the Counties of Northumberland and Durham.

Four demonstration orchards, one each at Colborne, Cobourg, Port Hope, and Newcastle, which had been very badly neglected, were taken in hand for a period of three years to be treated according to the best orchard practices. The orchards were situated near the main road where they could be under observation by passers-by throughout the season so that the results of the demonstrations could be noted.

Conditions of Orchards in 1911.

These orchards have been planted some thirty or forty years, but had been almost totally neglected as to pruning, cultivation, fertilization and spraying. In fact, they had never been sprayed, and hence the quality of the fruit was of a very low grade, the percentage of No. 1's varying from 30 to 60 per cent. They were full of bark lice and blister mite, and had suffered severely from canker and sun-scald, but it was hoped that with careful management, liberal feeding, and thorough pruning and spraying, that they would respond and give satisfactory results. Two of the orchards were in sod and had not been plowed for years. The soil in the Colborne orchard is a light sandy loam, and in the others a clay loam.

Treatment.

The orchards were all pruned in 1911, not very severely, but more of a cutting out of the dead wood and a thinning out of the top. In 1912 the greater number of the high trees were "dehorned," as much as 12 feet being taken off. Our object in doing this was to make a more spreading tree, have the fruit borne on the lower branches and thus economize in picking. In 1913 a lot of small twigs and branches were cut out to open up the trees thus giving the fruit a better chance to color.

All cuts of 1½ inches in diameter and over were given a coat of white lead and oil. The rough, loose, shelly bark was scraped off the trees to facilitate spraying operations. The orchards were all manured each year at the rate of 10-12 tons of farmyard manure per acre. In two orchards the manure was supplemented by an application of 200 lbs. of muriate of potash and 400 lbs. of acid phosphate per acre.

The orchards were plowed in each year as early in the Spring as it was possible to get on the land, and then they received thorough cultivation up to the middle of June when a cover of red clover, buckwheat or hairy vetch was sown.

The orchards were sprayed very thoroughly three times each year as follows:

(1) Before or as the leaf buds burst, with commercial lime-sulphur, 1 to 10, to control oyster shell bark louse and leaf blister mite.

(2) Just before the blossoms opened, with commercial lime-sulphur, 1 to 35, with 2 lbs. of arsenate of lead added per 40 gals. of mixture to control apple

Keeping Track of Daily Sales and Stock on Hand

Daily Analysis and Record Necessary for Intelligent Grasp of Business—A Simple Method for Monthly Stock-Taking—Sample Sheets for Records of Clerks' Sales.

Fifth of a Series by Wm. Cambell.

LET us discuss this matter with you and help you to find out what you know about the life of your business, for in very truth the Sales are its life, and this life can be made a very interesting study if we go about it in the right way. Moreover, the study of your Sales will pay you perhaps better than any other study in this world.

You will perhaps say, "Oh, I know how much my sales are," but do you know? Do you know how many knives you have sold and what gross profit they brought you? Do you know wha your window display brought you in? Do you know which line you carry brings you in the best profit? Do you keep a close watch and analyze your Sales every day or every week so as to know how much you have sold of each class of goods and the profit on each class? If not, you should.

Progressive Departmental Stores can tell all this by instant reference. That is one reason why they are progressive. Do you know that in such stores they encourage the Departments that yield the best net profits by giving them the best and most prominent positions, and this close supervision and analyzing of the Sales goes on all the time, not spasmodically.

Now it follows that if you dive deep down into your Sales and find out how much you sell of each class of goods and find out which is paying you, that you will consider seriously how you can increase the Sales of the profitable lines. There is no doubt that in the smaller towns as well as the larger, judicious, and well-thought out local advertising does bring in a lot of business. Of all advertising your window display, especially in a place where the buying public are accustomed to go down town and scan the windows every few days, this is the most fruitful of all the advertising you do.

Records of Daily Sales

Now, about your daily sales: what is the simplest method for keeping track of them? Suppose, first of all, you are not attempting to departmentise your business; to know how much you sell of this line, and how much of that, but simply want a daily record of totals in such a form that you can compare it with the most logical period, the corresponding date of one year ago; and again, compare it week by week, month by month, and finally your record for the full year 1914 with the full year 1913.

Some merchants have remarked to me: "Oh, I couldn't think of keeping a daily record in each department and of each sales clerk. I'd need to engage an extra clerk, and my office expenses would be too heavy."

Try it and see. In probably 85 per cent. of Canadian stores this work of tabulating is done by the bookkeeper in odd times. The sales slips do not pile up. They are put on the files, one for each, or one for all, whichever is handiest, and a few minutes now and then throughout the day is all that is required. When the afternoon is near an end it is surprising how few your bookkeeper will have in hand to do: just the extra number, in most cases, that a busy afternoon brings in.

Just one suggestion here. Make your day close at five o'clock if your store closes at six. Some attempt to keep the record right up to the last moment of closing on the ground that it is more satisfacory to have each day stand by itself, but what real difference does it make if the last hour, from five to six, is added onto the next day. It is a complete record and a comparison you want, and if the days compared are estimated on a similar basis, what difference does it make. There is too much of a crush entailed on the bookkeeper unless you give her an hour fairly free to complete her tabulations.

Each Sales Slip or the Total?

The record sheet may be either ruled out day by day or printed especially for you. Here, again, you must choose be-

DIAGRAM NO. 3.

How to know what your stock should be month by month; in this case 35% of the turnover is taken as the gross profit.

	Col. 1, Purchases.	Col. 2, Sales.	Col. 3, Shows stock on hand.
Stock on Hand	$15,000.00	.....	.....
Purchases	3,000 00	.....	$18,000 00
Sales	.....	$4,000 00	.....
Cost of sales on basis of 35% profit	.....	.....	2,600 00
Stock on hand	.....	.....	$15,400 00

Col. 3 shows the balance of stock month by month. In col. 1 you put your original stock, and your purchases month by month. In col. 2 you put your sales, and at end of year, when you take stock, you put the amount of your inventory in col. 2; then the difference between cols. 1 and 2 is the gross profit.

Big Selling Event in Score of Towns and Cities

Merchants Find Their Sales Greatly Increased by Extensive and Concentrated Advertising—Saturday Favorite Day for Holding it—Reports From Peterborough, Wingham, Brantford, Guelph, Etc.

THE success of Dollar Day as it was carried out in Brantford a year ago and later on in Calgary, Alta., has led a number of other Ontario towns and cities to attempt to duplicate the record of the other two places, and almost without an exception the results have been most gratifying. So much so that there has been some clamoring for a repetition next year, a few even urging that it be made a semi-annual event. It is as if it were a public holiday, but unlike this in fun-making giving place to business, a piling up of purchases on purchases, where the surrounding district joins the citizens in flinging broadcast their dollar bills and rejoicing the hearts of the merchants at sales increased sometimes to huge proportions.

It is no wonder the merchants like it. Dollar Day to them is an occasion when their advertising brings such results as justify their expenditures many times over. It is a time for clearing odd lines and left-over goods. It is an opportunity for devising ingenious bargains and methods of advertising them. No matter what line of business a dealer is engaged in, there is always a way in which he can make use of Dollar Day. It is a time when the country folk drive in for miles around and in some cases make purchases for many months ahead.

Townspeople Enthusiastic.

The public like it, too. Their curiosity is aroused—their interest in the big shopping festival is awakened—they desire to purchase some of the goods advertised in the newspapers—and they come. They come from the north, the south, the east and the west—on trains and radials, others in horse vehicles and still others on foot—all bent on one purpose, to see and be convinced, and to save money by spending it. Of course, the townspeople are enthusiastic about the event from the start. Many of them, if they have not participated in a Dollar Day before, have at least heard of it, and they quickly decide that the occasion is no ordinary one.

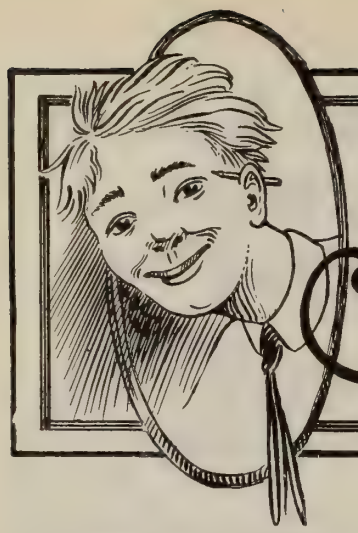
Brantford's second trial was highly successful and some remarkable bargains were produced as leaders by a a number of the stores. The "Expositor" also produced — or described — "The Mysterious Mr. Dollar," and a reward of $10 for his capture helped to stir up interest in the event.

Woodstock marks down Saturday, February 21, as a record day in the history of its retail merchants. In describing the results, W. J. Taylor, of the "Sentinel-Review," says: "Dollar Day was a huge success in Woodstock—much greater than either the merchants or we ourselves anticipated. The dry goods, clothing and haberdashers, and boot and shoe stores practically all did a business larger than on the Saturday before Christmas, which is generally conceded to be the best day in the year. The hardware, drug, book and fancy goods and furniture dealers, speaking generally, did about double the business they would have done on an ordinary Saturday at this time of the year. The groceries and meat shops all had a much larger day's business than they would have had otherwise, and there were more farmers in town on 'Dollar Day' than on the Saturday before Christmas. The day was so successful that the merchants are determined to hold a 'Dollar Day' twice a year in future."

In Guelph the two newspapers co-operated with this result: "Dollar Day in Guelph was pronounced by the merchants co-operating to be a huge success. Although there were only ten days to advertise the event, great crowds were on the streets early in the morning, awaiting admittance to the many stores offering Dollar Day bargains. Many of the merchants report record business, and although a large number were skeptical in the first place, they are now convinced that Dollar Day is a good thing. It will probably be an annual event in Guelph."

Sold Paper for 175 Rooms.

Peterborough celebrated on March 14. One example of the heavy sales is furnished by one firm, Trebilcock Bros., who sold wall paper for 175 rooms on the one day!



Getting Them by Poetry.

Tuesday, March 17, was the day selected by the newspapers and merchants for Dollar Day in Wingham and the public were exhorted to "Combine business with pleasure and be in Wingham on St. Patrick's Day." Both the Times and Advance carried a large amount of extra advertising and the day was a big success. In the way of general advertising the Advance printed an interesting poem, the last verse of which reads:

Come in spite of wind or weather,
Just as early as you can,
Have your work all done on Monday,
So that naught can spoil your plan,
And surely bring your dollars,
The dollars old and gray,
The false and fickle dollars
That lead us all astray;
The worn and weary dollars,
The shy and sheery dollars.
We want all kinds of dollars
On Wingham's Dollar Day.

Special prizes were given for the farmer bringing the largest number of persons in one load, the oldest lady buying

(Continued on page 64.)

THE JUNIOR CLERK'S PAGE

GETTING A START.

The heights by great men reached and kept,
Were not attained by sudden flight;
But they, while their companions slept,
Were toiling upward in the night.
—Longfellow.

GETTING a start in business early is a great advantage. Most of the men who have been great successes have gone to work young, and have made their early years tell.

Opportunity usually comes to a young clerk through some older man. Therefore, you must attract attention. You must gain a reputation for industry by being industrious. Remember, every clerk is being "sized up" not only by his "boss," but by the whole village.

In every store one clerk "knows." He is asked questions. His fellows turn to him for information. The clerk who "knows" is in line with opportunity. The day is sure to come when he is called to take the higher job. Some clerks know a lot, but they know the wrong things. They know things that don't help in business.

Cultivate your memory. A good memory is absolutely essential to progress. Memories can be improved by memorizing things. Memory is largely a matter of concentration of mind. Don't forget the things you should remember. Every time you forget, your memory is weakened. Every time your memory responds when called upon, your power

A good day's work starts the night before with a good night's sleep.

of remembering is improved. Learn to remember five things about your business every day. Don't say to yourself: "Oh, I will learn, it will come to me"—that's drifting. Say to yourself: "I will learn—I will learn every day." At night ask yourself: "What have I learned to-day? What do I remember that I did not know yesterday?"

That's the great trouble about dissipation. Dissipation steals the memory. The vicious clerk with fishy eyes answers you: "I can't remember."

As Shakespeare expresses the thought:

"O, that men should put an enemy in their mouths, to steal away their brains!"

What have I learned to-day?

Cultivate the habit of Observation. Every thing—every move—means something. The clerk who has eyes in his head, observes—he sees—he reasons—he thinks it out—he knows what is happening. He is on the job. His mind is Johnny on the spot. His mind is not somewhere else, wool gathering.

A good day's work starts the night before with a good night's sleep. That's why tango dancers don't remember.

Everything comes to him who knows where to wait. Opportunity runs over the fellow who walks on Opportunity Boulevard.

There is a tide in the affairs of men
Which taken at the flood, leads on to fortune;
Omitted, all the voyage of their life
Is bound in shallows and in miseries.
—Shakespeare.

Then wit often counts. I know a man who is rich to-day who attracted his employer's notice by a witty answer. He was lying full length on a case of screws, waiting for the elevator to return to the cellar. Suddenly the boss stood over him and remarked: "You look very independent." The clerk, without moving, answered: "Any man can be independent on five dollars a week."

If you had to walk five miles up and down hill you might call it tiresome Work. But if you play golf you forget all about the walking—you are interested in the Game. You don't get tired. You are sorry when the game is over.

Make a Game out of your work and it will be easy. Every sale made or lost is a game. Every day in business is a game. It is the most interesting of all games. To a clerk who expects to rise it is impossible to hang around a pool parlor when he might be playing the business game.

Go to any small town and size up the young fellows who spend their time and money in the pool emporiums. Would you go there to find a clerk to become a partner in your business?

Let me tell you a secret. If you want a real good man, hunt the fellow who already has a good job and doesn't want to leave it.

No matter how dull the barber's trade is, you will find one barber with customers waiting. The rest in "Murderer's row" take the suckers, who don't know.

Costly thy habit as thy purse can buy,
But not express'd in fancy: Rich, not gaudy,
For the apparel oft proclaims the man.
—Shakespeare.

Appearances go a long way in this superficial world. We take people at their face value. Therefore, my son, shave every day. Shine your shoes. Be neat in appearance. The man who is

No matter how dull the barber's trade is you will find one barber with customers waiting.

careless in his dress may be a careful bookkeeper; but the world won't believe it. I have met some great chartered public accountants, and I never met one who wasn't scrupulously neat in his person, and I never met one who wasn't a small man. Queer, isn't it, that great

bookkeepers are small, while extra good salesmen are usually large? There's a reason!

The competitive spirit makes every business grow. Without competition in efficiency on the inside the auctioneer's flag will soon hang on the outside. There is always one or two kinds of competition in every business—competition among employees to do the best work, or competition to do the least work! It all depends on the boss.

As a man once answered who was asked the question:

"Is life worth living?"
"It depends ON THE LIVER."

If you want to be a success you must compete with yourself. You must lay out your day's work and see if you can do it. You must measure its quality. You must be your own taskmaster. The best way to get a good day's work out of yourself is to lay out a good day's work in advance, and then have the will power and industry to do it. Use spurs on yourself.

"Plan your work, then work your plan."

Cut down "interrupters" and "time-eaters." Don't let them consume your valuable time. If you are trying to perform a set task, you won't—if you are just drifting, you will sit down and talk it all over. We all catch trains because we know they won't wait. The Pennsylvania Limited would never reach New York on time if the "time-eaters" had their way. They would "talk things over" at every station.

Mr. Mallaby Deeley, of London, pulled off the largest real estate deal in the world. He has no office nor telephone. He says he hunts up the men he wants to see. He uses their offices and can leave when he's ready. You can't do this in your own office, can you? Blessed is the man who has no desk, because he is free.

"If you can write a better book, preach a better sermon, or make a better mouse trap, tho' your house be in the woods, all the world will make a path to your door."
Both Emerson and Hubbard are accused of writing this.

I knew a firm where the partners quarreled about where their desks should be. One partner took a desk near the back door. The work will make a path to the desk of the strong man, even if it be on the alley.

I knew a corporation where they quarreled about the rank of the officers. One man took no title. He was simply a "director." When the financial storm came this simple "director" took the helm. Wherever Ben. Johnson sits is the head of the table. All this means, my son, not to quibble and squawk about place and office, but make it your ambition to be the Main Works in your little boiler factory.

Nothing is more amusing than some small-souled man rattling around in a big job, like a deuce spot in a dice box. Never leave your job until you have grown so big that all its titles and high-sounding appendages mean nothing to you.

The man should give dignity to the position, not the position to the man.

Devote your thoughts to the success of the business—many men have "forgotten themselves into immortality."

—Mike Kinney in The Gimlet.

GETTING BUSINESS FROM THE FRUIT GROWERS.

(Continued from page 48.)

scab, caterpillars, case bearers, canker worms, bud moths, etc.

(3) Immediately after the blossoms fell with commercial lime-sulphur 1 to 40, with 2 lbs. arsenate of lead added per 40 gals. mixture to control codling moth and apple scab.

Results.

The results obtained are in striking contrast to the small and indifferent crops yielded in unsprayed and uncared-for orchards of the same locality. The quality of the fruit in each of the three years was exceptionally high—the percentage of No. 1's being raised from 30-60 in 1908, 1909 and 1910 prior to our having charge, to 75 to 87.6 per cent. while under our care. Further from 95 to 98 per cent. of all the apples grown in these orchards were absolutely free from any insect pest or fungus disease. Scarcely an apple could be found with a worm in it, and it was only an odd apple here and there that showed a spot of scab."

This is only one of many examples that could be quoted to show the beneficial results obtained through the proper use of pruning, and spraying equipment, and fertilizers. In the above district many carloads of spraying material and a great number of spray machines, both hand and power have been sold.

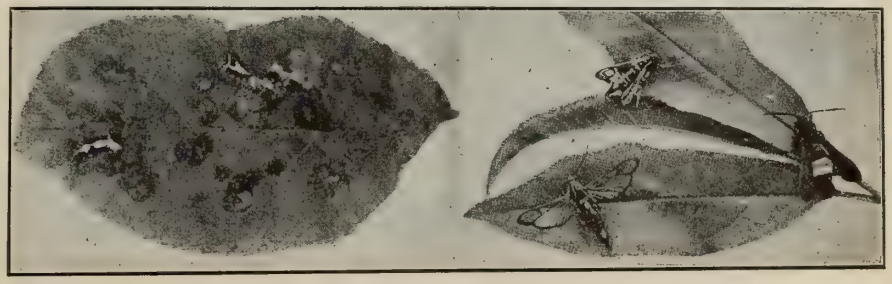
Many hardwaremen have before them unlimited possibilities for the sale of supplies for fruit growers and orchard owners. Have you investigated conditions in your locality? Are you getting your share of this business? Possibly the mail order houses or fruit dealer's supply houses, are picking up a large share of profitable business that you could get if you went after it. It might pay you to take a drive in the country and get some inside information on conditions as they actually exist in your locality.

Twenty Years Ago
In the Hardware Trade

The following items are taken from the issue of Hardware and Metal of May 5, 1894:

Thos. Davidson, of the firm of Thos. Davidson & Co., Montreal, died at his residence there on Monday, April 23. The deceased gentleman had suffered from diabetes for thirteen years, but his case was not considered precarious until a short time before his death. Mr. Davidson came from Edinburgh, Scotland, to Montreal about 50 years ago, and was one of the first commercial travelers in Canada, having driven from Montreal to Goderich before there were any railways, and called on most of the hardware merchants in Ontario at that time.

Editor's note.—The Thos. Davidson Mfg. Co., Ltd., is still doing business at Montreal, with branches at Toronto and Winnipeg.



THREE DISPLAY WINDOWS IN 16-FOOT FRONT.

(Continued from page 40.)

bright samples could be easily seen from the sidewalk on the opposite side of the street. This window is used principally for display goods of this nature.

Prince & Co. are firm believers in window displays as valuable aids in selling hardware. That they are using their 16-foot front to the best advantage is clearly shown in the accompanying illustration.

Firms having narrow store fronts, and wishing to solve the problem of securing adequate window display space, can find many valuable and interesting features in the windows here shown.

Scab on apple leaves—Adult moths of peach borer.

The Third Chapter of Western Growth*

The Peace River Country Has Become a Country of Commercial and Agricultural Possibilities—Trend of Settlement is Now Toward the Mackenzie Basin, a Land of Wonderful Promise.

By W. D. Albright.

THE agricultural development of the Canadian West, apart from ranching, divides into three chapters. First was the settlement of the Red and Assiniboine watersheds in eastern and southern Manitoba. The second was the development of the two Saskatchewan valleys, south and north, respectively. The third epoch, on which we are now entering, is the opening of the Mackenzie basin, commencing with the valleys of the Peace and the Athabasca. Will the third chapter exceed the second as the second did the first?

The Peace River country is on every man's tongue in the West. No longer is it the dread, rather mysterious and almost unattainable land of Arctic rigors and natural obstacles. It has become instead a country of commercial and agricultural possibilities, and as such is now the objective point of the pioneer.

This article is written in the new North, after an adventurous, exciting and decidedly laborious trip down the circuitous and risky waters beyond Athabasca Landing. We have passed the Grand Rapids of the Athabasca, run the Grand Cascade, struggled over many a weary portage; and we have begun to see the new North with new eyes—with eyes that glimpse the greatness of this wonderful land, which cannot fail but convey to the mind a sense of prophetic certainty. Beyond the Landing one starts to see visions of a new empire.

We of the East have had an idea that the region north of Edmonton was wholly unsettled. What was our surprise to find at St. Albert, Clyde, and various other points along the C.N.R.'s hundred-mile-line from Edmonton to Athabasca, extensive settlements where half a dozen stacks of grain marked many a homestead, and oat stooks studded the fields as thick as on the Saskatchewan plains.

The black-loam soil of the prairie extends all through this territory. Barring a few jackpine ridges and some rough country along the north shore of Lesser Slave Lake, we saw nothing else on a five-hundred-and-fifty-mile journey from Edmonton to Grande Prairie, via the Athabasca River, Lesser Slave Lake and Peace River Crossing.

A stream of people of the very finest class that ever developed a new country have been pouring into the North. The train to Athabasca had twelve freight cars and twelve passenger coaches. The train agent informed us they had been carrying a hundred and sixty or seventy passengers a day.

Many thousand homesteaders and holders of scrip have already located in one part or another of the great region traversed. Think of hundred-acre fields of oats at Athabasca Landing, Peace River Crossing and Dunvegan! Behold extensive settlement along the south shore of Lesser Slave Lake; on the plateau north of the Peace between the Crossing and Dunvegan; again in Spirit River prairie fifteen miles south of Dunvegan; south of this again in Grande Prairie, and yet again in the newer section of Pouce Coupee, sixty miles northwest of Grande Prairie and divided by the British Columbia boundary. The most thickly settled district of all is Grande Prairie, situated over a hundred miles north of Edmonton by latitude and between two and three hundred miles west. It lies within view of the snow-clad Rocky Mountain peaks, through the passes between which it receives many tempering Chinooks. The first considerable quota of settlers reached Grande Prairie in the mid-summer of 1909, treking by ox-teams the whole five hundred and fifty miles from Edmonton, the nearest railroad station and base of supplies. Even yet, machinery, provisions, clothing, furniture and seed other than that now produced in the district have to be freighted from Edson, Athabasca, or Smith, opposite Port Cornwall. Thus, in addition to the usual handicaps of pioneer farming, operations have been seriously hampered by lack of machinery to do seeding and harvesting with dispatch. Yet in Grande Prairie this past autumn and early winter, five threshing outfits winnowed three hundred and seventy-five thousand bushels of grain, besides which enough had been fed out of the sheaf or reserved for such use to have run the total crop close to half a million. Barley threshed thirty-five to fifty bushels per acre, and was nearly all ripened hard. Wheat yielded variously as to quantity and quality, but as much as forty bushels of good milling grain per acre were obtained. Oats averaged perhaps sixty, though yields of seventy were common and one acre turned out a hundred and twenty. The proportion of grain to straw is well nigh incredible. It is not at all unusual to bag a bushel from six or seven binder sheaves, whereas in the East a bushel from ten sheaves is counted satisfactory. At the risk of my reputation I will add that I assisted in threshing one load of oats grown on late spring plowing which turned out a hundred and one thirty-five-pound bushels according to the machine weigher. Count of the sheaves indicated a bushel to each four and a half sheaves. Yet these oats being sown late, had been frosted before being cut. The sample, nevertheless, was superb, as the editor may judge from the small quantity submitted.

I came to Grande Prairie well informed and therefore confident of the future of this particular area, but open to conviction regarding most of the other sections within what we have broadly styled the Mackenzie basin. I am already convinced beyond all hesitation that many million acres of prairie and bush land will soon be occupied and gradually brought under profitable cultivation. Who knows but that Marquis and Preston and Prelude wheat and sixty-day

*Reprinted from MacLean's Magazine.

Gardening on the Lesser Slave River.

oats may yet do for the New North what Red Fife did for the West? If that hope be too sanguine, great stock-raising possibilities remain. Oats and barley ripen well beyond the wheat line and, what is more, oats cut in the milk make excellent feed. Clearing and drainage will gradually reduce the danger of frost so that what is now being accomplished in Grande Prairie may be taken as an earnest of what will soon be duplicated in other tracts—is being duplicated in fact. One of the surprises of our trip was a large frame barn with shingled hip-roof at an extensive settlement just north of Dunvegan. At this same neighborhood we saw a bin of Marquis wheat said to contain fifty-four bushels, grown from one bushel sown on an acre. Near here a township thrown open to entry last summer was all filed upon in three days.

Before leaving for the North, I saw George Harcourt, Alberta's deputy minister of agriculture, and got him to talking about the new empire of the North.

"I want to give you a vision of the West," he said, unrolling a ten-foot map with red buttons stuck upon it here and there. The buttons represented places where wheat has been grown in the North, and were distributed within a line running from Fort McMurray, on the Athabasca River, sharply northwestward to Fort Simpson on the Mackenzie six or seven hundred miles north of Edmonton.

"This line," he explained, "takes in all of Alberta, even its north-east corner, as well as land a hundred and fifty miles north and a hundred and fifty miles west of the provincial boundary. How small the Maritime Provinces or the old-settled portion of Ontario seem in comparison with the tremendous sweep of territory from the international boundary north to the wheat line which this map shows!

"The fact of grain production in the North is no mere dream of to-day or yesterday. The wheat that won first prize and the bronze medal at the Centennial Exhibition in 1876 was grown at Fort Chippewan, on Lake Athabasca. It weighed sixty-eight pounds to the bushel. The prize wheat at the World's Fair, Chicago, in 1893, was raised at Peace River Landing (now calling Crossing). A Hudson's Bay Company factor tells me that twenty-five years ago he saw Ladoga wheat ripened at Fort Laird. Oats, barley and potatoes can be grown successfully much farther north than wheat, thus promising a great future for much of the Northland as a stock-raising country.

"Then look at the river systems. The many tributaries of the South and North Saskatchewan, whose waters taste the salt of Hudson's Bay; of the Athabasca and the Peace, whose mingled volume reaches Arctic brine through the mighty Mackenzie, all take their rise on the eastern slope of the Rockies. This watershed has been set aside as a forest reserve, ensuring a steady stream flow, What perfect conditions for stock raising on the plains through which they run!

A homestead on the Lesser Slave River.

"Climatologists have figured out that a thousand feet reduction in altitude is equivalent to between three hundred and three hundred and fifty miles af latitude. Calgary district is about three thousand feet above sea level, Edmonton a little over two thousand; Dunvegan, on the Peace, is thirteen hundred, and Fort Vermilion farther down the river is only nine hundred and fifty."

These figures, considered along with the tempering influence of the warm Japan current, whose soft breath is wafted across the Rocky Mountain range on the wings of the far-famed Chinook, go to explain the miracles of production now heard of from what was once supposed to be the frozen and forbidding North.

Who can set limits to the future of such a land? As J. D. McArthur, the well-known railroad contractor, put it in conversation not many months ago—"Every prediction that has yet been made about the West has been gone one better." Mr. McArthur has been building railways in Canada for over thirty years, commencing west of Winnipeg on the C. P. R. He has constructed part of every Canadian transcontinental and if all his sections were pieced together they would span the continent. He is at present constructing the Hudson's Bay Railroad under contract for the Dominion Government, and incidentally pushing through a line of his own from Edmonton to the Peace River by way of Lesser Slave Lake, to which the road is already graded and partly in operation. At least it is purported to be his own, although speculation has been rife as to whether the C. P. R. or the G. T. P. would not operate it when completed. At all events, Mr. McArthur has been building it. He is also president of the Canada Central, which will branch off from the E. D. & B. C. near Grouard to Peace River Crossing and thence to Dunvegan. Since our interview he has also completed negotiations with the Alberta and Great Waterways Railway.

Here is a project to fire the imagination. The Alberta and Great Waterways is projected from Edmonton to Fort McMurray, at the head of uninterrupted navigation on the Athabasca River. Scows ply between Athabasca Landing and Fort McMurray, but they have to be tracked back up the ninety-odd miles of rapids above the Fort. Practically, therefore, McMurray is at the head of navigation to the Arctic. From here on, it is interrupted only by a portage around the cataract at Fort Smith. The chain of lakes and rivers thus to be tapped is almost inconceivable in possibilities. Athabasca River discharges into the lake of the same name, drained by the Great Slave River, into which the Peace empties near its head. Of these three rivers, Ernest Thompson-Seton writes, "The Athabasca is a great river; the Peace is a greater, and the Slave is worthy of its parents," or words to that effect.

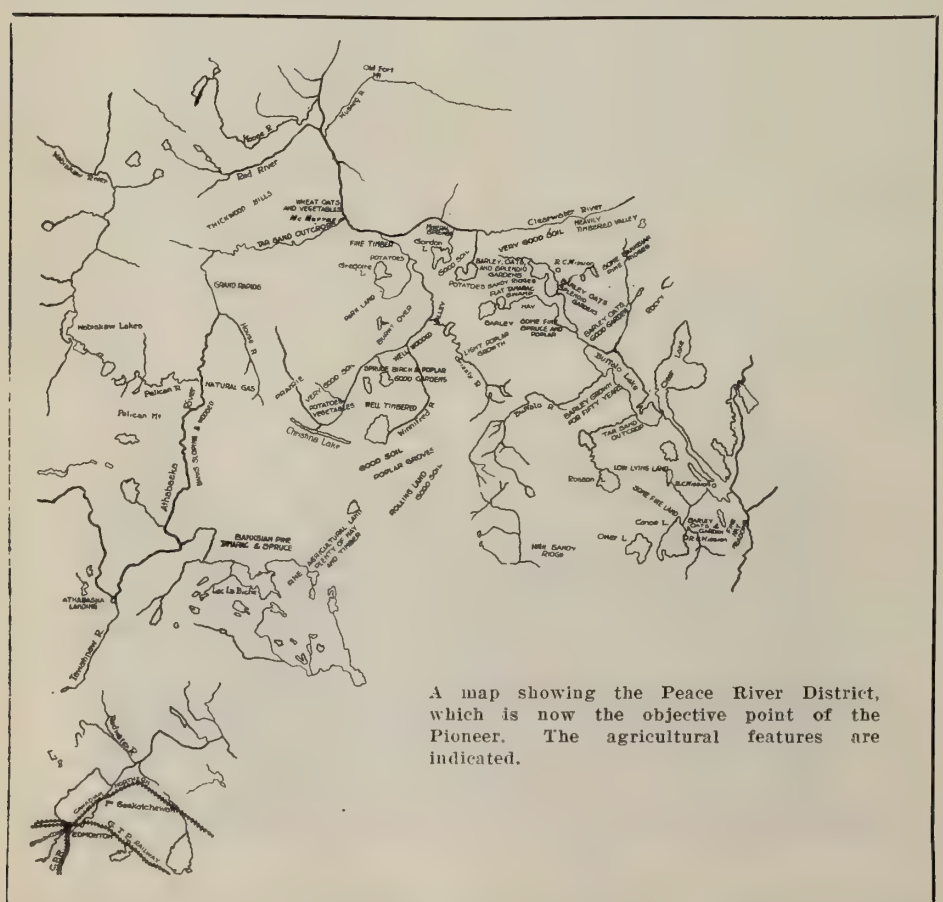
The Slave pours its flood into Great Slave Lake, which feeds the mighty Mackenzie, which swings north-westwardly toward the base of the mountain range that supplies its upper waters and then bears northward to the Arctic Ocean. Of this magnificent system of watercourses, J. K. Cornwall said, referring to the present C. N. R. spur to Athabasca Landing: "Thirty-six hundred miles of navigable water connect with steel at this point."

Perhaps the most wonderful feature of these northern rivers is their immense navigable stretches, though water powers of great potentiality are available at certain places, while minerals of known and unknown value await exploitation by the capitalist. The A. &

G. W. will place Calgary and Edmonton on one of the main crossings of the continent. At these junction points east and west traffic will be intercepted and switched toward the new North. Globe-trotters will change cars here for a thousand-league rail and water trip to summer resorts on the Arctic Sea where blubber soup and caribou steak will be features of the menu and whale-fishing a favorite pastime.

Of the Peace River climate I speak from three months' personal knowledge. These have been the pleasantest, most healthful and most favorable for accomplishing work outdoors of any corresponding period I have ever experienced, whether in New Brunswick, Ontario or Alberta. With just enough snow for sleighing since early November, with many fine days ranging from freezing to zero and with no storms as yet (writing the fore part of February) equal to what I have experienced elsewhere, we have been favored indeed. So far there have been no days but people and teams were moving, though two or three were hardly fit for driving. The few nights of forty or fifty below zero were not really so unpleasant as one or two others in December when a zero temperature was accompanied by hoar frost in the air and fanned by a light east wind. True, we have had what the old-timers call an exceptionally fine winter, but it could afford to be much worse without being at all unendurable. In Grande Prairie the extreme weather has never been of long duration. In most other sections of the North I suppose it is more continuous, but over large areas the climate seems to compare favorably with that of Saskatchewan. When one hears dozens of settlers from as far south as Oklahoma, California and Texas praising the climate unstintedly and making light of the Peace River winter after several seasons' experience, he can only conclude that its rigors are not to be particularly dreaded.

At Athabasca Landing, which is too far east to experience any very marked effect of the Chinooks, was an Englishman who had lived for some years in Ontario and Ohio. His remark when told we were from the Banner Province was startling.



"The only thing I don't like about Ontario is that miserable climate."

"What, do you prefer this climate?"

"Yes, very much."

Markets? The markets of the Pacific will be the future outlet for our surplus produce and we shall be nearer to them than any other important area of the prairie. Besides the E. D. & B. C. Railway heading for Spirit River Prairie; the Canada Central branching toward the Crossing and the north side of the Peace; the Alberta and Great Waterways striking north-east from Edmonton to McMurray, and the C. N. R., projected from Edmonton through Grande Prairie, the G. T. P. and the C. P. R. both have proposed lines directed toward the Peace. The C. P. R. has bridged the Saskatchewan at Edmonton and erected a fine depot on the north side. A British Columbia railway is building up the Fraser Valley. This will give connection with Vancouver. Thus export outlets are only a question of time.

Meanwhile the influx of settlement and general development of the country have been affording remunerative prices. Beef by the carcass commands ten to sixteen cents a pound. Pork was, until recently, twenty cents, but is now fourteen to fifteen; butter, sixty cents a pound, and eggs fifty cents a dozen. Oats for feed and seed are thirty-five to fifty cents a bushel, and wheat $1.25 to $1.50. Food is dear, costing five cents a pound above Edson prices, but as it is usually purchased wholesale, meat being bought by the quarter and evaporated fruit taking the place of fresh or canned, the cost of provisioning a table is not, after all, so much higher than in the East.

Problems in Sheet Metal Work

IN this issue we show how to develop the pattern for the prongs of a three-prong tapering joint used where it is desired to carry off three smaller pipes from a large main, a perspective view being shown at Fig. 9.

Fig. 1 shows a plan view in which the large circle A-B-C represents the main pipe and B-O-C-S-D one of the prongs.

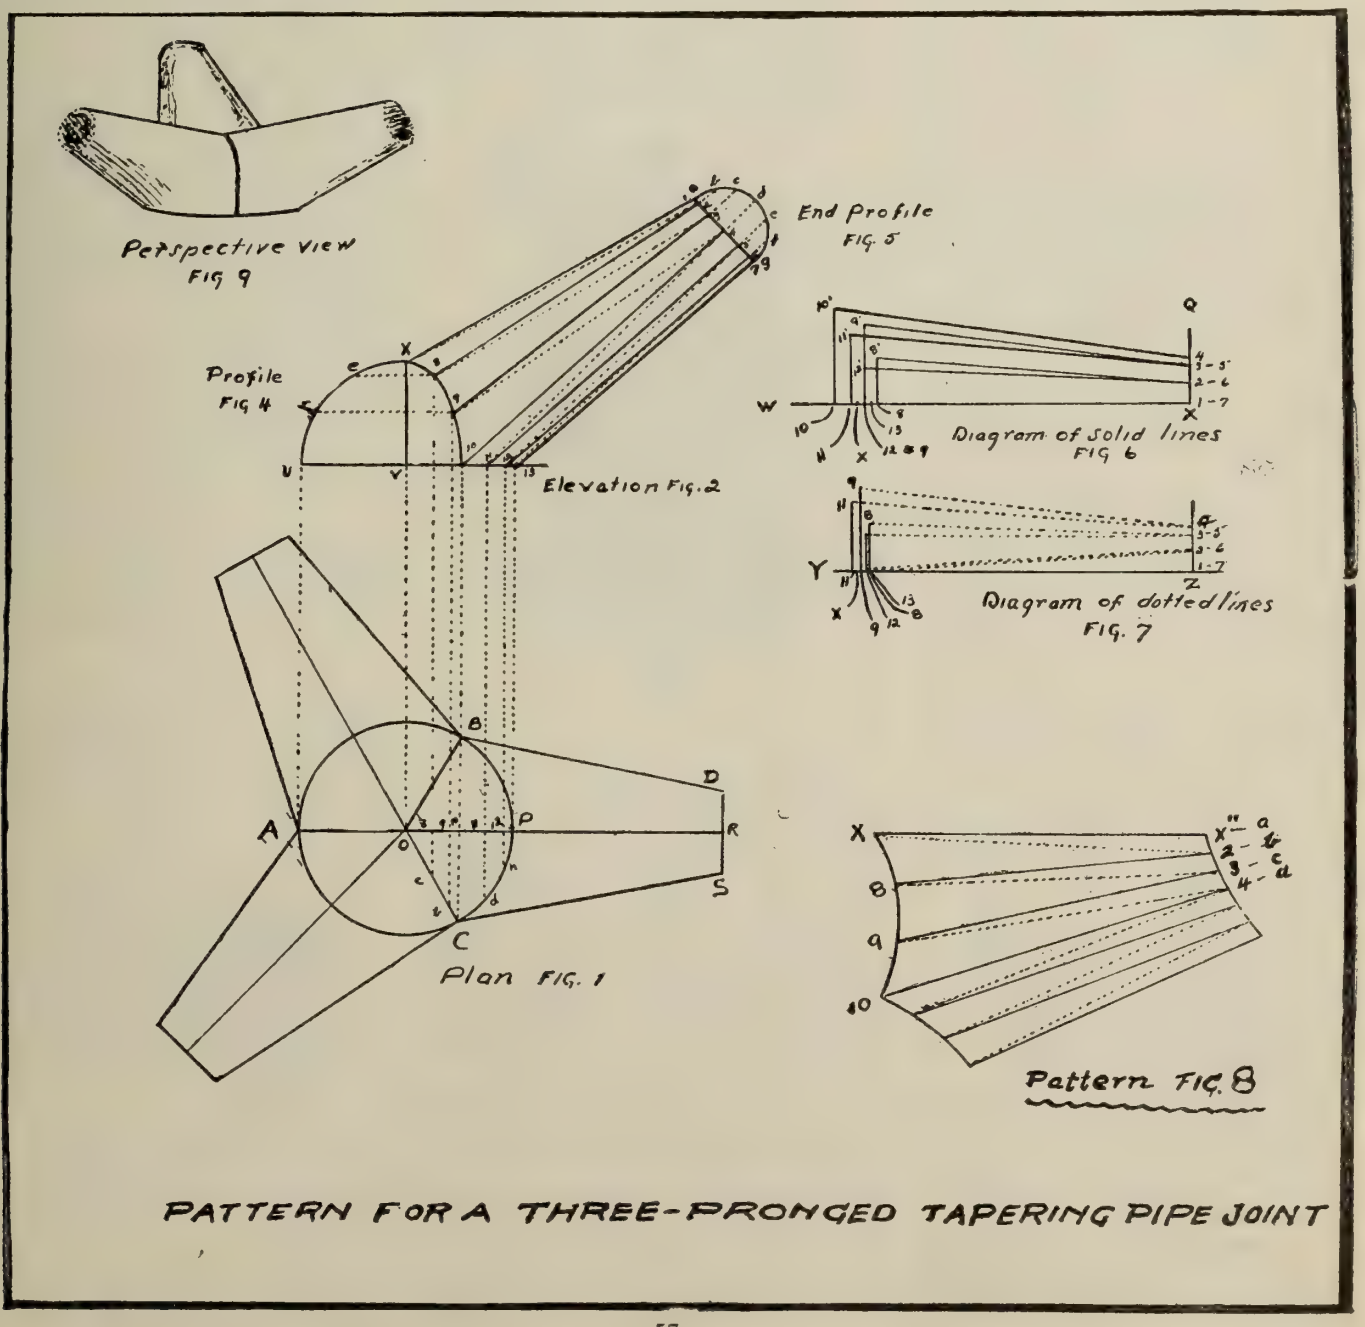
Fig. 2 shows one of the prongs in elevation; the line U-13 represents the width of diameter of the large pipe. The quarter circle U-X, the profile or elevation through 10-C of the plan.

The line X to 10 represents the mitre line. X-1-7-13 and 10 represents a side view in elevation of one of the prongs while Fig. 5 shows a half profile of the small end.

Fig. 6 is a diagram giving the true length of the solid lines.

Fig. 7 shows a true length of the dotted lines, while Fig. 8 shows the pattern for one-half of one prong, the other half being the same.

First draw the plan as follows:



Draw the large circle the diameter of the large pipe.

Draw the horizontal line A-O-P-R representing the centre of one of the prongs.

Draw the line S-D at right angles to this and make it the desired diameter of the small end of the prongs.

Divide the half circle into three spaces locating points C and B, from which draw lines to the centre O and to the small ends O and S.

Project a dotted vertical line from Points A-O and P and at any convening distance above the plan draw the horizontal line U-V-13, Fig. 2, representing

the top of the large pipe where the prongs spring from.

At V erect the line V-X, making it equal to U-V.

Draw the quarter circle U-X.

Draw the arm of the prong Z-1-7-13 and at the small end draw a half circle, equal to the diameter of the small end.

Divide this half circle or end profile off into equal spaces and as shown by a-b-c-, etc., and carry lines at right angles to the line 1-7 from each of the points a-b-c, etc., to the line 1-7.

We now want to get the mitre line X-10-13, so we proceed as follows:

Divide the quarter circle U-X, Fig. 2, off into three equal spaces and letter same as shown by c-e.

Project horizontal dotted line from C and E through and past the centre line V-X.

Now take the distance that e is from the centre line V-X, and lay this off from O on the line O-C of Fig. 1 as shown by O-s.

Also lay off the distance from C to the line X-V as shown by O-C Fig. 1.

Project vertical lines from a and b, Fig. 1, until they meet the horizontal lines drawn from e to c, Fig. 2.

A line traced through these intersections from X to 10 gives the mitre line for the prongs to join each other.

Divide the curved line C-P of Fig. 1 into three equal spaces as shown by d and h.

Erect vertical lines from d and h until they meet the line U-13. This gives the mitre line where the prongs join the large pipe.

Now draw full or solid lines from each of the points on the mitre line to the points 1-2-3, etc., of Fig. 5.

Then draw dotted lines as shown.

Then draw the base line W-X, Fig. 6, and at X erect a perpendicular line X-Q on which from X lay off the distances that each of the points a-b-c-d, etc., of Fig. 5, are above the corresponding numbers 1-2-3-4, etc., of the line 1-7.

Now from X on the line X-W lay off spaces equal to each of the solid lines on the elevation. For instance set the dividers to the space X-1 of the elevation and transfer the space to the line X-W as shown by X-X.

Then the dividers must be set to the space 9-2 of the elevation and transfer to the line X-W as shown by X-S.

Transfer each of the other spaces until all the full or solid lines are transferred.

Now from each of these points erect a perpendicular line equal to the distance from the line O-P, Fig. 1, to the edge of the plan of profile as shown by the line O-a-b-c-d-h-P, Fig. 1.

For instance erect a perpendicular line from 10, Fig. 6, and make its height equal to 10-C, of Fig. 1, as shown by 10-10, and as the line 10 of the elevation runs to point at the end in a like manner, draw a full line from 10, Fig. 6 to point 4. This gives the true length of the line 1-4 of the elevation.

In a like manner find the true length of each of the other full lines.

Next develop the diagram of dotted lines in the same manner as the full lines.

The pattern is now developed the same as previous examples, the measurements for the small end being taken from a to g of the profile, Fig. 5, and for the large end from U to X, Fig. 4, for the mitre end to join the other prongs.

Then take measurements from C to P, Fig. 1, for the prong to join the large pipe.

Draw the line X-X of Fig. 8, representing the line X-I of the elevation.

Set the compass to the dotted line X-2, of Fig. 7, and with X as centre cut the arc drawn for X, locating the point 2 or b.

Then with the solid, line 2-8, of Fig. 6, and 2-Fig. 8, as centre swing an arc near X.

Then with U-C, Fig. 4, as radius and X Fig. 8, as centre cut the arc swung from 2 thus locating the point 8 of the pattern.

Continue this until the pattern is developed.

KEEPING TRACK OF DAILY SALES AND STOCK ON HAND.

(Continued from page 50.)

tween two points. Are you satisfied to have the total sales figured up of each clerk, cash and credit, and marked down on this record, or do you prefer to list each sales slip, for instance, Clerk No. 1.—Slip No. 1, .25; No. 2, .34; No. 3, .68, etc., total $75.63—for the day. The benefit of the latter method, of course, is that you have a complete record of each slip before your eyes, which will prevent any being used and not turned into the office.

As the slips come in through the cash carriers, or in any other way you may arrange, they are marked down by the bookkeeper on this large sheet, or, in the former case, they are put on separate files, added up and the total set down as one item under the clerk's number.

Diagram No. 1 shows a farm for keeping track of each sales slip and assigning each to its proper department; Diagram No. 2, a record of each clerk's total, by which a whole months' report can be kept on one sheet.

Where it is not denied to keep records by departments Diagram No. 1 would omit columns for Departments A, B, C, D, etc.

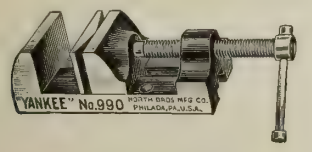
In nearly every store which is departmentized the clerk marks the letter of the department on the sales slip, if it is not printed on. Where a clerk goes from A to B or C, the leter of the department is marked opposite each item, for the information of the bookkeeper. In this way one slip often will contain amounts under A, B, C and D. In the larger stores where the clerks keep to their own departments each slip will be limited to that one department.

Stock Taking Once a Month.

Now then, let us analyze your stock. How do the classes work out? Are they in proportion to the Sales Supposing we take as a basis a month's Sales: We will suppose you know what your Sales are of every class of goods you are carrying. Now, go through your stock and if you have more than a sufficient supply, of any one kind, reduce it. A great deal can be done in this way and it will release capital that can be employed in extending the business in other channels. A good variety of stock is an advantage but never have too much of one kind; treat your stock in a scientific manner by comparing it with your Sales. Stock will increase and creep on you like a thief in the night unless you keep a searchlight on it all the time. Try and turn your stock over three to five times a year, and remember that you turn your stock over once when you clear out the original purchase. Therefore, if you keep an average stock of $5,000 and mark 40% profit on cost, your Sales will require to reach 7,000 before you turn your stock over once.

To get at the amount of your stock, approximately at the end of every month, charge up the purchases to the stock already on hand, then deduct your sales—allowing for the profit. The balance will be the stock on hand. This should be done every month in order to keep in touch with the stock you are carrying and its relation to your sales, for a study of this may prove to you that you must either reduce your stock or increase your sales.

A sample stock sheet is given here in which the amount on hand in a certain department at the beginning of the month was $15,000. The purchases during the month were $3,000, making a total of $18,000. However, sales were $4,000, but only 65 per cent. of this represents cost price—providing you marked these goods up so as to have a gross profit of 35 per cent. on the selling price—that is, $2,600. Deduct this from $18,000 leaving $15,400 stock on hand ir that department at the end of the month. If you find this total increasing to any extent, you had better slacken your buying and arrange to clear out some of your stock.



In concluding this article, I would point out that to make money and create a profitable business you must direct it skillfully yourself. You can get lots of people to do what you tell them, and to direct them profitably you must have every detail at your fingers' end; the more you dissect the details of your business, the better it will pay you.

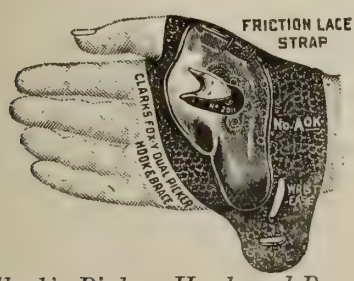
New Goods Offered Canadian Hardwaremen

"YANKEE" VISE.

North Bros. Mfg. Co., Philadelphia, Pa., are offering the trade the new "Yankee" vise, No. 990 here illustrated. The vise is designed for use on "Yankee" bench drills or it can be attached to a bench separately.

The body and sliding jaw are of cast iron, accurately machined to hold work square, when used either flat or on sides. The sliding jaw has a T-shaped block screwed to its underside, sliding in

Yankee Vise.



a T-shaped slot 9-16 inches wide, insuring parallel movement of the jaw.

A removable swivel jaw is provided to hold taper work, and is made of steel, case hardened. The stem has a friction spring to hold the jaw in position. The adjusting screw is of steel ½ inch diameter with ¾-inch head to receive sliding bar. The boss on the end of the body in which the screw works is ⅞ inches long. Two countersunk holes are provided in the base to screw the vise to the bench if desired.

The base of the vise is 6 inches long and 2⅜ inches wide. Extreme height 2 inches. The opening of the jaws, without the swivel jaw, is 3 inches, with the swivel jaw 2⅝ inches. Depth of jaws, 1⅜ inches. The weight of the vise is 3¾ pounds.

PICKER HOOK AND BRACE.

The accompanying illustration shows Clark's Fox-V. Dual Picker Hook and Brace No. A-OK., a new product of R. F. Clark, 54 W. Lake street, Chi-

Clark's Picker, Hook and Brace.

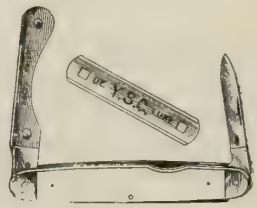
cago. It is claimed that the No. A-OK. fits any hand by opening or closing the narrow end of the steel. The friction strap under the thumb draws the leather and retains the shape of the hand, passes over the wrist and back to the buckle. A vertical lift of the strap in the buckle adjusts the comfort fitting grip and a perfect tension of the strap. The wrist ease opening makes it easy to toss the ear of the corn when it is picked without spraining the wrist.

CHICAGO GARAGE SPRING HINGE.

The Chicago Spring Butt Company of Chicago, with Eastern office and warehouse in New York, are placing on the market a garage spring hinge, which is said to be fully adapted to such requirements.

The illustration shown herewith exhibits the surface spring hinge, and it is also made for mortise application. This hinge is of very substantial construc-

Garage Spring Hinge.



tion, and is equipped with a reverse action spring, so that when the doors are released they will swing open. This feature is very desirable in many cases where the doors are held closed with a chain bolt, the chain of which is extended over pulleys to some convenient location so that by merely pulling the chain the doors will swing open and be held open, thereby avoiding the possibility of the doors rebounding and swinging closed and causing a collision of the vehicle.

These hinges are made in two sizes, the first size having an 8-inch flange, and the second size a 12-inch flange. They are supplied in any finish required or to match other hardware.

This article, together with the Chicago garage door bolt and Chicago checking bumper and holder are convenient in connection with operating garage doors, and are shown in their catalogue, copy of which will be sent on request.

SAFETY RAZOR AND POCKET KNIFE.

A new safety razor, of British manufacture, is now being placed on the Canadian market by Solomon & Spiel-

Y.S.C. Knife.

mann, Montreal. It has double-edged blade, three-eighths of an inch wide and is made rigid by stretching tight like the string of a bow. The result is to give a cutting edge which it is claimed by the makers is superior to that of a hollow-ground razor. The Y. S. C., as the razor is named, has a novel adjustment. A milled head screw regulates the distance between the guard and the blade, which are always parallel to one another, so that the razor can be set for a very close shave without any possibility of the user cutting himself. It requires neither stropping, setting, taking apart, nor wiping after use. Each razor is packed in a neat case, accompanied with ten blades, and extra blades in packets of ten may be secured as desired.

There is also offered a Y. S. C. pocket knife with a special holder to which can

Y.S.C. Razor.

be attached the razor blades when they become too dull for a comfortable shave. The accompanying illustrations show the safety razor and the pocket knife.

Current News of the Hardware Trade

New Firms.

Toronto, Ont.—J. E. Trelford, who for a number of years was in business at Markdale, Ont., and his brother, C. H. Trelford, formerly with the McClary Mfg. Co. traveling staff out of Winnipeg, have commenced business under the name of the Trelford Hardware Co., 1036 St. Clair Ave., this city.

Business Changes.

Saskatoon—J. East iron works has suffered loss by fire.

Lipton, Sask.—B. Muscovitch has discontinued his hardware business.

Moore Park, Man.—J. Potwin has sold his hardware business to J. Rutley.

Toronto, Ont.—John Hodgin's hardware has been succeeded by Toms Bros.

Swift Current, Sask.—McCreary and Martin, dealers in electric supplies have dissolved partnership.

Laird, Sask.—C. L. Lang and G. W. Morden have purchased the hardware business formerly conducted by the Assiniboia Trust Co.

Victoria, B. C.—The Modern Plumbing & Heating Co. has been succeeded by the Western Plumbing and Heating Co.

Edmonton, Alta.—D. G. Ross has disposed of his business at 268 Kirkness St., Edmonton, to W. A. Hamill, who will continue the business as the Norwood Hardware Co.

Medicine Hat Radiators.

L. Cary Wright, formerly of Sauk Centre, Minnesota, has taken out a permit for a building to cost $35,000, which will house the manufacturing of radiators. Mr. Wright says that the factory will employ about 50 men when completed.

Increasing Capital.

The Steel Trough and Machine Co. are increasing the capital stock from $25,000 to $100,000.

Hall Zryd Foundry Co. are increasing capital stock from $75,000 to $250,000.

Foundry Changes Hands.

The foundry of A. Belanger, Montmagny, Que., has been taken over by A. Belanger, Ltd.

A Correction.

In a recent issue we inadvertently reported Gillian MacLean as succeeding Wm. McBride on Bloor St. West. The name should have read McBrien. T. J. McBride is still doing business at 520 Dundas St.

Ontario Incorporations.

Benjamin Wheel Co., Ltd., capitalized at $100,000; head office, Yarker, Ont.; to take over the Benjamin Mfg. Co. of Yarker and to manufacture and deal in wagons, carts, carriages, vehicles, etc.

Canadian Expansion Bolt Co., Ltd., capitalized at $40,000, head office, Toronto, to manufacture and deal in expansion bolts and appliances, hardware, etc. Incorporators: J. A. Kent, J. H. McDonald, E. W. Wright, G. P. Robinson, L. R. Zifferer.

Merchants' Syndicate Catalogue Co., Ltd., capitalized at $75,000; head office, Toronto; to manufacture and deal in all kinds of merchandise, household goods, utensils, groceries, etc. Incorporators: A. C. MacNaughton, C. W. Livingston, A. L. Shaver, W. G. Simpson, J. J. Ritchie, all of Toronto.

Demees Electroplating and Manufacturing Co., Ltd., capitalized at $40,000, head office Toronto; to engage in the business of electroplating and to manufacture plated goods, cutlery, silverware, etc. Incorporators: F. Demees, W. Casper, P. Melhorn, J. H. Barrett, O. E. Ziegler.

Favary Tire Co., Ltd., capitalized at $500,000; head office, Toronto; to manufacture and deal in machinery and supplies, tires for vehicles, cushions, cushion devices, etc. Incorporators: F. Kitching, F. V. Clisdell, A. W. Briggs, H. E. Grosch, E. M. Dillon, all of Toronto, and D. H. Arnott, R. J. Young, of London, Ont.

Elected Secretary.

F. M. Tobin, Woodstock, Ont., has been elected Secretary The Stove Manufacturers' Association. Mr. Tobin is also Secretary-Treas. Canadian Hardware Manufacturers' Exhibitors' Association.

Obituary.

Halifax, N. S.—The death took place recently of T. G. Egan, dealer in sporting goods.

St. John, N. B.—The death took place recently of George H. Waring, President and Manager Director Union Foundry and Machine Co.

Wheeler and Bain Catalogue.

Wheeler & Bain, Toronto, have issued their annual Spring catalogue of galvanized iron, roofing supplies, eavetroughs, corrugated pipes and elbows, corrugated sheets, skylights, cornices, galvanized iron sheets, tin plates, etc. The catalogue consists of 56 pages and is neatly gotten up.

Marriage of Londoner.

The marriage took place at Christ Church Cathedral, Hamilton, on April 22, of Miss Lydia Dunn, daughter of Mr. and Mrs. G. S. Dunn, to Norman Howden, of D. H. Howden & Co., wholesale hardware, London, Ont. Following the church ceremony a reception was held at the home of the bride's parents. Mr. and Mrs. Howden left for New York from whence they sailed for Antwerp.

Injured in Auto Accident.

Wallace Cowan, sales manager Rice-Lewis & Sons, Toronto and W. R. Wight, a traveler for the Sheet Metal Products Co., were seriously injured when an auto in which they were riding skidded into a street car on College Street, Toronto. The motor car was badly smashed and the two men were taken out in an unconscious condition. Both were removed to the General Hospital, and reports indicate that their chances for recovery are good.

Change of New York Offices.

P. & F. Corbin have consolidated the up-town and down-town offices, and have installed them in commodious quarters in the new Architects' Building at No. 101 Park Avenue, New York. The change was made primarily to secure a closer connection between the businesses of the two stores, and also to gain the advantages of a more central location and of more convenient quarters, neither of the two former offices being susceptible of expansion to contain the forces of both. The new offices are within two minutes' walk of the entrance to the Grand Central Station, where the subway, surface and elevated lines meet, and could hardly be easier of access from all parts of the city. The display rooms are a model of convenience and artistic arrangement, and are flooded with light. The entire effect is a most happy one, combining utility and beauty in an original and highly satisfactory manner.

Deliveries of goods are made from the warerooms at 98 Lafayette Street, but all business is conducted from the new offices in the Architects' Building. The former sales office at 106 Lafayette Street and the contract department office at 39 West 38th Street have been vacated, and the transfer to the new location has been made.

Western Notes.

Herbert Birch, represting Wood, Vallance, Ltd., Winnipeg, called on the Yorkton, Sask. trade, April 23.

W. C. Lawson, late with James White, Carberry Man., has joined the staff of F. S. Collacott, Yorkton, Sask.

Kay's, Yorkton, Sask., general merchants, are reported to be contemplating adding hardware to their stock.

The Westhaven Hardware Co., Saskatoon, Sask., whose stock was recently sold, had their premises burned before the stock could be moved.

Milton and Roy Moffat, of Moffat Bros., Champion, Alta., are in Pilot Mound, having been called there on account of the sickness of their mother, who is very seriously ill.

Hugh Broddfoot, a clerk in the employ of the Macoun Hardware Co., had a narrow escape when the hotel in which he was dining was destroyed at Macoun by an acetylene gas explosion and ten people killed.

STEEL CO. RE-ELECTS OFFICERS

Hamilton, April 27.—The annual meeting of the shareholders of the Steel Company of Canada was held this afternoon, when the following officers were re-elected: C. S. Wilcox, President; C. A. Birge, Vice-President; Robert Hobson, Vice-President and General Manager; Directors, Charles Alexander, Providence, R.I.; W. D. Mathews, Toronto; John Milne, William Southam, Hamilton; Sir Edmund Osler, Toronto; F. H. Whitton, Hon. William Gibson and Lloyd Harris, Brantford; S. H. Champ, Secretary-Treasurer.

The directors' report, which stated that last year was the best in the history of the company, was adopted.

English Firm Opens Plant Here.

All of the buildings of Armstrong-Whitworth Co., of Canada, have been erected at the company's new plant at Longueuil, across the St. Lawrence River from Montreal. Contracts have been let for all the tools and for the electrical machinery. Part of this has already been installed, and further installation of machinery will go on all summer. By the 1st of September it is expected that the plant will be ready to operate.

Armstrong-Whitworth, of Canada, will manufacture all the finer grades of tool steel, both carbon and high-speed. They will be made into twist drills, milling cutters, reamers, and special forgings to drawing. Among other uses their steel tools are used for surfacing and polishing the harder grades of stone.

The buildings of the company, which are now built, occupy about 55,000 square feet of floor space. With the exception of the boiler-room, they are all under one roof.

New Manufacturers' Agency.

A new firm of manufacturers' agents and importers have opened offices at 305 Read Building, Montreal. They are representatives for the following lines: W. & F. Walker's, Ltd., Liverpool, Eng., liquid disinfectants and blockettes; Price Fire & Waterproofing Co., Poughkeepsie, N. Y., waterproofing for canvas and concrete; T. & R. Boote, Burslem, Eng., plain and ornamental tiles; Rollaway Screen Co., Burlington, Vt., fly screens; Phoenix Metal Tile Co., Brooklyn, N. Y.; metal weather strip; I. X. L. structural steel paint; Ceresit Waterproofing Co., Chicago; and Cooper Oven Thermometer Co., Waterbury, Conn.

DEATH OF C. F. KULOW.

The death occurred recently at Pt. Colborne, Ont., of Carl F. Kulow, aged nineteen years, son of F. C. Kulow, dealer in stoves, tinware, plumbing, etc.

The late C. F. Kulow.

The late Mr. Kulow was associated in the business with his father, and had only been ill for nine days. Death resulted from appendicitis.

Personals.

G. F. H. Williamson, traveler for The Miller-Morse Hardware Co., Winnipeg, out of Brandon, Man., was married on April 8, to Miss Olive Moody.

Adolph Henry of Henry & Sons, Orono, underwent an operation for appendicitis at a Toronto hospital this week. Latest reports indicate that the operation was successful.

George Williams, of the Canadian Yale & Towne Co., who has been ill at the Royal Victoria Hospital, Montreal, continues to improve, and it is expected he will be able to leave the institution next week.

George F. Darr, of the Novelty Manufacturing Co., Jackson, Mich.; Raymond A. Catlin, Corbin Cabinet Lock Co., New Britain, Conn.; Mr. Partridge, of the Ox Fibre Brush Co., Frederick, Maryland; Lawrence H. Laythe, of Butterfield & Co., Rock Island, Que.; D. G. Smith, of Smith & Hemenway, New York; H. A. Croxall, of National Hardware Co., Orillia, Ont.; Mr. Haynes, of the Savage Arms Co., Utica, New York; Mr. Isbester, of Peck, Stow & Wilcox, Southington, Conn.; and H. W. Johnson, of the No Tarnish Co., Toronto, were calling on the trade in Montreal this week.

HARDWARE LETTER BOX

P. A. O. Sankey, Vancouver, B.C.—Please advise who handles Ronuk Polishes and Cook and Boulton's Floor Dressing.

Ronuk, Ltd., 53 Yonge St., Toronto, handles Ronuk Polishes and Cook & Boulton, 185 King E., Toronto, handle Cook & Boulton floor polishes.—Ed.

* * *

Devine & Legree, Renfrew, Ont.—Kindly advise who manufactures Buck ties, 1½ in. by 6 in. long.

Germantown Tool Works, Philadelphia.—Editor.

Weekly Report on Market Conditions

Statements From Buying Centres on Prices and the Trend of Demand—Full Reports Dealing with Hardware, Metal and Stove Lines.

THE MARKETS AT A GLANCE.

The dull weather prevailing of late has had a tendency to make business rather slack with the retailers, although jobbers report a fair amount of business passing. Conditions in the metal markets remain unchanged and only a small amount of business is being done. The arrival of brighter and warmer weather will stimulate business and the retail trade appears optimistic regarding the outlook for future business. In the paint markets trade is holding up well. Turpentine has declined in price.

Lead and oil remain unchanged. The opening of navigation is enabling many of the jobbers to ship orders which had been booked for delivery by the water route.

MONTREAL.

MONTREAL, April 29.—The jobbers report that business has been rather better lately, and with the opening of navigation there has been quite a lot of activity in getting shipments away to up and down river points. The retailers have not been as busy as they usually are at this time of the year, however, and this may be put down almost entirely to the cold and unseasonable weather. To-day weather conditions are anything but spring-like, with a cloudy sky and snow in the air. It certainly is not the kind of weather that will make people think of buying gardening tools, ice cream freezers, refrigerators, or paints for exterior work. This state of affairs can hardly continue much longer, though, and it is altogether likely that the next few weeks will see an extraordinary demand for seasonable goods. Prices have not changed to any extent in the past week, the only quotation affected being a decline of 50 cents in antimony. All the metal markets are weaker, except lead, which is reported firmer.

Builders' Hardware.

There has been a better movement lately of low-priced inside lock sets for local trade. The large amount of cheap construction work, coupled with the fact that revised prices are offered, has contributed to this.

Electrical Goods.

Electric utilities, such as irons, toasters, boilers, etc., have been in better demand of late. This is a good time for the retailer to push these lines.

Summer Goods.

While the unseasonable weather has interfered with the sale of such lines as lawn mowers, lawn rollers, sprinklers and garden tools, etc., many retailers are bringing these goods to the attention of their customers as prominently as possible through special window and interior displays. There will be a marked demand for them from this time forward.

Screws and Nails.

There has been no change in prices, but the sales have been quite satisfactory. There has been some talk of an advance in wire nails, but thus far there are no developments.

Lead and Lead Waste Pipe.

This market is much firmer, but no change has yet been made in the quotations of 7½ and 9 cents per pound for lead and lead waste pipe. There is an unsettled feeling, and it would not be surprising to see a change at any time.

Metals.

Weakness characterizes nearly all the departments of the metal business. Tin, while higher in London to-day, is weak here, and the price of 42½ to 43 cents still remains. Spelter is weak, with quotation of $6 to $6.25 unchanged. Copper is still quoted at $16.50, with a fair amount of business. Antimony, which has been weak for some time, dropped 50 cents this week, and is now offered for $8.50. This price could be shaded for quantities. Iron shares the general weakness, but the quotation of the last few weeks, $19 per 100, is unchanged.

TORONTO.

TORONTO, April 29.—Conditions have not changed to any extent during the past week and the volume of business passing is if anything a little larger than that of the previous week, due principally to the fact that the season is well advanced and that retailers are looking for better business during the next two or three weeks. The weather of late has been dull and cool and this has had a bad effect on business.

The Metal Markets.

There is no change in the general situation of the metal markets and business continues to lag. Pig lead has advanced ¼ cent per pound, and a scarcity has developed. Stocks at Toronto are bare. Copper remains firm and unchanged. Tin is down ½ cent per pound, and has reached a low level. Some Toronto merchants are inclined to believe that an advance will take place in the near future. Pig iron and spelter remain unchanged. The ruling quotations in Toronto at present are:—Tin, 38¾c to 41c lb.; lead, $4.85 to $5 per 100 lbs.; copper, 15½c to 16½c lb.; antimony, 8¾c to 9c lb.; zinc, 5½c to 6c lb.; ingot brass, red, 13c to 15c lb.; ingot brass, yellow, 11½c to 14c lb.; half-and-half solder, 24c to 26c lb.; pattern aluminum, 23c to 24c lb.; ingot aluminum, 19c to 20c lb.; acme solder, 19½c lb.; easy wiping solder, 20½c lb.; star extra, 22¼c lb.; wire solder, 27c.; tinkers' bar solder, 28c lb.; lead wool, 8c lb.

Rope, Twine, etc.

Business in rope, twine, etc, continues to improve. Although business has been rather backward, dealers in this line are hopeful and expect to do a very fair amount of business this year. The following prices are being quoted:—

Best Pure Manila	15c lb. base.
British Manila	11c lb. base.
African Hemp	11c lb. base.
Sisal Rope	10½c base.
Lath Yarn Single	9¾c lb.
Lath Yarn Double	10¼c lb.

Other lines are shown in Current Market Quotations.

Binder twine prices are:—650 ft. twine, 13½c lb.; 600-ft. twine, 11c lb.; 550-ft twine, 9¾c lb.; 500-ft. twine, 9¼c lb.; ⅛c per lb. allowance on 5 tons and over; ¼c lb. allowance on 10 tons and over; delivery allowed on 300 lbs. and over.

Recent cables from Manila reported the primary market as strong, with higher prices expected. The main sustaining influence is the scarcity of intermediate grades, though the Mexican war also stiffens sellers' ideas. No blockade of the ports has, however, as yet been ordered and sisal can still be exported. The quotation of the latter was still 5¼c. Istle was dull at the basis of former prices, which are, however, nominal.

Nothing was said on jute and in view of the fact that the season is over business is naturally dull. There are tentative offers on new crop.

Nails, Wire, etc.

There is a very good demand for wire fencing, poultry netting, etc. Screen wire is also moving in fair quantities, quotations remain the same as shown in Current Market Quotations. Wire nails are still quoted at $2.10 base, but orders for future delivery are not being accepted at this price. The advance predicted has not yet materialized but some of the jobbers are still of the opinion that an advance will take place. One of the chief reasons for the continued low prices on many lines of goods is that business has not been any too brisk and price-cutting has been very much in evidence.

Bar Iron.

Toronto hardware jobbers quote bar iron at $2.00 base, F.O.B. Toronto, and $1.90 base F.O.B. factory.

Stoves, Ranges, etc.

Business in the stove trade is rather quiet with the exception of gas ranges, oil and gasoline stoves, for which there is a good demand. The approach of warm weather has caused a good demand for summer stoves. Household goods, woodenware, enamelware, tinware, etc., are in fair demand at unchanged prices.

Refrigerators, sprinklers, etc., are beginning to move and although the demand is not heavy at present, it will improve as the season advances.

WINNIPEG.

Winnipeg, April 28.—The week has seen very little change in hardware conditions. Cold weather continues, and is having the same tendency to hold back trade in some of the lines. It is to be hoped that a good deal warmer weather will come within the next few days, otherwise the clean-up, paint-up campaign, which has taken hold remarkably well, will be rendered somewhat less effective.

Despite the weather, however, a fairly large volume of orders are being received. Builders' hardware lines even have commenced to move, though it is not expected that the heavy buying in this line will begin for another two or three weeks.

Old Timer's Views on Weather.

The influence which the continued cold weather will have on future buying, is naturally a matter of great interest. An old timer who was calling upon one of the stove dealers this week, states that the cold weather indicates a splendid crop. This has seemed to be the rule in the West. One hardwareman recalls a remarkably late season 12 years ago when there was a greater percentage of No. 1 hard, than for many seasons previous or since.

It seems that conditions in all sections of the West are not the same. One sales manager who has been checking over his travelers' results, advised Hardware and Metal that some of these showed considerable advances over the same period in 1913. Others showed losses. This man, however, has found conditions on the whole fairly satisfactory.

Pushing Cash Lines.

One influence the year is bringing is a turn towards cash business—or a near cash business—on the part of very many dealers. The dealers apparently are determined to take few chances this year. They are selling only when they get the money, or to people whom experience has shown them are good for the money.

HARDWAREMEN MEET DOMINION BOARD.

The Dominion Board of the Retail Merchants' Association held a two-day conference at Toronto this week. On Wednesday afternoon a committee of the Ontario Retail Hardware and Stove Dealers' Association composed of Messrs. Caslor and Wrigley, Toronto; MacNab, of Orillia; McGregor, of Oakville, held a conference with the Dominion Board, with reference to the proposed affiliation of the Retail Hardware Association and the Retail Merchants' Association. The principal topic discussed was the financial conditions of the latter association. F. M. Tobin, secretary-treasurer Canadian Hardware Manufacturers Exhibitors' Association was also present and addressed the meeting. Mr. Tobin advised the various Associations to get together and pointed out that in union there was strength. President Macpherson, of the O.R.H. & S.D.A. was unavoidably absent.

It is noticeable that lines regularly selling for cash are being pushed even harder this year than usually. The demand for sporting goods is only commencing, but already indications are that the season will be a better one than was 1913. This, of course, is regularly a cash business, and the dealers are playing up the line prominently.

No Price Changes Recorded.

The week has seen no variation in prices. Nor does it now seem likely that any further changes will come for some little time. The recent reductions seem to have placed most lines on a footing where they will remain perhaps for a month or two.

The large buying of poultry netting, barbed wire, and fencing continues. The week has seen much larger demand for screened doors, wire netting, etc., dealers are evidently anxious to bring their stock of these goods up to the proper point before the real warm weather brings the heavy demand. For heavy hardware there is a good call. Also the week has seen some substantial orders placed for builders' hardware. Building, however, will have to advance materially before the demand for this line will be much greater. That a big demand will be felt in Winnipeg city is not to be doubted—for the building permits to date have established a record, and an unusual percentage of these permits are for dwellings and apartment houses.

Painting the Vogue.

The stove business remains quiet. For refrigerators, however, a strong demand is beginning to be felt. It seems likely that there will be big activity in this line in the next week or so. Early in May many of the contracts for ice commence.

For paint a very satisfactory demand is noted. It is evident that the clean-up paint-up campaign, which has been entered into so heartily throughout the West, is stimulating the call. It is not only new houses which will be painted this year, but old houses which will be re-decorated, and veranda floors which will be re-painted.

A representative of Hardware and Metal called at many points in Saskatchewan last week and reports that in Saskatchewan, hardwaremen are doing a big business with the farmers in spring supplies. Reference to the books of a Yorkton merchant showed that the chief demand was for the following: Oil and gasoline stoves, bolts, nuts and washers, horse-clipping machines, and batteries for gasoline engines, whiffletrees, wrenches, bar iron, and other blacksmith supplies.

Two weeks ago when the farmers were preparing for seeding and plowing, hardwaremen were kept busy supplying demands for hardware required to get machinery, etc., ready for this event. There is a brisk demand for paint and varnishes, but this is coming mainly from the people in the cities, rather than from farmers. Business in paint in Saskatchewan seems to be quite up to former years.

The demand for enamelware in some of the Saskatchewan towns is falling off a little, and has been doing so for some year. One reason given for this by a Yorkton merchant is that much of this trade was with foreigners employed on railway construction, sometimes 50 to 60 miles away, who have disappeared as the railways have been completed.

Quotations on Furs.

Toronto fur dealers are quoting the following prices for Ontario furs:—Skunk, prime, extra large, $1.50 to $5; muskrats, spring, extra large, 65c; large, 55c; medium, 40c; small, 25c; weasel No. 1, extra large, $1.50; No. 1, large, 85c; No. 1, medium, 50c; bear, No. 1, extra large, $22; No. 1, large, $17.50; No. 1, medium, $13; No. 1, small, $8; cubs, $2 to $12, as to quality. Mink, No. 1, extra large, $6 to $8.50; No. 1, large, $4 to $7.50; No. 1, medium, $2.25 to $5. Fox, No. 1, extra large, $8 to $12; No. 1, large, $6.50 to $10; No. 1, medium, $2.25 to $5; No. 1, small, $1.75 to $4.

MONTREAL CLEAN-UP CAMPAIGN.

The project for a "clean-up and paint-up week" in Montreal, which was launched several weeks ago by Frederick Abraham, honorary president of the Montreal Publicity Association, is assuming proportions that the promoter says is far beyond his expectations.

On every hand the campaign has been taken up by individuals and organizations that it was not possible to interest at the outset.

Practically all the civic departments are lined up for the clean-up week. The Health Department and Fire Department were among those to first offer their services and co-operation, and now Mayor Martin has issued an appeal to the citizens to prepare for a clean-up week, fixing the date as May 18th to 23rd. This should insure a much cleaner-looking city for the holiday on May 24th. The Mayor has also given instructions to the incineration department to take all steps to have the clean-up days made a thorough success.

The Montreal Tramways Co. is one of the latest, and perhaps one of the strongest, supporters that have rallied to the banner of the movement. They have agreed to put on the cars a banner proclaiming that "this is clean-up week," or some similar design, to attract the attention of every citizen to the movement. They have also agreed to give assistance in the removal of garbage, and are placing at the disposal of the clean-up organization their entire truck service for conveying the dirt to their own dumps. They will erect additional and modern dumps to provide a ten-minute service of twenty-ton capacity.

That the women are taking a keen interest in the campaign is evidenced by the fact that the Local Council of Women, the National Federation of Women, and the Montreal Women's Club have indorsed the movement, and are working heartily for its success.

Many pamphlets are being distributed, printed in English, French, Polish, Italian and Yiddish, so that practically every citizen, whatever his nationality, will be informed of what is being done and co-operation solicited.

Subscriptions and letters are coming in from all sides, indorsing the movement, and showing practical support. The majority of the merchants in the city are being canvassed by the committee appointed for that purpose, and a very general interest is being taken by manufacturers, wholesalers and retailers through financial support and promises of hearty co-operation in every way possible.

Letters to the Editor

ANOTHER WESTERNER.

Forgan, Sask., Apr. 15, 1914.

Editor, Hardware and Metal,
Toronto.

Dear Sir,—I was glad to see Manitoba Subscriber's letter in Hardware and Metal. It shows that there are a few hardwaremen alive to the unfair condition of things.

I do not agree with him, however, that a boycott of the manufacturers concerned would not be successful. I rather think it would be. Take the following lines:

Tank pumps, oil stoves, graniteware, and tinware, guns and rifles, screw plates, stocks and dies, dry cells, etc.

Eaton's could not begin to take their whole output. These manufacturers depend on the thousands of hardwaremen in this country.

Let every hardwareman refuse to handle them. There are other makes just as good, and just as good sellers.

When the traveler calls on you, put it up to him plainly why you refuse to buy these lines.

What is the Retailers' Association doing along this line?

Why should not Mail Order Houses pay a tax in every village and town, in which they do business?

They are the only people that do not.

Western Hardwareman.

THE FLY MENACE.

Saskatoon, Sask. — Civic authorities here as in every other western centre are taking every energetic means to educate the general public to the significance of the fly menace. Lectures are being delivered in schools and elsewhere, and much official literature distributed. The main aim is to teach people to fear the fly and to look upon it as an abominable and deadly vehicle of disease and death, and, therefore, a thing to be exterminated as a matter of self-preservation.

SUBJECTS AND SPEAKERS FOR ALBERTA CONVENTION.

(Continued from page 39.)

Alberta to keep up the good example that had been set by her sister provinces in obtaining legislation, both Dominion and Provincial, and pushing forward the claims of the retail trade for more equitable consideration in regard to municipal by-laws and regulations. There is no doubt that Alberta has a commercial future so immense, it is hard to predict, and the members of the R.M.A., were given to understand that, although they were one of the youngest provinces, it was for them to keep right up to the mark in progress.

A few of the matters to be discussed at the convention are:—Establishment of a small debts court, transient traders and peddlers, abolition of weights and measures inspection fees, early closing legislation, co-operative stores, mail order house, wholesalers' selling direct to consumers, public markets, pure food law, and taxation of retail businesses.

Among the speakers and the subjects they are handling are:—Major Duncan Stuart, "The Small Debts Court and its Relation to the Farmer;" C. L. Carter (Canadian Credit Men's Association) on, "Credit—Its Use and Abuse;" R. J. Deachman, "The Local Newspaper and Retail Trade;" Norman H. Rankin (President Ad. Club) "Advertising;" Dr. Mahood (Medical Officer of Health) "Pure Food Law."

One of the most unusual and interesting features in connection with this convention will be an exhibition which is being given in the basement of the hall where the convention is held, by the manufacturers and wholesalers of Calgary, who are showing their products and giving interesting demonstrations. This exhibition will be open to the delegates on Monday and Tuesday, and on Wednesday will be thrown open to the public.

BIG SELLING EVENT.

(Continued from page 51.)

a dollar bargain, the best teams of horses, etc. Merchants who had been in business for 20 years said they never had had a better day.

Galt had a good time on February 26, and St. Catharines on Thursday, March 19, and Ingersoll, Saturday, March 7. Brockville and Paris selected the same day, Tuesday, March 24.

In nearly every case the calling together of the merchants to make arrangements has been done by one of the daily papers. In a few cases the paper has taken charge of the general publicity work, posters, streamers, etc., charging a small advance in regular advertising rates to cover this expense.

You've Seen Our Ads.

There's no hiding the Martin-Senour advertisements this year—they stand right out in the best Farm Papers, Religious Publications, Magazines, etc., all through Canada—working hard for our dealers. Write Montreal office to-day for our special newsdealer's proposition.

WALKERVILLE, ONTARIO

Weekly Market Report---Paints

MONTREAL.

MONTREAL, April 29.—The volume of business through the jobbers has been very satisfactory. One manufacturer stated their orders were considerably ahead of last year, and he added, "Last year at this time business was mighty good too." While the jobbers and manufacturers are busy filling orders, the same does not apply to such a large extent with retailers. The backward weather this spring has delayed sales to a very large extent. It needs bright sunshiny days to make the people get the real "brighten-up" spirit. The movement for a "clean-up and paint-up" week, however, is growing apace, and as the date has now been fixed for Montreal for the 18th to the 23rd of May, there will doubtless be a big demand on the retail trade from this time on. Navigation on the St. Lawrence opened this week, and there has been a busy time with the wholesale houses in getting goods shipped to outside points. Collections are fairly good, but not as satisfactory as could be wished.

White Lead.

The demand continues good, with prices unchanged. The quotations are: $8.05 per 100 for ton lots; $8.25 for less than ton lots; and open prices for quantities.

Linseed Oil.

Prices are unchanged since last report, and business is fairly steady. The ruling quotations are as follows:—

Raw Linseed—

1 to 4 barrels	62c per gal.
5 to 9 barrels	61c per gal.
10 to 25 barrels	60c per gal.

Boiled Linseed Oil—

1 to 4 barrels	65c per gal.
5 to 9 barrels	64c per gal.
10 to 25 barrels	63c per gal.

With open prices for carload lots.

Turpentine.

There has been a very good sale for turpentine, and in consequence several jobbers report that their stocks are exhausted. Prices are a little easier than last week, and quotations are now given as follows:—

5 gallons	70
Half-barrels	66
1 barrel	65
2-4 barrels	64
5-10 barrels	63

Gasoline.

The sales of gasoline have increased to a considerable extent lately. The opening of navigation contributed to this end, and the fact that automobiles which were laid up for the winter are now in use again has also been a factor in the larger demand. Lubricating oils have also been moving freely. Prices for gasoline are:—

Barrels, in wood	23c	gallon.
In steel and drums	20c	"
Tank wagon (100 gals.)	19½c	"

TORONTO.

TORONTO, April 26.—Some of the Toronto manufacturers and jobbers report that business is exceptionally good and others report that business has slackened off and is rather quiet. It appears as though the firms that are working the hardest for business are securing the largest share. All will agree that business is harder to secure this year than last, but still there is a large amount of business to be secured for the people who go after it. The same rule applies to the retailer. The "Clean Up and Paint Up" movement has stimulated business to a great extent and many retailers are making splendid efforts to stir up enthusiasm in their respective towns and cities. The movement secured a splendid reception, and now that it has started it will no doubt become an annual affair. Next year the publicity end of the movement will be started earlier in the season.

Big Decline in Turpentine.

As reported in last week's issue, the turpentine market has become very weak and a further decline has taken place at Toronto. The decline this week has been 4 cents per gallon. A report from New York states:—

"There is an easier tone to the local market for naval stores, reflecting the situation in Savannah, where larger receipts caused a reactionary tone. The demand was rather quiet as usual at the week-end, the weather, moreover, being unfavorable for activity. The dealers are hoping for a spell of fair days which will stimulate the painting demand.

On the spot turpentine was quoted at 46c, with no special interest manifested in the article. There were few sales of round lots noted.

There was shading of turpentine locally and 45½c, it was said, might be done on actual business.

Tar was quiet and unchanged at the basis of $7 for kiln burned and 25c less for retort. Pitch was repeated at $4.

Rosins were nominally repeated for all grades, there being a small inquiry for current needs. Common to good strained was held at $4.10."

Toronto quotations are now as follows:—

Single barrels	65c per Imp. gal.
2 to 4 barrels	64c per Imp. gal.
5 gallon lots	72c per Imp. gal.

Linseed Oil.

There has been some shading of prices in linseed oil at Toronto, and although the ruling price is the same as reported last week, the local market is exhibiting weakness. Ruling quotations are:—

Raw Linseed Oil—

Single barrels	65c gallon
3 to 5 barrels	63c gallon.
6 to 9 barrels	61c gallon.

Boiled Linseed Oil—

Single barrels	68c gallon.
3 to 5 barrels	66c gallon.
6 to 9 barrels	64c gallon.

Oil in less than barrel lots, 7 cents per gallon. Cans are charged at: 5-gal. cans, 50 cents each; 10-gal., 75c each.

White Lead.

Lead is in fair demand at the following prices:—

Less than ton lots	$8.40 per 100 lbs.
Ton lots	8.20 per 100 lbs.

For larger quantities prices are open.

Glass and Putty.

Quotations on glass and putty remain the same as shown in Current Market Quotations. There are rumors of price changes in glass but nothing will be done before next week. Business in the cities is quiet, but there are many inquiries from the small towns.

Gasoline and Benzine.

Gasoline and turpentine have been reduced in price. New quotations are shown in Current Quotations.

SELLING PAINT AND BRUSHES THROUGH GLASS.

(Continued from page 45.)

has a real commercial value, and if used will be one of the principal elements in the making of your success. If you have not the gift, try to hire a clerk who has it and can trim the window in addition to his other duties.

Your windows give you and your salesmen a chance to show invention, good taste and enterprise. Perhaps you have more of the three than you think you have. Put your faculties to work. Try a paint window now and endeavor to make your show window help in a large degree to make the month of May this year, the greatest paint month in the history of your business.

It attracts the big trade

Current Hardware and Metal Quotations

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figure being for large quantities and prompt pay. Large buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate. Retailers desiring to get in touch with firms selling any articles on which quotations are made can do so by writing the editor.

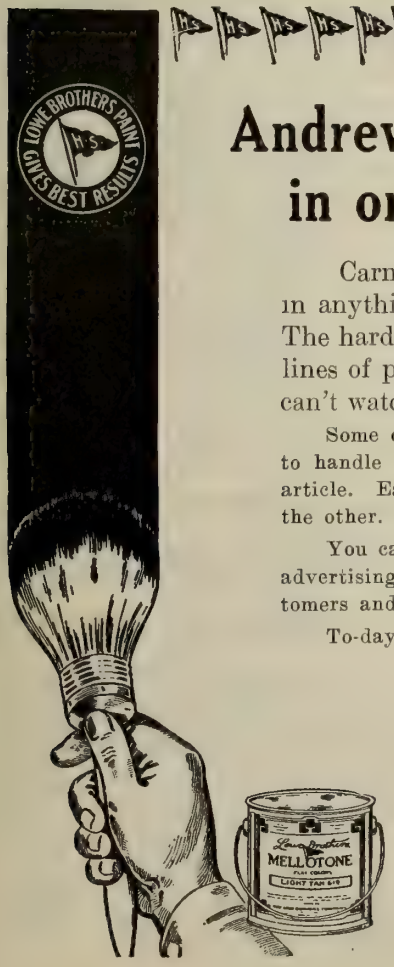
Are You Doing A Good, Profitable Paint Business?

If not, you should find out the reason why. Perhaps you are not handling a profitable line, or perhaps it is a line that does not satisfy your customers. If so, you should make a change.

Jamieson's Pure Prepared Paints

allow you a good profit, and the absolute purity makes satisfied customers and brings repeat orders.



These are the two important points that build up a profitable paint business.

R. C. Jamieson & Company, Limited

Owning and Operating P. D. Dods & Co., Ltd.

Established 1858

MONTREAL **VANCOUVER**

Andrew Carnegie said: "Put all your eggs in one basket and watch that basket."

Carnegie was master of just one business—steel making. He didn't dabble in anything else. He made steel right and steel made millions for Carnegie. The hardware man who clutters up his paint department with a dozen different lines of paints, varnishes, stains, enamels, etc., is using too many baskets. He can't watch 'em all.

Some of the most progressive dealers in Canada are mighty glad to-day they decided to handle the Lowe Bros. complete line. There is "High Standard" quality in every article. Each one helps the other. Our whole reputation is just as much behind one as the other.

You carry one-third smaller stock; you get simpler accounting and bigger cumulative advertising value along with simplified work on the selling end. You get satisfied customers and increased business. Let's tell you more about it.

To-day is the day to write us.

A WORD FOR QUALITY

PARROT CAGES

The season is on for parrots. For the next three months young parrots are in great demand. The "HENDRYX" cage has never been equaled. Every wire being riveted to each rail affords positive security for keeping the birds.

When Wood Workers Ask for Screws

Be able to supply them with

PAT. FEB. 2, 1909

SEE THAT SQUARE HOLE

ROBERTSON'S SOCKET HEAD WOOD SCREWS

These screws are far superior to any other kind. They have a square hole into which our specially designed driver fits snugly. The driver cannot slip and thus spoil screw heads or material.
We also manufacture high-grade Yankee Bits, Brace Bits, Rivets, Burrs, Washers, Nails and Wire.

Satisfy Your Paint Customers

"Good-will," that wonderful intangible asset, is essentially the result of satisfied customers. Satisfied customers are invariably the result of satisfactory goods. Now, this spring, you can add many dollars to your "good-will" asset by handling absolutely dependable wall finishes, paints and colors.

Our lines of wall finishes, paints and colors are complete. Every one is absolutely dependable. We would be glad to tell you of our "dealer" plans. It's decidedly worth your while to write.

Benjamin Moore & Co. Ltd.
6 Lloyd St., West Toronto, Ont.

Do you sell it?

Are you in line for big paint profits in 1914? Have you made sure of a prosperous paint year by stocking

"SILKSTONE"

No. 7-8 ft. Light Cornice Brake

The Brake That Is

undisputably the best value for the money is the "BB."

It turns out work of a **superior standard**, QUICKLY, ACCURATELY, and ECONOMICALLY, which are the qualities every level-headed business man wants.

This brake is adapted for the manufacture of light cor nices, ridge rolls, valleys, gutters, sq. pipe, any size of eavestrough with square or round beads, etc. We also manufacture Heavy Power and Geared Brakes. OUR PRICES ARE REASONABLE.

If interested, we will be pleased to mail catalogue.

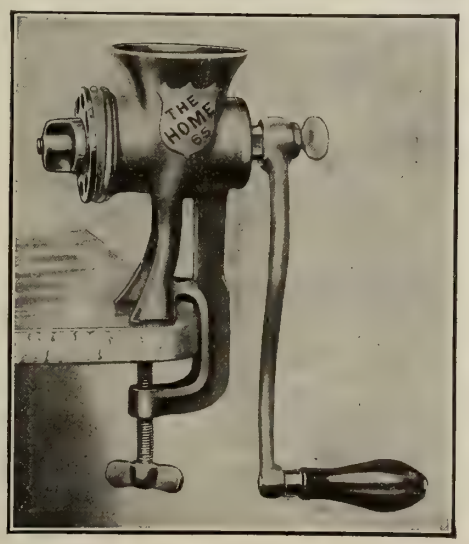
SOLES

BEARDMORE & CO. TORONTO & MONTREAL — TRADE MARK — B — REGISTERED



These soles sell at a good profit, working in splendidly with Cobbler's Outfits. Stock them now! Soles will come to your liking and sales will surprise you. Your jobber can supply you, if not, write us direct.

For sale only by

Beardmore & Co.
Toronto Tanners **Montreal**

You will find this
MAXWELL "HOME 65"
FOOD CUTTER

one of the best selling lines you ever handled.

The "Home 65" is a new machine embodying all the latest principles. Made in the standard family size and much stronger than the ordinary type of machine. Cap fits close, rendering the machine quite watertight. The open-end cylinder makes it easy to clean. Supplied with different cutting plates.

Maxwells Ltd., St. Mary's, Ont.

Build Up a Profitable Fence Department!

Handle a line of fencing that does not serve only as a mere boundary line, but one that gives real fence service—one that is built strong enough to withstand the onslaughts of stock as well as the ravages of all kinds of weather. Such a fence is

Peerless Fencing

You can sell this fence with a clear conscience. You can guarantee that **Peerless** goods will give full satisfaction. We will stand right back of your guarantee, whether it be in farm fencing, poultry fence, ornamental fence, gates or any other lines we manufacture, our policy is to satisfy every customer if at all possible to do so. **Peerless** fencing is well advertised through farm papers or other mediums. It is a line that is easily sold. Having an agency for **Peerless** will sell other goods for you.

It's Made of Heavy Open Hearth Steel Wire

with all the impurities burned out and all the strength and toughness left in. Heavily galvanized. Every intersection is locked together with a Peerless clamp. Top and bottom wires of Peerless Poultry Fencing are extra heavy—extra strong. Consequently fewer posts are required. **Peerless** fencing can't sag—can't rust—can't get out of shape—can't help giving absolute satisfaction.

For 30 days we will accept dealers' orders for our PEERLESS Farm Fencing and Gates at a special reduced price. Write for further particulars to-day.

MAKE MONEY FROM GOOD PUMPS—PROFIT

Unless a metal pump is made just right it will leak at joints or valves.

"Aremacdee" pumps do not give dealers who sell them trouble and loss from defective service in "Aremacdee" pumps sold customers.

Pumps for every use—hand or motor—force or lift—every type a dealer can sell.

All in the big catalogue. Ask for it—for dealer prices—for dealer terms.

GERMANTOWN LAMP BLACK

IS THE BEST AND HAS BEEN FOR OVER SIXTY YEARS.

When we originated Germantown Lamp Black at our factory in Germantown, Philadelphia, we little realized that it would become the STANDARD of the Trade and that in order to market their Blacks every other manufacturer would have to use that name, or else make something better.

THERE'S MONEY IN THE RIGHT PAINT

If you stock a complete line of **Ramsay's Paints and Varnishes** there's no danger of a customer going to "the other store" because you couldn't fill the bill.

Furthermore, that customer will be **satisfied.** Time and climate won't alter his first good impression of the paint you sold him because Ramsay's Paints have stood the test since 1842, and have built up a reputation for right-down durability and unfading qualities in spite of our strenuous weather conditions.

Ramsay's paints sell themselves—stock them, there's money in it for you.

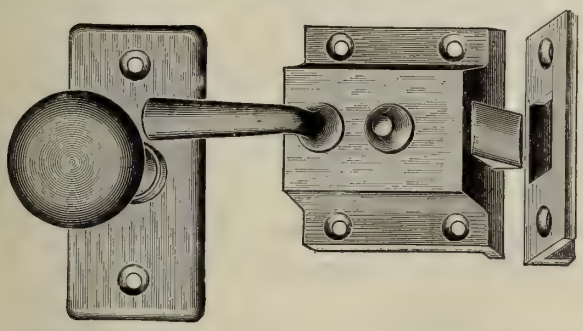
Russwin Builders' Hardware

Where Quality and Profits go hand in hand

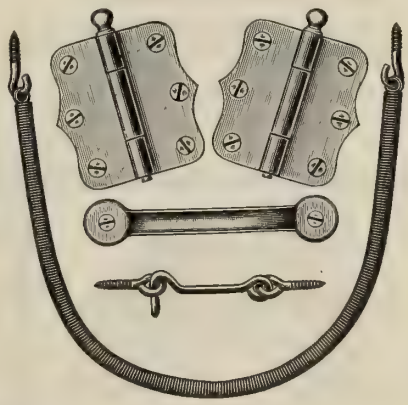
More than ever before, the dealer this year must handle goods that are money-makers. Quality, however, will not be sacrificed for profits by the merchant who hopes to hold and increase his business. Russwin Builders' Hardware is **quality stock** at a **moderate price.**

Knowing contractors will use "Russwin" hardware. They have learned that in so doing they secure both durability and style in the highest possible degree. Russwin goods have been a standard on the market for years.



In the wide variety of designs are fittings that will please your most exacting customers, and it is worth keeping in mind that a satisfied customer will do more to increase your business than any advertising you could possibly do. Make satisfied customers, then, by recommending quality hardware that in itself

Will Make Profits For You



With the opening up of the summer, your stock of builders' hardware should be all ship-shape. Anticipate the demand for this line and profit by your forethought. Full information covering Russwin hardware will be forwarded you on request. Don't let your competitor monopolize this business, but act to-day in your own interests. We will assist you.

Screen Door Hardware

Makes Good Money for any Dealer

But you can't sell it in the winter. The season for screen door hardware is over long before the last mosquito wakes from its winter's trance. This stock is turned over quickly and profits are correspondingly quickly realized. Be ready to handle this business with the highest grade hardware. We have the largest stock of this line in the West, and your orders will receive immediate attention. Stock up to-day.

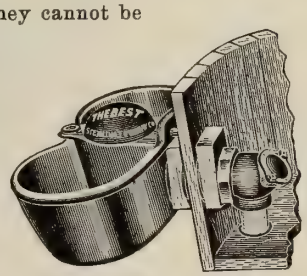
NEW REVOLUTION, Cambridge St., BIRMINGHAM, ENG.



The "BEST" Stock Fountain — the "best" for the following reasons:

Showing Construction

Easily attached to a barrel or tank.
All working parts are accessible without removing fountain or water. Connections of working parts are made with brass and will never rust, so that they cannot be removed. There is practically no chance of sediment getting on valve seat and preventing valve from closing.
Valve cannot wear off on one side and cause a leak. Construction of **Float Rod** reduces the chances of pipe becoming clogged.
Perforated Brass Screen is easily removed in case valve requires adjustment.
If your Jobber does not handle the "Best," a post card to us will bring full particulars, prices and terms, which we **know** will be interesting and profitable to you.

The Sterling Foundry Co., Sterling, Illinois

As Attached to Barrel

TWO CENTS PER WORD

You can talk across the continent for two cents per word with a WANT AD. in this paper.

Prosperity Rampant In the Peace River

Climatologists have figured out that a thousand feet reduction in altitude is equivalent to between three hundred and three hundred and fifty miles of latitude. Calgary district is about three thousand feet above sea level, Edmonton a little over two thousand; Dunvegan, on the Peace, is thirteen hundred, and Fort Vermilion, farther down the river, is only nine hundred and fifty.

These figures, considered along with the tempering influence of the warm Japan current, whose soft breath is wafted across the Rocky Mountain range on the wings of the far-famed Chinook, go to explain the miracles of production now heard of from what was once supposed to be the frozen and forbidding North.

So writes in the May MacLean's, W. D. Albright, a brilliant young journalist-farmer, now 800 miles north-west of Edmonton. On the ground, about which he talks, he is authoritative and convincing. The producing agents are getting down to business. Their assumption of such operations means a speedy return to business progress. Read this striking description of the third chapter in Western growth.

Then again the May issue of MacLean's is unusually bright by reason of the excellence of:

Canadians at Harvard. By H. G. Black.
John McClary—Still At It. By W. A. Craick.
The Business Outlook. By Jno. Appleton.
The Princess of the Stage. By Margaret Bell.
An Automobile Sprite. By B. B. Cooke.
The German Electric Genius. By F. W. Wile.
And the Five Entertaining Short Stories.
By Sullivan, Cooke, Pinkerton, Rorke, and Quarren.

The Coburn cover design for this month will appeal to every lover of Canadian art.

Send us a postcard and have your name placed on our subscription list.

Subscription $2.00 a year. *Twenty cents a copy.*

Atlas
10 Cent Fly Swatter

This swatter has an extra long handle — 10 inches. It is very neatly and securely bound with soft green felt — cannot mar the finest furniture. Especially adapted for parlor or drawing room use. We have made it extra strong and flexible — will outlast any now on the market.

Our 5 cent swatter is the best ever sold for a nickel. Also it has a triangular fold, permitting the insertion of your ad. if you desire.

Now is the time to place stock orders. We'll gladly quote prices and terms.

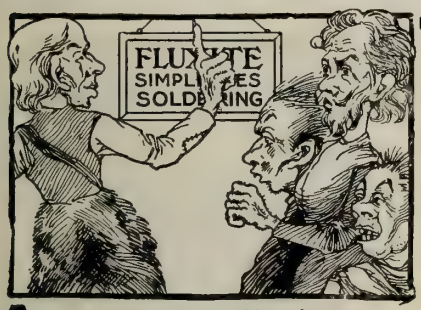
One of the most successful retailers of late years says: "When a firm advertises in trade papers it is getting into good company. As I pick up one of a dozen of these periodicals here in my office, and glance through it, I find that the best people, the successful firms, are represented in such a way as to reflect their importance in the trade."

"NORCROSS" Cultivator—Hoes And Weeders

Practical Garden Implements That Outclass The Common Hoe From Every Standpoint, Will Outsell It And Cost No More.



The lightness, efficiency and ease of manipulation are certain to encourage more people to do gardening and bring you more customers.

Be sure to include these tools in your 1914 Spring and Summer Stock. The turnover and profit will be most desirable.

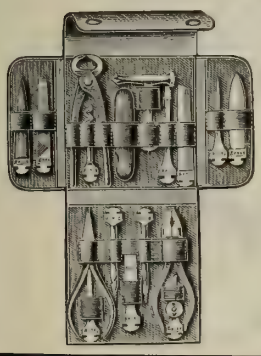
No. 32 Torch

There is none better



than the "C. & L." No. 32 Gasoline Torch. IT HAS NO EQUAL WHERE INTENSE HEAT IS DESIRED. The No. 32 burns perfectly in cold and windy weather, and produces more heat, consuming less gasoline, and will last longer than other makes. The burner is made of the best generator metal, and is fitted with a hook and support for holding a soldering copper. The tank is made of extra heavy seamless drawn brass, fitted with patented double spring automatic brass pump.

Saves Oil, Time and Labor

A trial always makes a steady user.

Easy Profit because Easily Sold

No matter in what position the can may be held, the oil is entirely controlled by the operator. Not a drop of oil need be wasted. Oil is forced out by simply pressing on the plunger. The flow of oil ceases the instant the pressure on the plunger stops.

Oiling can be done in one-half the time and with less effort.

The "Cannon" is giving satisfaction to thousands of users.

Drop a card for particulars.

The PULL-EASY Garden Cultivator

IT IS ADJUSTABLE TO ANY WIDTH ROW

This handy garden tool can be used both as a rake and a weeder. Patented slide grooves, secured by thumb screws—allows a width adjustment varying from seven to eighteen inches. When plants are young, middle tooth can be removed, the plants straddled and two rows worked at once. Weighs but four pounds. Indispensable about the yard or garden.

For Sale by all Leading Canadian Jobbers.

THE PULL-EASY MFG. CO.
110 Barstow Street WAUKESHA, WIS.

A Sign of the Age

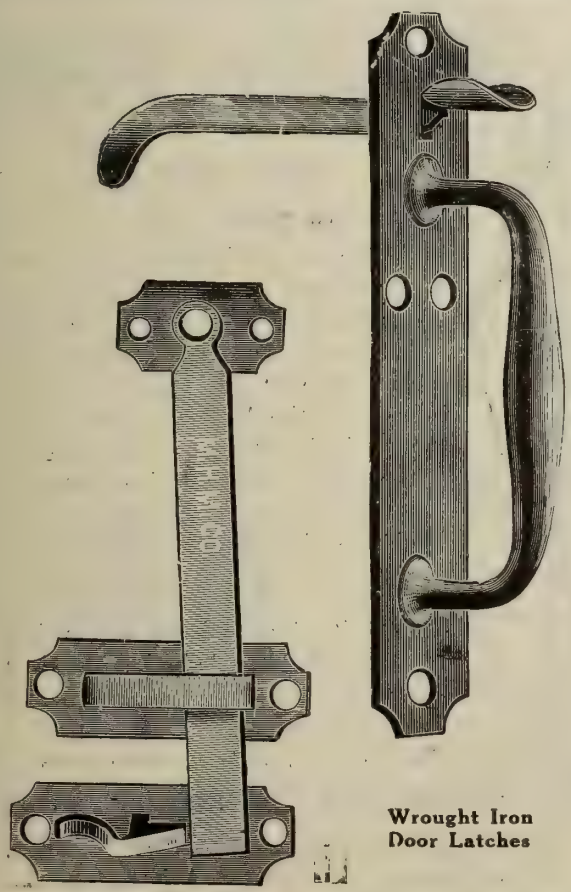
We live in an age of progress, of striving, of upward tendencies. And our architecture reflects this spirit—is the trade-mark of the age. To construct his giant buildings, man introduced steel into architecture. And to protect this steel against the ravages of fire, time, and atmosphere, he employs concrete.

This is just one of the reasons that has made the handling of

Rogers' Portland Cement

so very profitable. For concrete has become the 20th century building material for everything from sky-scraper to cottage.

Get in the concrete movement—right away. Become one of our authorized dealers.



Sell cement to the men who are building concrete structures in **your** locality. Tell them that you can save their hauling it half across the town, and they'll be mighty glad to give you their orders, because Rogers' cement meets the approval of their architects and engineers, **because Rogers' cement is standard.**

And we don't want you to carry a big stock either. We ship right to Mr. Builder, as fast as you tell us his requirements.

So don't delay. Write us to-day.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

The Long Green
Lasting

Has the strength, the body and the consistency that are essential to re-orders

There are paints and paints — but "Bronzite" is the green that is different—it lasts, it wears and holds its color.

We make a specialty of our green — give it nearly all our time and attention — been experimenting, testing, proving and bettering it for ten years and more.

A test of this paint under actual working conditions is all that is needed to prove its exceptional merits.

Write for color cards and particulars.

Used on all work where a green paint is needed.

DOMESTIC ELECTRICAL WORK, BY WILliam A. Wittbecker. Concise and Practical Explanation for Plumbers and Hardware Dealers, on How to Wire Buildings for Bells, Alarms, Annunciators, and for Gas Lighting From Batteries. The information given is practical, and with a close observance of the directions laid down, any one, though entirely ignorant of electricity, should be able to do the work described. Illustrated with 22 diagrams. Price, in paper, 25c post paid. Price, in cloth, 50c. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE WINDOW DRESSING—THIS is the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE STORE BUSINESS METHODS —The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business; Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10 postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

The New Metal Worker Pattern Book

This is the most elaborate and complete work that has ever been brought out for the use of sheet metal pattern cutters. It is printed from new type with a new and improved arrangement, especially convenient for reference and study. Parts of a former edition, entitled The Metal Worker Pattern Book, which have been utilized in its preparation, have been re-written and simplified and later methods embodied. 218 problems are now given, 75 of which are entirely new. A Treatise on Pattern Cutting as applied to all Branches of Sheet Metal Work. By George W. Kittredge. 430 Pages; 744 illustrations; Size, 10 x 13 inches. Cloth bound, Price, $5.00. Sent postpaid only on receipt of price.

The Handy Hame Strap

To show is to sell

Made of oak-tanned Belting Leather. It's twice as strong as the ordinary harness leather strap and it looks it.

Special hook fastens on to the hame and prevents wear and slipping at this point—Made also in the regular sewed style.

If you want a sample of the leather used in the belting straps, say so, and we'll send it immediately. **If you want samples of Straps, send 5 cents in stamps to help pay postage.**

The distinctiveness of the Griffith quality, the reasonable selling price and the good profit allowance are good reasons why you should stock this strap at once.

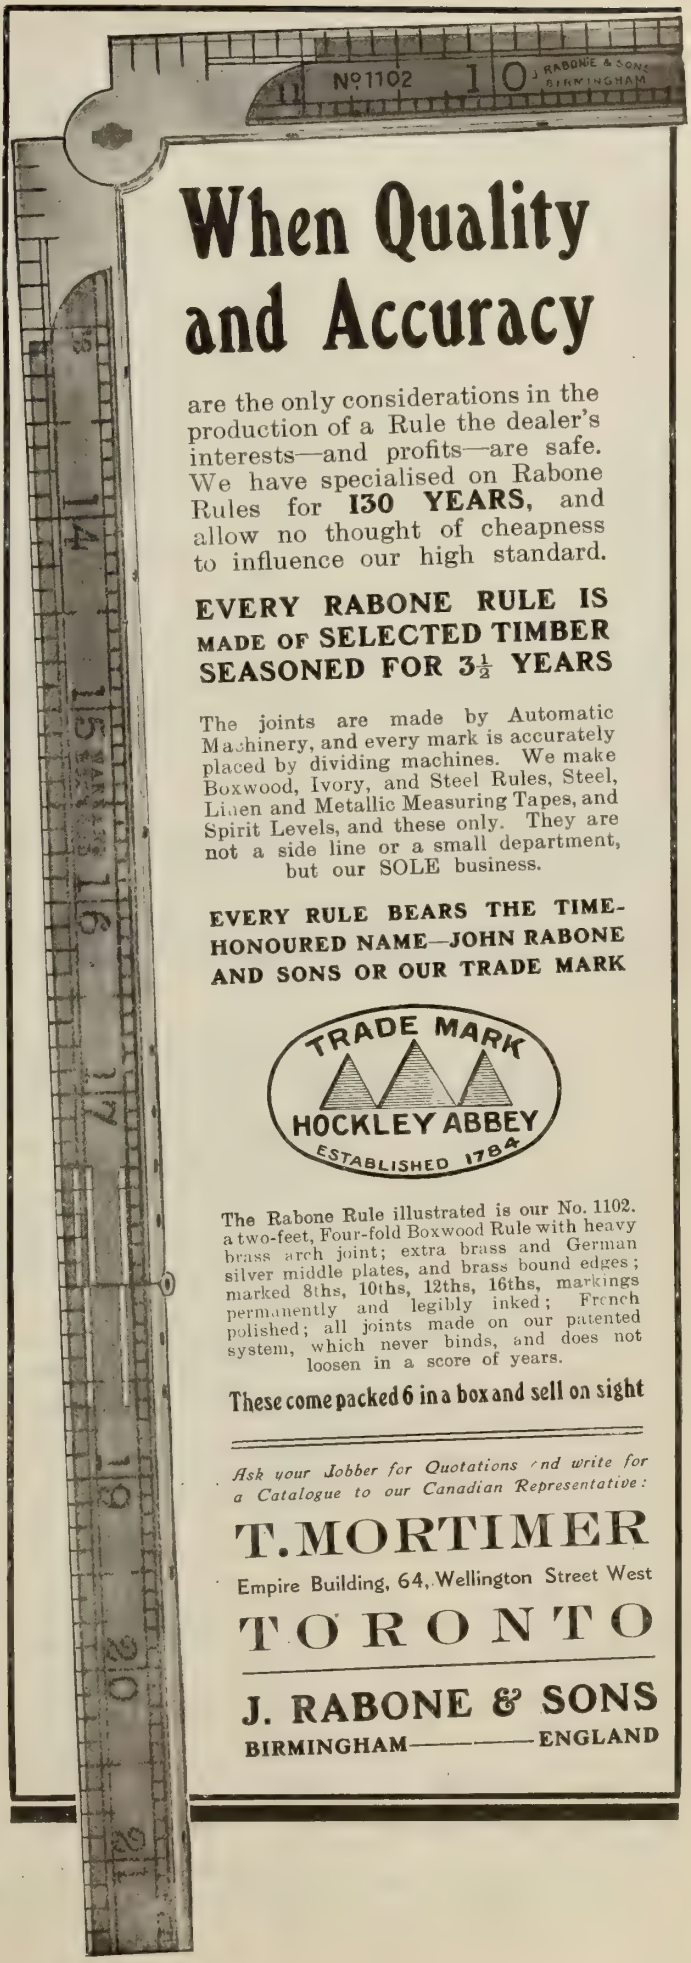
CUTLERY

REGISTERED TRADE MARK



GRANTED 1682.

By seeing that this exact mark is on each blade.

SOLE AGENTS FOR CANADA

James Hutton & Company

MONTREAL

When Quality and Accuracy

are the only considerations in the production of a Rule the dealer's interests—and profits—are safe. We have specialised on Rabone Rules for **130 YEARS**, and allow no thought of cheapness to influence our high standard.

EVERY RABONE RULE IS MADE OF SELECTED TIMBER SEASONED FOR 3½ YEARS

The joints are made by Automatic Machinery, and every mark is accurately placed by dividing machines. We make Boxwood, Ivory, and Steel Rules, Steel, Linen and Metallic Measuring Tapes, and Spirit Levels, and these only. They are not a side line or a small department, but our SOLE business.

EVERY RULE BEARS THE TIME-HONOURED NAME—JOHN RABONE AND SONS OR OUR TRADE MARK

TRADE MARK
HOCKLEY ABBEY
ESTABLISHED 1784

The Rabone Rule illustrated is our No. 1102. a two-feet, Four-fold Boxwood Rule with heavy brass arch joint; extra brass and German silver middle plates, and brass bound edges; marked 8ths, 10ths, 12ths, 16ths, markings permanently and legibly inked; French polished; all joints made on our patented system, which never binds, and does not loosen in a score of years.

These come packed 6 in a box and sell on sight

Ask your Jobber for Quotations and write for a Catalogue to our Canadian Representative:

Stanley Tools

SIX REASONS WHY YOU SHOULD STOCK STANLEY METALLIC PLUMBS AND LEVELS

1. Their design is **attractive** and **perfectly proportioned**, which combines the **minimum of weight** with the **maximum of strength.**
2. The **milling** and other **machine** work is such as to secure **absolute uniformity** in the level stocks, whose top **and** bottom are **perfect straight edges** and parallel.
3. They are **correctly made** and will **remain accurate** under any ordinary condition of use.
4. They are **easily adjustable.**
5. They are **reasonable in price.**
6. The **demand** for them is **well established.**

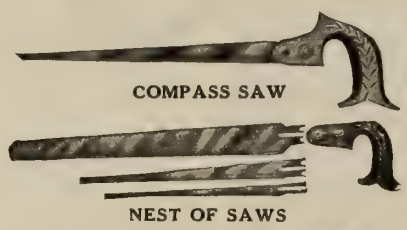
A. MACFARLANE & CO., Montreal



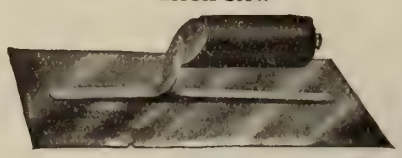
TRADE S.W. MARK.

Ross Rifle Luck

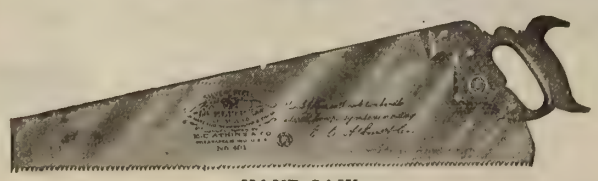
Users of "Ross" Rifles invariably comment on their good luck, because the power is such that judging of distance is scarcely necessary, so if game is **seen**, it can be **hit** and **bagged**. Dealers are wise to order early, as, despite increased facilities, it is difficult to keep up with orders.

ROSS RIFLE CO. Quebec

ATKINS' STERLING SAWS



COMPASS SAW



NEST OF SAWS

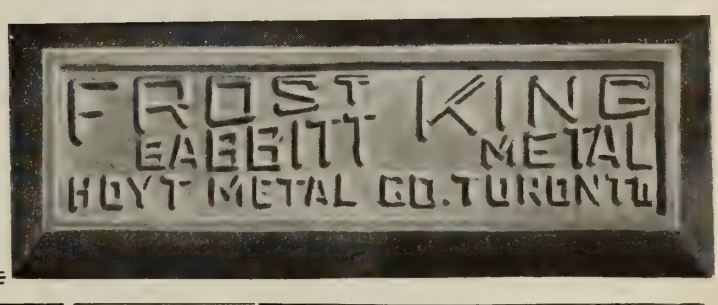
"Frost King" Babbitt Metal



(Made in Canada)

Good to sell because it's good

The quality of this babbitt is exceptionally high.

It is the result of over 35 years' experience in the careful selecting and compounding of stock.

You'll fill all demands for babbitt metal to the greatest satisfaction of buyers if you sell "Frost King."

Hoyt Metal Co., Toronto, Ont.

New York, N. Y.; London, Eng.; St. Louis, Mo.

THE "HANDY ANDY" FORCE CUP

FOR HOUSEHOLD USE

Enables anyone to keep the waste pipes of sinks, basins, baths, tubs, etc., free and clear, and in a safe and sanitary condition.

THERE'S A GOOD SALE FOR THEM.

MANUFACTURED SOLELY BY

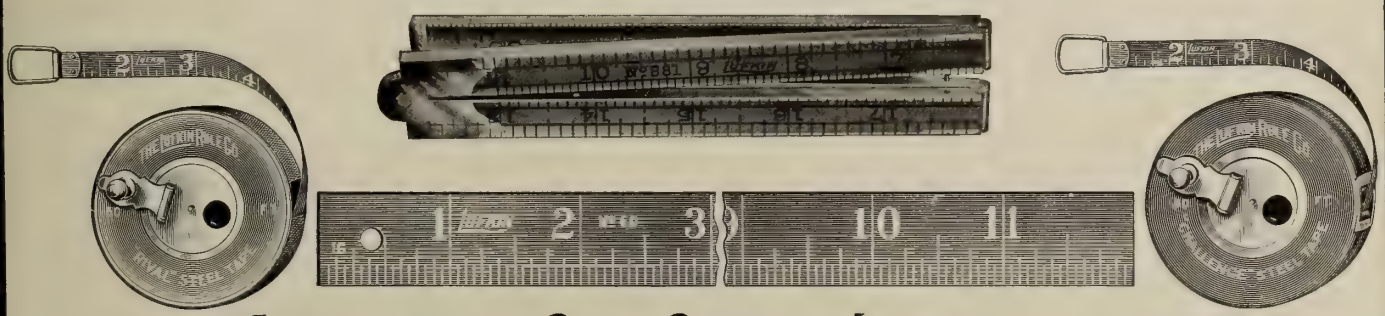
GUTTA PERCHA & RUBBER, LIMITED

SUCCESSORS TO

The Gutta Percha & Rubber Mfg. Co., of Toronto, Ltd.

TORONTO MONTREAL WINNIPEG CALGARY VANCOUVER

THERE'S MORE SELLING ARGUMENT IN THE NAME **LUFKIN** THAN YOU EVER NEED TO SELL **LUFKIN** GOODS



LUFKIN Measuring Tapes and Rules

Are Canadian Made and are on sale at practically every prominent house in the country stocking such goods.

THIS IS THE SIMPLE EXPLANATION: Dealers stock the line that will sell and will bring customers back. CUSTOMERS buy the line in which they have confidence.

THE OPINION OF THE LARGE MAJORITY MARKS THE SAFE COURSE.

Stock **LUFKIN** Goods

THE LUFKIN RULE CO. OF CANADA, LTD. WINDSOR, ONT.

COMMUNITY SILVER PLATE

THE SILENT SALESMAN

Persuasion is unnecessary when selling Community Silver Plate. Its attractive advertising creates a desire for possession. A glance at the goods completes the sale.

THE MACLEAN PUBLISHING COMPANY, LIMITED

Vol. XXVI. Publication Office: Toronto, Canada No. 19

May 9, 1914

There's a GOOD Job!

I used Amatite ROOFING"

"NOW I have the best roof in this township. One that will last—one that's waterproof—one that will resist the hardest storms—and I didn't have a bit of trouble laying it."

That's about what every Amatite owner says. Its superiority over all other ready roofing is apparent to any one who uses it.

Amatite does away with all roofing troubles and unnecessary expenses because it is made with a real mineral surface that *needs no painting.* It is durable, fire-retardant, practical, economical.

Don't buy any other roofing till you look up Amatite. Write to nearest office for samples.

The Paterson Mfg. Co., Limited

Montreal, Toronto, Winnipeg,
Vancouver, St. John, N. B.; Halifax, N. S.; Sydney, N.S.

Most Easily Marketed

A prominent merchant writes thus regarding **1847 ROGERS BROS.,** ware.

> "We can truthfully say this, that in a business experience of 48 years we have NEVER had goods in our cases so dependable, of so GOOD VALUE to the consumer, and so easily marketed."

This satisfactory experience will be yours if you handle

1847 ROGERS BROS.

"Silver Plate that Wears"

The reputation of the ware—before the public for two generations—is backed by the most persistent and extensive advertising in the history of silver plate.

And every dealer handling the ware is entitled to our Retailers' Service.

Write for illustrated circular describing the advertising and display matter we supply free of charge to dealers handling our ware.

Yale Triplex Blocks

A "Line of Steel from Hook to Hook"

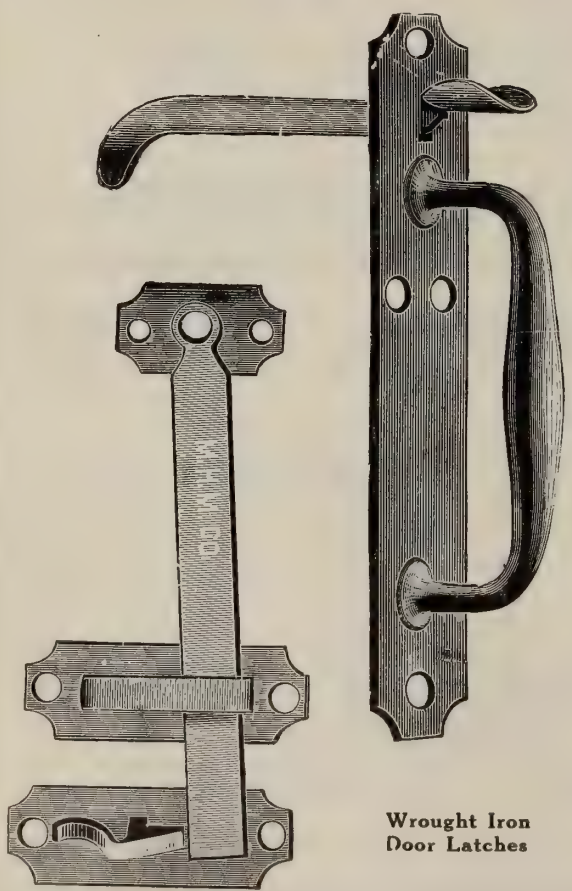
Every load-lifting problem, on the farm, in the factory, machine shop, garage, to lift your gas engine or to lift your motor boat out of the water, is solved with a Yale Triplex Block.

"Safety First" in material and workmanship justifies the Yale Triplex Block, and is behind your sales to your customers.

Fairbanks Valves

"Disc Renewed in one minute"

Will remove all valve troubles. They are built of high-grade material, to withstand a great deal more than their rated pressure. The renewable disc feature is unequalled by any valve on the market. The valve stems are packed with Palmetto Twist packing, which will remain soft and perform its function better than any other packing made.



Fairbanks Scales, Small Tools, Automatic Supplies and other mechanical lines are the best the world affords.

MORRISON
Brass Valves

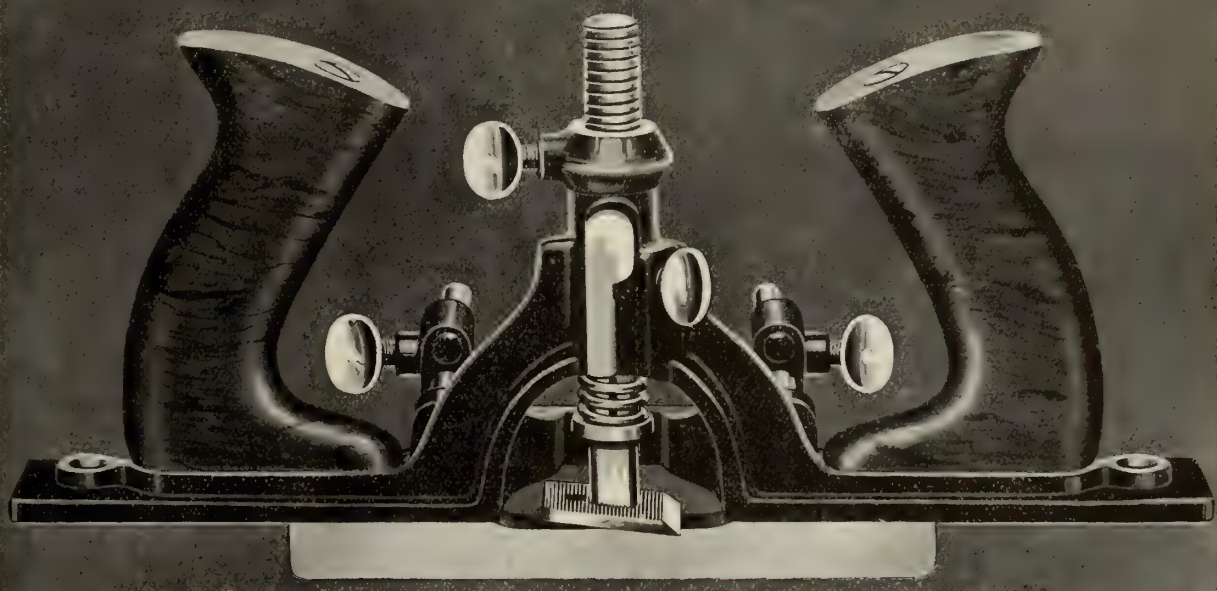
Do you want to know how we have been able to sell valves to the same customers for over twenty-five years? Some of the reasons are given below.

Do you want to stock the cheapest for the quality, and yet the longest-wearing and most easily repaired valves on the market? Then read about them lower down on the page.

MORRISON Brass Valves are built with renewable discs and a special disc nut. They can be made as good as new in a few minutes—for a few cents. The body is made large and heavy, giving full opening through the valve and strength to withstand the stress of rough usage and expansion and contraction of piping. The spindles are large enough to withstand all but the most reckless turning. They are fitted with special packing gland, making repacking easier and quicker, and the packing wears longer too. In short, ask any engineer who has ever used Morrison Valves if he ever bought a better valve for the money.

We make a type of valve for every purpose. Each type is the result of twenty-five years of study and skillful design. And each individual valve is the best that can be produced by carefully proportioning new metals, high-class workmen, severe tests and rigid inspection. Each valve is absolutely guaranteed.

Full information and prices will be gladly furnished on request.



The James Morrison Brass Mfg. Co.
LIMITED

93-97 Adelaide St. W. - - Toronto, Canada

Stanley Tools

Stanley Door Trim Plane

THIS new Plane will make mortises for Butts, Face Plates, Strike Plates, Escutcheons, etc., without the use of a butt gauge or chisel. In fact it might very properly be termed a mechanical chisel. ¶ It is also a very superior Router Plane for surfacing the bottom of grooves or other depressions parallel with the general surface of the work. ¶ The Plane is japanned, has nickel plated trimmings, rosewood handles, and three forged steel cutters.

TROLLEY-HANGER
Questions and Answers

THE HATCH

Why does the "Dealer" stock the Hatch Trolley Hanger?

BECAUSE

The dealer makes a good profit; has faith in the Hatch Hanger, and knows that he will have a satisfied customer.

Why does the "Customer" demand the HATCH HANGER?

BECAUSE

He wants the BEST for the LEAST money.
He wants a hanger, easy to adjust, strong, well made, and one that can be depended on. THE HATCH fills the bill.

Three Things Make Wilt Twist Drills the Standard of Drill Excellence

STOCK

The stock Wilt Twist Drills come from is the finest, most carefully selected, most accurately tested steel that can be bought.

It is **steel with a pedigree.** Steel that has a long record of worthy performances behind it.

MACHINING

Wilt Twist Drills are machined complete at a single chucking—not as has been heretofore necessary, in five or six different machining processes.

The rough stock goes into the automatic machine and comes out a perfectly cut drill.

HARDENING PROCESS

Wilt Twist Drills are **perfectly** hardened. Electric furnaces run by the most skilled operators in their trade insure hardening of a scientific accuracy.

No wonder Wilt Twist Drills stand up better, last longer and almost never break down under strain.

Every live dealer in Canada should have Wilt Drills in stock.

The Wilt Twist Drill Co. of Canada, Limited

NICHOLSON MADE FILES

You're Known By The Goods You Sell

Sell a man a file that fails to give good service — and you're digging a pit for yourself.

When you give your trade **NICHOLSON-MADE-FILES**—you give them files that you know are absolutely right. You know that each file has been inspected eight times—between every important operation. You know the finished file has been tested on tougher steel than it will ever be used on in actual service. So that when you sell a **NICHOLSON - MADE - FILE,** you're certain it's going to give the utmost of satisfactory service.

No "come-backs" to fight — no excuses to make. Nothing to do but "sell more files"— and take your liberal margin per sale.

You Can Make Money Out of Clean-Up Week on Many Lines

A great demand has been created for a clean, sanitary fence that rubbish could not accumulate around without being seen. Our "CYCLONE" fence is made for this purpose. The pickets are of No. 9 heavily galvanized wire, spaced 2⅞ inches apart at the top with an additional No. 9 galvanized picket interwoven, so as to give an extra close spacing of 1⅜ inches at the bottom. Cables are of heavy galvanized wire. This is an ornamental fence and is made for use around any home. Write for fine display card and literature. The clean-up campaign will make this fence popular, as a sanitary fence is one recommendation of the scheme.

We have many lines of Clean-Up Goods such as:

Rakes, Garden Wheel Barrows, Shovels, Hose, Window Washers, Mops, O-Cedar Polish, Myers' Putz Cream and Silva Putz, Boeckh's Paint and Household Brushes.

Lawn Rollers and Lawn Mowers, Garden Shears, Turf Edgers, Poultry Netting, etc.

This will be an age of Concrete

Just as other ages have been named after some much used material—the stone age, the copper age, the iron age—for example, so will this, in days to come, be known as the concrete age.

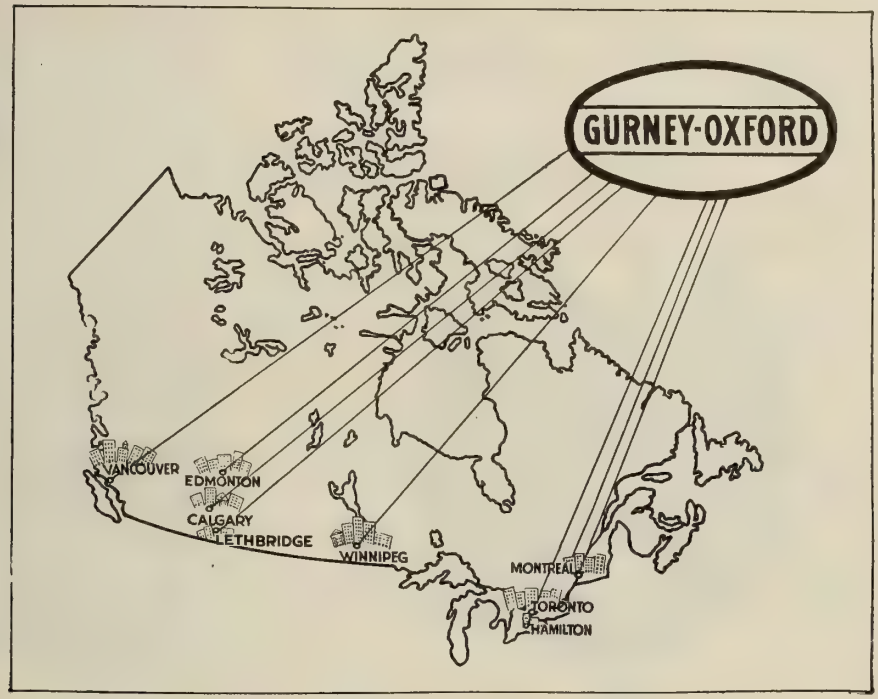
And it will have earned the title, for concrete is being used everywhere, more and more, every day.

Now if you are a

Rogers Portland Cement

dealer you will be right in line for making money out of this big, new business, because you can look after the needs of any small contractors who are doing jobs close to your store—can save them the trouble of hauling cement from the supply house.

And when they know the brand you handle, they'll be glad to give you their orders—for Rogers' Cement meets the approval of their architects and engineers—**Rogers' Cement is standard.**



But you don't need to carry a large stock to meet their varying needs. We'll attend to that as obediently as you tell us to.

You can't find a better proposition from your viewpoint,—**so write now**, to-morrow may be too late.

ALFRED ROGERS Limited, 28 West King Street, Toronto

N. J. DINNEN & CO., Western Sales Mgrs., WINNIPEG, MAN.

"Spreading Ourselves"

Here's Canada.

Look at the width of it, and the depth of it.

Even the youngest of us can remember when Canada was a "No account" country.

They used to call Canada "Supine."

Wait, we'll look up the dictionary and save you the trouble.

Here it is: "Supine"—"supine—lying on the back, leaning backward, negligent, indolent." Whadyathinkathat?

But you can't keep a squirrel on the ground.

Canada—bar one or two—is the biggest country on the globe. Perhaps we'll never have the most people, but what we have grade high.

See the cities marked on this map, with the lines running to them?

Those are the places where The Gurney Foundry has factories or warehouses.

We're close to everywhere.

As Canada grew we spread out like a vine on a wall.

We enlarged our "distributing facilities."

Gurney Dealers don't have to wait for goods till a train crawls like a snail (when you're waiting for goods) over one or two thousand miles of track.

If you're a Brandon man, your goods come from Winnipeg.

If you do business in Sherbrooke your goods are shipped from Montreal. And so on.

Time is money and satisfaction these days, and this wide system of distribution gives the Gurney dealers an additional argument for business — the argument of prompt deliveries.

Safety First

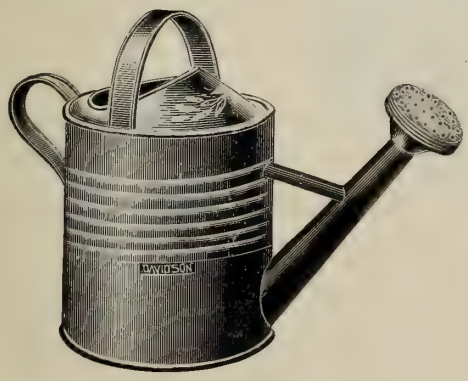
Nowadays "Safety First" is not only preached, but practised in all constructional work.

The exterior of a Home or Store may be "safe as the Bank of England," but ofttimes the safety of the whole building is jeopardized by inflammable or flimsy ceilings and walls.

The interior shown here is just an ordinary kitchen. "Metallic" interiors are all "useful patterns" and ranging upwards from the design shown they culminate in the acme of artistic decoration.

"METALLIC" CEILINGS AND WALLS

Are "Safety First" Materials—Safe as regards fire, decay, dirt, disease, insects—safe since they cannot fall and injure persons or furniture—easily and quickly applied over old ceilings and walls or over new boards or studding—economic—durable.



Use Metallic Ceilings instead of Lath, Plaster and Paper.

The METALLIC ROOFING CO. LIMITED

McClary's

Sprinklers

with cleanable zinc roses

This Sprinkler is made in 7 convenient sizes, from 1 to 20 quarts.

The Bottom, Breast and Spout double-seamed to body.

Large dome-shaped breast prevents water from spilling when sprinkler is tipped.

The Rose or Sprinkler screws on to the spout, which prevents it from becoming loose.

Made in japanned, plain tin, and galvanized.

McClary's on goods is a Quality Name.

McClary's

TORONTO, WINNIPEG, EDMONTON, ST. JOHN, VANCOUVER, SASKATOON, MONTREAL, HAMILTON, LONDON, CALGARY.

McClary's Goods Always Recognized As Quality Goods

Since its first activities 65 years ago, our now famous organization has built its reputation on the "Quality" basis. All McClary's goods bear the "Quality" mark, and prominent amongst these is our

SUNSHINE FURNACE

Its big, new feature is the inclusion of that remarkable rust-resisting metal, American Ingot Iron in two vital parts, the Dome and Radiator. This construction gives the "Sunshine" a superior feature of incalculable value to the dealer when talking durability and service.

Then there is the semi-steel indestructible fire-pot in two sections, the latter feature allowing the top half to expand independently of the bottom half and vice versa. This saves danger of cracking, a common experience with one-piece fire-pots.

And there are many other features of first importance. Write for our booklet, "McClary's Way of Heating."

McCLARY'S ON GOODS IS A QUALITY NAME.

OPEN

"Majestic" Coal Chutes

(Made In Canada)

The MAJESTIC GRAVITY LATCH

Point out to your customers the following **advantages of the Majestic Coal Chute and you'll effect many sales and reap a good profit.**

It permits coal, wood or vegetables to be put into the cellar without disfiguring the building in any way.

Unlike a glass window, it cannot be broken.

Hopper can easily be removed if desired to put in very coarse coal or wood, or if a wagon chute is used.

It swings back into the chute and allows the door to be closed and locked automatically. It can only be opened from the inside—hence it is burglar-proof.

CLOSED

The door is made to lock when opened upward. It also affords protection to the building above the fuel opening where a great amount of damage occurs when throwing in fuel the ordinary way.

The use of the "Majestic" coal chute leaves the fuel opening always neat and clean.

The "Majestic" will give long service because it is made with a cast iron frame and a cast iron door and a steel body.

Write for full particulars.

ELEY

CARTRIDGES

We Load for the World!

¶ No Ammunition Manufacturer or Loader handles or loads a greater variety of shot gun powders than ourselves, consequently our experience of the styles of powders and the specification of loads which give the greatest satisfaction to sportsmen is second to none.

Eley Smokeless Shot Gun Powder (33 gr. class) is inferior to no other powder. 33 grains is the Eley Standard load, and that this will do the work more satisfactorily than heavier loads of other powders is one of its merits. This load gives results equal to 3¼ drs. of other bulk smokeless powders.

ELEY CARTRIDGES are shot in the snows of Canada, the heat of Central Africa and India, and elsewhere throughout the world.
SOLD BY ALL GUNMAKERS AND AMMUNITION DEALERS.

BOSS OVEN

GLASS DOOR

GUARANTEED

No. 750

BOSS Glass Door OVENS

Sold throughout the World. In almost every Country where Oil, Gasoline or Gas is used as fuel, you will find the Boss Oven on sale.

Its tremendous popularity is due to the fact that it is first of all a good and economical baker. We guarantee it to bake or roast satisfactorily on any good oil, gasoline or gas stove, or "money back" without argument.

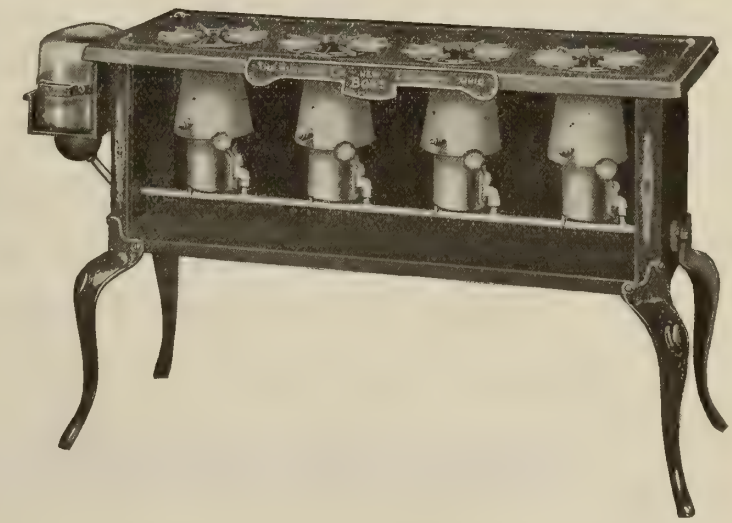
The "BOSS" is made better than any other Oven. Only the best materials are used. The body is made of Mecca Lustre Polished Blue Steel. The linings of heavy Corrugated Tin Plate, having thick asbestos inner linings throughout.

Its Patented Glass Door, which we guarantee not to steam up or break from the heat, has been a universal success. More than 600,000 of this style are now in daily use.

Many patented and exclusive features are found in the Boss. The new Hinge and Door Support leave the door opening entirely free when Oven is open. No danger of burning the hands or arms by coming in contact with wires or chains.

Large variety of styles and sizes in Glass and Steel Doors are shown in our new catalogue, which will be sent on request. Write for it to-day.

Write to-day for Complete Catalog and prices.

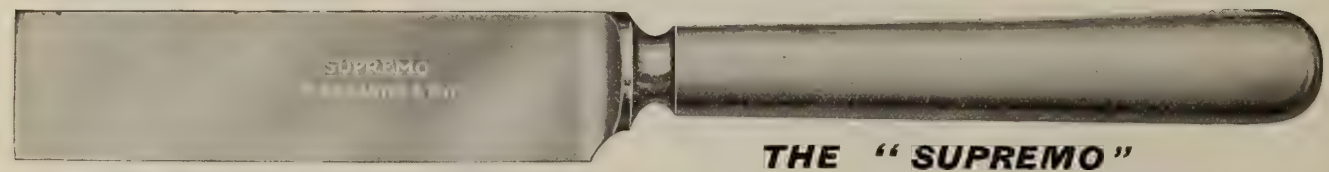


NEW BOSS OIL STOVES

Every Vital Feature in the construction of an Oil Stove has been carefully worked out in the "New Boss." There is nothing complicated to get out of order—nothing hard to understand to operate it properly.

Simple but Substantial construction has been adhered to throughout. The extra wide top gives more room for cooking utensils. The legs are strong cast iron, making the stove very rigid.

Patented High Wick Limits or fingers are provided on the inner combustion tubes which are engaged by the wick when turned at full burning height. These fingers automatically trim the wick when chimney is revolved.



The Intense Blue Flame plays right against the cooking utensil, giving quicker results and using less oil than most other stoves.

LUNDY
SHOVELS

It isn't just by chance,

that Lundy Shovels have become a standard wherever shovels are used in Canada.

No, Sir! There's more back of it than that—it's their many points of superiority that have earned for them their enviable place. For instance—

The strap and blade point are made of crucible steel, and are extra strong, thus ensuring long service and durability, from those parts that usually give out first.

This is only one "Lundy" advantage. To fully appreciate their value as business-getters, you must handle them.

They'll be found at your jobber's, most probably; but if he hasn't got them write to us direct.

Every Business Man Should Have a Copy of This Book in His Library

"Digest of the Mercantile Laws of Canada"

A READY REFERENCE FOR BUSINESS MEN AND THEIR ASSISTANTS. A GUIDE TO THEIR DAILY BUSINESS

IN RENTING A STORE, PROCURING A LOAN OR COLLECTING A DEBT, THIS BOOK WILL SAVE YOU MANY DOLLARS

No work published in Canada equals it for business men. A veritable consulting library on this one line so universally needed. Based on Dominion and Provincial Statutes and Court Decisions. Indorsed by barristers, sheriffs, magistrates and conveyancers.

Below appears a few of the questions it answers. These are picked out at random from the book.

If you endorse a cheque which bank cashes, are you liable to the bank for the amount, if the cheque were forged or raised?—173.

(The figures after each question refer to the section in the "Digest" which gives the answer.)

Can Interest written "one per cent. per month" in a note be collected by "legal process?"—See sections 345, 185.

In going security on a note, what is the difference between writing your name on the face of the paper or on the back?—171.

Why is it that a verbal agreement to buy real estate with, say $100 paid down "to bind the bargain," does not bind either seller or buyer?—451.

If a proposition is made to you by letter and you accept it by letter, do you know the exact time when the contract is closed?—39.

How many years does it take a promissory note, a book account, a judgment or a legacy to outlaw in your province?—356, 359, 360, 367.

How long may the drawee legally hold a draft for acceptance?—209.

If a man, in the presence of witness, makes a verbal agreement to buy a wagon, say for $53, but does not take possession of it, will the sale be binding?—500.

What effect has it on a will if only one person signs it as a witness?—815.

If the wife or husband of a legatee signs the will as a witness, what is the effect?—816.

"A," in paying off a Mortgage, gave mortgagee a marked cheque on which was written: "This cheque is given and received as a full settlement and discharge of Mortgage No.———." Is that a legal discharge?—410.

If a person goes with his hired man to a merchant and says: "Give this man the goods he may need up to," say "$15, and if he does not pay you," say, "within thirty days, I will," will the promise bind him?—110.

If stolen goods are sold to an innocent purchaser for value, can they be taken from him?—513.

How may a person legally add "& Co." to his name, or use any special name other than his own as a firm name, without having a partner?—694.

"B" claims that the Canadian Bills of Ex. Act allows him two days, in addition to the day of presentment, to accept a sight draft, and then three days of grace in which to pay it—six days in all. Is he right?—209, 217.

If you rent a property for a year, the rent payable monthly, and remain on after the year expires, are you a yearly or a monthly tenant?—580, 608.

Can you garnishee a debtor's money deposited in a bank if you know it is there?—885, 295.

Forwarded direct post free on receipt of price.

Keep the book ten days, and if it is not worth the price, return it and get your money back. If remitting by cheque make same payable at par, Toronto. **Eastern Edition, Price, $2.00. Special Western Edition, $2.50.**

To meet the needs of subscribers in New Ontario and the Western Provinces, where land is under The Land Titles System of Registration, an Appendix of 16 pages, containing a synopsis of the Land Titles Acts, has been added to our regular edition, thus constituting a special "Western Edition." Price, $2.50.

How we help you sell more

YALE

Padlocks—three big helps!

LIVE ADS for NEWSPAPERS

Advertisements that will get attention and hold it until you have said your say. In plate form all ready to print, or just the pictures, as you prefer. The use of these advertisements will bring new and old customers into your store.

MAGAZINE ADVERTISING

The magazines each month carry the Yale story into the homes of those whom you sell. We are making the name "Yale" a selling force for you. Nothing on your shelves is better known and more highly thought of by the trade you seek than Yale Products. Our advertising has been largely responsible for this.

ATTRACTIVE CAR CARDS

Signs for your street cars, playing up the Yale goods you sell, have a wonderful trade-pulling power. They catch the man who needs a lock, a night latch or a door closer going and coming and send him to your store. They make our *national* Yale advertising a *local* Yale advertising. We'll furnish the cards if you'll furnish the street cars.

Three other important ways in which we help you to sell more Yale Products are with Window Displays. Clever Lantern Slides, and Display Boards. Ask our Dealer's Advertising Service to send you detailed information about any or all of the above.

Many Merchants Attend Alberta Convention

Problems of Vital Importance to Retail Trade Up For Discussion —Legislative and Educational Topics on the Slate—Address on Credit—Its Use and Abuse—Resolution of Retailers.

MERCHANTS from all parts of the Province attended the big convention of the Alberta Branch of the Retail Merchants' Association of Canada, held at Calgary on May 5, 6 and 7. Subjects of paramount interest to the retailer were discussed, and many of the leading merchants in the Province took part. Among the questions discussed were proposals relating to a small debt court; credits; the local newspaper and its relation to the retail trade; advertising; the pure food law, etc. The attendance at the meetings was large and the exhibition held by the manufacturers was on an elaborate scale.

Vote Down Resolution.

The retailers voted down a resolution by the Steamfitting Branch to prevent hardwaremen doing pipe work. The hardware section threatened to form a retail wholesale company if wholesalers continue to cater to consumer, especially in harness lines. There was a unanimous vote in favor of prohibition of liquor in Alberta. A resolution was passed against municipalities selling electric fixtures, fittings or other lines by retail. A more complete report of proceedings will be given in next week's issue. Among the important addresses delivered was one here appended:

Address on Credit.

One of the addresses presented at the convention was by C. L. Carter, Calgary, secretary-treasurer the Canadian Credit Men's Trust Association, Alberta Division, on "Credit—Its use and abuse." It is given almost in its entirety as follows:—

"In all cases credit should represent positive values, and should be at most a very limited anticipation of those values, or, to simplify this statement, a merchant should be reasonably certain that his customer is or would be financially responsible for a much larger sum than the amount of credit extended.

"Credit always implies the confidence of the creditor in the debtor, and a "Credit System" is one of general confidence of people in each other's honesty, solvency and resources.

"By means of a credit system a comparatively small sum of money can be used as the basis of a number of different transactions, but it is indispensable for every good system of credit that money must be instantly available when required, and this principle applies to every species of transaction where postponed payment is concerned. Nations, banks, mercantile houses great and small, the retail merchant and the consumer must conform to this law of finance, and when it is broken confusion arises immediately.

"While, as I have said said, the principles of credit remain unchanged, conditions regarding same have gone through a process of evolution which renders the methods of the credit of the day entirely different from those in use even thirty or forty years ago.

The Man Who Comes and Goes.

"In every comparatively new territory there are a certain number of irresponsible and frequently dishonest merchants who spring into business as mushrooms grow up in the night, a menace to the wholesaler and the legitimate retailer alike, and who just as quickly vanish, (and in many cases their merchandise vanishes with them). It is to combat propositions of this kind that the present modern methods of credit have been evolved. This does not mean in any way that credit has been restricted, but by systematizing its conduct it is now more intelligently dispensed, and by eliminating the unworthy customer, the wholesaler is in a better position than ever before to contribute to the requirements of those who merit his confidence.

"By this procedure the wholesaler not only protects himself by minimizing his losses through bad debts, but he also upholds and maintains the interests of the reputable hard-working merchant who suffers just as directly and just as severely from the depredations of these mercantile pirates, who do not care whom they injure in carrying on their fraudulent transactions.

"There are certain qualifications in his customer which the wholesaler has a right to expect, and there is a certain protection which he has a right to demand. Among the qualifications are character, or honesty, ability, and capital. The first is easily the most necessary of all, the second is essential, the third very desirable, but given the first two, honesty and ability, the merchant will prove a much more satisfactory customer than, if possessing ability and capital, his business methods are yet not above criticism. I do not imply that the latter is an unsafe customer—tangible assets are always an important factor as a basis for credit—but I do mean that no wholesale house can have absolute confidence in a merchant, however well-to-do, if his reputation for fair dealing is questionable.

Need of Adequate Insurance.

"I have said that there is a protection which the wholesaler has a right to demand. His goods should be properly housed, properly cared for, and if credited out in turn, the utmost care should be taken to see that these credits are directed in the safest possible channels. I need not lay emphasis on the necessity of adequate protection from loss by fire. Every facility is offered the present-day merchant in securing insurance

in reputable companies and every business man owes it to his creditors (if he has any)—to himself and to his family in any case—to make ample provision along this line against the possible destruction of his merchandise and buildings by a devastating fire. I am not here to talk insurance but I would like to say while on this subject that too much care cannot be exercised in the selection of the insurance companies and in seeing that policies are correctly written.

"Business experience is also a good asset for the prospective customer, but I have not considered this absolutely necessary. Many merchants with years of experience behind them have failed most disastrously, and many with the most superficial training have been entirely successful. In checking carefully the causes of failure in a number of insolvent concerns which have come under my personal notice, I find the great majority of these were due to lack of business ability. Under this heading I include over-buying, injudicious selection of stock, over-crediting, and inability to compete with more alert and better trained opposition. Want of capital was of course also contributory, but I do not hesitate to say that the result while perhaps postponed would inevitably have been the same.

Fraudulent Cases Few.

"Dishonesty was apparent in a few instances, but I think it is only fair to say that in most of these deplorable cases the fraudulent features did not appear to have been premeditated, and only developed when other conditions made the situation hopeless.

"And now after the wholesaler or his credit man has satisfied himself that the customer is worthy of credit, and shipped the goods, the question of payment comes. It is customary for purposes of convenience to pass drafts for the amounts due according to terms of the sale. This procedure has a double advantage. It gives the wholesaler the use of the amount involved immediately, enabling him to meet his own obligations, and it also permits the purchaser to provide for the payment by simply depositing the amount in his home bank, and thereby saves him the trouble of remitting. This banking arrangement is merely one of the many illustrations of the advantages of a credit system in the commercial world. These drafts are accepted by the customer in due course, (or at least they should be if correct, and in accordance with terms arranged) and are supposed to be paid at maturity. It may be unnecessary for me to remind you of the advisability of checking all invoices and statements very carefully, as even wholesalers make mistakes occasionally, and it is wise to assure yourself that your accounts are accurate.

No Trouble to Get the Money.

"I remember reading one time of an instance where a good customer of a wholesale concern being in town called at the office of these people, and purchased an expensive saddle. The salesman recognized the man as a favored customer, but after he had left, taking his purchase with him, the clerk discovered to his dismay that he did not remember the name of the customer. He accordingly went to the manager in his predicament and after some consultation the manager said "Get a list of forty or fifty of our best customers from the accountant, charge the saddle to each of them, and those who did not get it will kick. The man who did will pay for it.'

"A month or so afterward, the incident recurring to him, the manager went to the salesman, and asked, 'Well, John, how did you make out in that saddle transaction?' 'Fine, sir, fine!' said John. 'Forty-one customers have paid for it to date, and only two have written in to say they have not received the saddle.'

"I cannot vouch for the truth of the story, but am sure in any case that it could not have happened in Alberta.

Many Drafts Returned.

"To return to the drafts; I have stated these drafts are supposed to be paid at maturity, but as a rule a comparatively large proportion of them is returned to the drawer. This proportion varies according to the financial conditions existent in the territory in which the transactions occur. The fact that his drafts are not met promptly does not by any means indicate that the merchant's affairs are in an unsatisfactory condition.

"Many circumstances may contribute to the situation — business depression, unseasonable weather, strikes, inability to realize on his accounts. These or other causes all have their influences, and in many cases it is unavoidable. But I want to point out, and I cannot emphasize this too strongly, that while the wholesaler makes every allowance for the customer who is unable to pay or pay in full, and is always ready to afford reasonable assistance on these occasions, there is absolutely no excuse for the merchant who persistently ignores his maturing paper, without even taking the trouble to advise his creditors of his inability to meet these obligations. Wholesalers have their own troubles and nothing can be more discouraging than to have a sheaf of drafts presented every morning with the notation 'No response to notice' marked by the bank thereon.

"One would almost imagine from the indifference with which some merchants treat their obligations that the wholesale houses had unlimited capital at their command and the return of a few thousand dollars' worth of paper an hour or so before the bank closes were a mere item in the day's work. This is far from the truth as the wholesaler has thousands to provide for where the retailer has hundreds, and this unbusiness-like treatment of drafts is not only therefore a serious inconvenience to the creditor, but it also shakes his confidence in the debtor whose affairs are conducted in so loose a manner.

"On the other hand when a merchant finds himself unable to meet a maturing bill, or is only in a position to pay part of same, how easy for him to sit down a few days before the due date of his obligation and manfully write his creditor to his effect, stating briefly the cause of his embarrassment, and it is a rare instance indeed when the necessary assistance is not promptly forthcoming. Note the different aspect of the whole situation—the debtor has done the best he could under the circumstances—the creditor is in a position to make ample provision for the returning paper, and what is perhaps more important, his confidence is strengthened in the customer who has shown conclusively that he is conducting his affairs in a proper and business-like manner. The merchant who does not do this is not only a source of annoyance, and frequently, loss to his suppliers, but he is also a detriment to the interests of his fellow merchants, and the sooner he is out of business the better.

Knowing Where One Is At.

"It is perhaps unnecessary for me to refer to the importance of the financial statement in establishing a credit. It is not only a question of the creditor having full knowledge of the business affairs of his customer, but it is also a question of the customer knowing exactly his own position at all times, in order that he may intelligently carry on his transactions. Too much care cannot be exercised in preparing these statements. Due allowance must be made for depreciation, shrinkage, bad debts, and the hundred and one details that encroach on the profits of a business. Even if he errs on the conservative side, it is much better for a man to be better off than he thinks he is than to think he is better off than a closer investigation of his affairs would warrant. In the latter case he is apt to make undue drafts on his business, and this in the end frequently leads to disaster. In analyzing his financial statement as a basis for future expenditures, due consideration must be given by the merchant to his volume of business as compared with his operating expenses. Assets will quickly disappear

(Continued on page 58.)

Modern Equipment to Facilitate Merchandising

The Hardware Store of C. T. Laird, Regina, Possesses Many Model Features—One of the Predominating Features is the Excellent Manner in Which Goods Are Displayed.

By Norman A. Ruse, Publicity Commissioner, Regina.

A HARDWARE store with an economical arrangement and an exceptionally good display space is that of C. T. Laird, of Regina, Saskatchewan. The store is of the dimensions of 25 ft. by 112 ft., and silent salesmen line each side for almost the entire length of the store. These cases also do duty as counters. At the rear of the store is an elevated office from which Mr. Laird has an unobstructed view of all parts of the store, and the workrooms at the rear.

Mr. Laird went West in 1900, and for the first five years conducted a business in Indian Head. He then decided to seek a larger field, and settled in Regina. His first store in Regina was at 2118 Eleventh avenue. His trade grew, and an addition to his selling space was required. A disastrous fire caused a setback to his business for a time, but he rebuilt his store and put in a new stock. He continued business at this stand until 1913, when he leased a three-storey block on Hamilton street, Regina—one of the main thoroughfares. Half of the ground space he re-leased to a restaurant, and the two upper storeys are rented as business offices.

His present store is well arranged, and is said to have every convenience known to the hardware trade to facilitate rapid and easy merchandising. Wall fittings and shelving, sample glass front drawers —a battery of self-measuring oil pumps with a gasoline auto filling station on the street in front of the store, are all attached. Five silent salesmen and glass walled cases add materially to the appearance and convenience of the store.

Recently, Mr. Laird decided on a new departure and appointed Mr. Humphries, an eastern hardware man with wide experience, as store manager.

Mr. Laird is a great believer in advertising, and always endeavors to pull off something original. In this way his advertisements attract more than passing attention.

Hardwaremen will be particularly interested in the manner in which all lines are displayed. An exceptionally large space is devoted to household goods, and as shown in the photograph, a large stock of enamelware, tinware, aluminumware, japanned ware, etc., is carried. In this department silent salesmen are used to display cut glass, coffee percolators, tea sets, trays, electrical appliances, etc.

The tool department is also sampled attractively, and mechanics visiting the store can see at a glance a large range of tools, neatly sampled. The shelving extends to the ceiling and the upper shelves are accessible by means of sliding ladders. That Mr. Laird believes in modern equipment as a means of facilitating merchandising is evidenced by the splendid equipment shown in the accompanying illustration.

HARDWARE AND METAL

VOL. XXVI. No. 19 Toronto, Canada, May 9, 1914 Two Dollars per Year

Watch Your Credits

AT this season of the year, and, particularly during the present year, the retail hardwareman should watch credits closely. Many people in purchasing spring supplies are inclined to overbuy and will purchase more than they can conveniently pay for. It is therefore important that if at all possible, a settlement should be made at the time of sale. In extending credit to customers it is a good plan to have an understanding as to the length of time the account is to be allowed to run, also as to the amount of credit to be extended. There is no good reason why a retail hardware merchant should be compelled to wait for 2 or 3 years or longer for the settlement of an account—and yet you find such a condition existing in many instances. The retailer should adopt a set rule for credit accounts, and stick to it. The manufacturers and jobbers have specific terms of sale.

The terms are definitely stated in every quotation and on every invoice. The jobber or manufacturer does not consider it discourteous; nor does he hesitate to demand payment at maturity. Compliance with terms is expected and no time is, or should be lost in inviting attention to delinquencies. What about the retailers? In some cases a strictly cash business is carried on. Others demand settlement every 30 days and still others—and many of them—have no set rules. In some cases the terms are "payable at your convenience." Some customers adopt the slogan: "Let the hardwareman wait," and the result is that the hardwareman is often making excuses to the manufacturers and jobbers, for slowness in meeting payments. The retailer is not permitted to overlook that he is expected to comply with terms—why should the customers of the retailer be allowed to do so? It is claimed that the great diversity of resource and occupation makes it almost impossible to fix retail terms as uniform and general as can be done by jobbers and manufacturers but this does not justify the prevalent neglect in fixing terms in retail credits. On the contrary this very diversity makes all the more necessary that terms be specifically agreed on with every credit customer. A credit manager in speaking on the subject said recently:

"The terms in each case should be made to fit the condition and resource of that customer; or, if the requirements of the customer cannot be logically met, the credit should be declined. The terms agreed on should be specific; and payments, not voluntarily made as agreed, should be asked for, and, if necessary, insisted upon. Weekly accounts should have weekly attention; monthly accounts, monthly attention. Accounts, running longer than a month, unless closed by note, should be kept before the debtor by monthly statements, each statement showing prominently the maturity date.

"The developing and enforcement of such system does not preclude consideration and even latitude in cases where conditions have changed through unforeseen reasons, so that a customer is unable to fulfil his agreement."

The Business Situation

THE advent of warmer weather has stimulated business in many lines pertaining to the hardware trade and retailers are finding a ready sale for many lines of spring goods. With continued fine weather prevailing, the trade should be very busy for the next few weeks. While it cannot be said that business is booming, a very fair volume is passing, and considering general conditions since the first of the year, the hardware trade has little room for complaint. Hardware jobbers have been busy since the first of the month. The metal markets are still quiet and buyers are cautious. The paint season for the retailer is just starting and from now on there will be a steady demand for painting materials. In some centres much additional business is being secured through the boosting of the "Clean up and Paint up" movement. Stove manufacturers report business as only being fair, although there is a good demand for gas ranges, summer stoves, etc. Credits are being closely watched, and collections generally are fair.

An extract from a recent issue of Financial Post says:

"In the meantime manufacturers and jobbers generally are exercising the utmost care with respect to the giving of credit and do not manifest any particular anxiety to make sales except to buyers in an unquestionable position.

"It will be noted that in the West bank clearings continue to contract abnormally. During the last week in April the contraction was over 20 per cent., and for the entire month was equal to that figure. In the East the contraction is not quite so marked. It is felt, however, that Eastern Canada is beginning to feel more acutely the continued depression in the West. As we have indicated, the inclination of the West to mixed farming and the already larger shipments of livestock ought very soon to improve the outlook there. Bankers are extremely hopeful as they have reason to be by the marked improvement in their own position during the past three months."

A Strong Indictment of Price-Cutting

IN another part of this issue appears an article on price maintenance, which is perhaps the strongest presentation of the case against price-cutting that has yet been seen. It shows conclusively the inevitable consequences of retail price-cutting. When a retail merchant starts to cut an established price he just hurts himself, then his competitors and finally the manufacturer and the public. Everyone suffers. The price-cutter leaves a trail of blasted profits and vanished service in his wake.

The article is well worth reading. Written from one standpoint only—cutting established prices—it nevertheless serves as a sweeping denunciation of price-cutting in every phase. It presents the matter in what, to many, will be a new light.

The Mail Order Menace

ELSEWHERE in this issue an announcement is made regarding the incorporation of a new mail order house which it is said will have headquarters in Winnipeg. The new firm is capitalized at $1,000,000.

Every time a new mail order concern starts business in Canada it means extra loss of business to merchants in the small towns, for they are affected most. The mail order houses to-day are doing more damage to the small towns and small town merchants than anything else. The mail order houses are splendidly organized and the pendulum is at present swinging with them. Many of the people in the small towns do not realize the necessity for loyalty to their home industries. In some cases the retail merchants are themselves to blame to some extent on account of their lax and unaggressive methods. In other cases there are merchants who are making splendid fights against the inroads of mail order houses, but even by adopting aggressive methods and endeavoring to hold the trade at home, they stand to lose a large volume of local trade. The business of some mail order houses has reached alarming proportions. In the city of Chicago there are two mail order houses that did over $164,000,000 business last year. Another mail order house organized three years ago has grown at a wonderful rate and the annual turnover has reached several millions of dollars. American small town retailers are feeling the effects of mail order competition to a greater extent than Canadian merchants. Canadian mail order houses have been aggressive and the volume of business they annually secure from small towns in Canada, runs close to the $100,000,000 mark. The advent of another mail order house means that in addition to the new firm in the field the older houses will be even more aggressive than they have been in the past. In the United States a national society is being formed to help the country merchants. The organization will be called the Home Town Organization of America. The purpose of the organization is to bring more business to the country merchant.

In creating the organization the members claim no altruistic motive but solely the purpose to help the country merchant adopt more modern methods so that he may sell more goods, put up a stronger competition against the mail order houses, and so become a larger purchaser from the wholesaler and jobbers.

The Home Town association makes an appeal to the country merchant to advertise, hustle, hold and build up his trade. Further than that it appeals to the farmers and local public spirit to trade at home and thereby help to build up the home country town. The local towns and the local merchants are of inestimable value to the farmers, but without the patronage of the latter the former cannot expect to prosper to any large degree. Home Town organizations should be started in every town in Canada, and the retail merchant should be at the back of the organizations.

THE WESTERN EDITOR of Hardware and Metal writing on the train from Saskatoon to Edmonton states that conditions in the smaller towns such as Yorkton, Humboldt, Wilkie, Wadena and others of similar size have been adversely affected but little by the trade depression. This, he says, is due to the fact that the people were not caught with large real estate holdings when the slump

Making a Strong Plea for Price Maintenance

One Price in All Stores at One Time—An Article Dealing With Uniform Standardized Products on Which the Manufacturer Has Tried to Name a Uniform Price.

By William Hard, in Everybody's Magazine.

KOLYNOS Tooth-Paste, and Kellogg's Corn Flakes, and the Ingersoll Watch, and Cheney's "Shower-Proof Foulards," and hundreds of other well-known and widely-wanted products are so well known and so widely wanted that various retailers every now and then make up their minds to do their best not to sell them at all.

Why? They are being cut-priced in the retail market. They are "leaders." They are too prominent. Their names are too famous. They have climbed too high. Down with them, under the counter; or, better, if possible, out with them through the door!

The more readily the public purchases them at such times, the more reluctantly the retailers handle them.

Sounds like a madhouse. Is a madhouse. And getting madder every day, ever since the Supreme Court of the United States wandered into it.

The Ultimate Consumer rejoices, and smells the Bargain Sale afar off, and gambols like a young goat upon the mountains. He reads the cut-price advertisements in the papers, speeds to the madhouse, buys a few "leaders" and "bargains" and a great many other things that are not leaders and not bargains, and then goes his way highly pleased with himself—and crazier than any of the patients.

This article is written to give him—and her—a glimpse at the interior decorations of the Bargain Scheme of Selling Standard Products—and at what it does to the production and distribution of good goods.

Cheney's "Shower-Proof Foulards," for instance.

A friend of the people in Boston prominently advertised his determination to sell Cheney's "Shower-Proof Foulards" across the silk counter of his store at a big cut from the regular price. Competitors of his, owners of other retail establishments, took a look at his advertisements, buzzed in haste for stenographers, and began dictating advertisements in reply.

Within a few days, cut impinging on cut, Cheney's "Shower-Proof Foulards" were being sold in Boston at as low as fifty-seven cents a yard.

There was just one disadvantage to the retailer in continuing to sell these goods at that price. He had to pay a higher price himself to the manufacturers. He had to take sixty cents of his own money and hand it to Cheney Brothers, silk manufacturers, in order to get a yard of their "Shower-Proof Foulards" to pass on to the public at fifty-seven cents.

As often as he passed it on, he lost three cents plus a good many more cents representing his rent and his salaries and the rest of his cost of doing business.

It was time to ring for ice-water and a few padded cells.

So then, right then, the punishment of Cheney Brothers began. They were utterly and shiningly innocent. They hadn't started this cut-price trouble. They had objected to it, clamorously. It wasn't their crime at all. But they were punished for it just the same.

For, right then, various retailers in Boston began to be aweary of Cheney's "Shower-Proof Foulards." They began to think scorn and disgust for the behavior of an article which had gone and got itself beaten down below the profit-level. They began to be filled with admiration and affection for the character of certain other foulards, charming foulards, on which there had been no such bargain advertising, on which the public had not yet been led to expect an unreasonably low price, and on which a profit could still be made.

That season, in Boston, the sales of Cheney's "Shower-Proof Foulards" fell off from their customary total by more than a third.

Something had been done to the Ultimate Consumer. The retailers, instead of giving her what she wanted to have, had been giving her what they wanted her to have.

When she went into her favorite store to buy Cheney's "Shower-Proof Faulards," they were no longer in stock. They had been sold out and no more of them had been ordered.

Or else, more usually, though they were still in stock, they were occupying the background and obscurity, while other foulards were occupying the foreground and the conversation of the salespersons.

The result, as the sales-record proves, was that thousands of persons who had customarily bought Cheney's "Shower-Proof Foulards" were induced that season to buy other foulards instead. They went in to get one thing. They came out with another. Their access to the one thing they knew they wanted had been narrowed, and it had also been planted with diverting hedges and mazed with alluring by-paths leading towards other things, substitutes.

I do not say that the substitutes were not just as good. Their goodness is not here the point.

The point is the substitution itself. If you really want foulard A and get foulard B, foulard B is a substitute.

And here we come to the seeds in the core of retail merchandising.

The Ultimate Consumer has a right to expect that her retailer shall exercise an impartial judgment in her behalf with regard to those two foulards. But it is preposterous to think that he will do so when Price-Cutting has taken the retail profit out of foulard A. "On the whole" and "in the long run" and "by and large" and "taking one consideration with another," the mass of retailers will "push"—successfully—the wares on which the retail profit still exists, and they will "knock"—successfully—the wares on which the retail profit has been destroyed.

That is not good for the public. It is very bad. And it is especially and particularly bad when you go on to the next point in it.

What had Cheney Brothers done to deserve that extremely painful contraction of their sales in Boston?

They had succeeded, as various other textile manufacturer have succeeded, in giving their products a good name. That's what they have done. They had spent some eighty years making the name Cheney mean something, and something right, on bolts of silk. That's the fault they had committed.

That was why the friend of the people made such a stir in the pocketbook of the Ultimate Consumer when he announced that he would cut a Cheney product. That was why competitors felt obliged to meet his cut and go under

"Price-Cutting," as spoken of in this article, has nothing to do with potatoes or spring hats or any other commodity subject to fluctuating prices and closing-out sales. It has only to do with Uniform Standardized Products on which the manufacturer has tried to name a Uniform Standard Price.

When you see a lot of cut prices on standard products, remember you are seeing in most cases an injury to the manufacturers of those products an injury to true competition, and a final injury to the buying public.

it. That was why the sale went on and on to its disastrous finish.

So now you see how to do it. Make a product. Make an individual product. Remember that. Individualize it. Put personality into it. Make it different from other products. Give it a name to be known by. Make that name known favorably. The public wants your product. It becomes famous. Then the Price-Cutting will begin. Then the destruction of the retail profit will begin. Then the unwillingness of the mass of retailers to "push" your product will begin. Then their eagerness to sell substitutes for your products will begin. Then the contraction of your sales will begin. And you will be punished for having made a uniform, standard, individualized, named and known product.

But that is precisely the kind of product which is the peak of modern manufacture and which the Ultimate Consumer most wants.

The Fate of Cosmo Buttermilk Soap.

See, then, the contending forces:

On the one side, Price-Cutting and Substitution, fortified by certain recent decisions of the Supreme Court. On the other side, the growth of Individuality in Manufacture and, along with it, the One-Price System.

It is the manufacturer of the individualized product who has tried to say to the retailer: "One Price—to All Consumers at All Times!"

He is driven to this policy. He remembers what happened to Cosmo Buttermilk Soap.

It was a famous soap in its day. Its regular price, retail, was ten cents. That was the price at which the manufacturers asked the retailers to retail it. Asked.

At this point some of the members of the Judiciary Committee of the House of Representatives begin to fear with a great fear.

There is a bill in Congress saying that the manufacturer may bind the retailer to retail his product at a settled price, at one price, with no price-cutting tolerated. This bill was introduced by Mr. Stevens of New Hampshire.

Many Congressmen are troubled, sincerely troubled. If the Stevens bill were passed, what would prevent the manufacturers of Cosmo Buttermilk Soap from binding the retailer to retail their soap at twenty cents—or at a dollar? And then think how the public would be plundered!

The poor innocent manufacturers of Cosmo Buttermilk Soap! They didn't know that the game of business was so easy. They were in it. They would have liked well enough to sell their soap at a dollar or at ten dollars. But they couldn't. And the reason why they couldn't was so simple and so annoying. Their cruel competitors wouldn't let them.

The world seethes with the suds of the soaps of competing soap-manufacturers. The manufacturers of Cosmo Buttermilk Soap had to get down into that competition and swim. They swam. They compared their soap with the other soaps, the countless other soaps, already on the market. They decided it could hold its own in the ten-cent class. They risked their money on their guess, and offered it at ten cents. And they won. They won by verdict of the public itself.

The public bought Cosmo Buttermilk Soap at ten cents, compared it on its own account with other ten-cent soaps, decided that it was a good soap at the price, and then came back and bought it again—and again.

Cosmo Buttermilk Soap became prosperous, competitively; and its name, its trade-mark, became valuable—so much so that its owners were offered more than a quarter of a million dollars for it, and declined.

But there was a danger. The danger was in having any name at all. The danger was in being individualized.

Let me shift for just a moment from soap to coffee.

Here's a coffee quite nameless, lying in a bin. Well, you can't hurt it, no matter what price you sell it at. And the Ultimate Consumer does actually buy it at thirty-eight cents and goes her way still highly pleased with herself. She doesn't know that it also sells at twenty-five cents a pound.

I mention thirty-eight cents and twenty-five cents out of real life. The Association for the Improvement of the Condition of the Poor in New York City has been inquiring at length into retail prices. Here's a coffee shoveled out of a bin and taken to a certain store. There it sells at thirty-eight. It is shoveled out of that same bin and taken to a certain other store, owned

by the same firm, and there it sells at twenty-five. Anonymous coffee.

And tea. Emerging from its sack, it travels to one store and sells at thirty-five cents a pound. Emerging from the same sack, it travels to another store, owned by the same firm in the same city of New York, and sells at seventy. Anonymous tea.

Happy anonymous commodities! The Ultimate Consumer buys them at one price here to-day and at another price there to-morrow, and all is as merry as an Oriental bazaar. She can't remember anything against them because she can't remember them. She looks into their blank identical faces and there's nothing to remember them by. They can be sold to her at a score of different prices and she doesn't know it.

But:

UNIVERSAL DEPARTMENT STORE

BARGAIN SALE

COSMO BUTTERMILK SOAP
NOW THREE CENTS

The Ultimate Consumer remembers that. "Cosmo Buttermilk Soap." "Three Cents." The name and the price.

Enter, then, lady into neighborhood grocery store.

Lady: "Cosmo Buttermilk Soap."
Grocer: "Ten cents."
Lady (sweetly): "Robber!"
And, exit, one lost lady-customer.

Grocer sits down and writes to Cosmo Buttermilk Soap manufacturers:

Gentlemen:

You sell me your soap, like everybody else making standard articles, at price which gives me only narrow margin for profit. And now you let Universal Department Store, this city, sell your soap for three cents. If you look for any more business from me you will be looking longer than I will live. Please cancel the order I sent you yesterday. Everybody told me you was a snide firm, and now I know it.

Yours respectfully,
_____.

There are millions of such letters in the files of the manufacturers of individualized products.

The price of an individualized product is as much a part of its individuality as its name. Demoralize the price and you demoralize the product.

A Forest-Fire in Soap.

In Reading, Pennsylvania, there were ninety retailers handling Cosmo Buttermilk Soap. It wasn't a cut-price war. It was a mob massacre of a defenseless commodity. The price was trampled down to three cents and kept there, an advertisement for the retailers who were doing it and a quick death for Cosmo Buttermilk Soap.

Death—because, in the end, the reputation of Cosmo Buttermilk Soap was totally destroyed. All the Ultimate Consumers residing in that city got it marked down in their minds as a three-cent product. It wasn't. It couldn't be made and sold at that price. But the public couldn't be got to go above that price again. Whereupon, its reputation having gone, its value as an advertisement for the retailers went too. As for the retail profit on it, that had gone long ago. There was nothing left in it. And eighty of the ninety retailers threw it out of their stores.

Reading was imitated by city after city. It was no longer a local massacre. It was a forest-fire, catching and spreading. The firm which was manufacturing Cosmo Buttermilk Soap was not old enough or strong enough to make any effective resistance. Within two years virtually the whole of its area of distribution had been burned over and left bare.

A young firm, a new product, a competitive price, the public pleased. Just the kind of thing that must be fostered forever in order that industrial and commercial progress may never cease among us. Slaughtered—by the firm's own distributers—over whom it had no control!

Cosmo Buttermilk Soap was revived—a bit. But it has never come back to as large a sale in a month as it used to have in a morning.

How can it said to be good for the public to be blocked off like that from a product it had proved it wanted?

It was an extreme case. It was extreme in the completeness of its finish. It was not extreme in any other way. There is not a community in the United States this moment in which the sales of well-known and widely wanted products are not being contracted by Price-Cutting.

This Price-Cutting may be done by local stores or it may be done by distant mail-order houses. The result is the same. The same old result. Retail profit in those products diminished or destroyed. Angry retailers. Fresh drummer who comes into retail stores and says to retailer: "Now here's a product your customers don't know much about. But push it. There's a big retail profit in it for you." Substitutes. And the distributing channels through which the well-known and widely-wanted products must reach the public are artificially clogged and choked.

Mr. Babbitt—He Did It.

It should all be blamed on great and courageous innovators like Mr. Babbitt.

Mr. Babbitt saw soap, simply soap, long bars of anonymous soap, being sawed into chunks by retailers. You took your chunk home and if it didn't behave well in the water, you blamed the retailer for carrying poor soap. You went to another retailer. But there you perhaps got the same soap. You couldn't tell. There was no name on it.

Mr. Babbitt saw his chance. He sawed his soap into chunks in his own factory and wrapped each chunk in a piece of paper and put his name on the paper. But it was a chance, this chance he took. For if you didn't like Mr. Babbitt's soap, you could spot it by its name instantly in every other retail establishment in the world. And you never bought it again.

Mr. Babbitt, and men like him in hundreds of other lines of business, went straight over the heads of the wholesaler and the retailer to the people. They conducted referendums. The people voted directly on their products.

For these products, therefore, these men changed the whole nature of merchandising. If the vote of the people was unfavorable, it didn't hit the retailer so very hard. It went back full-force all the way to where the soap started, and hit the manufacturer. On the other hand, if the vote was favorable, if the people liked the soap and kept on buying it, they bought it not because of the retailer but because of the name, because of the manufacturer.

It was a commercial revolution. In came an era of fiercer competition than had ever before existed between manufacturers.

Competition—In the Factories.

The manufacturers of named and known products—in hardware, in jewelry, in clothes, in toilet articles, in furniture, in plumbing, in everything—couldn't save themselves by intrigues with the wholesaler and retailer. They couldn't trust to mere "pull" and "secret arrangements" for the "pushing" of their wares in wholesale and retail establishments. Their wares had names. They were out in the open, competing with all other similar wares, face to face, glovelessly, for the verdict of the public ieself, each manufacturer standing or falling by what the public itself finally said.

That era is the era we now live in. True competition to-day in the price of named and known articles is not in the retail stores at all. It is in the factories. And it glows and flames there with a fire hotter than was ever before kindled in the modern industrial world. It is the most competitive competition ever invented.

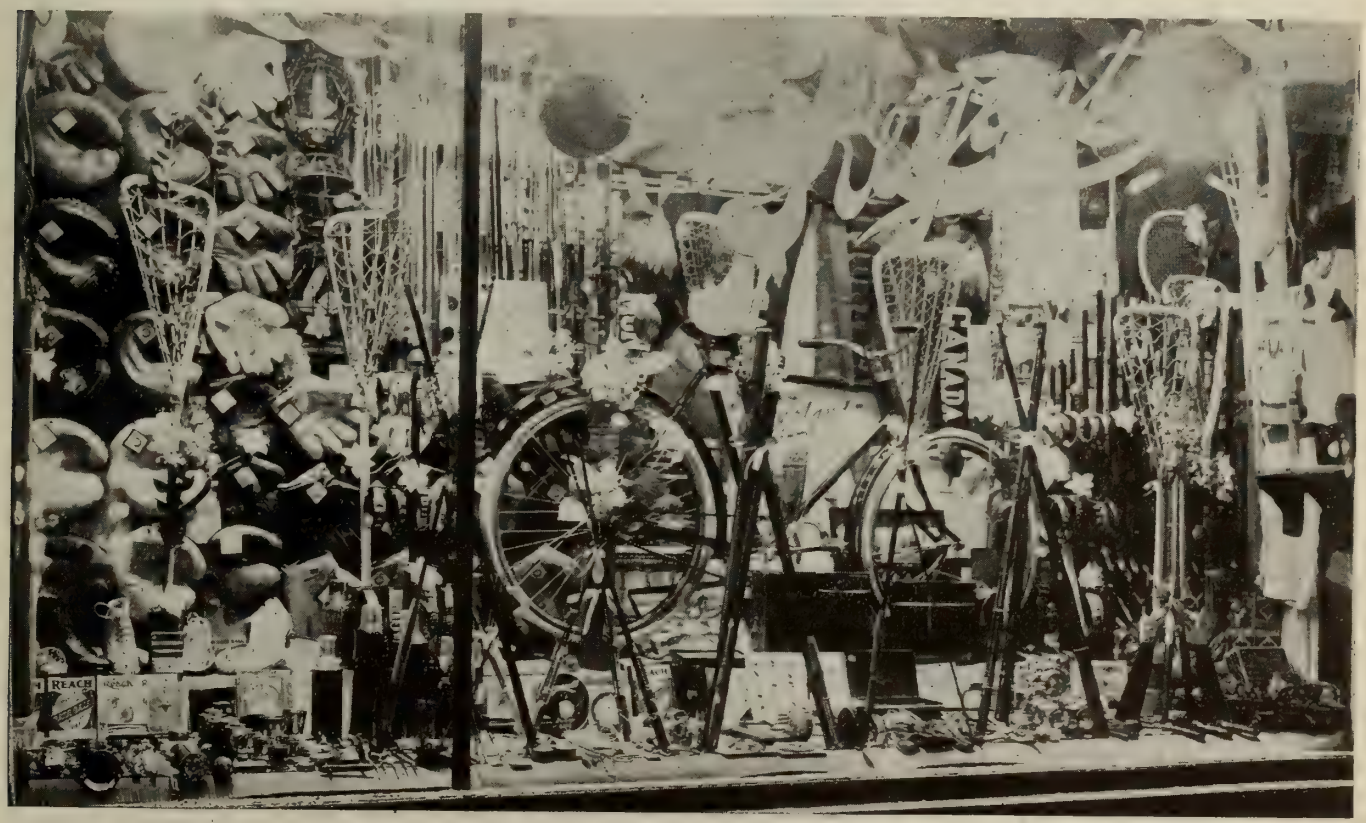
And it is dashed and quenched by Price-Cutting.

(Continued in next issue.)

Featuring Sporting Goods in the Show Window

Hardware and Metal Representative Impressed With Timely Display in Show Window of A. E. Bregent, Montreal — Store Attractively Laid Out.

MONTREAL, April 24, 1914.—"In the spring a young man's fancy lightly turns to thoughts of—" sport. On the corner lot, the public playground, or any old place the small boy, and bigger boys, too, are out with baseball outfits, and every male being with red blood in his veins is thinking about sport—of baseball, tennis, canoeing, fishing, hunting or something of the kind. It is the harvest time for the hardware dealer. It is the time to feature sporting goods and to get the people thinking about "your store" as the place in which to get what they want.



Walking along St. Catherine Street, in Montreal, a few days ago, a representative of Hardware and Metal was impressed with a very timely and comprehensive display in the window of A. E. Bregent, a specialist in sporting goods. While simplicity is often preached for window trimming there are occasions when a great mass of goods can be utilized to good advantage, and this window seemed to offer a good example of it. Certainly there was lots in it, but the display was tastefully arranged, and when one came to look over it and analyze it, it seemed necessary that everything should be there in order to carry out the scheme of the window trimmer—namely, that the time had come to buy spring sporting goods, and this store had everything needful. The accompanying photograph will give some idea of the general lay-out and the goods used, though, of course, a lot of the detail is lost and the color effects will have to be imagined.

The window is not deep, so that only a small amount of space was available on the floor, but the back was banked up almost to the ceiling. Among the goods shown are: a bicycle, all kinds of fishing tackle and accessories, baseball, football, lacrosse, cricket and tennis outfits, hunting goods, dog collars, electric lamps, roller skates, etc. They were all seasonable goods and the showing could not fail to impress the passer-by. An inquiry of Mr. Bregent elicited the information that the display was "pulling" business.

Although Mr. Bregent's store is not large—it is about 25 feet frontage and about 60 feet in depth, not counting a stock-room and office at the rear—it is attractively laid out. High wall cases with glass-front sliding doors occupy the right side of the store. In these are shown guns, tennis rackets, fishing rods, etc., in specially-designed racks. Silent salesmen show cases are utilized to show off small goods, such as fishing tackle, cutlery, hunters' supplies, sweater coats, gauntlets and running shoes, etc. Ammunition is all stocked neatly in special compartments at the rear of the store, and along the left-hand side is a showing of athletic goods in neat array.

The display as arranged at present is, of course, changed considerably for fall and winter, the summer goods giving way to hockey and skating equipment and other seasonable lines.

Mr. Bregent gives special attention to supplying outfits for baseball clubs and other organized bodies, and during the height of the season has a department for making uniforms to order. He is finding it a profitable business to specialize on this one department.

Display of sporting goods by "Bregent," Montreal.

"Clean Up and Paint Up" Campaigns in Full Swing

Saskatoon, Calgary and Winnipeg Campaigns Have Stirred Up a Wonderful Interest in the Movement—Extracts From Daily Newspapers.

CLEAN-UP and paint-up campaigns are now being carried on in several Canadian towns and cities. Among the principal cities where active campaigns are being carried on are Montreal, Winnipeg, Calgary, Sherbrooke, Hamilton, Saskatoon, Regina, London, Brantford, and many other places. Many hundreds of editorials have recently appeared in Canadian daily and weekly newspapers urging merchants and citizens to do their share in boosting "clean-up and paint-up" movements. In some places campaigns have been taken up in earnest, and much good will result. In other places only a lukewarm interest has been created, but even the stirring up of a lukewarm interest this year means that a still greater interest will be taken next year.

The "clean-up and paint-up" movement will assume greater proportions next year. The city of Toronto has not taken up the movement this year, but plans are already being made for a campaign to be launched early next year. A few extracts from recent issues of daily papers are here appended:—

Winnipeg.

The Manitoba Free Press, Winnipeg, May 2, in featuring the "clean-up and paint-up" campaign, said in part:—

"From almost every point of vantage along the front of the Industrial Bureau fly 24-foot signs, painted in big lettering, 'Clean-up; paint-up.'

"The signs are the forerunners of what the people of Winnipeg are expected to do throughout next week, with the result that the sun when it rises on the morning of Sunday, May 10, will shine on a brighter, cleaner and, therefore, healthier city.

"With a big free moving picture show in the lecture hall of the Bureau this evening, the clean-up week will be inaugurated to pitch in and do some hard and likewise good work during the six working days of next week.

"A voluminous amount of literature has gone out from the Industrial Bureau, for the Bureau will be the centre of next week's activities, and, indeed, is the foster-father of the whole clean-up movement.

"Over 50,000 pieces of literature have been distributed about the city, a large number of pamphlets and circulars going to the pupils of the public schools, a greater number to the housewives of the city through the co-operation of the creamery and bakery companies, and a lot more to the manufacturers and business men. In all of them the people were importuned to do their part in cleaning up the back yards, the front yards, the houses and the buildings of Winnipeg.

"It is impossible to estimate the amount of paint which will be used during the coming week within the limits of the city. It has been predicted by one contractor that practically every painter in the city will be busy next week, and, besides the professionals, there will be scores of amateurs engaged in painting shutters, barns and even whitewashing fences. Winnipeggers have taken hold of the clean-up idea with a vengeance, and the forecast is that everybody will be more or less busy in cleaning up the inside and outside of his or her respective home. There is a great deal to do."

Calgary, Alta.

The Calgary Daily Herald of April 29, in a full-page article featuring the "Clean-up and paint-up" movement, said in part: "Never before in the history of this city has a 'clean-up' campaign been greeted with such enthusiasm as the one which starts on Monday. Not only have the civic fathers indorsed the campaign, but householders are already at work in all parts of the city. Any person with leisure and willing to take a trip even to its farthest outskirts may see evidence that the people of Calgary are earnestly taking up the work so necessary if Calgary is to retain its reputation of 'best in the West.'"

Full page ad. by Saskatoon firm during Clean Up and Paint Up week.

In this one issue of the above paper twenty-three "clean-up and paint-up" advertisements appeared.

Saskatoon.

The Saskatoon Phoenix on the first day of the "Clean-up and paint-up" movement at Saskatoon said: "To-day is the first day of the 'Clean-up' week, and with the start which the work has had, there does not seem to be much doubt but that Saskatoon by the time the 'clean-up' week is over will justly merit the name of 'Spotless Town' which the health department has set out to give it."

THE SPIRIT OF "CLEAN UP AND PAINT UP."

IN a tenement district lived a family surrounded by filth and dirt. The whole atmosphere of the little room which they called "home" was one of hopeless depression and squalor. To prove the power of suggestion, a good woman placed on the table a miniature statue of the Venus of Milo. Against this grimy background of dirt and wretchedness, the Venus shone out in all her whiteness and purity, elevating and brightening her strange surroundings. The good woman called a week later and found that the place had been cleaned up, the dirt had been washed away and a pathetic but sincere attempt at decoration had been made—the subtle influence was effective.

If the homes in a neighborhood become weather-beaten and shabby, values in the whole neighborhood deteriorate. But if some house-owner paints and brightens up his home, it radiates its attractiveness in every direction and soon the whole neighborhood is made bright and attractive.

Make yourselves Missionaries of the Gospel of Good Paint—of Brightness and Thrift.

Brantford.

Brantford, May 4.—Don't forget the Brantford "clean-up" campaign starts on Wednesday. It will be brief and complete when his Royal Highness the Duke of Connaught arrives in the city. He will arrive in the cleanest city in Canada. By official proclamation of the Mayor, three days this week will be given over to civic house-cleaning. The programme is as follows:—

A few clippings from newspapers featuring the "Clean Up and Paint Up" Campaign.

Wednesday—Cellar and garret day; get the refuse all piled together and get rid of it. Thursday—Yard day. Friday—Paint-up and children's day.

Moose Jaw.

Moose Jaw, April 30.—The time is drawing close for the commencement of Moose Jaw's "clean-up and paint-up" campaign. Starting on Sunday, the whole week will be devoted to cleaning up all rubbish and doing away with all unsightly spots in the city. In view of the near approach of this, the municipal committee of the Board of Trade is hard at work perfecting the details of the whole scheme.

To have the thing started properly, and the importance of it brought forcibly to the people of Moose Jaw, letters have been sent to all the clergymen in the city asking them to devote part of their services on Sunday to the subject of the "clean-up" campaign. This has been successfully done in other cities, and it is expected that reference to the "clean-up" week will be made from various local pulpits on Sunday.

Badges are to be printed for the boys to wear while doing patrol duty during the campaign.

Although the city council is taking no active part in the work, it has given its approval to the scheme, and will supply city teams to gather up all rubbish that may be put out for collection by the clean-up toilers.

Hamilton.

"Clean-up! Paint-up!" This is the slogan for "clean-up" campaign which the Board of Trade is promoting next week. Ward 8, the Progressives, Mount Hamilton, West End Improvement, the Ad Club, and other associations are co-operating with the fire prevention committee of the board to make the affair a success. Cards will be distributed throughout the business district indicating the districts where rubbish will be collected on different days during the week beginning on May 4. Citizens are requested to have their receptacles in readiness for the teamsters so as to facilitate the extra work required to remove the accumulations of refuse. Lessons on clean-up from a fire prevention standpoint are being forwarded to the different schools in the city with a request to the teachers that the children be instructed on the dangers of conflagration causing loss of life and property through negligence and carelessness. Thirty dollars in prizes will be awarded to the pupils writing the best composition on the value of keeping a city clean and free from the possibilities of fires. The competition is only open to scholars under sixteen years of age.

The Supervision of Credit Accounts

Supervision of Credit Accounts More Important Than a Collection System—Suggestion for Collection Card System.

By Byron J. Morrow.

THE question of collections is always one of the utmost importance to the retail merchant who does a credit business; but it is particularly important at the present juncture. Business for the past year has been so dull that many merchants have had to exercise considerable skill in the financing of their stores. The same necessity still holds. Money is not plentiful and it will be some months yet before the return swing of the pendulum, to the prosperity side, will stimulate a freer circulation of currency.

It follows that the limiting of credit lines and the closest attention to collection have become necessary. When every cent is needed to keep things moving in good order, no merchant can afford to have large sums tied up in non-collectable accounts. That way failure lies.

The giving of credit requires perhaps more care and thought than any other branch of the ordinary business. Certainly the collection of accounts causes more friction and worry than anything else. However, in a large proportion of stores the giving of credit is necessary, and it therefore becomes necessary that it should be done systematically.

My experience has been that it pays for the merchant to place the responsibility for the making of collections on his bookkeeper. This enables him to do things on a regular system, regardless of friendship and personal pressure.

Why He Could Not Collect.

I recall once making the acquaintance of a hardwareman who was doing quite a large business but who, somehow or other, did not seem to be very prosperous. I had been called in to untangle the books of his next door neighbor, a dealer in crockery and chinaware, who was a wonderfully clever salesman but a wonderfully weak business man. His books were in a fine condition when I got them and it took a week's steady application on my part, working about sixteen hours a day, before I even began to see daylight. In the meantime I had noticed the hardwareman who bobbed in and out. He and my man seemed quite chummy, drawn together by their mutual troubles, I judged. After I had put the books of the crockery business into fairly presentable shape and was beginning to educate Mr. Crockery Merchant to handle his affairs in a more systematic way, the hardwareman began to cultivate my acquaintance rather sedulously.

"I wonder if you'd have time to fix my business up the same as you've done here," he said, one day. "I've come to the conclusion that it needs something."

I was billed for another town as soon as I finished my present job so I told him that I couldn't go through his books. But in response to his urgent pressing I promised finally to give him a day and try and suggest some way that would help him to straighten things out. I found that his bookkeeper, a tidy young lady, was extremely slow but sure in direct ratio, had kept the books of the concern in reasonably good shape. The fault lay in another direction.

Would you believe it, that man was carrying $30,000 on his books! He had simply let collections go all to pot; or rather, he had stood helplessly by and watched his profits go smash on the rock of personal friendship.

That was his trouble. He was a good fellow, knew every Tom, Dick and Harry in town, an active churchman, a member of every lodge, belonged to the council, and I don't know what else. Every person in town dealt with him, especially when it was a case of credit. People did not seem afraid to ask him for credit or to keep him waiting any length of time. He was, in fact, a regular "mark."

I imagine I can see him now, a big, blonde fellow with a kindly eye, a weak mouth and no chin worth mentioning, going over his books with me in a sort of hopeless apathy and explaining why he had not pushed account after account. This one belonged to a certain lodge and had been hard up on account of investments in the West. That one was an old friend, "And, of course, I don't like to bill him," he would add. And so it went through a seemingly endless list.

At the conclusion of our examination I judged cursorily that about half the total amount was collectable.

"Your only hope is to clean up your books," I told him as I left. "With your turn-over you ought to be making a fortune but instead you're giving the profits away to all the dead-beats and credit-suckers in town. You don't need a new system of bookkeeping. What you need is a new backbone. If you don't change your methods at once, the sheriff will get you."

I have heard that the acquirement of a new backbone was too much for him and that he did not change his methods. Anyway the sheriff got him in the end.

A Practical System.

This experience and countless others along the same line, have convinced me that it generally pays to make your bookkeeper responsible for the collection of out-standing accounts. Of course it will always be necessary to supervise the work very carefully but **do not appear in the matter before your customers.** No matter how tactful a merchant

Ledger	Name	Address	Card No.
		Date	
Letters to	Promises from	Bal. of %.	
		Last Payment	
		Date of	

Suggestion for collection card.

may be, he is bound to find difficulty when it becomes necessary to exert pressure on a slow-pay customer who thinks that he knows you well enough to be allowed to pay when he likes, unless you can make the transaction appear as a part of the store system over which you have no control. When a debtor of this class appeals to you personally—and when are you free from such appeals?—you are then in a position to say:

"Well, it's this way, Mr. Smith, I've made my bookkeeper absolutely responsible for all accounts and under the circumstances I can't in fairness to him interfere. You had better see him and give him as much as you can now and arrange for the balance."

This cuts the ground from under his feet. The stand you have taken is a fair and logical one. He cannot appeal from it and neither can he take offence. The latter is an important point, while it is essential that the books should be kept clean, it is equally essential that the merchant should avoid trouble or unpleasantness with customers. An aggrieved individual, no matter whether he is in the wrong or not, can do a lot of harm to the reputation of a merchant.

Supervising Credits.

But if it is often advisable for a merchant to remain in the background in the matter of collections, he should always be very much in the forefront in the matter of the regulation of credits.

The supervision of credit is in reality more important than a collection system. A slow-pay customer cannot do you out of your money if he does not get on your books in the first place. From my experience I would strongly advise that, when an account is opened, the amount should be marked in the ledger which you consider this account should not be allowed to exceed. **And keep to it.** If this were done we would not find the books of so many merchants filled with accounts quite out of proportion to the means of the debtors. Bills have a truly astonishing rapidity for mounting up. When an account is started neither the seller nor the purchaser has any intention of allowing it to grow to large proportions; at least the honest purchaser has no such intention. But as time goes on it creeps up until the total astonishes both the seller and the purchaser. When a debt reaches the stage where it is beyond the means of the purchaser to settle it within a reasonable time the work of clearing it off becomes a laborious one to the debtor and a decidedly aggravating and sometimes embarrassing process to the creditor. In many cases customers when their accounts become too big to pay will start going to other stores. They may not be intentionally dishonest, but merely passively lacking in moral ballast. They dread to face the merchant while the bill is still running, and thus, following the line of least resistance, transfer their custom to the opposition store.

Therefore, limit all accounts and put that limit when each account is opened. As stated before, **keep to that limit.**

Secondly, I would urge that a statement be rendered every week or month, and let it be early in the month. Good payers like to have their account rendered regularly. It is doubly necessary that accounts should be rendered regularly to slow-pay customers. This is the only way to keep them spurred up to the necessity of settling.

Thirdly, always give an invoice at the time of purchasing.

Collection Card System.

In handling accounts a collection card system is very necessary. Most well-managed stores have adopted this system, but there are still plenty of merchants who do not even know how collection cards should be handled. When an account becomes slow make out a collection card at once, putting down the name and address of the debtor, the date covering time of purchase, the balance of the account, and the date of last payment. A sample card to be used for the purpose is shown herewith. It will be noticed there is space on the card to record as well the date on which letters are written or calls made about the account. Space is also allowed to record the date of replies—if any.

All collection cards should be numbered. Thus, the first collection card will be No. 1, and the copies of all letters sent to this party will be marked No. 1, and filed in a docket or envelope, which will also be marked No. 1. The replies received from the debtor all go in this envelope, and thus the complete correspondence referring to the account can be referred to instantly and without any trouble.

The next collection account will be No. 2, and so on.

These cards should be kept in a box or filing cabinet in alphabetical order. This puts the whole system on an efficient basis, reduces the work of getting out accounts, and of looking up matter referring to any particular account, to a minimum.

Write Off Bad Debts.

Many merchants make the mistake of allowing accounts to remain in their ledgers that they know to be bad and uncollectable. According to best bookkeeping practice accounts should be written off directly they are known to be bad, or even if there is any doubt. In such cases it is best to write them off the books, and keep track of them on collection cards until every means of collection has been tried. In any case it is better not to keep in your books accounts which are not really a live asset. Otherwise you are only deceiving yourself into believing your business to be worth more than it actually is. Experience has shown that an account which has been allowed to run for some time, and to grow to large proportions, cannot safely be considered as a live asset, and to leave it on the books invites mistakes in estimating the worth of your assets.

THE NEW FORCE IN BUSINESS.

Mr. Ingersoll, New York, of the Ingersoll dollar watch, in giving evidence before the Judiciary Committee of the U.S. Congress at Washington the other day in favor of legislation that would permit manufacturers to fix the prices at which their products may be sold, said among other things, that as a result of advertising they had sold 37,000,000 watches. They did not manufacture themselves, but had a contract with a large watch factory to make them for the Ingersoll Company. They were salesmen, and they could not have built up this business but for advertising. "Advertising," Mr. Ingersoll said, is a relatively new force in business. It has grown in the past twenty years. Now, advertising, when efficiently done, means great economy and the saving of a great many salesmen. Without wishing to draw any distinction between classes of people, I think it not improper to point out that the advertising of manufacturers in a magazine is very much more reliable in quantity and quality than the advertising of this nature in the newspapers. Almost all of the magazines have taken a pretty high ethical stand on the question of what advertising they will accept. The newspapers, with the exception of about half a dozen shining instances throughout the United States, take anything that anyone will offer and pay for."

ELECTRICITY ON THE FARM.

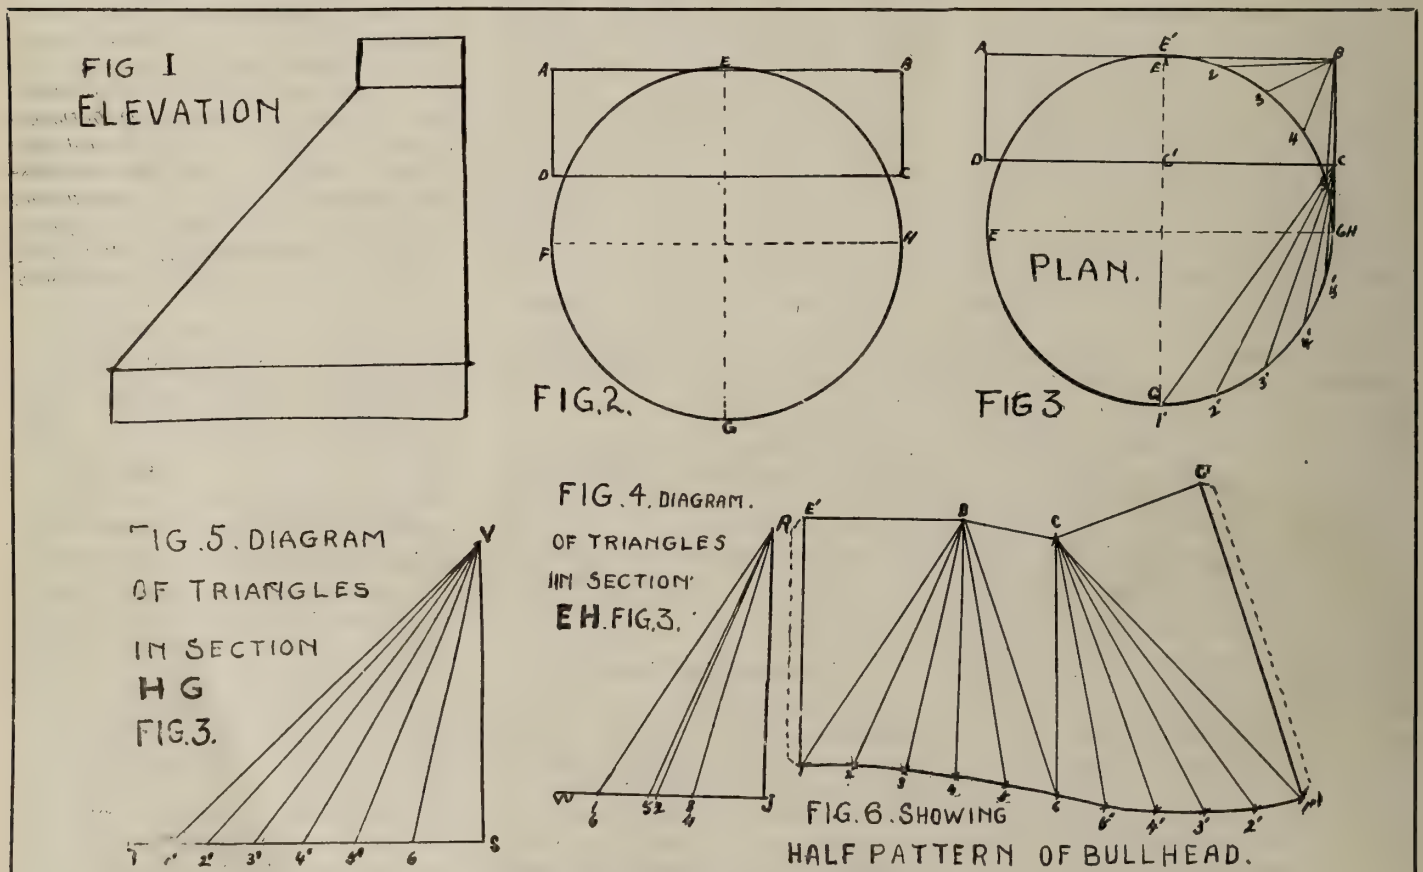
The Northern Electric Company, Limited, Montreal, have just issued a comprehensive bulletin covering their low voltage lighting outfits. With such an outfit installed, it is said the farmer may enjoy the same electric conveniences as have heretofore been confined to those living in cities or towns. Electric irons, toasters, vacuum cleaners and fan motors are only some of the many conveniences that may now be used on the farm. Copies of the bulletin will be mailed on request.

Problems in Sheet Metal Work

IN THIS issue we are illustrating how to develop the pattern for a bullhead or transition round base with a rectangular top, to be in two pieces. Fig. 1 is the elevation of bullhead or transition piece, and Fig. 2 shows the bottom and top, the top to one side leaving the back straight, while Fig. 3 is the plan showing the method of obtaining triangles; E F G H represent the bottom, and A D C B represent the top.

As the pattern is to be in two pieces it is only necessary to use half the plan. First divide the circle or bottom, into quarters. Then divide the two quarters represented by E H G into equal divisions and from the points in the section E H draw lines to the corner of top represented by B in Fig. 3, and from the divisions in section H G draw lines to the corner of top represented by C (Fig. 3). It will be necessary to construct the two diagrams of triangles one for each corner shown in Fig. 3, so as to obtain the true length of each line.

Lay off the line R J (Fig. 4) equal to the straight height of article (this is made to suit the work to be used on). From the point J and at right angles to R J set off the length of lines in the section E to H, making J 1 equal to B 1, J 2 equal to B 2, etc. From the points thus established in J W (Fig. 4) draw lines to R as shown.



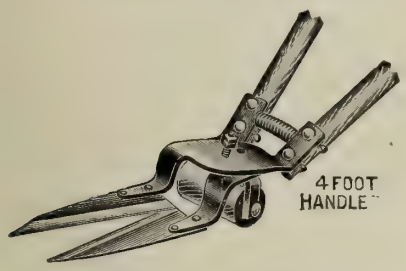
To obtain the triangles for the section H G proceed to draw lines same as in Fig 4. Make V S same height as R J (Fig. 4), draw S T at right angles to V S, and on the lines S T set off the length of lines in section H G, making $S1^1$ equal to $C1^1$, $S2^1$ equal to $C2^1$, etc., and from the points thus established in ST (Fig. 5), draw lines to V as shown.

To obtain pattern lay off line $1E^1$ (Fig. 6), from point E^1 and at right angles to $1E^1$ draw line E^1B equal in length to E^1B of plan (Fig. 3), which is the same half the length of long side of top. Set the dividers to R1 (Fig. 4) and with B of pattern as centre strike arc cutting the line $E^1 1$. Then draw line from where they cross to B (Fig. 6), with B as centre and R2 (Fig. 4) as redius, describe an arc with the dividers set to the same space used in stepping off the plan.

With 1 of pattern as centre strike a small arc intersection at 2 with arc previously drawn. With B (Fig. 6) as centre and R3 (Fig. 4) as radius describe an arc, and with the dividers set to same space used in stepping off the plan strike small arc intersecting at 3 of pattern. Proceed in the same way to lay off the lines 4, 5 and 6. Then to obtain the point C of pattern set the dividers to B C of plan (Fig 3), with B of pattern as centre and B C of plan as radius, describe an arc, and with V 6 (Fig. 5) as radius and 6 of pattern as centre strike an arc intersecting with the arc already drawn. This will give the point C of pattern. With C of pattern as centre and V 5 (Fig. 5) as radius, describe an arc and with the dividers set to same space used in stepping off plan using 6 of pattern as centre strike small arc intersecting at 5^1. The remaining line 4^1, 3^1, 2^1 and 1^1 are established in the same was as the preceding one.

To complete the pattern set the dividers to C^1C of plan and with C of pattern as centre strike a small arc and from 1^1 of pattern as centre and the slant height of article (Fig. 1) as radius strike an arc intersecting at C^1. Then lines traced through the points thus obtained will give the pattern required.

All edges to be allowed.



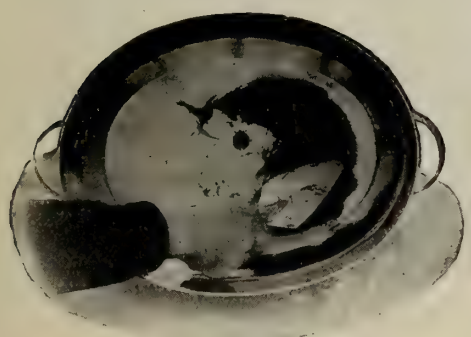
Development of Pattern for Bullhead.

New Goods Offered Canadian Hardwaremen

N. W. LAWN TRIMMER.

The North-Western Stamping Co., Burlington, Iowa, is offering the Canadian trade a new article known as the N. W. lawn trimmer. It is said that the trimmer will trim the edges of the lawn, around the walks, under trees, fences and flowers, the same as if it were done by the hand shears, with the operator on

N.W. Lawn Trimmer.



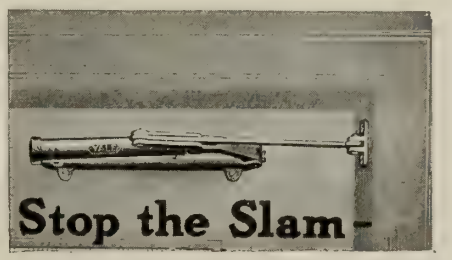
his hands and knees. By simply pressing the two 4-foot handles together the blades are made to work the same as a shear, and it is claimed they will trim the edges of a lawn in less than half the time necessary with hand shears or sickle.

The instrument is easily pushed along as the operator is walking. There is a wooden roller at the bottom of the frame.

The blades are made from best grade of steel, and are controlled by a small spring, which will always by tension hold the cutting edge of the shears, guaranteeing a clean cut. The frame is made of heavy stamped steel 3/16-inch thick, gives a full bearing, and is assured against breakage.

WEATHERTITE CEMENT.

Pecora Paint Co., Philadelphia, Pa., is offering the Canadian trade Pecora Weathertite Elastic Cement. Weather-



Applying Weathertite Cement.

tite is an elastic, rubbery, roofing cement, and is claimed to be a perfect cement for general repair or new work. The makers claim that it never shrinks or cracks away, and it will stick just as well under water as on dry spots.

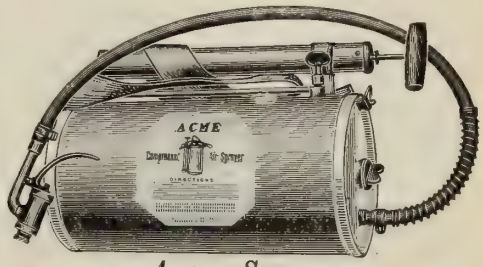
The accompanying illustration shows Weathertite being applied under an ordinary tin pan filled with water. The makers claim the cement can be used for tin, iron or composition roofs, skylights, slate or tile roofs, repairing glass, etc. The cement is put up in 5-lb., 10-lb., 25-lb., 50-lb. pails, 100-lb. kegs, half-barrels and barrels.

NEW YALE SCREEN DOOR CLOSER

Among the recent products put on the market by Canadian Yale & Towne, Limited, St. Catharines, is a new screen door closer, which is intended to fill a long felt want, and supply, at a moderate price, a device of real efficiency, which will prevent screen doors from either standing open or closing with a slam.

Screen Door Closer.

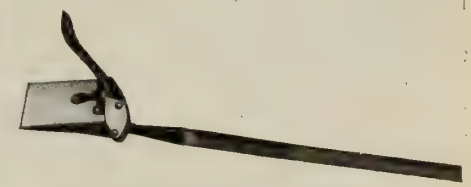
This company has long made a liquid door closer for use on heavy, high grade screen doors; but the new closer (which is of the air type) is intended for use on the smaller and lighter screen doors that are in general use around the home in the summer time.



With it in place it is claimed the nerve-racking slam that is a common accompaniment of the closing of a screen door is absolutely done away with. At the same time the screen is never left ajar allowing flies and mosquitoes to enter and make life miserable for the occupants of the house.

It is said that the Yale screen door closer shuts a screen door quietly, firmly and surely. There is no slam; no failure to close; no sagging of the hinges due to the general breaking down of the frame from constant slamming.

The spring power and checking action are both adjustable, making this screen door closer suitable for use on doors of various weights and sizes.



SPRAYER AND POTATO PLANTER.

Potato Implement Co., Traverse City, Mich., offers the Canadian trade the Acme hand potato planter and the Acme compressed air sprayer, here illustrated. The planter weighs 2½ pounds, and it is

Acme Sprayer.

claimed by the makers that one man can plant two acres in a day of ten hours. The Acme compressed sprayer has a copper bearing, galvanized or brass tank, with convex ends securely seamed or crimped to the tank. Each sprayer is tested to 50 lbs. air pressure, and is finished in aluminum with enameled green ends. The nozzle is said to be of solid brass with phosphor bronze spring. There is a bronze ball air check valve at seat of pump easily accessible for cleaning. The air compressor pump is 1½ in. in diameter, 14-in. stroke, made of heavy brass seamless tubing, screwed to a cast brass seat, which contains the

Acme Potato Planter.

bronze ball valve. Each sprayer is equipped with 3-foot hose extension and adjustable shoulder strap.

IT'S HARD WORK THAT TELLS.

Mix enthusiasm for your work with a love of it for its own sake, and you have a mixture that will achieve success against great odds.

Difficulties are made to be overcome. Without them life would be dull.

They act as an incentive and in the effort to overcome the obstacles in the way faculties are developed that otherwise would lie dormant.

Therefore let everyone accept the difficulties that confront him in life as a means by which he can be developed into a better man physically, mentally and morally.

Current News of the Hardware Trade

Enlarging Plant.

Montreal, Que.—The Thos. Davidson Mfg. Co., is increasing its plant to take care of the increased demand from the range boiler department.

New Paint Store at Toronto.

H. H. Bradfield, formerly of Morrisburg, Ont., has opened a paint store at 13 Temperance street, Toronto. Mr. Bradfield will act as agent for A. Ramsay & Son, Montreal.

Entertained Staff.

Lindsay, Ont.—The members of the Boxall & Matthie hardware staff were entertained by Jas. Boxall at his home to commemorate the 21st anniversary of his residence at Lindsay.

Paint Traveler Changes Ground.

Neil McKay, who has represented Brandram - Henderson in Southern Saskatchewan and Southern Alberta, for the past year and a half, is now working the city of Winnipeg, succeeding S. Clarke.

Obituary.

Toronto, Ont.—The death occurred recently of D. S. Keith, president Keith's, Ltd., dealers in electric fixtures.

The death occurred at Montreal last week of Onezime Souliere, who for over forty years was connected with the hardware business of Faucher & Son, 362 Craig St. W., Montreal.

The death occurred at Toronto last week of Wm. J. Smith, who was a commercial traveler for the Imperial Oil Co. for over thirty years. The late Mr. Smith was in his 68th year, and was ill less than a week.

New Mail Order Firm.

The opening of a new Winnipeg mail order house, lately incorporated with a capitalization of $1,000,000, is announced.

The new firm will be known as the Christie-Grant Co., Ltd., and will be managed by A. H. Grant and A. W. McCreary, both of whom have been employed in the mail order department of the Eaton store for the past nine and eleven years respectively. Mr. Grant as mail order advertiser and compiler of catalogues and his partner as transportation manager for the past year, and before that time connected with the mail order department.

Business Changes.

Claresholm, Alta.—W. M. Ross has succeeded to the hardware business of Moffatt & Sons.

Toronto, Ont.—Wm. Emery, hardware, is reported discontinuing business.

Glencoe, Ont.—G. W. Sutton has been succeeded by Mitchell & Hagerty.

Innisfail, Alta.—Snyder & Underwood have sold their stock of hardware to W. Leisemer.

Davidson, Sask.—Calloway & Calloway, hardware, have sold out to Pioneer Hardware Co.

Edmonton, Alta.—The stock of the estate of the Stewart Hardware Co. has been sold to J. A. Werner.

Wilkie, Sask.—The business of Dulmage & Spark is now being operated under the name of E. H. Dulmage.

Canora, Sask.—The business formerly carried on by the Canora Hardware Co. has been taken over by E. H. Woods and Frank Robertson.

Chatham, Ont.—A. D. Allison, late of Kent Bridge, has taken over and remodeled the premises formerly occupied by Stephens & Douglass, hardware merchants. Mr. Allison held the formal opening of his new hardware store last week.

Fire Losses.

Bathurst, N. B.—Mrs. Southwood, hardware, etc., has suffered loss by fire.

New Firms.

Wynward, Sask.—W. T. Harvie has opened a hardware store.

Doremy, Sask.—Scott & Saunderson have opened a hardware store.

Florence, Ont.—Beatty & McDonald have opened a hardware store.

Sunderland, Ont.—J. A. Simons has opened a tinsmithing and plumbing shop.

Superb, Sask.—Geo. E. Tait & Co., dealers in hardware and general merchandise, held the formal opening of their new store on May 4th.

Companies Incorporated.

Marpal-Blastine Explosives, Ltd., capitalized at four thousand pounds sterling, head office Toronto, to manufacture and deal in all kinds of explosives and ammunition.

Western Notes.

G. H. Anderson, head of the cutlery department of the Miller-Morse Hardware Co., Winnipeg, is leaving in May for the Old Country. He will be away about three months, and will spend a good deal of his time in Sheffield and Birmingham, on business with the various cutlery establishments there.

Before coming to Canada to join the Miller-Morse staff some twelve years ago, Mr. Anderson was employed in Sheffield, and knows intimately a number in the hardware trade there. Mr. Anderson will visit his old home in Elgin, Scotland, while away. Mrs. Anderson will accompany her husband.

Personals.

F. W. Lamplough, of Montreal, was in Ottawa last week.

Wm. H. Evans of Montreal was a business visitor in New York last week.

Mrs. Geo. Caverhill and family left Montreal last week for a trip to Europe.

G. L. Griffith, of Stratford, Ont., manufacturer of horse specialties, was in Montreal during the week.

L. J. Street, Montreal, assistant sales manager Dominion Iron & Steel Co.,; Sydney, is visiting in Vancouver.

Walter H. Cottingham, president of the Sherwin-Williams Co., of Canada, was in Montreal this week and left for England with his family.

Congratulations are being extended to Gordon C. Seybold, manager of the Cochrane Hardware Co., Sudbury, Ont., on the arrival of a baby boy.

H. M. Borland, Western representative for Lewis Bros., Montreal, was the host at a gathering of the staff of Reg. F. Scott, "Blue Hardware," Guelph, Ont., last week. Mr. Borland proved a good entertainer and was voted a "jolly good fellow" by all present.

W. S. Fisher, of the firm of Emerson & Fisher, hardware dealers, St. John, N.B., has been appointed one of the three Royal Commissioners who will inquire into the charges of graft preferred against Premier Flemming and H. F. McLeod, M.P. for York County, N.B. The other members of the commission are Sir Frederick Barker and Judge McKeown.

P. A. Wuterich, representing Chas. Parke Co., Meriden, Conn.; E. A. Sherlock, Miller Lock Co., Philadelphia; Oscar R. Claus, Hopkins & Allen Arms Co., Norwich, Conn.; F. M. Fay, J. Stevens Arms & Tool Co., Chicopee Falls, Mass.; Mr. Shyne, of Peterborough Lock Co.; A. H. Andrews, of N. R. Streeter & Co., Rochester, N.Y.; Chas. K. Eichler, Slaymaker Co., Lancaster, Pa.; L. H. Powell, American Cutlery Co., Chicago; and Harry James, of Shurly & Dietrich Co., Galt, Ont., were calling on the trade here this week.

Industrial Notes.

Newcastle, N.B.—E. G. Hedman, patentee of a new weigh scale, is endeavoring to promote a company in order to build a factory for making scales.

Hamilton, Ont.—The Steel Company of Canada has reopened its blooming and billet mills, and 200 men will be put to work.

Medicine Hat, Alta.—A. C. Tegge, general superintendent of the Canada Cement Co., states that the company is going ahead with the completion of their plant at Dauntless, Alta.

Redcliff, Alta.—Work on the addition to the Ornamental Iron Works plan here is now almost completed. It is the intention of the management to install new machinery which will mean an increase in the staff as soon as this machinery is ready for operation.

New Westminster, B.C.—A new company, composed of Messrs. Stewart, Moore & Wright, of Vancouver, has taken over the D. & H. Brassworks Co., at Sapperton. Two acres of land have also been purchased and a foundry and steel plant will be built.

Windsor, Ont.—The Dowsley Spring and Axle Co., had fully decided to build a factory this spring on a site the company purchased in No. 2 district on Howard avenue, but owing to a serious fire the plans were deferred. The industrial committee granted the company's request for a year's extension of time.

The Canada Coke Corporation, Universal Tool Steel Co., Ltd., Electric Furnace Products Co., Ltd., Dominion Engineering and Machinery Co., Ltd., Galbraith & Cate, Ltd., and the Corbett Contracting Co., Ltd., have recently been incorporated in Toronto. These companies had already obtained Federal charters.

Montreal Notes.

The team of Canadian cadets from Western Canada, who are to compete at Bisley left Quebec May 5 on the Royal George. Before sailing each boy was presented with a handsome silver watch fob by Mr. Boa, of the Dominion Cartridge Co.

The Canadian Tube & Iron Co. have been appointed selling agents for the Colonial Wire Manufacturing Co., Lachine Canal, Montreal, and the Canadian Rolling Mills Co., also located at Lachine Canal. They will handle all kinds of smooth steel wires, mattress wire, bottling wires, plain and galvanized fine wires, fence staples, wire nails, wood screws, plain and galvanized pump rods, bar iron and steel, twisted steel bars, all kinds of bolts and nuts and black and galvanized wrought pipe.

New Firms.

Riggs-Thompson Co., exclusive dealers in builders' hardware and hotel supplies, have opened a store at the corner of Rice and Howard Avenues, Edmonton. P. R. Thompson, formerly manager of the hardware department of The Acme Co., Ltd., Edmonton, and an old Madoc, Ont., man, is a member of the firm. W. A. Riggs, formerly manager of the Sommerville Hardware Co., Edmonton, who came from Montana, is the other member.

Weekly Report on Market Conditions

Statements From Buying Centres on Prices and the Trend of Demand—Full Reports Dealing with Hardware, Metal and Stove Lines.

THE MARKETS AT A GLANCE.

The advent of warmer weather has had a good effect on the retail hardware business and many lines of spring goods which have been inactive are now moving in a satisfactory manner. With continued warm weather there will be a splendid improvement in business as far as the retailers are concerned. "Clean up and Paint up" movements have helped in a large degree to increase the demand for paint, especially in the West. The stove trade is rather quiet, the principal selling lines at present are gas ranges and summer stoves. The metal markets are still quiet and only a limited amount of business is passing in this line. Hardware jobbers report that business so far this month has been very brisk.

MONTREAL.

MONTREAL, May 6.—While business with the jobbers has been fairly good during the past week, it may be said that the retailers have experienced a marked improvement in their trade. The advent of more seasonable weather has resulted in a largely accelerated demand for spring goods. Though the business is still a little behind last year, owing to a late start, it is going along now with a boom, and indications are that it will pick up right along. There has been a brisk demand for garden tools, hose and sprinklers, hammocks, and baseball goods, etc. The jobbers report good orders coming in from outside, especially from the Maritime Provinces, Eastern Ontario and some sections of Quebec. Collections, while not as good as could be wished for, are showing some improvement, due in some degree, it is thought, to the more favorable weather conditions, which have brought about a better demand for seasonable lines.

Metals.

There is a slightly better tone to the metal markets this week, but no changes in prices are listed. Tin shows weakness, but the quotation of 42½ to 43 cents is still maintained. Antimony, which declined 50 cents last week, has undergone no further change, and the price of $8.50 is being quoted, but could probably be shaded for quantities. Spelter is offered at $6 and copper at $16.50.

Bar Iron.

The quotation on bar iron by Montreal jobbers is $1.90 base. The market is none too strong.

Nails and Screws.

The price of $2.20 base for steel wire nails is being maintained, and there seems little likelihood of a change at present. The market here has been fairly steady. Cut nails are quoted at $2.60. Screws are unchanged in price, though there has been some talk of new prices for some time past.

Lead and Lead Waste Pipe.

Though this market continues firm, the quotations of 7½ and 9 cents a pound respectively for lead and lead waste pipe have not been altered.

Rope, Twine, etc.

Since the opening of navigation there has been an improvement in the amount of business in this department. For the next few months it is anticipated that shipments will steadily increase, especially in binder twine. Present quotations on rope are as follows:—Pure Manila, 15c; British Manila, 11c; African hemp, 11c; sisal, 10½c; double lath yarn, 10¼; single lath yarn, 9¾c. For binder twine the prices are: Best Manila, 650 feet to pound, 13½c; Manila, 600 ft., 11c; standard Manila, 550 ft., 9¾c; standard, 500 ft., 9¼c.

Stoves and Ranges.

There has been a very good sale lately for gas ranges and oil stoves, the former to replace old ranges which were found unsatisfactory after the "moving day," and the latter for country houses. Oil heaters are also selling very well at this time, as they are found to be very handy for use after the furnace has been allowed to finally "go out."

Seasonable Lines in Demand.

Such summer lines as window screens, screen doors, garden tools, refrigerators, etc., have been moving much better during the last few days. There has also been quite a demand for garbage cans, and it is thought the "clean-up" campaign has had its effect in this direction. The fire and incineration departments are making a systematic canvass of the houses, warehouses and yards all over the city, and are insisting upon a more rigid regard for the by-laws having to do with removal of garbage and of keeping proper fire-proof receptacles for it.

Vacuum Cleaners.

Vacuum cleaners are being taken up by the Montreal jobbers to a larger extent than heretofore, and they are evidently finding them a profitable line to handle. One jobber remarked that he had sold over one hundred machines this spring, and that without any special effort. There is no doubt that the retail dealers, especially in the smaller towns, can work up quite a satisfactory trade in this department. It is as much a hardware line as brooms, brushes and other such house-cleaning utilities, and there is a good profit in it.

Builders' Hardware.

The sale of builders' hardware of all kinds has been well maintained. There is a lot of building going on in Montreal at the present time, especially in the newer wards where street improvements have been made, and where lots have been lying idle for some time. The heaviest demand has been for the cheaper type of lock sets, etc., which enter into the construction of the average tenement house.

TORONTO.

TORONTO, May 7. — The improvement in weather conditions during the past few days has created a tendency toward better business condition, and retailers report that the demand for spring lines is becoming more pronounced. The unsettled weather which had prevailed for some weeks naturally had a bad effect on business and many merchants who had looked forward to a large rush of business during the early spring were disappointed. In January it was predicted in many quarters that business would show a big improvement during the early spring, the spring season is now well advanced and many merchants have not secured the volume of business they had expected. There has been a tendency on the part of some jobbers to lower their stocks and to buy as little as possible. It is not thought that the hardware trade in general has any great reason to complain about business, when conditions in some other lines are considered. There will no doubt be a steady

improvement from now on — in fact there cannot help but be.

The retailers are still holding large stocks of spring goods which will move rapidly if good weather continues. Warm weather during the month of May is a great boon to retail hardwaremen in helping to dispose of spring and summer goods.

Metals.

There is practically no change in the general condition of the metal markets and only a limited amount of business is being done. Shading of prices is very much in evidence and the market generally shows weakness. The following prices are being quoted at Toronto:— Tin, 35½c to 39c lb.; lead, $4.90 to $5 per 100 lbs.; copper, 15c to 16½c. lb.; antimony, 8¾c to 9c lb.; zinc, 5½c to 6c lb.; ingot brass, red, 13c to 15c lb.; ingot brass, yellow, 12c to 14c lb.; half-and-half solder, 24c to 26c lb.; pattern aluminum, 22c to 24c lb.; ingot aluminum, 19c to 20c lb.; acme solder, 19½c lb.; easy wiping solder, 20½c lb.; star extra, 22½c lb.; wire solder, 27c; tinkers' bar solder, 28c lb.; lead wool, 8c lb.

Rope, Twine, Eec.

Toronto firms dealing in rope, twine, etc., report a slight improvement in business and quotations are said to be firm. A despatch from New York says:—

Inactivity still prevailed in the local hemp market and the manufacturers were more than ever inclined to wait for developments. The shading of low grades had a certain sympathetic influence, though Manila is not pressing the intermediate quality such as the local market needs. Fair current was repeated at 7¾c for shipment. No word was received from London, where May Day observance checked business. The news from Mexico is of the same peaceful tenor so far as the mediation negotiations go, and consequently sisal continues nominally unchanged at 5¼c. There is still much delay in getting confirmation of bids. Istle is dull and nominally repeated at quotations.

No change was reported in jute, which is dull and steady at 7.50c for old crop. There is little interest shown at this stage in new crop.

Toronto quotations are as follows:—
Best Pure Manila .....15c lb. base.
British Manila .. ..11c lb. base.
African Hemp .....11c lb. base.
Sisal Rope .....10½c base.
Lath Yarn Single ..... 9¾c lb.
Lath Yarn Double .....10¼c lb.

Other lines are shown in current market quotations.

Binder twine prices are:—650 ft. twine, 13½c lb.; 600-ft. twine, 11c lb.; 550-ft. twine, 9¾c lb.; 500-ft. twine, 9¼c lb.; ⅛c per lb. allowance on 5 tons and over; ¼c lb. allowance on 10 tons and over; delivery allowed on 300 lbs. and over.

Building Materials.

A fair amount of building is now under way and the demand for builders' supplies is improving. Cement is in very fair demand. Nails are still quoted at 2.10 base, quotations on building paper, etc., remain unchanged. With improved weather conditions much additional building will no doubt be undertaken.

Bar Iron.

Toronto hardware jobbers quote bar irons at $2.00 base, F.O.B. Toronto, and $1.90 base F.O.B. factory.

Spring Goods.

Business in spring goods has been a little backward although with the prospects of warmer weather a big improvement should be noticed.

Stoves, Ranges, Etc.

The improvement in weather conditions and the advent of warm weather has stimulated the demand for gas ranges and plates, oil and gasoline stoves, etc. Trade in Ontario is fair and is picking up nicely. Heating stoves are being booked for fall delivery. A large number of retailers are pushing the sale of gas ranges pretty hard this spring and many are giving demonstrations in the stores.

WINNIPEG.

WINNIPEG, May 13.—The coming of warm weather, also the coming of the clean-up, paint-up week, which is being observed quite generally throughout the West, has brought in increased business for the retailers. It cannot, of course, be estimated for some little time exactly what stimulus this clean-up week has had, but from present indications it has apparently turned the minds of householders towards the need of putting on a screen door here, a screen window there, and has made them see the desirability of getting their front and back yards in good condition, and their verandas and steps re-painted. It is bringing a larger retail demand for garden tools, screen doors, and paints, and such lines than might otherwise have been expected. In short, the clean-up, paint-up campaign in the West is proving a success.

General trade conditions are encouraging. There is no attempt on the part of manufacturers and wholesalers to hold this up as a record year. On the other hand, as one jobber put it, the falling-off for the first four months has not been so great that a good summer's business would not enable the sales for the year to surpass anything so far experienced. Whether this good summer's business will come or not remains to be seen. A record summer is hardly expected, and yet weather conditions are now considered ideal for a good crop, which, of course, means much in regulating the summer's trade.

The tendency among retailers to regulate credits strictly, tending towards a cash business, is very strongly marked. It would seem that many dealers last year felt that the talk of hard times was largely exaggerated, but that this year they are realizing that it is absolutely necessary to conduct business on strictly conservative lines.

In the city, builders' hardware is beginning to move, the houses which were started early in April now being near the point where interior finishing can be done. For heating lines, too, there is a very fair demand. A representative of one of the large heating companies says that there is a good deal of work being done in the country, and that the dealers are getting after this in splendid fashion.

The stove business remains very quiet. Refrigerators, however, are moving well. There is also a good demand for certain lines of automobile accessories.

The clean-up, paint-up campaign has perhaps done more to stimulate the call for paint than for any other single line. House paint, paint suitable for fencing, and varnishes for interior work, are moving satisfactorily.

Practically no price changes have been made and none of importance seem imminent.

ANNUAL MEETING C. M. A. MONTREAL BRANCH.

The annual meeting of the Montreal branch of the Canadian Manufacturers' Association was held May 5 in the Canada Club when the following officers were elected:—

Chairman, J. P. Howard, Phoenix Bridge and Iron Works, Ltd.; vice chairman, T. H. Wardleworth, National Drug and Chemical Co., Ltd., by acclamation. The Montreal depresentatives on the executive committee were elected as follows: H. W. Aird, Canada Paint Co., Ltd.; George F. Benson, Edwardsburg Starch Co., Ltd.; B. W. Coghlin, B. J. Coghlin Co., Ltd.; A. J. Hart, Hart Manufacturing Co.; Percy S. McKergow, National Brick Co.; R. H. McMaster, The Steel Company of Canada, Ltd.; J. C. Newman, the McClary Manufacturing Co.; S. J. B. Rolland, the Rolland Paper Co., Ltd.; Wm. Rutherford, Wm. Rutherford and Sons, Ltd.; W. J. Sadler, Sadler and Haworth; Geo. A. Slater, Geo. A. Slater, Ltd.; W. H. Wyman, Belding-Paul-Corticelli, Ltd. Representatives of affiliated towns were chosen by acclamation for the executive as follows: H. T. Chalifoux, O. Chalifoux & Fils, St. Hyacinthe; John Lowe, jr., Montreal Cottons Limited, Valleyfield;

There were some sixty members present at the meeting and the annual reports were declared satisfactory and adopted unanimously.

The retiring president, Howard Murray, reviewed the work of the year, touching on matters that had been dealt with in the city and province.

Matters of export trade and Dominion affairs were gone into and this statement was made:

"The decision in the long drawn-out investigation into Western freight rates by the Railway Commission, the questions arising out of the demands for changes in the customs tariffs on supplies and equipment used, by the farming communities and on certain products of our iron and steel industry had been looked forward to with considerable anxiety. The removal of these questions from surmise and their crystallization into facts, clears the air to a considerable extent.

Government's Masterly Handling.

"A much graver and pressing problem, that of the treatment to be accorded the Canadian Northern Railway, has been dealt with by the Government in a masterful manner, and although many opinions have been given voice among manufacturers, it can be safely said that the outcome will go far toward modifying the railway conditions throughout Canada. To my mind, a still graver question remains in the matter of the National Transcontinental Railway. In this instance the huge augmentation of the cost of construction and its resultant effect on the cost of haulage calls for serious study on the part of those upon whom the duty devolves.

"A further problem confronting Canadians is the matter of the Georgian Bay Canal. A commission has been appointed which will study the feasibility of this project and its report when received will require still further study as to its advisability."

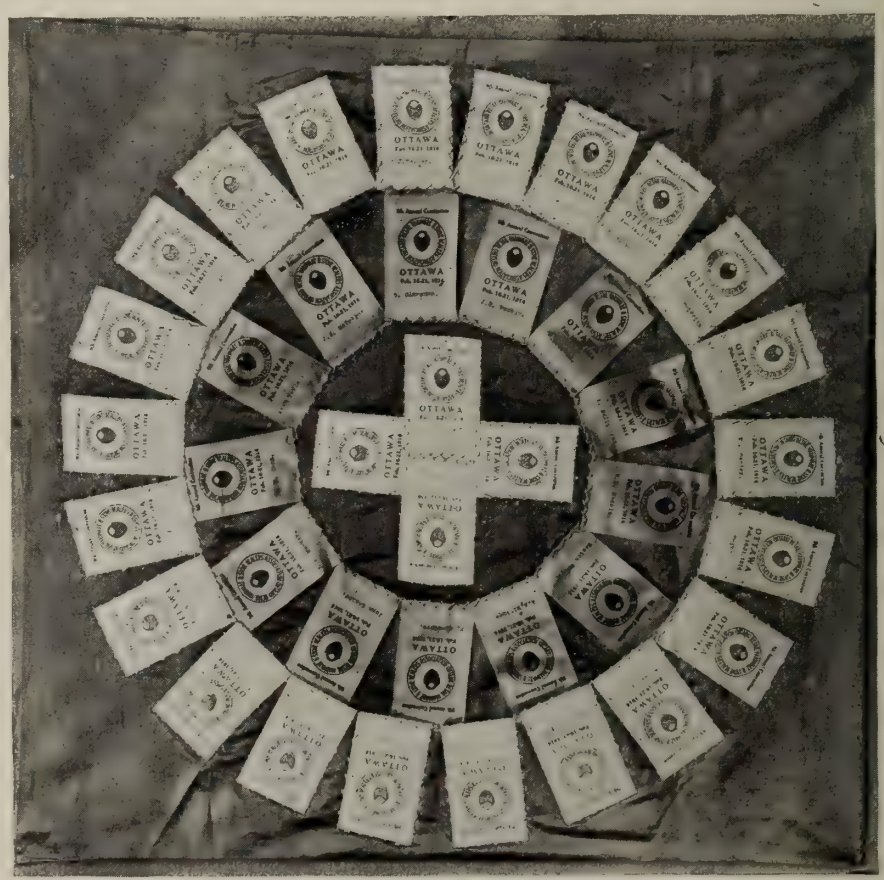
In conclusion Mr. Murray remarked: "There is no ground for pessimism."

MANY MERCHANTS ATTEND CONVENTION.

(Continued from page 40.)

if the business is not sufficiently active to provide a safe margin over and above all expense, and in computing the costs of carrying on a business, where the stock in trade is perhaps disproportionately large for the amount of business done annually, the items of interest and depreciation must figure very largely and should not be overlooked.

"In regard to the credit system of a retail house, this is more difficult to define. While the fundamental principles of credit are the same in every class of business, the policies vary a great deal. In the credits of the retail trade there is little in common with those of the wholesaler. The class of patronage is radically different; and the manners of extending credit and making collections are entirely dissimilar. The principles, however, are identical, in that care must be exercised in seeing that credit is dispensed to only responsible parties, and that collections are made promptly. It has been said that if credit is the foundation of modern business collections are its roof. Over-crediting is neither good for the merchant nor his customer, and when the former finds that his book accounts are increasing, and at the same time it is becoming increasingly difficult to meet his own obligations it is time for him to call a halt.



"Crop failures, low prices, and other local conditions make it difficult for the merchant in the country to adjust his credits and collections as systematically as he would wish, but I believe that a time of settlement should be arranged with every customer, and this adhered to as closely as the circumstances will permit—and in any case all credit should be restricted to a figure where the outstandings cannot seriously embarrass the business.

ORGANIZE TO HELP COUNTRY MERCHANTS.

An American magazine announces the organization of the Home Town Association of America. The purpose of the organization is to bring more business to the country merchant. Its membership, the magazine says, is composed of large wholesale, jobbing, and manufacturing concerns.

"In creating this organization they (the members) claim no altrustic motive, but solely the purpose to help the country merchant adopt more modern methods so that he may sell more goods, put up a stronger competition against the mail order houses, and so become a larger purchaser from the wholesaler and jobber.

"The Home Town Association makes an appeal to the country merchant to advertise, hustle, hold and build up his trade. Further than that it appeals to the farmers and local public spirit to trade at home and thereby help to build up the home country town."

The above illustration shows a reproduction of a cushion cover presented to W. F. Macpherson, President Ontario Retail Hardware and Stove Dealers' Association by John Caslor, Treasurer of the Association. The cover is made of green silk, on which is worked a neat design composed of badges left over from the Ottawa Convention.

The presentation took place at a recent meeting of the executive of the Association held at Toronto.

You've Seen Our Ads.

There's no hiding the Martin-Senour advertisements this year—they stand right out in the best Farm Papers, Religious Publications, Magazines, etc., all through Canada—working hard for our dealers. Write Montreal office to-day for our special newsdealer's proposition.

PAINTS & VARNISHES

MONTREAL CHICAGO WINNIPEG LINCOLN
TORONTO HALIFAX

Back of every Berry Brothers Dealer are sure sales-forces that help him sell Berry Brothers' Varnishes. Berry Brothers' Varnishes move fast over the counter. They are the most active stock a dealer can handle.

Berry Brothers' Varnishes have a reputation of satisfaction for over fifty years. People know about them — they know that the dealer who sells and recommends Berry Brothers' Varnishes is giving them honest, lasting varnish values. This reputation helps you sell Berry Brothers' Varnishes.

Berry Brothers' advertising is another sales-force that brings folks into your store. For years we have been telling the public about the qualities of our Varnishes. We have educated them to ask for Berry Brothers' Varnishes—to know this name as one that stands for varnish satisfaction. Berry Brothers' Varnishes are easy to sell because of this.

And the Berry Brothers dealer gets more than the profit out of Berry Brothers' Varnishes. They help him to build his business reputation for selling high-grade goods.

If you haven't Berry Brothers' Varnishes on your shelves, let us tell you more about them.

Weekly Market Report---Paints

MONTREAL.

MONTREAL, May 6.—Almost without exception Montreal jobbers and manufacturers report that business has been very good this spring, and there seems no reason to anticipate any change in these conditions. Locally the "clean-up and paint-up" campaign is having its effect in increased sales of paints and brushes, etc., for the clean-up week. The advent of warmer weather has given an opportunity for outside work, and a great deal is being done in this way.

Glass and Putty.

Shipments of glass are expected to arrive shortly. There has been a good amount of business right along, and prices have not been changed. Some new packages of putty are now on the market. Quotations are as follows:—Casks, $2.30; 100-lb. drums, $2.50; 50-lb. drums, $2.55; 25-lb. drums, $2.60; bladders, in barrels, $2.80; 5-lb. tins, 2 cents advance over 25-lb. iron price, and 1 and 2-lb. tins, 2½ cents per pound advance over 25-lb. iron price.

White Lead.

Quotations of $8.05 per 100 for ton lots, and $8.25 for less than ton lots, are still in effect. There has been a good steady demand.

Linseed Oil.

Prices on linseed oil are marked down 2 cents since last report. Business has been about the average. Quotations now are:—

Raw Linseed—
1 to 4 barrels ..... 60c per gal.
5 to 9 barrels ..... 59c per gal.
Boiled Linseed—
1 to 4 barrels ..... 63c per gal.
5 to 9 barrels ..... 62c per gal.

Turpentine.

The demand for turpentine, like the paint business, has been exceptionally good, and stocks in the hands of some dealers are quite low. The market is weak, and prices are 1 cent below last week's figures. Quotations now are:—

1 barrel ..... 64c per gal.
5 barrels ..... 63c per gal.

Five-gallon packages, 5 cents advance; packages extra; terms net.

Gasoline.

There has been no change in the price of gasoline since last week. Sales have been very good, both in the city and out through the country. The following prices are in effect:—

Barrels, in wood..... 23c gallon.
In steel and drums..... 20c "
Tank wagon (100 gals.). 19½c "

TORONTO.

TORONTO, May 7.—Toronto retailers and those in the surrounding districts report an improvement in the paint business since the advent of warmer weather. A better demand now exists for all lines of paint, linseed oil, lead and turpentine. There is a scarcity of turpentine in Toronto at present.

Linseed Oil.

The ruling prices in linseed oil at Toronto remain unchanged although price cutting is evident. Ruling quotations are:—

Raw Linseed Oil—
Single barrels .....65c gallon.
3 to 5 barrels.....63c gallon.
6 to 9 barrels.....61c gallon.
Boiled Linseed Oil—
Single barrels .....68c gallon.
3 to 5 barrels .....66c gallon.
6 to 9 barrels .....64c gallon.

Oil in less than barrel lots, 7 cents per gallon. Cans are charged at: 5-gal. cans, 50 cents each; 10-gal., 75c each.

Turpentine.

There has been no change in turpentine quotations since the big decline reported last week. The southern market has been very weak for some time past, but during the past few days has shown signs of strength. The ruling quotations in Toronto are as follows:—

Single barrels .....65c per Imp. gal.
2 to 4 barrels ... ...64c per Imp. gal.
5 gallon lots .....72c per Imp. gal.

White Lead.

White lead quotations in Toronto remain unchanged and are as follows:—

Less than ton lots....$8.40 per 100 lbs.
Ton lots ..... 8.20 per 100 lbs.

For larger quantities prices are open.

Ready Mixed Paints.

With the improvement in weather conditions and the advent of warmer weather retailers have experienced a better demand for ready mixed paints and varnishes.

During the next few weeks paint sales should be very heavy. Some very fine displays of paint are being shown in the show windows of many of the retailer's stores.

Gasoline and Benzine.

The demand for gasoline is increasing rapidly and quotations are steady. There does not appear to be any great reason to expect an advance in price this year such as there was last. Quotations in gasoline and benzine are shown in current market quotations.

Glass and Putty.

Business in glass is not brisk at present, although the outlook is slightly better than it was last week. Quotations on glass and putty remain the same as shown in current market quotations.

THE MONTREAL CAMPAIGN.

The "Clean Up and Paint Up" campaign in Montreal is making splendid progress. The city council has voted $2,500 toward the expense of the movement and more than $600 has been received from private subscription. The Montreal Tramways Co. have placed their trucks and incineration plant at the disposal of the committee and the civic departments of police, fire, health and incineration are all working in harmony to make the week a huge success. The moving picture theatres have also offered to help and a series of local views showing unsanitary conditions and how to remedy them are being prepared and will be shown on the screens all over the city.

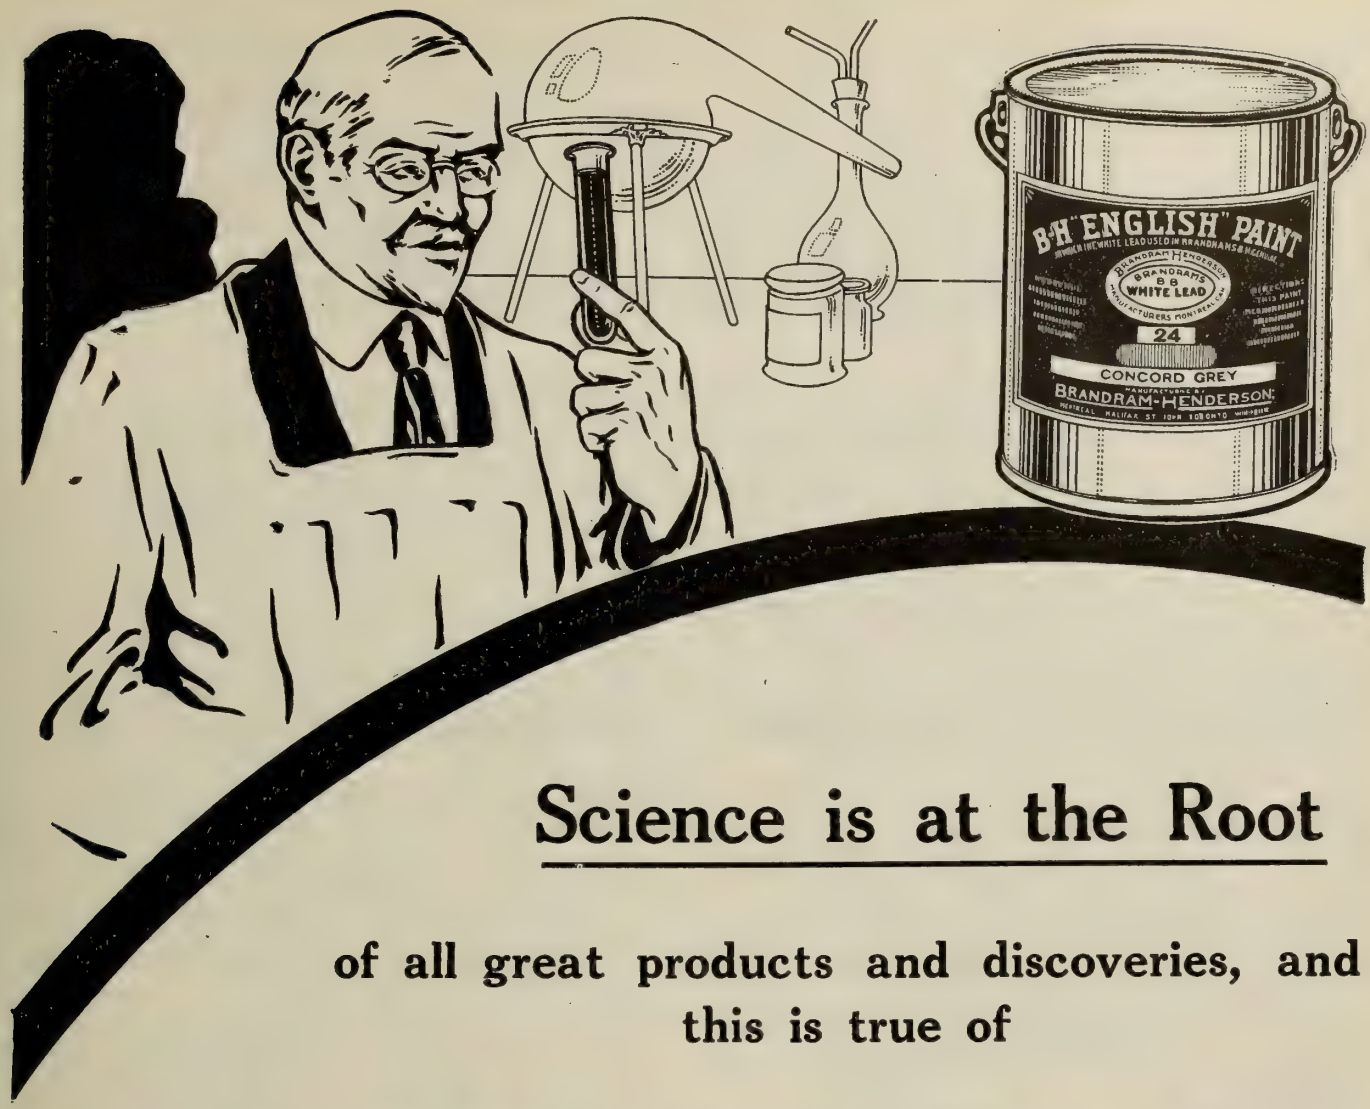
The programme for the Clean-Up week and the officers in charge each day has been decided on as follows:

Sunday, May 17—Special sermons in the city churches, Dr. Atherton.

Monday, May 18—Fire Prevention Day, Chief Tremblay, of the Fire Brigade.

Tuesday, May 19—Front Yard Day, Dr. Walter G. Kennedy.

Wednesday, May 20—Back Yard Day, E. T. Sayers.



Thursday, May 21—Sanitation Day, ex-Mayor Dr. J. J. Guerin.

Friday, May 22—Paint-up Day, L. R. Greene.

Saturday, May 23—Children's Day, Dr. S. Boucher, M.H.O.

FIRE LOSSES.

The warehouse of Sadler & Haworth, leather belting manufacturers, Montreal, was visited by fire on May 5, and damage to the extent of about $20,000 was done before the flames were under control. The loss is fully covered by insurance, and the business is being carried on as usual. The fire was confined to the upper floors of the building and the stock-rooms escaped practically without damage. All orders are being filled, and the business will not be interfered with in any way, except the inconvenience that such a visitation always brings. This is the first fire Sadler & Haworth have had in their forty years in business.

Science is at the Root

of all great products and discoveries, and this is true of

B-H "ENGLISH" PAINT

There is no guess-work in its composition—no uncertainty about its ability to run a long-winded race against time.

B-H "English" Paint shines as a noteworthy achievement in paint-making against a dull grey background of mediocre things made primarily to sell, but with little thought as to their actual use or enduring qualities.

"Endurance" Paint is another name for B-H "English" Paint. It *must* excel in lasting qualities because made in white and tints on a base consisting of 70% of Brandram's B.B. Genuine White Lead and 30% Pure Zinc.

Service is the proof. Convincing indeed is the fact that after many years of use, B-H "English" Paint is more widely used every year on the finest buildings in Canada.

You can do a better business with the best—build up a lasting trade with B-H "English."

Why Use Screen Doors, If They Don't Shut Tight?

Bur-Nor Catches will hold the doors shut, prevent warping and sagging. Also strengthens weak hinges. Made in two styles, Plain and with positive locking attachment. Put them on your show-case, they sell themselves.

Our Hatchet proposition will also interest you. Bur-Nor Hatchets are 50% stronger than other styles.

May we send you catalogue and prices of both?

NOW IS THE TIME TO STOCK

Ready Roofing — Building Papers

Deadening Felts and Waterproof Papers

By purchasing from any of our branches, Saskatoon, Swift Current, or Winnipeg, you save both time and freight charges. This means quick delivery, satisfied customers and better profits. Get our sample book showing samples of any of the following:

Supreme Building Paper—The very highest grade of pure Sulphite Sheathing. Put up in uniform rolls, 32 inches wide, containing 400 square feet.

Sovereign Sheathing Felt—A high-grade fabric, manufactured of best quality wool felt, heavily coated with an indestructible mineral compound that will not dry out or disintegrate. Unequalled for the sheathing of ceilings, walls and floors. Protects against wind and wet, dampness or moisture. Hygienic and Sanitary, Germ and Vermin Proof.

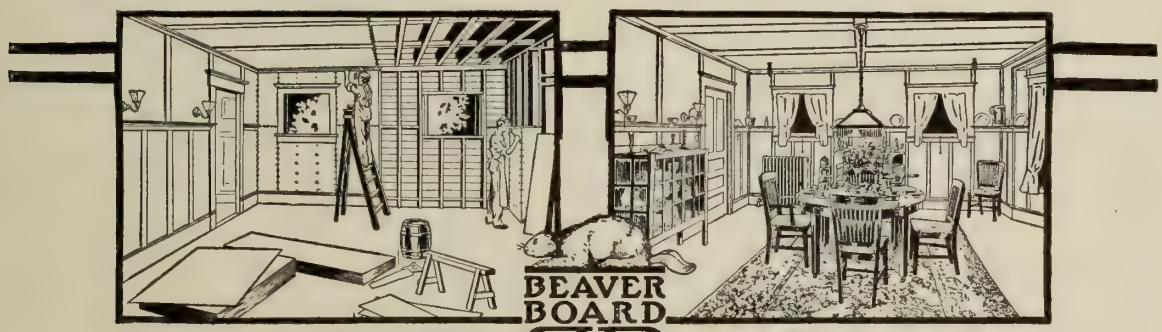
Winnipeg Roofing—Made of the highest grade of wool felt, thoroughly saturated with a non-drying compound, specially adapted to the extremes of climate in this western country.

Put up in one or two square rolls, as desired, with sufficient extra material to allow for a two-inch lap in laying. Complete with cement and large-headed nails for seams and laps.

Klimax Roofing is an excellent grade of smooth-surfaced, ready-to-lay roofing. It is a flexible fabric, thoroughly water-proof, and possesses great wearing qualities.

Put up in one or two square rolls, as desired, with sufficient extra material to allow for a two-inch lap in laying. Sufficient broad-headed nails and cement for laps, together with full directions for laying are packed inside each roll.

Deadening Felts—Snug Felt, Carpet Felt, Red Burlap Felt, and Green Burlap Felt.



Beaver Board

The New Wall Board—Takes the Place of Lath and Plaster

Is nailed directly to the studding of wall or ceiling, and can be put on by a carpenter or anyone handy with tools.

Beaver Board is made of pure wood fibre, in sheets about 3-16 of an inch thick, 48 inches wide, by 6, 7, 8, 9 and 10 feet long, and put up in bundles.

This shows a new room with the BEAVER BOARD being nailed to the studding. The work is easily and rapidly done, without the litter and confusion of lath and plaster.

PURE WOOD FIBRE

This shows how the room looks when finished. It suggests but one of very many artistic schemes of design and decoration possible with BEAVER BOARD walls and ceilings.

Extensive advertising, backed up by the quality of this product, has created an extensive demand. Let us assist you to realize on such easily-earned profits. A postal inquiry will bring complete details.

Handle a line of paints and varnishes made by a firm with a long-established reputation for satisfactory products.

Canada Paint Products have been well and favorably known to the trade and general public for the past fifty years.

Here are reasons why The Canada Paint Co. is able to maintain a full line of Paints and Varnishes of a high standard of quality.

The most important ingredients used in the manufacture of strictly high-quality paint are linseed oil, white lead and coloring pigments.

In Winnipeg, where the best No. 1 North Western Flax-seed can be obtained at the most favorable price, The Canada Paint Co. operate their own Linseed Oil Mill. Linseed Oil is the life-blood of paints and varnishes, and no purer or better oil is produced than Canada Paint Hydraulic Pressed Linseed Oil.

In Montreal, The Canada Paint Co. grind their own White Lead. The reputation Elephant White Lead has in all parts of the country speaks for the efficiency of this part of The Canada Paint organization.

At Red Mills, Que., The Canada Paint Co. mine and treat their own iron oxides for the production of oxide colors. Oxides produced at Red Mill are the purest known to exist in the world.

With control of the principal raw materials entering into the production of their products, The Canada Paint Co. are able to maintain a high standard of quality. This is the keynote of Canada Paint Products.

The long manufacturing and business experience of The Canada Paint Co. behind the goods themselves presents an unusual opportunity for paint dealers who are looking for the best paint and varnish proposition to push. Our Representative will lay before you a plan that will not only make your paint business more profitable for you, but will also make it the most interesting and prominent part of your business if you are an aggressive business man.

The Month of June— For Bride and Groom

June is the month of weddings.

And June is a **Community Silver** month.

Society news, notes of thanks from the bride, gossip of the guests—all touch upon the charm of **Community Silver** and its appropriateness as a wedding gift.

June is a harvest month—truly a harvest for the dealer—the month in which he reaps handsome profits, profits which usually mature in one month.

Community Silver and June weddings. One's the seed, the other's the soil.

We furnish the seed, the "community" the soil, and the dealer reaps the profits.

Mr. Dealer: Don't overlook **Community Silver** in sending Miller-Morse your **May** orders.

Send for illustrations and prices of the three new styles shown on left.

wedding was solemnized at the residence of the bride's sister.

The popularity of the bride and groom was evidenced by the numerous presents received. One of the most appropriate was the Community Silver set of seventy-two pieces, given the young couple by the members of the Retail Clerks' League, with which the groom is prominently identified.

After the honeymoon trip to Winnipeg, Toronto and Montreal, the happy couple will be at home to their friends at the Strath Apartment

a Morris Chair from the members of the E.O.T., a literary club which meets "Every Other Thursday," and of which the bride is Secretary.

On the centre table was a resplendent array of Community Silver representing the gifts from relatives and friends of the bride and groom.

It was noticeable that these presents elicited most favorable comment and undoubtedly will be appreciated

And Flora, you can't imagine how George and I appreciate the set of Community Silver Forks and Spoons you and Bess gave us. Mother says you have always shown such good judgment in selecting gifts

We Appreciate Your Mail Orders and Ship Them Promptly

The bride was the recipient of many handsome presents, of which the most admired, perhaps, was a cabinet of Community Silver from her classmates.

Lovely spring flowers, daffodils and tulips were in profusion in the drawing room and

MILLER-MORSE HARDWARE CO. LIMITED

"THE BIG WINNIPEG HOUSE"

The dealer who wants to make a big **paint** profit should stock a **complete** line of paints, varnishes and supplies.

He must handle a product of **known** worth, that will give satisfaction to householder, contractor and painter—a product that will bring his customer back for more and add to the good reputation of his store.

Since 1842 dealers have found that it is an easy matter to hold the whip hand in the paint trade of their district if they handle

Lion Ratchet Braces

Get the idea firmly fixed in your mind that the LION is first and last in QUALITY Brace. It isn't made to sell at bargain prices, but to give a service that will satisfy your trade.

As a dealer, you know that tools of this kind are the most profitable to sell. You get a fair price, a fair profit and no complaints. You know, too, that when a tool gives exceptional service, it usually means an order for another.

LION Ratchet Braces give just that kind of service and therefore make the soundest kind of basis for a growing trade.

Heller-Aller Force Pumps

"The very profitable and reliable kind"

Pump Cylinders are made of heavy brass tubing, which has a double advantage.

It ensures the very best wear and permits the use of very coarse thread on cylinder caps (eleven threads to the inch). This prevents the cap threads from wearing or rusting off and dropping into well.

Heller-Aller Force Pumps are equipped with the most efficient, tried and tested valves. They never fail in service.

Write for full information.

The
R. McDougall Co., Limited
GALT, CANADA

Prosperity Rampant In the Peace River

Climatologists have figured out that a thousand feet reduction in altitude is equivalent to between three hundred and three hundred and fifty miles of latitude. Calgary district is about three thousand feet above sea level, Edmonton a little over two thousand; Dunvegan, on the Peace, is thirteen hundred, and Fort Vermilion, farther down the river, is only nine hundred and fifty.

These figures, considered along with the tempering influence of the warm Japan current, whose soft breath is wafted across the Rocky Mountain range on the wings of the far-famed Chinook, go to explain the miracles of production now heard of from what was once supposed to be the frozen and forbidding North.

So writes in the May MacLean's, W. D. Albright, a brilliant young journalist-farmer, now 800 miles north-west of Edmonton. On the ground, about which he talks, he is authoritative and convincing. The producing agents are getting down to business. Their assumption of such operations means a speedy return to business progress. Read this striking description of the third chapter in Western growth.

Then again the May issue of MacLean's is unusually bright by reason of the excellence of:

Canadians at Harvard. By H. G. Black.
John McClary—Still At It. By W. A. Craick.
The Business Outlook. By Jno. Appleton.
The Princess of the Stage. By Margaret Bell.
An Automobile Sprite. By B. B. Cooke.
The German Electric Genius. By F. W. Wile.
And the Five Entertaining Short Stories.
By Sullivan, Cooke, Pinkerton, Rorke, and Quarren.

The Coburn cover design for this month will appeal to every lover of Canadian art.

Send us a postcard and have your name placed on our subscription list.

Subscription $2.00 a year. *Twenty cents a copy.*

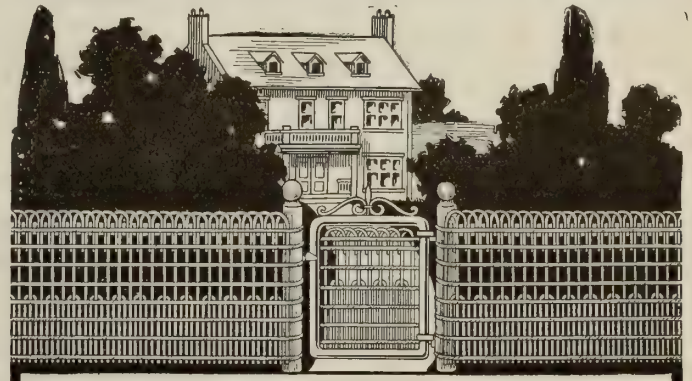
A Novel Feature of the

MAXWELL
"Favorite" Churn



—and one which has made it popular wherever used—is the

BOW LEVER

No other churn has this lever. Handle can be adjusted to centre, left or right, whichever is desired, or is easiest for driving. The frame is of light rigid steel with bolted trunnions, and the barrel of best imported oak with aluminum hoops. Swings on roller bearings and is exceptionally easy-running and durable. A splendid seller.

Send for Illustrated Catalogue of the "easy-to-push" Maxwell lines.

MAXWELLS LIMITED, St. Mary's, Ont.

Establish a Profitable Ornamental Fence Department

Handle a line of fencing that is bound to give long continued satisfaction—fencing that not only protects but beautifies property, as well—fencing that can't help bringing more trade to your store. Such is

Peerless Ornamental Fencing

Every stay is made of strong, stiff wire that will not sag. This fencing is made from galvanized wire and in addition, is given a coating of zinc enamel paint, thus forming the best possible insurance against rust. Peerless fence is easy to erect and will hold its shape for years to come. We also build a full line of ornamental gates.

Send for Dealers' Proposition

Get our literature showing many beautiful designs for lawns, parks, cemeteries, etc. Also ask about our farm fencing and gates.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

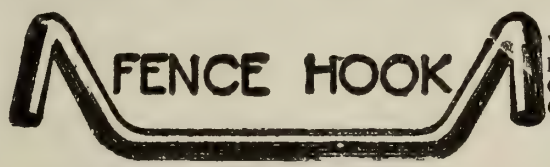
THE "WANT AD."

The "want ad." has grown from a little used force in business life into one of the great necessities of the present day.

Business men nowadays turn to the "want ad." as a matter of course for a hundred small services.



The "want ad." gets work for workers and workers for work.

It gets clerks for employers and finds employers for clerks. It brings together buyer and seller, and enables them to do business though they may be thousands of miles apart.

The "want ad." is the great force in the small affairs and incidents of daily life.

HARDWARE WINDOW DRESSING—THIS is the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

GOOD STENOGRAPHERS ARE WHAT every employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

The White Dove Hand Machine

is finished up in white enamel and gold bronze, and is beyond a question of doubt the best-looking hand machine on the market.

It does not have any gears on it to get out of order, and it obtains its great power from a 25-lb. balance wheel, which is underneath the tub and runs on ball bearings; this makes it one of the easiest-running machines on the market.

It is also noiseless on the account of not having any gears to grind.

No trouble, for there is nothing to get out of order; once sold, it stays sold.

We are giving exclusive agency to dealers, one dealer in each town.

Catalogue on Request

The PULL-EASY Garden Cultivator

IT IS ADJUSTABLE TO ANY WIDTH ROW

This handy garden tool can be used both as a rake and a weeder. Patented slide grooves, secured by thumb screws—allows a width adjustment varying from seven to eighteen inches. When plants are young, middle tooth can be removed, the plants straddled and two rows worked at once. Weighs but four pounds. Indispensable about the yard or garden.

For Sale by all Leading Canadian Jobbers.

THE PULL-EASY MFG. CO.

110 Barstow Street WAUKESHA, WIS.

Full Stocks and Prompt Delivery

We can supply your every requirement in sheet metal goods promptly, and at fair prices from our works at Oshawa, or the nearest branch to you.

Get after the builders and contractors in your district and fill their needs in Pedlar's Metal Ceilings, Metal Shingles, Eavestrough, Round and Square Conductor Pipe, Fittings, Corrugated Iron and Stamped Ornamental Work.

We are the largest sheet metal workers in the British Empire, and guarantee you service and satisfaction.

Big new reference catalogue 22 H.M. yours for the asking. It should be on your desk.

Slow-Pay Customers

Are always a source of worry. Some of your best customers may be the slow-pay kind, but you're afraid to ask them to pay up lest they take offence and go to some other store. You hang on to them for dear life, for if they go elsewhere you are taking big chances of ever getting the money they already owe.

The method of account collecting adopted by the **McCaskey Account Register** enables you to collect accounts easily and without offending customers.

Each statement that you give out contains the amount of previous purchases brought forward. The total account is naturally before the customer's eyes at every purchase—it is considered a matter of course and as a result it does not offend—yet the customer is always posted as to how much they owe and they pay up without causing you any trouble.

Send Coupon and we'll tell you how to save much trouble and increase profits.

CHICAGO STEEL BENDING BRAKES

(Made in all sizes)

Regarding the Steel Bending Brake we purchased last spring, are pleased to report that we are more than delighted with this machine, not only with the way it is constructed, but with the work it turns out. We formerly used a —— brake, but are very glad indeed now that we have made the change. We get more speed and better results.

Yours truly,

The Steel Bending Brake Works Ltd., Chatham, Ont.

The Beauty, Durability and Ease of Maintenance of

RONUK FLOOR POLISH

—makes permanent customers for dealers who sell it. Every person who buys Ronuk from you will come back for more.

And Ronuk is being very extensively advertised. Daily newspapers and magazines throughout Canada are carrying the message of Ronuk into every home where there are hardwood floors or linoleum to use it on.

The dealers who first stock Ronuk will reap the most benefit from this campaign. Will *you* be among them?

Ronuk retails at 10c, 20c, 35c, and $1.00 the tin. For dealers' prices, etc., write

← That Trade-Mark

On the back of a STANLEY No. 241 Butt Distinguishes the Original No. 241 Butt sold in Canada and elsewhere from inferior imitations.

The Stanley No. 241 Butt is a Wrought Steel, Loose Pin Butt with a Planished Surface and a Plated Finish. It sells for a little higher price, because it is worth more money. And it is worth more money, because it is better made in every respect. Let your own good judgment decide—that's enough. **We can make prompt delivery in any quantity of all Stanley Products.**

Failing to get Stanley No. 241 Butts from your jobber, we shall be pleased to quote prices direct.

Ross Rifle Luck

Users of "Ross" Rifles invariably comment on their good luck, because the power is such that judging of distance is scarcely necessary, so if game is **seen**, it can be **hit** and **bagged**. Dealers are wise to order early, as, despite increased facilities, it is difficult to keep up with orders.

THE MACLEAN PUBLISHING COMPANY, LIMITED

Vol. XXVI. Publication Office: Toronto, Canada No. 20

May 16, 1914

"DURING the month of March, just ended, 602 persons in Chicago were killed with pneumonia, a dirty-air disease. This means that there were practically twenty deaths a day from a preventable disease. For the same period there were 338 deaths from tuberculosis, all forms, a little more than half the number of deaths caused by pneumonia. From now on the death rate from pneumonia will drop, reaching its low point during the outdoor months, and beginning to rise again with the coming of cold weather, when people shut themselves in DRY, OVERHEATED CONDITIONS."—From Bulletin Board of Health of City of Chicago.

YOU CAN HELP

Mr. Heating Contractor, in lessening the terrible toll of these diseases in Canada, by advocating and installing

"GOOD CHEER"

CIRCLE WATERPAN WARM AIR

FURNACES

It requires GALLONS, not quarts, of water added to the heated air, to even approach natural atmospheric conditions indoors, and to promote that congenial, healthful and satisfying warmth which every householder would have if he could.

BIG Ben is the biggest thing to-day in the American alarm clock industry. He has everything in his favor—quality, looks, and style. He runs on time, he rings on time, he stays on time.

Slender, massive, richly plated, he stands seven inches tall, with well-shaped distinct hands and a big broad dial easily visible in the dim morning light.

He rings just when you want and either way you want—*five straight minutes* or every other half minute *during ten minutes* unless you shut him off.

His keys are large, strong, easy to wind; his voice deep, jolly, pleasing to hear. The movement plates are bridged like on a Waltham watch— you can change both mainsprings *without taking the movement apart.* The pivots are of hard steel piano wire $\frac{22}{1000}$ of an inch thin. The escapement is a hardened steel pallet escapement—not a pin escapement like that of other alarm clocks.

We are carrying on hand a stock of Big Ben specially put up for *Canadian* trade, 6 in a carton together with a full set of Store Selling Helps, (posters and show cards.) On an order for 12 we give a solid mahogany display stand. On an order for 24 we print your name free on dials and with an order for 48 we send a striking, electric flashing sign, just the thing for your window or counter.

The minimum retail Canadian price is $3.00, and there's a $3.00 resale tag on everyone you buy.

Yale Triplex Blocks

A "Line of Steel from Hook to Hook"

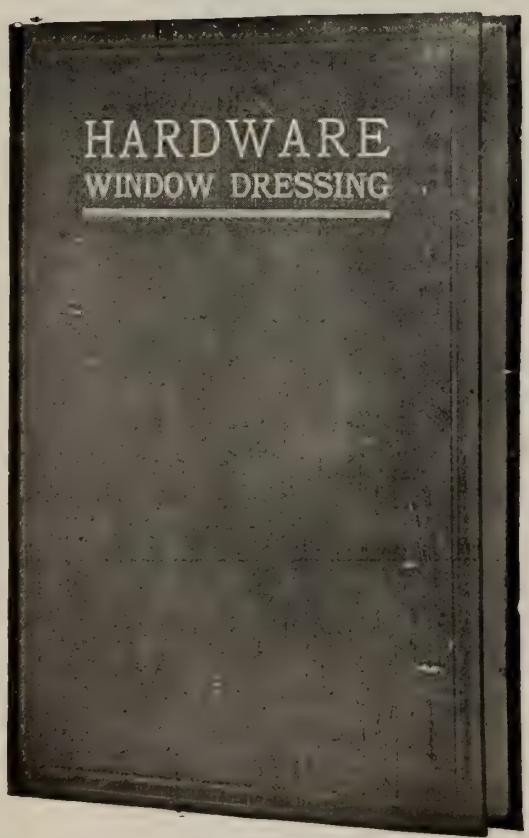
Every load-lifting problem, on the farm, in the factory, machine shop, garage, to lift your gas engine or to lift your motor boat out of the water, is solved with a Yale Triplex Block.

"Safety First" in material and workmanship justifies the Yale Triplex Block, and is behind your sales to your customers.

Fairbanks Valves

"Disc Renewed in one minute"

Will remove all valve troubles. They are built of high-grade material, to withstand a great deal more than their rated pressure. The renewable disc feature is unequalled by any valve on the market. The valve stems are packed with Palmetto Twist packing, which will remain soft and perform its function better than any other packing made.



Fairbanks Scales, Small Tools, Automatic Supplies and other mechanical lines are the best the world affords.

The Brand That Was Best In 1840, Is The Best Brand To-day

This enthusiastic statement from the elderly hardware merchant aroused the customer's interest.

"Have the DISSTON works been in business all those years?" he questioned.

"Yes," returned the hardware merchant. "They started with the manufacture of saws in 1840. Advertising was not thought of in those days, and their business grew simply because of the exceptional merit of the goods they made. Just look at this saw. You would know it was a good tool—even without the DISSTON Brand upon it, for there is something about the appearance of a good tool that carries to the eye a conviction of its efficiency."

"But, you said the price was a little higher," interrupted the customer.

"Yes, a DISSTON saw, tool, or file, may be slightly higher in price than others, but you get the difference in quality, finish, and the greatest ease in doing your work which is afforded by a **good** tool. Now, look at those other DISSTON tools," went on the hardware merchant, directing the customer's attention to the plumb and level, bevel, trowels, and other DISSTON tools which lay on the counter. "DISSTON makes a large variety of tools, in addition to saws, and every one partakes of the same high quality, and upholds the unequalled reputation that they have established for their saws. As a matter of fact, almost every known trade uses one or more DISSTON tools, and I venture to say, in the light of my experience, that more DISSTON tools have been used in the construction of buildings in this, and foreign countries, than any other single brand."

"Well," said the customer, "I think I will equip my new tool chest entirely with

DISSTON Brand Goods

Do you talk to your customers like this, Mr. Dealer? You will find it the easiest way to do business. Also remind your customers of the various tools they need by using our set of five hangers, each showing a different tool. Here is one of them. All are brilliantly colored.

Let us tell you the reason,

that you should stock up with the Dana Peerless Freezer, **right now.**

The Peerless makes its greatest appeal in Summer. Although it's in demand all the year round—naturally, in the sultry months, the demand is greatest.

And the Peerless appeals irresistibly to those people — the Summer campers, the commuters who go to live, far from the stores, where good ice-cream is procurable.

If you have it in stock, good and early, you'll be able to show it to them before they go,—you'll have time to demonstrate it—to point out the tall, slender can—to show them how the dasher removes the cream from the sides as fast as it becomes solid. You will be able to let them crank it themselves, to let them discover that it is as easy to grind as a watch is to wind.

That's the reason you should stock the Dana Peerless **now.**

A mighty good reason, isn't it?

You'll think so, when we tell you about the profits.

So ask your wholesale hardware supply house about them now.

Manufactured and Sold in Canada by

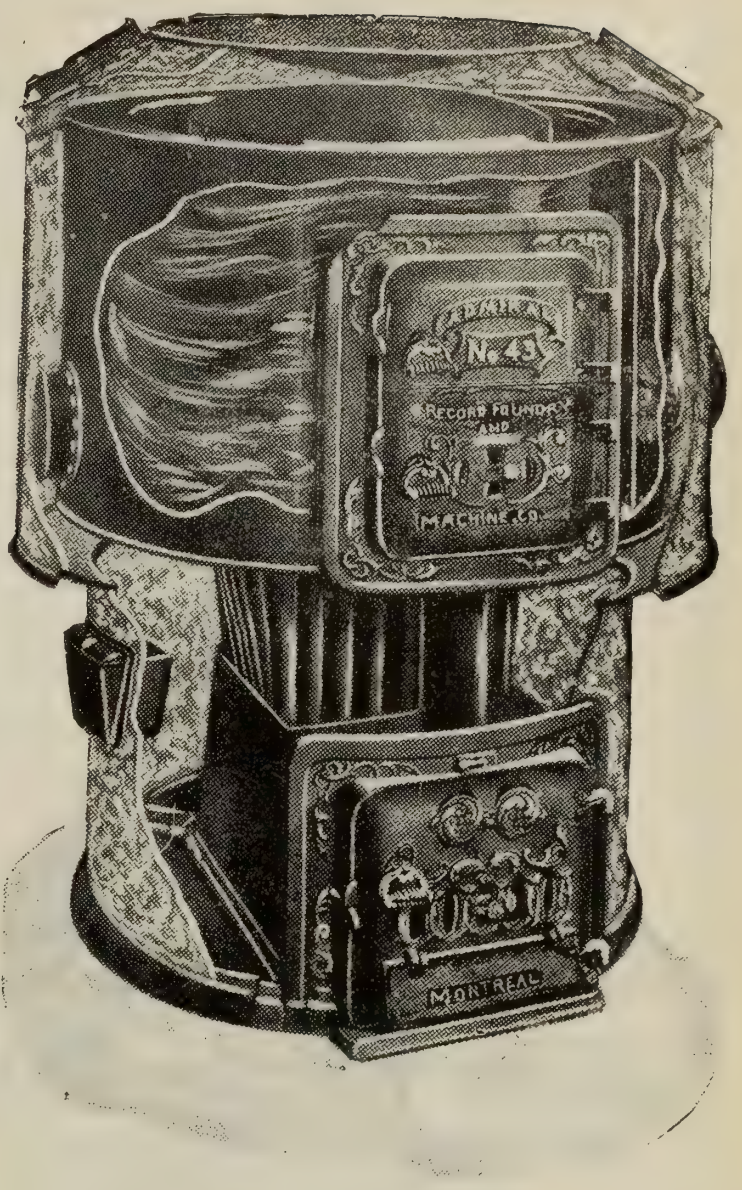
The ADMIRAL Furnace

keeps customers satisfied



It pleases them because it is strong and durable, and because it gives quick, efficient heat with minimum consumption of fuel.

It has large steel gas-tight radiator, large double-feed doors, especially adapted for wood, and smoke pipe opening above the feed-door which prevents the smoke coming out of the door when feeding coal. Large combustion chamber with flues 4x24 inches do not clog up with soot.

The Admiral Furnace is guaranteed to give highly satisfactory service—and it pays a good profit.

We'll take pleasure in sending you full information. **Why not write now?**

Burns Hard or Soft Coal or Wood

Note Novel Construction of Fire Pot

The scientific construction of this Fire Pot is such that every separate RIB or SECTION forms a BRACE for the other, making it absolutely impossible for any two sections or ribs to WARP OR CRACK at the same place. The corners of the pot being perpendicular permit rapid clearance of ashes, thus giving quick radiation of heat. The top forms a COMPLETE CIRCLE, while the bottom a PERFECT SQUARE, thus allowing a large amount of grate surface.

Grate Partly Removed from Ash Pit

This is one of the MOST PERFECT FURNACE grates on the market. It is of the triangular operating pattern, each pair of bars being operated independently by the use of a handle applied to the two centre bars.

Why Not Get Some of the "Velvet" Too?

Referring to the very interesting series just concluded in Hardware and Metal—"The Inside History of a Hardware Business"—did you notice that the turning point successward came when the Hardware Man pushed Metal Ceiling and Roofing?

Note his own words:

"There was one reason why this outside business—Metal Ceiling and Roofing—benefited my financial standing to so marked a degree. It required no capital investment. I secured a commission on what business I placed without having to invest a single copper. There was no risk to it whatever. Furthermore, it did not add to my overhead charges. Everything that I made, literally speaking, was 'velvet.'"

If you too are wise you'll write to-day to the largest sheet metal people in the Empire, established 1861, and get profitable details.

This Micrometer Sold Itself
—and then saved more than its cost

While taking some photographs for advertising purposes in a large machine shop recently the Starrett advertising man saw a machinist using several ordinary Starrett micrometers on a turning job. The piece had five different diameters and there were to be 5,000 pieces like it.

The advertising man called the foreman's attention to the fact that a

Starrett
Quick-Acting Micrometer

would do the measuring in less time than was taken with several micrometers of the usual kind. He explained that pressure on the plunger in the end of the thimble permitted the spindle to slide to its adjustment. After listening to the description of the Starrett, the foreman sent out to a nearby hardware store and bought the micrometer, paying $10.00 for it (No. 204 in Starrett catalog.) A few days later the foreman said that about three seconds were saved on each measurement of the five diameters, and readings were taken twice on each piece. As there were 5,000 pieces this meant a total saving of more than forty hours. The micrometer is still in service—having more than paid for itself with a large balance to its credit. We will give you the names of the shop and foreman if you want them.

You can sell this tool too, if you will just look into it and talk it up. Send for our big, new, free catalog No. 20 M.A. describing the full line of Starrett Tools and hack saws.

"That's A Gurney-Oxford A Splendid Stove"

No woman ever "cuts" the Gurney-Oxford when she sees it in your window.

She knows, by personal experience or hearsay, that it's a stove of exceptional character. That's good advertising. It's good for your business to have one woman say to another as she passes your store window: "That's a Gurney-Oxford—a splendid stove." Seventy odd years of stove-making have taught us a great deal—and the Gurney-Oxford is the result of constantly improving methods and design.

We believe that to-day the Gurney-Oxford is the most economical, efficient and satisfactory stove made.

You—a dealer in stoves—are interested in this because it is the making of a business to sell goods that are in every case satisfactory. And that is why the Gurney-Oxford has been sold for more than seventy years in GREATLY INCREASING NUMBERS.

"Metallic" Materials mean more than one profit to the Dealer who is wise enough to handle them. Apart from the question of money—and there is "money in 'Metallic'"—there is profit in the prestige that goes with the handling of these Standard Materials. Many customers are made for the "Metallic" Dealer by the reputation of the goods alone.

Write to-day and tell us what you are interested in. Send dimensions of any job and we will send you prices.

McClary's Goods Always Recognized As Quality Goods

Since its first activities 65 years ago, our now famous organization has built its reputation on the "Quality" basis. All McClary's goods bear the "Quality" mark, and prominent amongst these is our

SUNSHINE FURNACE

Its big, new feature is the inclusion of that remarkable rust-resisting metal, American Ingot Iron in two vital parts, the Dome and Radiator. This construction gives the "Sunshine" a superior feature of incalculable value to the dealer when talking durability and service.

Then there is the semi-steel indestructible fire-pot in two sections, the latter feature allowing the top half to expand independently of the bottom half and vice versa. This saves danger of cracking, a common experience with one-piece fire-pots.

And there are many other features of first importance. Write for our booklet, "McClary's Way of Heating."

McCLARY'S ON GOODS IS A QUALITY NAME.

9 RUNAWAY BARGES SEND 156 CRAFT ADRIFT AND SINK 7

Boats Break Loose from Tow and Sweep Yacht Anchorages.

HAVOC ALONG SHORE OF THE HUDSON RIVER

Three Houseboats, with Families on Board, Among Those Struck and Damaged.

Nine runaway barges, laden with sand, gravel and other building material, swept through the numerous fleet of yachts, motor boats, launches and other small craft moored in the Hudson River between 137th and 170th streets yesterday morning, sinking at least seven of them and sending 156 adrift, many of them damaged.

All day the owners of the craft and the harbor police were busy searching for the drifting vessels, many of them being found as far south as 100th street.

A sudden squall out of the northwest at two o'clock yesterday morning parted the hawsers by which two tugs of the Cornell Towing Company were towing nine laden barges down the river against a rising tide. The nine barges, which had been lashed together, parted, two of them being blown inshore at 138th street, while the tugs caught the other seven, towed them inside of the cove at Fort Washington Point, opposite 176th street, and anchored them while they put out to stop the other two barges.

But these two barges were blown swiftly into the moorings of the Colonial Yacht Club, at 138th street, and with such force that three motor boats were sunk, forty more small craft were stripped from their moorings and the landing stage was smashed. The freed vessels started down stream. Their cabins had been crushed in by the barges, their sides scraped and their seams sprung in many instances.

The wrecking of the landing stage awa

The news story opposite goes to show how much damage may result from the parting of a rope. Viewed in this light, every poor or overstrained rope is a public menace.

A man's responsibility does not end with himself—it embraces everybody whom his dealings or actions may affect.

You, as a dealer, can do much to fulfill your responsibility by selling only Plymouth Rope, which is reliable, and by educating buyers to purchase new rope oftener.

Both these courses are also profitable—in money and good-will alike.

¶ The fact that the successful business man is an advertiser is usually incidental. He is an advertiser because he is wise and possessed of good, sound business sense and an analytical mind. At some time or other he came to the conclusion that advertising could be made one of the mightiest factors of his business organization, and having arrived at this conclusion, he just naturally went to it and advertised.

BOSS OVEN

GLASS DOOR

GUARANTEED

No. 750

BOSS Glass Door OVENS

Sold throughout the World. In almost every Country where Oil, Gasoline or Gas is used as fuel, you will find the Boss Oven on sale.

Its tremendous popularity is due to the fact that it is first of all a good and economical baker. We guarantee it to bake or roast satisfactorily on any good oil, gasoline or gas stove, or "money back" without argument.

The "BOSS" is made better than any other Oven. Only the best materials are used. The body is made of Mecca Lustre Polished Blue Steel. The linings of heavy Corrugated Tin Plate, having thick asbestos inner linings throughout.

Its Patented Glass Door, which we guarantee not to steam up or break from the heat, has been a universal success. More than 600,000 of this style are now in daily use.

Many patented and exclusive features are found in the Boss. The new Hinge and Door Support leave the door opening entirely free when Oven is open. No danger of burning the hands or arms by coming in contact with wires or chains.

Large variety of styles and sizes in Glass and Steel Doors are shown in our new catalogue, which will be sent on request. Write for it to-day.

Write to-day for Complete Catalog and prices.

NEW BOSS OIL STOVES

Every Vital Feature in the construction of an Oil Stove has been carefully worked out in the "New Boss." There is nothing complicated to get out of order—nothing hard to understand to operate it properly.

Simple but Substantial construction has been adhered to throughout. The extra wide top gives more room for cooking utensils. The legs are strong cast iron, making the stove very rigid.

Patented High Wick Limits or fingers are provided on the inner combustion tubes which are engaged by the wick when turned at full burning height. These fingers automatically trim the wick when chimney is revolved.

The Intense Blue Flame plays right against the cooking utensil, giving quicker results and using less oil than most other stoves.

AUTOMATIC POWER WASHER
You Can Buy It In Canada

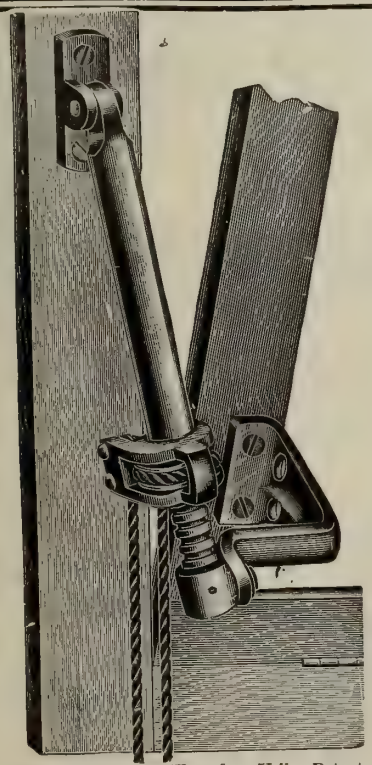
Automatic Power Washer.
(Also made in Electric type.)

The wise dealer will consider this fact: when he begins to handle Power Washers (and the demand is now compelling all up-to-date dealers to handle them) he should take up a machine that is dependable. One that is so absolutely satisfactory to the people that he will never have to consider making a change.

The AUTOMATIC is Such a Machine

It is made of the finest materials. It is well made. The workmanship is first-class. Nearly all the castings are malleable. Fast-running gears are machine cut. All metal working parts are machined. Babbitted bearing for drive shaft. Bottom outlet, galvanized, with brass faucet. No need to tilt tub to drain it.

The best wringer made in the world. The rolls are special, stamped "power and electric," and are better than the regular five-year quality. The coil compression springs are extra length, giving wide latitude to the rolls. No need to change tension when wringing light or heavy articles. Safety release. All pressure instantly thrown off. Controlled by a mere touch with a convenient lever.



Wash and wring at same time, or do either alone. Add our Universal Rod and operate the churn, grindstone, grain grader, sausage mill, etc., at the same time.

The greatest time and labor-saving machine on the market. Thousands in use, and every one giving satisfaction.

Full particulars in our special washing machine book, 32 pages, known as Bulletin 107. Ask for it. It is free.

Sold by Canadian Jobbers.

TWO CENTS PER WORD

You can talk across the continent for two cents per word with a WANT AD. in this paper.

Sandusky Power or Electric Washer

Here is a thoroughly practical Washer, one that will do a family washing right at home, under sanitary conditions and save from $1.00 to $3.00 each week, enough to pay for it in a short time.

Every Dealer who has stocked it has found it exactly as represented—first-class in every respect and a splendid seller.

Every woman is captivated by the way it starts automatically and by the perfect condition of the clothes and their snow-white cleanness after washing. You will find it

A Trade-Bringer

worth handling, because every woman who gets one recommends it and sends more customers to you.

One big selling point which takes with prospective buyers is the novel wringer device. It permits wringer to be started, stopped, reversed or swung to any position. And while the washing is going on, the wringer will wring from the rinse water to the bluing and from the bluing right into the basket. The construction of the entire Washer is the best possible.

Space won't permit full details, but if you'll write we send them and tell you about our Guarantee Certificate plan which helps you make quick sales. Our proposition is worth sending for. Don't neglect it.

Business Development

¶ Do you ever feel that your present occupation prevents the development of your business talent?

¶ Many a young man is engaged in office or store clerking. Owing to the nature of the business, he has but a narrow range in which to exercise his talent. He cannot relinquish his position to seek one giving better opportunities and paying a larger salary. To do so would be to give up his only source of revenue, and someone may need his support. Yet it is imperative that he increase not only his business, but also his salary.

¶ We will solve the problem for you. We have need of part time salesmen. Men who can devote spare hours to our work and make as much, and in many cases, more money than they can from their regular occupation. Many of these men we develop into regular road men with a high salary. Do you feel that there are latent forces in you, waiting for an opportunity to assert themselves? If so, we want you to let us show you how to discover them. Write at once for the particulars.

MacLean Publishing Co.,

"The Accommodation"—Canada's first steamboat, and thus the first steamer on the St. Lawrence River, 1809-1832. Used our rope.

100 Years Ago

The above picture depicts the first steamboat in the British Empire, built by the Hon. John Molson, early in the 19th century. As the illustration shows, "The Accommodation" is being towed through St. Mary's current to its Montreal landing. The tow line used on this occasion was manufactured in our Montreal factory.

CONSUMERS CORDAGE IS ALWAYS DEPENDABLE

That our cordage is still in demand, with those requiring the best, is shown by the following photo. The "Sin-Mac" towing two molasses-ladened United States brigantines up the same St. Mary's current, just 100 years after "The Accommodation" first plied these waters. At the time this photo was taken, the two American vessels were decorated in honor of July 4th. On this occasion, also, the towline was of our manufacture—made in Montreal.

HARDWARE AND METAL

Vol. XXVI. MAY 16, 1914 No. 20

Many Alberta Dealers at Three Day Conference

One of the Livest Questions Discussed Was That of Wholesalers Selling Direct to the Consumer—Strong Resolution Introduced—Collection of Small Debts Given Much Attention—T. A. Gaetz, Red Deer, the New Head.

Reported by Staff Representative

CALGARY, Alta., May 12.—One of the most remarkable conventions ever held by the Retail Merchants' Association came to a close last week in Calgary. This was the first annual convention of the Alberta Branch, which has been organized much less than a year; but it is big for its age. The convention lasted three days—May 5th, 6th and 7th—and was remarkable for many things. Firstly, the business consisted more of discussion on subjects of interest to the retailer, rather than on the hearing and delivering of lectures. About three dozen resolutions were adopted, and these referred to subjects upon which the members had their own opinions. Often these were at variance, which made the meetings more interesting.

The attendance was good. Members came from every corner of the province. There was no monopolizing the business by the larger places. Those who attended consisted mainly of general merchants, with a good sprinkling of hardwaremen. What grocers there were, were mostly from the larger centres, and they joined hands with the general merchants. The hardwaremen looked after their own business.

Tuesday morning was spent in welcoming the visitors to the city, and in registration. The evening session was presided over by the president of the provincial board of the association, J. F. Glanville, of Calgary.

The session was mainly taken up by the delivery of addresses by Major Duncan Stuart and C. L. Carter, the latter having appeared in last week's issue.

The Small Debt Court.

In the course of his address on "The Small Debt Court, and Its Relation to the Farmer," Major Duncan Stuart stated that the machinery now in existence in Alberta for the collection of small debts was an absolute failure.

He referred to the question of imprisonment for debt, and said that the idea of imprisonment for debt was a thing of the past. He did not think in the first place that a man should be imprisoned for debt, and in the second place he did not think the government could ever enact any such legislation. In the third place, he did not think it would work well if such a law were enacted, be-

View of 8th Avenue, Calgary, Showing Municipal Railway.

cause the feeling of the people was against it. The judges, lawyers and court officials had no heart for that sort of thing. They did not want to see men handcuffed, and taken away to jail. But if a man owed a just debt, there ought to be an efficacious way of getting after the man's earnings.

He had submitted a proposition for the consideration of the government by which after getting judgment, the creditor could call the debtor before the court, and have him examined as to the wages he was earning, or as to any other money that might be owing to him. If the judge was satisfied that the debtor was earning more than sufficient to supply the needs of his family, then it would be in the power of the judge to make an order that would entitle the creditor to serve notice upon the debtor's employer and without going into court again requiring him to deduct from the debtor's wages so many dollars per week as the judge might think right.

As for farmers who contracted debts, he thought that if these debts had been incurred for the supply of the necessaries of life, he was of opinion that these debts should be placed against the homestead, and with a provision that the homestead could not be sold for a number of years in order to meet these debts.

In concluding, Major Stuart stated that, while there was a small debt court, at the present time, he thought a judge should be appointed to deal with small debt cases summarily. (Applause).

A short discussion followed the close of the address, among those taking part being: A. M. Anderson, D. A. Thompson, Coronation; J. G. Robertson, Foremost; and N. A. Gaetz, Red Deer.

WEDNESDAY MORNING SESSION.

When the delegates arrived at Paget Hall on Wednesday morning, they were split up into divisions. There should have been at least five divisions, but eventually they resolved themselves into two, the hardware section and the general stores. The latter included grocers, dry goods merchants, and general merchants. In the body of the hall, the resolution committee had a sitting at which they prepared two score resolutions to be brought before the general committee at the afternoon session.

The hardware delegates met in the basement. The Western representative of this paper interviewed several of the hardwaremen present before the discussion commenced, and learned that there was going to be some hot talk about wholesale firms doing business as retailers, and in other ways catering to the consumer. While the discussion was in progress, the representative walked in to see how things were progressing, and found things pretty lively in the direction above indicated. So pointed was the talk he was asked to leave the room, a promise being given that information would be handed out later as to what had transpired.

The meeting of the general merchants was not so secret, though the criticisms cast at wholesalers were none the less severe. However, there were several other subjects discussed, which readers of this paper will find very interesting.

A. M. Anderson, chairman of this division, spoke on the severe competition felt in the smaller places. This gentleman's observations were of importance because he expressed his opinion freely during the discussion on the subject of running a business on the cash or credit basis. He declared that the former was impossible in this part of the country, and that where a man tried out the cash system, he would eventually revert to the credit system.

Some Candid Criticism.

D. R. McIvor, Cowley, was one of the first to start an attack on the wholesale houses for selling direct to the consumer. He believed that the farmer, after a few years with this organization of theirs, would find out that they could not handle goods on as cheap a basis as through the retailer, and that it would be to their interest to attend to their farms, and have somebody else manage their supply end.

He claimed that whenever retailers brought a charge against wholesalers they were told to the face that the charge did not exist, and all the while the goods were lying at the depot. At this convention, said Mr. McIvor, the general stores especially should take strong action, and bring out some plain statements. If the wholesalers were bound to be retailers, they should let them be retailers, and the retailers should become wholesalers.

A member from Bassano told a story of a wholesaler and a contractor in that town. The latter had been trading with this speaker, but one day a wholesaler came to town, drove out to the place where the work was proceeding, interviewed the cook and the boss and took the business. If he had been dealing with this wholesale house, he would have been protected. His only protection was in an association like this. There were more wholesale travelers going around than the retailer could buy from.

Often, said the speaker, a wholesaler came to town who did little business, whereupon he said, "If I can't do business with the stores, I'll sell to the contractors, the hotels and the restaurants, and at least get my expenses."

Sees Cure in Organization.

G. W. Buck, High River, referred to by the chairman as 'a big merchant in the south,' was the next speaker. If they organized, he said, when a wholesale traveler came to a town and declared his intention of doing business with the hotels, the fact could be made known, and the retailers could cut him off. It would only be necessary to do it for one month to cure the evil.

Referring to his methods of doing business, he said they had been doing a long credit business, and had found that this gave the mail order people a chance to get in. Later they started as near cash as they could get, with nothing over 30 days. They were told they could not do it, but they had succeeded.

Taking up the question of the mail order houses, he pointed out that merchants were leaving room in lots of small towns for these people to come in. The small dealer in the small town could not carry large stocks, and 25 per cent. of what the customer needs he could not keep in stock. The customer must send away for them; he gets the habit, some of the things he gets from the mail order are satisfactory and eventually he sends them all his business. He thought they should all get down to a practical cash basis, keep their stocks up, and watch the little things that the people wanted and were liable to send to the mail order firm for.

No Hold With Cash.

Mr. Anderson, the chairman, said he did not think it was possible to do a cash business in the small towns. He had tried it, and found it hard. On

ELECTION OF OFFICERS.

The election of officers took place on Thursday afternoon, and was private. T. A. Gaetz, general merchant, Red Deer, was elected by acclamation for president; H. N. Stephens, general merchant, Vermilion; first vice, N. B. Good, Lethbridge; second vice, N. I. McDermid, of the McDermid Drug Co., Calgary, treasurer; and J. A. Bucknall, re-elected provincial secretary. There was a ballot between the first and second vice.

TO RED DEER NEXT YEAR

The next convention of the Retail Merchants' Association, Alberta Branch, will be held at Red Deer, Alta., which is the home town of the new president, T. A. Gaetz.

A fine picture of the delegates to the Alberta Convention. The new president, T. A. Gaetz, is the second man from the right in the second row. J. A. Bucknall, the provincial secretary, is fourth from the right in the front row and on his left is W. H. Andrews, the Calgary secretary.

the other hand, it they limited the credit they gave, they got a hold on their customers; if they had a cash system they had no hold on them, and there was a tendency for them to go to the mail order houses.

Notwithstanding all they had said about getting after the farming community for not showing gratitude, all the farmers were not like that. He had satisfaction in looking back on customers who had stood by him. They were liable to touch on the sore spots only. It was abuse of credit and indiscriminate credit that caused the trouble, but if the credit business was done successfully, money could be made at it. Merchants should use more backbone. It was a mistake to lie down to customers. They should keep a stiff upper lip, look the customer straight in the eye, and customers would then have more respect for them than if they were always cringing to them. That was not business at all.

W. A. Fraser, Pincher Creek, did not agree with Mr. Anderson. He had had twelve years in the West, and his experience had been that you could not do a cash and credit business together. They ought to come out and out for one or the other. There was not sufficient difference made between cash and credit systems. If they were going to give credit, they should place a 10 per cent. advance on the price of their goods, and tell the merchant that he would get 10 per cent. off for cash, but if they got a good living by selling for cash, and 50 per cent. profit for credit, it would be better for the interests of the trade.

Mr. Fraser said that he had no more faith in 30 days' credit than in 30 years'. Thirty per cent. of the customers would leave it for fifty days, and some for a year unless some drastic measure were taken. He had been in the general business. Later he cut out the groceries, with $10,000 on his books. Then they did as near a cash business as they could, carrying only $4,000 on their books. But they could not draw the line too fine. He knew plenty of men in the cash business who would not go back to the old system.

Pleased With the Change.

H. J. Montgomery, Wetaskiwin, made one of the most interesting speeches of the morning. He said he cut out the credit system two years ago, after he had been doing 60 per cent. credit and 40 per cent. cash. After their first year of business, they had $10,000 on the books, the next year $15,000, and the next $20,000. Then they decided that if they could not get their money they would not do business at all, and went into the cash trade. It was not the farmers who were getting the credit, but the townspeople, who were living beyond their means. They expected a drop of 30 per cent. in their turnover. The first day was a miserable one, wet, and did not augur well, but that night they had more cash in their till than they had ever had before, and they never would return to the credit system.

During the first few months the amount of business done was not decreased more than five per cent. After that the business depression came which affected all business, upsetting calculations. Other merchants in the town have decided to adopt the cash system after seeing how well it works.

Mr. Montgomery admitted that they gave credit in some form, but never kept any books. If a man dropped into the store and purchased something, saying he would drop in to-morrow and pay for

it, that was permitted, but no account of it was kept. Then again, if when the delivery man arrives at a house to deliver a telephone order he finds the party out, he would bring the goods back because they were not paid for.

Salaries of Clerks.

Mr. Montgomery then opened an interesting subject. He wanted to hear the experience of dealers in the payment of their clerks. Was it advisable to pay a straight salary, or a percentage. He found it hard to get efficient help. One man was loyal, the next was lazy. Only a small percentage took the interest in the business they should. He often thought it would be better instead of paying a straight salary, to offer the clerk a commission on all sales above a certain amount. In his opinion the clerk would then be anxious to sell more goods.

Mr. Anderson, the chairman, while he did not wish to discourage Mr. Montgomery, said he could not help predicting that he would be back at the credit business inside of five years. He had been through the mill so thoroughly, he knew how it worked out. It started with giving a customer a pair of shoes, say, on approval.

Mr. Fraser of Pincher Creek wanted to know whether two years' experience was not sufficient to prove whether a cash system paid or not. It was up to the retailer to rid the farmer of the impression that the merchant was a banker, and to show him that in running a cash business he was working in the farmer's interest; then the biggest difficulty would be overcome.

The discussion reverting to the question of wholesalers doing business with the consumer, the question was raised whether the wholesaler would retaliate on a dealer who gave information against him. Mr. Fraser drew attention to the fact that the dealer was not always loyal to the wholesalers in his own district.

Officers for Sections Elected.

The meeting of the general merchants then came to an end, and Mr. Anderson remarked how helpful this little fellowship talk had been. He only wished they could have one every month. The election of officers for this division then took place. On the motion of Mr. Montgomery, seconded by Mr. McIvor, A. M. Anderson, Bawlf, was chosen president. W. A. Fraser, Pincher Creek, was elected first vice, and E. F. Purcell, Bassano, second vice. F. F. McDonald, Cayley, was elected secretary.

J. F. Glanville, provincial president, being unable to attend, T. A. Gaetz, Red Deer, took the chair at the afternoon session. The business down on the programme was Report of Resolution Committee and discussion and voting on Inter-Provincial resolutions to be submitted to the Dominion Board. There were about thirty resolutions. Some called for discussion; others were dismissed quickly. J. A. Bucknall, Provincial Secretary, was on the platform.

THE COLLECTION OF DEBTS.

In Alberta the question of debt collection is just as live as anywhere else. One of the important resolutions submitted to the convention in this regard was the following:—

"That this Convention take further steps to press our amendments to the Division Court Act, regarding garnishees and simplifying the collection of small debts."

Mr. Bucknall announced that they had met with some success in petitioning the Alberta Government. A letter had been received from the attorney-general stating that the Premier would see that the bill was introduced next session. Mr. Bucknall said it could not be allowed to rest there, but should be given a last kick to drive it home.

Under this law, a merchant can secure a judgment summons and have his debtor put on oath as to his earning capacity, and get an order, the employer being compelled to deduct so much a week from the man's salary.

Mr. Thompson, Coronation, said it would be effective in some cases, but not in the case of the man who is always trying to beat his creditors. He did not believe in imprisonment for debt, but he believed it would be effective. Both the lawyers in his city said they should have the same law as they had in Ontario.

The resolution was then adopted.

Discussions on Resolutions.

Among the many resolutions submitted, the following are of chief interest to the trade in general:—

That it is the opinion of this meeting that no change should be made in the present parcel post system, as recently adopted by the Government, until it has been fully worked out and tested, and that we should insist, as far as possible, that it be self-sustaining.

On motion of Mr. Stevens, Vermilion, and Mr. Jackson, Pincher Creek, the resolution was adopted.

That it be an instruction from this convention that the information be secured from the retail merchants throughout Alberta as to whether they are favorable to have a special tax placed on large mail order catalogue houses, and that the money so secured through taxation would be paid into the various municipalities from which it is taken.

When this resolution was brought forward, the chairman announced that the resolution committee had decided that, as the Provincial Government had no power in the matter, this matter should be referred to the Dominion Board.

A member wanted to know why, if manufacturers were required to pay a licence fee to operate, the mail order people were not compelled to pay too. Mr. Sevens, Vermilion, answering this, said that the province had no control. Eaton's and Simpson's sent their catalogues through the mails, and their goods went by parcel post, so that it was impossible to touch them unless the Dominion Government did something.

Getting After the Pedlar.

That we consider that it would be in the best interests of the retail merchants of this province, who pay municipal taxes and business taxes, as well as maintain other expenses in connection with the retail sale of merchandise, and that a provincial pedlars' licence be charged to all pedlars, and that a portion of said licence be remitted to each municipality, and that any person who is found making false statements or deceiving the public should have his licence canceled, and also that the present pedlars' licence be amended so that manufacturers who peddle shall be included.

This resolution brought forth considerable discussion. Mr. Johnson, who formerly operated a store at Grassy Lake, told of a traveler who went out there last year, claiming to be a wholesaler, and sold goods at cheap rates. The speaker had been commiserating with his victims ever since, as they were stung, the goods sent being seconds. The man was arrested at one place and fined $10, whereas he had done about $10,000 worth of business. J. A. Bucknall suggested the words "and that the penalty be fixed not less than $50 in each case." Mr. Johnson thought that good. He continued, saying that the only way to handle this was through the boards of trade. Mr. Bucknall replied rather heatedly that if the merchants were alive there would be no need for boards of trade. "You can't do it," replied Mr. Johnson, "they're dead."

The resolution was adopted.

MANY ALBERTA DEALERS AT THREE-DAY CONFERENCE.

That it is the opinion of this meeting that the system of charging for freight cartage at both ends is unfair to the retail trade, and that we recommend that this matter be referred to the Dominion Board, and that they be requested to take such steps as will remedy the evil, and that all merchants buy f.o.b. cars where possible.

Mr. Bucknall told the meeting that a deputation from the Calgary Board of Trade had met the committee that morning, and it had been decided eventually to have the Calgary Board of Trade take steps to have the freight charges arranged so as not to be a burden, as it is now.—Adopted.

Another resolution along similar lines was "that this convention take steps to ask the Dominion Railways Board to order the railways to supply freight classification books when asked for."—Carried.

That it is the opinion of this meeting that, in the event of co-operative society legislation being introduced again at Ottawa, that every effort should be made by the Dominion Board, to see that the same is vigorously opposed.—Carried.

That as a great many requests have been made by members of our association, to make provision for an efficient inspection of the proper weight of artices sold over retail counters, that this convention petition the Dominion Government to take such steps to secure the marking of all package goods with the net weight.—Carried.

That it is the opinion of this convention, that a very large sum of money can be saved by our members, if they would write and secure information from the head office before they subscribe to, or connect themselves in any way with any rating or collecting associations or agencies.—Carried.

That it be a recommendation from this convention, that literature be published and circulated among our members, setting forth all the facts and circumstances — from the butchers' and grocers' standpoints — regarding public markets.—Carried.

A Point in Buying Goods.

The following resolution created considerable discussion:—

That in the opinion of the convention the retailer receiving credit notes on goods not ordered or returned as unsatisfactory, should have some remedy.

A member told how travelers called on him offering goods, which were ordered and signed for, but which arrived different to those ordered. They had no way of showing that they were not what they ordered.

J. Miller, Stoney Plain, said his buyer took a copy of everything he bought, checked the invoices, and if the goods were not those ordered the manufacturer was always willing to take them back.

The member who made the complaint then came down to tacks and stated that the goods ordered were 50 raincoats, 50 inches long. These came in too short, and were lying at the depot. The general opinion was that it was up to him to show the court that they were not as ordered.

The Chairman: "A good manufacturer to keep away from."

Mr. Stevens, Vermilion: "The executive have a hard nut to crack in that. Mr. Miller suggested something that I recently adopted. I took it up with my buyers some time ago, and got them when buying to get a description of the goods if the firm was not well known."

It was decided not to introduce this resolution, the committee thinking it a difficult subject to handle.

That whereas a very much larger sum of money is invested in retail distribution, than is invested in any other manner in the Province of Alberta, that we urge upon the Alberta Government the necessity of appointing a minister of inland trade, so that our retail interests can be cared for. It was decided to lay this resolution on the table.

That we commend the action of the Dominion Board in asking for legislation during the coming session that will make false advertising of merchandise a crime.—Carried.

That it is the opinion of this meeting that the time has arrived that we, as an association, should undertake a strong education campaign, to educate the public to a greater knowledge of the importance of the retail trade, so that the various sections of trade will not receive the abuse they have received from organizations, who are not familiar with the processes of distribution, and that this meeting recommend that the executive appoint a committee from the various sections of trade, who would be willing to give their time to addressing public meetings, with the object of educating the general public to the true conditions and the importance of the retailer in the community.

Selling on Sunday.

That we recommend that the law which prevents merchants from selling goods to their customers on Sunday, should also apply to the customer, making him equally responsible for violating the law, the same as the merchant.

The question of selling gasoline came up in connection with this. The chairman was surprised to hear this was against the law, remarking that he often bought it on Sunday.—Carried.

That we recommend that the Dominion Board of our association apply for an amendment to the Trading Stamp Act, to include all forms of guessing and voting contests.—Carried.

That it is the opinion of this convention that, while they favor the bill recently introduced at Ottawa, to regulate cold storage, that clauses should be inserted in the measure to protect the retail merchant, so that he would not be unjustly dealt with under its provisions.

Mr. Bucknall explained the Cold Storage Bill provided that goods taken out of cold storage could not be placed back again. No provision was made for a grocer or butcher who had a refrigerator and had to put his goods there over the week-end. They suggested the addition

SKETCH OF PRESIDENT GAETZ.

T. A. Gaetz, the new president, is a man who figured much in this, the first annual convention of the Alberta branch. It was rumored long before the election of officers that he was a likely man for president. He had proved himself able, and a man with a wide knowledge of the retail business. Mr. Gaetz came to Western Canada in 1887, *when he was fifteen years of age, and knows something of the hardships of pioneer life. He told the convention during one of the discussions that he would not like to return to the rough ways of the early days. He did not a little ranching as a youth, then started working in the general store of Smith and Gaetz, Red Deer, in* 1896, *and worked with them for ten years. Then he and R. C. Brumpton bought out the above firm, and two years later Brumpton bought out Gaetz. The latter then started for himself in Red Deer, and owns a good business in that town. He put five years on the council there, is vice-president of the Board of Trade, president of the local Retail Merchants' Association, and a member of the hospital board.*

of the words, "other than retail stores."—Carried.

That this convention request the executive officers, to report upon the advisability of securing inter-provincial judgments, so that they will be operated in every province, so as to facilitate the collection of small debts.—Carried.

Want Onus on Manufacturer.

That it is the opinion of this meeting that any goods that are sold to retail merchants as being unadulterated and they are found to be adulterated, that the manufacturer should be prosecuted instead of the retailer. —Adopted.

That this convention place itself on record as being opposed to municipalities engaging in the retail trade.

This had particular reference to municipalities retailing electrical fittings, etc.—Adopted.

WEDNESDAY EVENING.

Wednesday evening session proved both interesting and enjoyable, two addresses being delivered by Norman Rankin and R. J. Deachman.

Mr. Rankin chose as his subject "Advertising," and as he has gained for himself an enviable reputation as an advertising expert, it naturally followed that his remarks were listened to with close attention, and that he had much valuable information to impart. He handed out many "tips" to the delegates, and thoroughly impressed upon them the fact that business development and advertising go hand in hand.

Mr. Deachman delivered an interesting address on "The local newspaper and its relation to retail trade." One of his remarks was that the first community advertiser was Paul, for what finer phrased piece of advertising was there than that of Paul when he declared: "I am Paul of Tarsus, a citizen of no mean city"?

Selling Over Retailer's Head.

A resolution by the general merchants was then introduced to the effect that as they understood manufacturers and wholesalers were supplying goods to the consumer, and were becoming a menace to the retail trade, resolved that this business can be best handled by the retailers, and, further, that the merchants and executive take action to stop this business, or of starting a retail merchants' wholesale company.

Mr. McIvor said in his district the farmers were buying direct from the millers in car lots, for which they paid hard cash, which made it hard on the retailers who had to carry them. He did not believe that the wholesalers knew of the amount of business their travelers did with contractors; he wanted to believe that. The greatest offenders were the millers. If they insisted on it, there was brains enough among the retailers to run their own affairs.

Favored Prohibition.

Mr. Gaetz, chairman, read a resolution suggesting that the convention approve of the action of the temperance and moral reform league in their efforts to place on the statute book a provincial prohibitory law. This, said Mr. Gaetz, meant that liquor would not be sold anywhere in the province if adopted.

Some opposed it, but the resolution was finally adopted.

THURSDAY MORNING SESSION.

J. F. Glanville, provincial president, was in the chair when the convention was called to order Thursday morning. The proceedings began by Mr. Glanville reading a resolution: "That in the opinion of the convention the Government of Alberta should be empowered to conduct a general banking business."

W. A. Fraser, Pincher Creek, said the adoption of such a system would be in the mutual interests of the farmers and the retailers. They heard the cry for cheaper money. The banks were waxing fat on their high rates.

Mr. McIvor, Cowley, stated that in view of the money stringency and the difficulty in obtaining money at any rate, it was time banking should be controlled by the province. At present he believed that the banking laws were made by the Dominion Government. In his opinion the banks were controlling the Government instead of the Government controlling the banks.

Mr. Anderson, Bawlf, thought the resolution too important to be sprung on a meeting like this.

Mr. Stephens, Vermilion, was not opposed to the principle, but would like to have more definite information before favoring such a resolution. He wished to tell the last speaker that the Government were paying a higher interest for money than the banks.

Mr. McIvor disagreed, saying that the Post Office Savings Bank was paying less than the bank.

Mr. Stephens—Are not the Post Office Savings Banks paying 4 per cent?

Mr. McIvor—No, never.

Mr. Stephens—They did ten years ago. When the banks were paying 3 per cent. the Government was paying 4 per cent. However, it seems we don't know enough about it to discuss the matter.

The President suggested that the subject be left to a committee to report at the next meeting. The committee formed consisted of D. R. McIvor, F. F. McDonald, and Mr. Glanville.

Are Wholesalers More Exacting?

The next resolution coming up was to the effect that certain wholesale grocers were urging a more stringent enforcement of the fifteen-day settlement, undue enforcement of which would result in hardship, owing to the long time retailers were compelled to give customers, and that the thirty-day limit was reasonable.

Mr. Anderson, Bawlf, said this was the first intimation he had had that such was the case.

Mr. McIvor believed it was in force with firms handling sugar and tobacco.

Mr. Bucknall, provincial secretary, understood that a fifteen-day settlement was being enforced in the cities, as a result of which the grocers claimed they could not turn over their stocks. It was formerly sixty days, then thirty, and now fifteen. He thought some of the retailers would find it impossible to make a settlement in fifteen days.

T. A. Gaetz—Even though it would only help the members of one branch, it is for us to help them by going into this matter.

At this point Mr. Stephens, who took part in the discussion on banking, returned and stated that he had been out to determine what interest was being paid on money. Both the banks and the Post Office, he said, were paying 3 per cent.

It was decided that the resolution of the hardwaremen to prevent wholesalers catering to the consumer was covered by that of the general merchant.

The Market Question.

Mr. Fraser, Pincher Creek, wanted to know which delegates had a market in their town, and how it was conducted. He also wanted to hear from delegates who were paying a business tax.

H. Snell told how Red Deer secured a market, a committee being formed to visit various centres where markets were established. He recommended Mr. Fraser to apply to the chairman of that committee for information.

N. B. Good, Lethbridge, said they used to have a market, but it was a failure. They were thinking of organizing another. In the days when business was very good, people preferred to trade at the corner grocery, considering it too much trouble to walk to the market. Now, when they required to save every cent, they would probably use the market.

Mr. Fraser said he thought they should encourage farmers to come into their towns.

On the subject of a business tax, Mr. Gaetz, Red Deer, said that when this matter came up in their town the business men wrote the council saying they were willing to pay a tax of 5 per cent. if the council would be willing to assess improvements at 5 per cent.

The council adopted the first part of their suggestion, but cut out the last.

His business tax for the year amounted to $60.

It was agreed among the members that as a rule it was not lawful for a town to impose a business tax.

Splendid Exhibits.

There was one feature to the convention that surprised everybody, because of its novelty and its success. This was the exhibition of products by the local wholesalers and manufacturers. This not having been tried before, it was not known how many would take advantage of showing their goods. The results were beyond expectations. The basement of Paget Hall was crowded uncomfortably, and those crowded out had to be housed in the Convention Hall. Nothing better, however, could be done, as such a demand had not been expected. The Board will know better next year, and there is no doubt other associations will follow up this practical idea of the Alberta branch.

During the convention there were always some retailers who were not required in the hall walking around the basement, inspecting the goods and chatting with those in charge. Not a few of those who exhibited met lots of new dealers, which no doubt make good customers. The lines represented cover practically all trades, though the bulk were grocery firms. Among them were Campbell, Wilson & Horne, Ltd., Calgary and other points, who showed Royal Shield brands; McVitie & Price's biscuits; Libby, McNeil & Libby's canned goods, etc.; A. J. Macdonnell, grocery brokers, showing Epps' cocoa and chocolate; Brand & Co.'s ox tongues, Dominion matches, Marb's chocolates, Macintosh's toffee, Magic matches, Napoleon olive oil, George Washington coffee; McCormick's, London, Ont., had biscuits, jams and candies; F. Fryer was in charge of the booth; the Robin Hood Mills, Moose Jaw and Calgary, had a pyramid of flour bags and rolled oats; Tees & Persse, Ltd., had a display of the goods of E. B. Eddy Co., Ltd., also N. K. Fairbanks Co.'s line—W. H. Dingle represented Tees & Persse, and L. Roberts the N. K. Fairbanks Co.; Fry's had an exhibit of their chocolates and cocoa, represented by W. W. Hastings; L. T. Mewburn & Co., Ltd., wholesale grocers, Calgary, who make the Polo brands of coffee, baking powder, etc., showed these lines, K.C. jams, and Crawford's biscuits—represented by Herman Mewburn; the Stanley Paper Co., Calgary, showed various lines of stationery, wrapping paper, etc., and Barr account registers; the Alberta Empress Co., Calgary, had a display of baking powder, coffee, teas and spices—represented by F. D. Cox; McLaren Imperial Cheese Co., Alberta branch, showed several lines of cheese, mustard, olives, pickles, Snider's sauces. Deurr's jams, and Huntley & Palmer's biscuits; P. Burns & Co., Calgary, exhibited hams, lard, butter, etc.; the Rockland Marmalade Co., Calgary, showed several of their lines—they are represented by the Alberta Financial Brokers, Calgary; Scott Bros., 715 First Street East, showed Toledo scales and Van Berkel slicers—represented by J. R. Scott; Hamblin, Brereton & Co., grocery brokers, Calgary, Winnipeg and Vancouver, had a display in the Convention Hall; Anderson & Co., grocery brokers, Calgary, showed Eiffel Tower lemonade, Foster Clark's goods, and Sharp's toffee; S. F. Bowser & Co. had a display of their oil tanks and pumps.

DELEGATES WHO REGISTERED.

J. Alfred Pine, Magrath; Lang Ly, Magrath; W. J. McInnes, Acme; T. A. Gaetz, Red Deer; W. J. Boomer, Redcliff; Otto M. Shipley, Redcliff; Jno. G. Robertson, Foremost; R. J. LaRoy; Morrin; George Rebder, Dalroy.

Many Entertainments.

On Wednesday at 12 o'clock the Board of Trade tendered a luncheon to the visiting delegates at the Young Men's Club Rooms, Central Methodist Church. In the afternoon there was an auto trip to P. Burns & Co.'s, Ltd., plant. The ladies were entertained at the Allen Picture Theatre the same afternoon. On Thursday evening the delegates attended a banquet as guests of the Calgary Branch. The same evening the ladies were given a theatre party at the Sherman Grand Theatre while the banquet was in progress.

The following provincial section officers were appointed for the hardware section:

Hardware—President, W. J. Illsey, Calgary; first vice-president, C. W. Hanson, Barons; second vice-president, R. B. Wilkinson, Airdrie; treasurer, W. J. McInnis, Acme; secretary, D. A. Thompson, Coronation.

EXHIBITORS AT CALGARY.

Among the exhibitors at Calgary during convention and exhibition week were: The British American Paint Co; Tees & Persse; L. Roberts; McClary Mfg. Co.; The Calgary Paint & Glass Co.; G. F. Stephens & Co.

British Columbia Incorporations.

The B. C. Steel Works, Ltd., capitalized at $500,000, head office Vancouver, to carry on the trades and businesses of ironmasters, steel makers, etc.

Automatic Electric Heat Controller Co., Ltd., capitalized at $200,000; head office, Vancouver.

Vancouver Shingle Stain and Paint Co., capitalized at $10,000; head office, Vancouver, B.C.

Twenty Years Ago
In the Hardware Trade

The following items were taken from the issue of Hardware and Metal of May 19, 1894:—

"T. S. Hobbs, hardware merchant, has been nominated in London to oppose W. R. Meredith."

Editor's Note. — Col. Hobbs, ex-M.P.P., is still at London, Ont., and is president of the Hobbs Hardware Co., and Hobbs Mfg. Co. He is also identified with several other interests.

* * *

"Early in the morning of May 4 burglars made their way into the store of James & Reid, Perth, and blew open the safe, getting two dollars for their trouble."

Editor's Note.—James and Reid are still located at Perth, Ont.

* * *

"W. B. Stewart, senior partner in the firm of Stewart & Wood, Toronto, wholesale dealers in paints, is dead. His demise took place early Thursday morning."

Editor's Note.—The wholesale business of Stewart and Wood is still being carried on at York St., Toronto.

HARDWARE AND METAL

VOL. XXVI. No. 20 Toronto, Canada, May 16, 1914 Two Dollars per Year

Prepare for the Next Campaign

THE Clean-Up and Paint-Up Campaign of 1914 is at an end and it may safely be asserted that a great deal of good was done. The idea was taken up with hearty good-will in all parts of the country and many scores of cities and towns set aside certain periods for the work of regeneration. The West was particularly active.

The campaign waged by Hardware and Metal had a strong influence in the work. With its large circulation, Hardware and Metal was in a position to interest the trade from one end of the country to the other. This interest was intensified by the fact that the influence was exerted weekly. In many cases dealers took copies of Hardware and Metal to their local newspapers and urged them to follow out the suggestions contained therein. Campaigns were started in several places as a direct result of the work thus done by the hardwaremen. In addition Hardware and Metal was able to gain the interest of many newspapers by direct correspondence.

Several of the paint manufacturers took a very active part in the campaign and are deserving of fullest credit for what they did. Literature, advertising matter and cuts were supplied, which enabled the dealers and the newspapers to conduct the campaign on a well-informed basis.

As stated at the outset, the results achieved this year have been highly satisfactory. But the movement was not nearly as general as it might have been—as it should have been. Not one municipality in ten took the idea up. In many places where the campaign was launched the support given it was not as complete as had been anticipated. For an initial attempt, it was satisfactory; but bigger results must be achieved next year.

Why Not Form a National Committee—Now?

TO make the campaign truly national in its scope next year, more general co-operation will be needed. The only way to secure this general co-operation in the opinion of Hardware and Metal is to start the work for 1915 now. If it is left again until the first of the year, it will be found impossible to get all the interests lined up together. Futhermore much of the real publicity work should be done in advance of the first of the year.

It will be necessary to obtain the co-operation of the paint manufacturers, the hardware and paint merchants and the newspapers. Plans must be laid well in advance. Literature must be prepared, cuts made and so forth. The time, therefore, to start is NOW.

As the movement is not a sectional one in any sense of the word, as the citizen of Halifax should be just as much interested as the Winnipeger, the campaign should be conducted on a national basis. A national committee might be formed to look after the publicity work and to generally direct the spread of the idea. Such a committee would be composed of representatives of the various bodies interested in civic improvement, of the paint manufacturers and of the press. With a committee behind it, the movement would spread next year to every city, town and hamlet in the Dominion.

Why not proceed with steps toward organization at once?

A Word to the Paint Manufacturers

DURING the campaign now over many of the paint manufacturers showed a lack of interest that amounted almost to apathy. This was disappointing as it was recognized that the hardware and paint dealers throughout the country would benefit, particularly as it was felt that the hearty co-operation of all manufacturers was needed to make the campaign a complete success. The lack of interest that was noticed can be attributed, we believe, to the fact that concerted action was not suggested early enough.

Well, Hardware and Metal is out with the suggestion as early as is possible this time. The 1914 campaign is just over. Let us start to get ready for the campaign of 1915 and let all work together.

If the paint manufacturers were to put their combined strength and influence behind the movement, backed up by the press and by civic bodies interested in problems of municipal improvement, the results would be of incalculable value.

The Alberta Convention

ORGANIZATION in Western Canada is one of the big questions of the day. Not very long ago, the Retail Merchants' Association of Saskatchewan held a large convention in Moose Jaw, which was fully reported in this paper. Last week the merchants of Alberta met in Calgary, and from the enthusiasm exhibited and the number of places from all over the province represented, it is plain that Western merchants have fully awakened to the importance of association work. This shows that the trade is alive to their own interests. The entire country is now pretty well organized, and in the next few years we may expect aggressive work on the part of the retail merchants' associations.

At Calgary last week, two topics seemed to be uppermost in the minds of the delegates. First there was the problem of overcoming the selling by wholesalers direct to consumers, and there was the great problem of keeping down credits. Vigorous protests were made against some wholesalers who seemed to find it necessary to sell over the heads of the retailers. In this matter the obligation of the wholesale dealer seems plain. If he desires to sell goods at all to the retailer, then he should sell only to the retailer. Of what benefit is it to the retailer to purchase goods from the wholesaler, only to find the wholesaler has supplied his customers? The question is one that is of much importance to the entire trade of the country, and from the organization that has been going on recently, it looks as if one of the biggest reforms will be seen in this direction in the years to come.

For many years retailers have been handicapped by insufficient legislation, or the absence of legislation so far as collecting debts is concerned. This was another of the problems gone into thoroughly at the Alberta Convention. It appears too that the only remedy lies in organization. Just as soon as the retail merchants of the country are strong enough to demand changes in the law or additional laws, then will our governments submit to the passing thereof. The retailers of Alberta hope to secure changes in legislation which will enable them to collect small debts more easily. It is to be hoped they will secure the advantage of this legislation in the near future.

That old problem as to whether cash or credit business is the most acceptable to the retail trade also came in for its usual share of discussion. It is apparent, however, that this is a question that will never be fully settled by any association. Each man will have his own individual opinion, and because of the fact that in some places a cash business is practically impossible, differences of opinion will always exist. It is a question that in future might well be omitted from association conventions. Not so, however, the matter of watching credits and collecting debts. The credit business we shall always have with us, and therefore the subject of debt collection and limitation of credit will ever remain a live one.

Next year the Alberta convention will be held in Red Deer, and it is to be hoped that even a greater interest will be taken in organization work on that occasion and during the intervening period.

The Business Situation

ALTHOUGH it cannot be said that business is booming in the hardware line, there is every reason to believe the conditions are gradually growing better and that business is showing a steady improvement. The general feeling is that the period of depression through which the country has been passing was needed to check private and public extravagance. Reports from the larger industries indicate that orders have slightly improved. Speculation seems to be now absent from business generally and with the elimination of such a deterrent to healthy conditions, confidence and activity should derive encouragement. There is still evidence of a determination on the part of the people as a whole to liquidate and economize, but it is a good sign and puts business on a basis that is exceedingly promising. Reports from the agricultural districts are extremely encouraging and should be a great aid in establishing confidence. Rural and country town business is particularly healthy and hardware merchants in many of the smaller places throughout Ontario and the Eastern provinces state that their business so far this year compares favorably with the business of last, and previous years. In some cases the volume of business has increased. Hardware jobbers report that business is holding up well. Paint manufacturers have secured good business from the retail hardwaremen. The weather of the past two weeks has been unfavorable for good business, but with an improvement in weather conditions the hardware trade should be stimulated to a great extent.

A considerable amount of building is now under way, and the demand for building material is improving. Summer goods are beginning to move and will move rapidly with the advent of warmer weather. Quite a number of price changes have occurred recently and in most cases have been in a downward direction. Collections are showing improvement.

INFORMATION FROM Halifax wholesalers indicate a healthy business outlook in Nova Scotia. The first part of the year compares most favorably with last, and 1914 is expected to at least equal, if not exceed 1913. This is a hopeful sign and indicates trade stability in the far east in spite of the temporary stress in Canada as a whole.

The Art of Bringing the Public Inside to Buy

Methods of Merchandising Have Been Altered to Conform To the Ideas of a More Advanced Age—Important Part Played by Show Windows—Three Interesting Displays.

WHAT the retail hardware merchant wants is to get more people inside to buy — he is not worrying so much about those who have entered the store, but about the crowds that are passing the store with possibly little or no thought of entering. To bring these people inside he must depend to a great extent on his show windows. An authority on window trimming recently said, "Display is the salesman. It is showing the goods that sells them. Years ago, when merchandising was conducted on a lower plane —when buying at a store was a matter of bargaining and a matching of wits and lung endurance between the customers and salesman, display was not so important. Prices were marked in cabalistic symbols, or, if in plain figures, subject to decline; values were not to be taken for granted, and "seeing" was by no means "believing" for the astute shopper. Under these conditions it was but natural that the merchant regarded display as of minor importance.

"But times have changed and with them the methods of merchandising have been altered to conform with the ideas of a more advanced age. Prices are now marked in plain figures—and these figures are final. Qualities are just about what they purport to be, and any good store may be depended upon so far as values are concerned. Practically every store guarantees the customer satisfaction or his money back. Under these favorable circumstances goods have only to be shown properly and they will sell themselves.

"And so it is that in the modern store display has become the chief salesman. Goods are got out into plain sight wherever that is possible. Merchandise is shown in glass cases and cabinets, in drawers with glass fronts and as many of these cases and cabinets are used to get the goods out where visitors to the store cannot help seeing them. In the newest stores illuminated display cases are built in wherever space permits, and special cases are used on stairways, by the elevators—wherever they will go. There certainly is no doubt that the modern merchant is an enthusiastic believer in display.

"But of all the display space, that which can be seen from the sidewalk outside the store is of the greatest value. Interior displays may be effective—but the people who see them are already in the store ready to buy.

"The trouble with most stores is that they haven't nearly enough show window space. This is as true of big stores as it is of little ones, for the bigger the store, the more window display space it requires."

Accompanying this article are three window displays which were recently shown in the show windows of Canadian retail hardware firms.

Sporting Goods.

One of the illustrations shows a sporting goods display arranged by Kerwood Bradbury, with the Manville Hardware Co., at their Prince Albert, Sask. branch. Mr. Bradbury has charge of the sporting goods department, which is largely a new department in the store. In past years Mr. Manville, who conducts stores at Shellbrook and Prince Albert, Sask., has dealt heavily in rifles, shot guns and ammunition and has, it is said, ranked among the large buyers of loaded shells in the West, but not until

Neat display of sporting goods, by Kerwood Bradbury, in the show window of the Manville Hardware Co., Prince Albert, Sask.

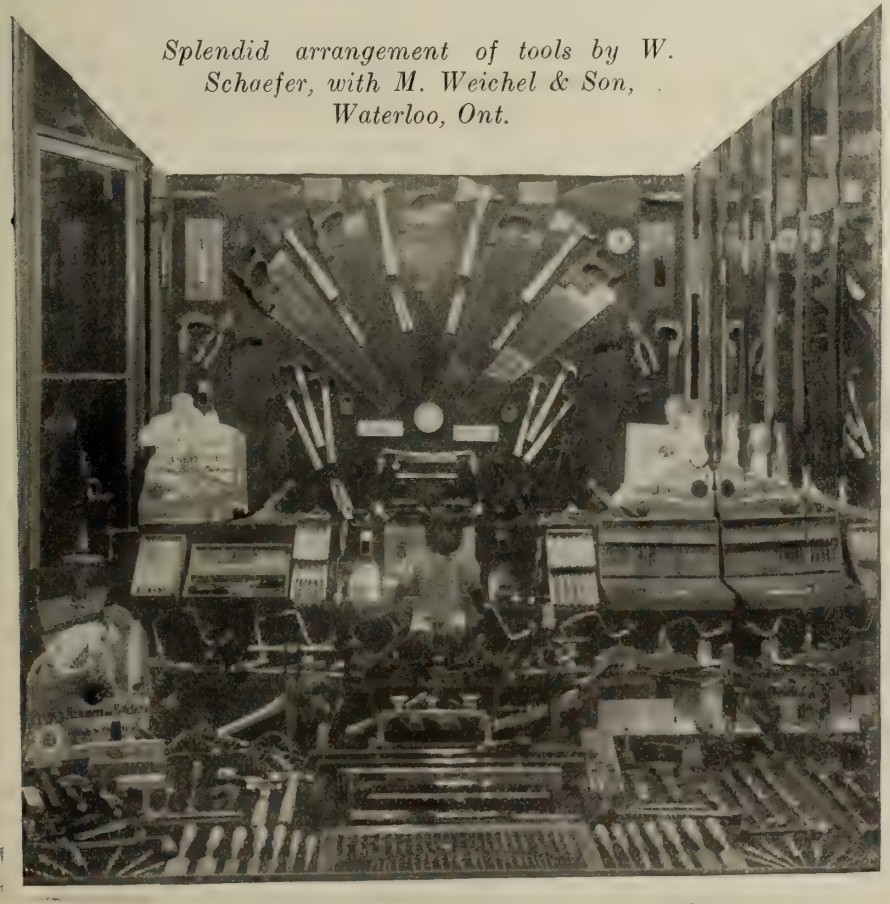
the present year did he take up a full line of sporting goods. Mr. Manville is meeting with splendid success in selling sporting goods, and attributes not a little of the success to the business secured through the display window.

The accompanying illustration shows an evenly balanced and neatly arranged display of baseball, football, and tennis supplies, swing and couch hammocks, etc. The display could not help but interest all lovers of outdoor sport.

Tools.

A neat display of tools by W. Schaefer, with M. Weichel & Son, Waterloo, Ont., is also shown. Much taste has been exhibited by the window dresser in arranging the tool display. Displays of this nature are always particularly interesting to a great many people. In the first place, the mechanic is always an admirer of a neat display of tools, and will often be induced to purchase additional tools for his kit, after seeing a display of this kind. In addition to the full-fledged mechanics there are also many apprentices, gathering kits of tools, and their patronage is very desirable. Professional and business men, manual training and technical school students are also prospective tool purchasers who may often be influenced in their selections, through the medium of the show window.

A Novel Display.



The spring hardware millinery display shown was arranged by W. A. Dopson, with Dunlop & Co., Pembroke, Ont., and is one of the styles of displays that has novel features to attract the attention of the passer-by to the store. Various articles found in the hardware store have been used to trim the elaborate styles of head gear shown. Several splendid displays of tools, household goods, etc., arranged by Mr. Dopson have appeared in Hardware and Metal in the past. Occasionally he arranges a novel display such as the one here shown in order to create a slight sensation, and to keep the public thoroughly interested in the show windows under his charge.

Hardware millinery display by W. A. Dopson, with Dunlop & Co., Pembroke, Ont.

An old window-trimmer once said, "The show window is the index to the store," and in this respect he was correct. The show window is also the magnet which draws people into the store, but the dealer must not forget to have the magnet loaded.

Splendid arrangement of tools by W. Schaefer, with M. Weichel & Son, Waterloo, Ont.

DEVELOPING THE CLERK.

A good many trade papers just now are advocating some sort of training in the store for clerks.

"A school of instruction for the salesmen and clerks in your store will pay you, and it will pay the clerks," says the National Bulletin. "The direct aim of the school is to educate the clerk in a knowledge of the various articles he is selling. He is to acquire a technical knowledge without a practical handling of the raw product unless it comes into his possession for sale.

"Here are some subjects upon which the proprietor can give an interesting and instructive talk. Take up the item of wrenches, ice-cutters, tongs, and give such information as you desire; as, for instance, as having the clerks name three common pipe wrenches and the advantages of these three over those of other makes. Then elaborate on how pipe wrenches should be used, and in selecting your pipe wrench, what points of construction should be considered."

"What the proprietor learns at such meetings is of greatest importance. We We mean it! He realizes how young and untried his clerks are. He learns that, better than condemning them in his mind for not taking an owner-like interest in a business they don't own, is to discuss things with them humanly and give them a chance to learn details outside of rush hours."

Dominion Incorporations.

The National Rubber Co., Ltd., capitalized at $500,000, head office Hamilton, Ont., to manufacture and deal in rubber products. Incorporators: G. Wenig, D. B. Wood, R. W. Long, C. L. Boyd, F. E. Walker, all of Hamilton.

Talks of a Selfmade Merchant to his Clerks

Using Technical Terms on Some One Who Doesn't Understand Them Has Only One Effect, it Antagonizes —People Nowadays Know Something About Barter and a Whole Lot About Value.

By a Merchant.

I HAVE a matter to talk about today which should interest all of you, said the Boss, when the staff had gathered in the office. I heard a conversation the other day between one of you and a woman who had come in for an electric toaster. Never mind which one of you it was. You are all making the same mistake at times, I know, so you can all take the lesson to heart.

This salesman was trying to explain how the toaster was run, and I could see that he had her all twisted up in mental knots. He was talking away about voltage and insulation and rolling electrical terms off his tongue as fast as the words would come. Of course, he lost the sale. That woman didn't know anything more about electricity than that it ran along wires and was dangerous. All the salesman managed to do was to get her confused and afraid of the article. 'I can't remember all that,' she probably said to herself. 'I had better not get one for I'm sure I can't run it right.'

The first principle of salesmanship is that the purchaser must be brought to

"Why do they let that man run between those other two?"

understand all about the article. Some people can be cajoled into buying something they don't understand sometimes; but it isn't often. The average person nowadays knows enough about the fine art of buying to refuse to take an article that has any element of mystery about it. Mystery spells trickery.

I was at a baseball game the other day, and had the misfortune to sit near a young couple who persisted in talking so that I could hear everything they said. The girl was one of those sweet young things who know nothing and think it attractive to display their ignorance. She asked questions about everything. The man was one of the hopeless maniacs called Real Fans, who carry long tables of batting averages around in their heads and express themselves in a language called diamond slang which sounds to the uninitiated more like the Cannibal Island tongue or the Papuan patois. The dialogue was running something like this:

Girl.—"Why do they let that man run between those other two with the big gauntlets"

Man.—" 'Sthisway. Griff was winding up for a spitter and Baker started to steal. Griff pulls a balk and shoots it over to first. Umpire is wise and gives a base to the runner. See?"

The girl didn't see. I could see myself that she was getting more mixed every time he gave one of his explanations. Finally she got mad clean through and insisted on being taken home at the end of the eighth when the score was a tie. The state of mind of the Real Fan showed clearly in his face. I saw that the course of true love wasn't going to run very smoothly with that pair for some time.

And that's the outcome every time you use technical terms on someone who doesn't understand them. It has only one effect; it antagonizes. Just let that thought get thoroughly settled in your heads. Fail to make yourself clear and you arouse antagonism—if not to yourself, to the goods you are offering for sale.

Some salesmen go on the idea that you make sales by failing to satisfy the customer's desire for information. They think that people will buy 'to find out about it.' Any man who thinks that nowadays is on a steep chute to failure with the course well greased.

People nowadays know something about barter and a whole lot about value. They've been educated by advertising and have been canvassed too often by agents and peddlers and salesmen (note the distinction), so that they don't fall for that primary class trick any more. They want to know all about what you have. You've got to convince them that it is worth while or you might as well be trying to sell window screens to the keeper of the Pyramids.

When I was going through school I put in two vacations selling five-volume sets of books, Great Men of History. I had a carefully prepared talk on Julius Caesar, Hannibal, Plutarch, Charlemagne and others of like kidney. It seemed to me that a talk reeking with culture and full of antique lore would be just the thing to sell those books. People wouldn't know anything about Hannibal and Plutarch and their curiosity would be roused to boiling point—to the $15 degree. The first man I tackled was a hard-headed old retired auctioneer. When I had spun off about two reels of my sales talk, he grunted.

"He was talking about voltage, etc."

'Caesar and Homer died quite a good many years ago, I take it,' he said. 'They don't interest me. I wouldn't pay $15.00 to read about dagos and such

(Continued on page 66.)

The Retail Handling of Poison Preparations

Retail Hardwaremen Should See That Legal Provisions Governing the Sale of Wood Alcohol, Paris Green, Arsenate of Lead, etc., Are Observed—Extracts From Various Acts.

OFFICERS of the Inland Revenue Department are again going the rounds in an endeavor to secure convictions of merchants who do not live up to the letter of the law in respect to sales of poison preparations. Merchants not observing the provisions of the various acts are liable to heavy penalties, and ignorance of the law is not accepted as an excuse. For the benefit of our readers we are publishing extracts from acts bearing on the poisons usually sold by hardwaremen.

All the Provinces come under the jurisdiction of the Inland Revenue Act as far as the sale of wood alcohol is concerned. The following sections from the Inland Revenue Act gives full details regarding the law governing the sale of wood alcohol.

Sec. 266.—Every person who uses spirits containing methyl alcohol in any form in any pharmaceutical or medicinal preparation intended for internal use, shall be liable to a penalty of five hundred dollars.

Section 266 of the said Act is amended by adding the following subsection thereto—Every person who uses methyl alcohol or spirits containing methyl alcohol in any form, in any pharmaceutical, medicinal or other preparation for external use shall affix to the vessel containing the said preparation a label stating in black letters not less than one-fourth of an inch in height, the presence of methyl alcohol therein, and every person violating the provisions of this subsection shall incur a penalty not less than fifty dollars and not exceeding two hundred dollars.

The following from Section 10 should be specially noted by hardwaremen:—All vessels containing wood alcohol, whether in the possession of the manufacturer or other person, shall have affixed thereto a label bearing the words "Wood Alcohol Poison," in black letters not less than one-fourth of an inch in height. Any person who holds in possession, sells, exchanges or delivers any wood alcohol contrary to the provisions of this section shall incur a penalty not less than fifty dollars and not exceeding five hundred dollars.

Ontario Pharmacy Act.

The following from the Ontario Pharmacy Act relates to the sale of Paris green and arsenate of lead:—

Sec. 28.—No person shall, (a) sell or keep open shop for retailing, dispensing or compounding poisons, drugs, or medicines, except patent or proprietary medicines (subject to Section 42), and except turpentine, epsom salts, cream of tartar, carbonate of soda, bi-carbonate of soda, glycerine, carbonate of magnesia, Rochelle salts, blue stone, copperas, saltpetre, spirits of nitre, rhubarb root, solution of ammonia, phosphate of soda, gum camphor, quinine or chloride of lime, or sell or attempt to sell any of the articles mentioned in Schedule (A) unless registered under the Act.

Sec. 30 (1).—Nothing in this Act shall prevent the sale, by persons not registered, of Paris green, hellebore, tincture of iodine, arsenate of lead, carbolic acid not exceeding a five-per cent. solution and London purple, if such articles are sold in well-secured packages distinctly labeled with the name and address of the person preparing or putting up such packages and marked "poison."

The foregoing section states that Paris green or arsenate of lead can be sold if put up in a well-secured package, distinctly labeled, etc.

Section 33.—No person or incorporating company shall sell any poison either by wholesale or retail unless the box, bottle vessel, wrapper or cover in which the poison is contained is distinctly labeled with the name of the article, and the word poison, and if sold by retail, then also with the name and address of the proprietor of the establishment in which such poison is sold.

With reference to the sale of wood alcohol the section in the Ontario Pharmacy Act is similar to the one in the Inland Revenue Act.

Quebec Pharmacy Act.

Article 372 of Bill 143.—All vessels containing wood alcohol whether in the possession of the manufacturer or other person shall have affixed thereto, a label bearing the word "Wood Alcohol, Poison" in black letters, not less than ¼ of an inch in height. Any person who holds in possession, sells, exchanges or delivers any wood alcohol contrary to the provisions of this section shall incur a penalty of not less than fifty dollars and not more than two hundred dollars.

Article, 5,016 of the Quebec Pharmacy Act.—Nothing in this section shall prevent the sale by persons not registered in pursuance of this section, of Paris green or London purple so long as said articles are sold in well-secured packages, distinctly labeled with the name of the article and the name and address of the seller and marked "Poison."

5,017.—For the purpose of this section the proprietor on whose behalf any sale is made by any clerk, apprentice or other employee, shall be deemed the seller, without prejudice, however, to the liability of the three classes of persons in pharmacy under Article 5,023.

Article 5,023.—Any person offending against the provisions of Article 5,009-5,016, shall incur a penalty of twenty-five dollars for each subsequent offence with costs.

Saskatchewan Pharmacy Act.

Wood alcohol is not mentioned in the copy of the Saskatchewan Pharmacy Act sent to Hardware and Metal. This poison, however, would come under the Dominion Act, and it would be necessary to have all vessels containing wood alcohol, labeled "Wood Alcohol Poison," in black letters at least ¼ of an inch in height. Article 36 of the Saskatchewan Pharmacy Act reads as follows:—"No person shall sell any poison in Schedule (A) either by wholesale or retail, unless box, bottle vessel, wrapper or cover in which the poison is contained is distinctly labeled with the word "Poison," and if sold by retail, then also with the name and address of the proprietor of the establishment in which such poison is sold."

We note, however, in Schedule (A), that it states:—"Arsenic and preparations and compounds thereof (except Paris Green)."

In Prince Edward Island wood alcohol comes under the Prohibition Act. The Pharmacy Act of that province does not include Paris green.

ONTARIO INCORPORATIONS.

The Ontario Flexotile Products, Ltd., capitalized at $50,000, head office Toronto.

Canada Cut Glass Co., Ltd., capitalized at $25,000, head office Toronto, to manufacture and deal in cut glass.

Standard Welding Co., Ltd., capitalized at $3,000, head office Hamilton, to do all kinds of welding of iron, steel, and other metals.

The Brockville Paper Box Co., capitalized at $10,000, head office Brockville, to manufacture and deal in paper and cardboard boxes, etc.

The St. Thomas Electrical Co., Ltd., capitalized at $40,000, head office St. Thomas, to manufacture and deal in electrical appliances, etc.

The Canada Chain Co., Ltd., capitalized at $40,000, head office Sarnia, to manufacture and deal in lapweld chain, electric chain, bolts, nuts, etc.

Profitable Publicity for the Retail Hardwareman

Plan for Criticizing Copy as Used by the Copy Chief of One Successfully Advertised Concern—Recent Advertisements of Canadian Hardwaremen.

HARDWAREMEN frequently admit that they do not give their newspaper advertising copy the time and thought which it really deserves. The result is a considerable advertising waste—and in many cases a very expensive one. During recent years there has been a vast annual increase in the amount of advertising space used by retail hardwaremen. For the merchant who wishes to get the best returns from his advertising it is a good idea to follow the plans of some of the men who have made a study and a success of advertising. By so doing needless wastes can often be eliminated and better copy prepared.

To be able to see ourselves as others see us—to look upon our advertisements with the probable viewpoint of likely readers — would eliminate advertising waste considerably, and also help attain greater proficiency Following is a plan for criticising copy as used by the copy chief of one successfully advertised concern, that brings out the basic principles which make for all-round perfection. To answer the questions truthfully means better advertising with more assured returns.

1. Is it true?

If the statements contained in the advertisement are not true, the man who wrote it is not honest. He may "get away with it" for a while, but he is bound to be found out, but his career as an advertiser is over. Once the confidence of the public is lost, it is hard to regain.

2. Is it too broad?

Your ad. may be true for the most part, but may claim a little too much, or take in a little too much territory. This includes what is known as extravagant language.

3. Is it reasonable?

Unless what you say is reasonable and believable, it is likely to be doubted. This is so whether the ad. be true or not. I know of one firm who purposely refrained from stating all that a certain machine could do. They knew if they published the entire truth it would not be believed. State only what you think will be believed.

4. Is it far-fetched?

Do not use an example in your ad. that needs an explanation. Do not use words, phrases and headlines which have no connection with the matter in hand. That is a common fault of the novice in advertising.

5. Is it painfully funny.

If you want to become a successful ad-writer, don't try to be funny. Buying goods and paying money for them is a serious business. If people want jokes, they know where to look for them. Human interest in an ad. does not mean wit.

6. Is it grammatical?

Once in a while, but not often, a piece of copy gets out with a glaring error in its grammar. Some copy-writers expect the boss to find such errors and correct them. The boss usually finds a way out of the difficulty by getting a new copy-writer.

Ad. of Scroggies, Ltd., Montreal, Que.

7. Has it too much novelty?

All of us are continually trying to get something new into our ads., which is right and proper, but there is such a thing as too much novelty. In that case, the prospective customer may be so interested in the appearance of the ad. that he forgets all about the article advertised. Better be original in the way of describing the goods, rather than in the general appearance of the ad.

8. Does it knock?

The ad. that "knocks" a competitor's goods or service is likely to prove a boomerang. The American love of fair play makes "knocking" in an ad. out of the question. Don't do it. It is neither fair nor safe. The best way is not to mention your competitor. In some cases the public doesn't know you have a competitor until you mention him in your advertising.

9. Are there superfluous words?

When you pay 15 cents per line and upwards, you can see that you have no room for superfluous words. Unnecessary adjectives are often used. Sometimes a whole phrase can be cut out. Phrases can often be reduced to a single word. Cut your long and involved sentence into two or three short ones. You'll save words by it.

10. Is the language too flowery?

Beware of flowery or "flossy" language. We are all tempted to use it at times, but it seldom sells goods. People like the truth, told in an interesting way, in the language they are accustomed to speak and hear.

11. Will it be understood by the average reader?

If it will not, write it again. It is the average reader who buys the most goods, not the "high-brows" nor the "low-brows."

12. Does your caption "say something?"

It is well to put as much meaning into your headline as possible. Study the newspaper headlines. See what a story they tell in four words. Don't, by all that's good and bad in advertising, start your ad. with a current phrase or saying, such as "I should worry." These phrases are meaningless and will turn people of intelligence and refinement away from your ad.

13. Have you put the "punch" in?

This is sometimes referred to as the "kick," and means the summing up or the appeal to buy. Without it, the ad. is flat. There seems to be something missing. It may be a mere suggestion, as: "There's a photographer in your town," or it may be in the form of a question, as: "Have you a Bell telephone?"

14. Is the first sentence worth reading?

Make your first sentence a strong one, and don't make it too long. Many otherwise good ads. fail to secure a reading, and fetch up in the "also-ran" class because they get a poor start.

15. Are punctuation and spelling correct?

If you make an error in these, the reader's confidence is weakened in what you have to say. Don't be afraid to use the dictionary.

16. Is the construction of the sentences smooth?

This simply means is the ad. easy to read and easy to understand. Short sentences and plain words will help. Remember that everybody does not possess a high school education, and very few are mind-readers.

17. Is the ad. likely to start a controversy?

If it is, better think twice before you publish it. A controversy is an easy thing to start, but hardly a wise thing. The starter of it usually comes in second best.

18. Is it contrary to the policy of the house?

Every organization has a policy. That policy may be an unwritten law, but it sets forth certain things which must not be mentioned in the advertising. If the copy-writer desires to avoid unpleasant interviews with the powers that be he will study the house policy and avoid clashes with it.

19. Is there too much copy for the size of type desired?

If you want the printer to be your friend, and this is highly desirable, you will write the copy to fit the space. Study it out. There are several methods.

20. Is the illustration dignified?

The same thing applies here as was said of "painfully funny" copy. Don't spend good money for space and fill it up with so-called funny pictures. It's the mark of the novice.

21. Does it tell a story, per se?

Your illustration should at least identify the line of business it is supposed to advertise. If it does not, choose something else.

22. Does it fit the copy?

Some folks who write advertisements evidently think any picture will do so long as it is a picture. That's why we see a picture of a pretty girl used to advertise building brick, or a photograph of a man with whiskers used to advertise flour. Avoid stock cuts. An experienced ad-reader will recognize one ten feet away.

23. Is it pleasing?

Your illustration may be very appropriate, but be slow in using it if it carries an unpleasant suggestion. The reader does not like to have his senses shocked. Some ads. I've seen have been little short of repulsive.

24. Does the ad. "look good" to you?

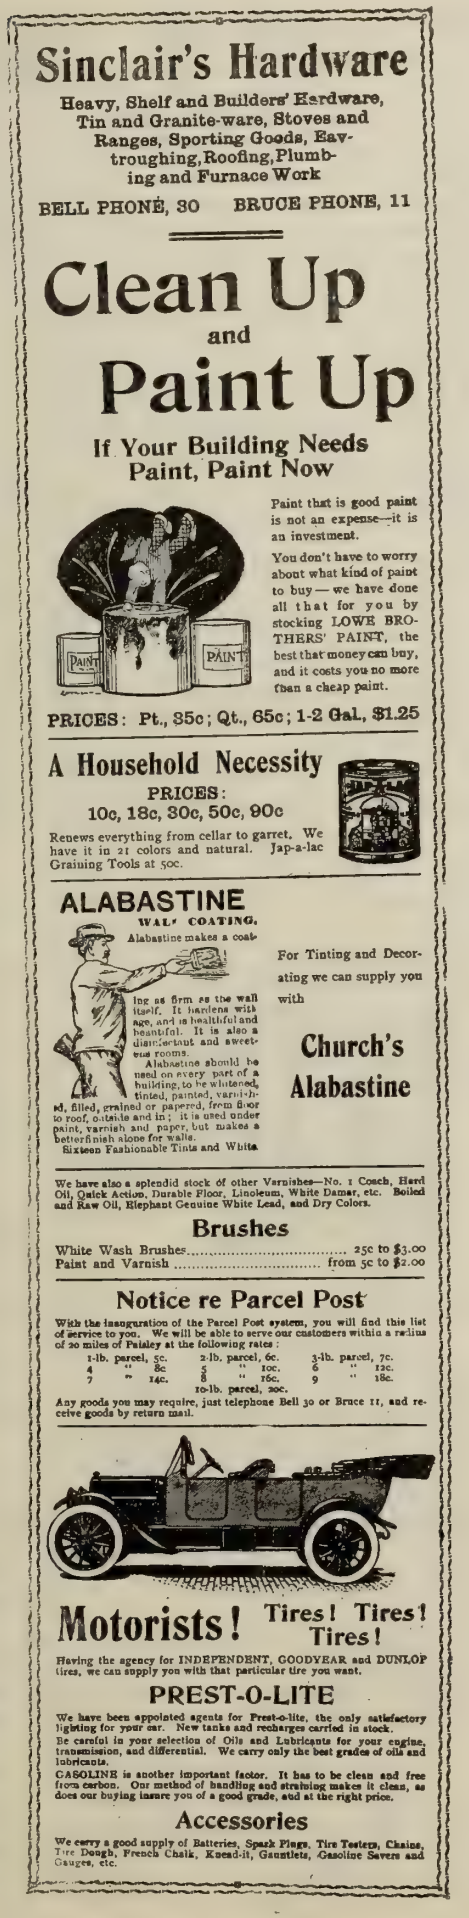
If you feel that something is not just right about it, put it on the operating table and turn the X-ray on. It isn't safe to take a chance on that something.

25 Would you read it in a newspaper if you had not written it?

Look the ad. over from the standpoint of the ordinary newspaper reader. Forget that you wrote it. Imagine that it is the ad. a competitor wrote. If it still looks all right, it must be good.

26. Deep down in your own heart do you think it is a good ad.?

That is the final test. You may convince others that it is a good ad., but unless you can convince yourself, you are making a mistake.



If your ad. successfully passes all these tests, you are justified in trying it on the public.

The accompanying reproductions show hardware advertisements which have recently appeared in Canadian newspapers.

The advertisement of Sinclair & Co., Paisley, is an ad. that would attract the attention of the readers. Several lines are featured, the use of illustrations is a commendable feature. An appeal is also made to farmers to make use of the recently inaugurated parcel post system.

Scroggies, of Montreal, are featuring a number of lines of household goods. In this ad. as in the others illustrations have been used and prices quoted.

There is a strong tendency on the part of hardware merchants to make liberal use of illustrations and to quote prices in newspaper advertisements. Both are excellent features and should be encouraged especially when such lines as those shown in the reproduced ads. are being offered to the public.

KODAKS IN HARDWARE STORES.

Drug and stationery stores have had the kodak and photographic supply business pretty much to themselves. A medium-sized town hardware proprietor in Iowa took notice of this state of affairs. He decided to take a flyer in the line. His first purchase was about $60. Eleven months later an inventory showed that the amount of stock on hand totaled $100, while the books revealed the very pleasing information that the department showed purchases for the period mentioned to an exact total of $988.75.

Writing to the Hardware Age, that particular dealer opines:—

"We don't believe that anyone could possibly get stuck with this line if there is not one in the town. They will also find that the people who have kodaks will use twice as many supplies after an agency is in the town than they did before. And last, but not least, is the profit the entire line shows. Nearly every item will show a profit of 50 per cent. There are two items that show less, and they show 25 per cent. Now you can figure for yourself how much profit we have made in one year, as we have turned our stock nearly twice a month; but, to be real safe, we will say 1½ times each month. What better could anyone wish for?

New Canadian Patents

New Canadian Patents

No. 152,993.—John Walker, Toronto, Ontario, Canada, 6th January, 1914; 6 years. Filed 26th September, 1913. Receipt No. 229,401.

Claim.—1. A horseshoe comprising a body having heel, toe and intermediate bosses, removable caulks fitted to said heel and toe, bosses and fastening blocks rigidly securing said caulks to said bosses.

No. 153,046.—John Percival Cullen, Toronto, Ontario, Canada, 13th January, 1914; 6 years. Filed 5th April, 1913. Receipt No. 222,795.

Claim.—1. A flue cleaner comprising a cleaner rod, flue cleaner heads mounted thereon, arched springs connecting the heads together, and V-shaped circular blades mounted on the arched springs, as and for the purpose specified.

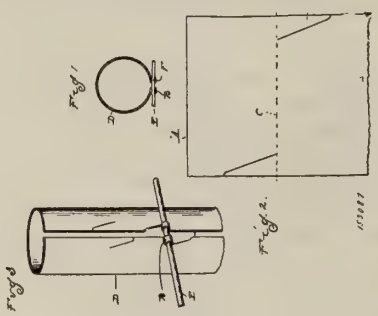
No. 153,057.—Amelia Guernsey, North Bay, Ontario, Canada, 13th January, 1914; 6 years. Filed 12th September, 1913. Receipt No. 228,882.

Claim.—1. A caster comprising a disk or body portion having an opening therein, a bearing member upon the lower surface of said disk, a backing member upon the upper surface thereof, a headed bolt or stem extending through the disk, and means co-operating therewith for securing a caster to an article of furniture.

No. 153,087.—The Anthony Wire Fence Company of Canada, Limited, Walkerville, Ontario, Canada, assignee of Daniel P. Anthony, Tecumseh, Michigan, U. S. A., 20th January, 1914; 6 years. Filed 24th July, 1913. Receipt No. 227,183.

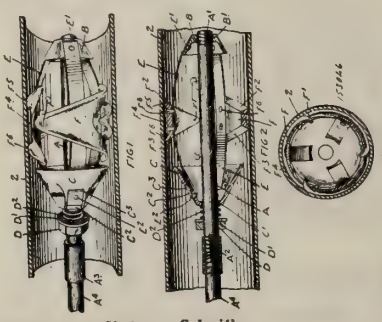
Claim.—1. A fence post, comprising a sheet metal blank having the opposite edge portions thereof slitted to form bendable tabs upon opposite sides of a horizontal line, said blank being formed into an open cylinder with its edges spaced, and said tabs being bent about the fence wire respectively above and below the same to secure the latter and to stay the cylinder.

No. 153,163.—William Greenspaw, Toronto, Ontario, Canada, 20th January, 1914; 6 years. Filed 3rd October, 1913. Receipt No. 229,641.



Claim.—1. A window cleaning device, comprising a metal frame formed in U shape comprising parallel side bars, loops formed on the ends of said sidebars, as and for the purpose specified.

No. 153,190.—John Frank Rodgers, Athabasca Landing, Alberta, Canada, 20th January, 1914; 6 years. Filed 10th March, 1913. Receipt No. 221,559.



Claim.—The combination with a trap comprising a base plate, jaws pivotally mounted thereon, a spring member designed to actuate the said jaws and a captive member, of a cross bar rigidly fixed to the said base plate and having an orifice through its outer end, a catch member pivotally mounted on said cross bar, a platform rigidly attached to the said catch member and adapted to be located below the catch member, and a bait hook fixed on the upper face of such platform, as and for the purpose specified.

Making a Strong Plea for Price Maintenance

One Price in All Stores at One Time—An Article Dealing With Uniform Standardized Products on Which the Manufacturer Has Tried to Name a Uniform Price.

By William Hard, in Everybody's Magazine.

Continued from Last Issue.

Conspiracy Price?—By No Means.

But here are the officers of the Miles Company about to put their "Restorative Tonic" on the market and about to name its price. Have they a monopoly? Do they control their market? Can they name a monopoly price? There are about a thousand reasons why they can't. There are about a thousand other tonics eager for business. That's all. And the officers of the Miles Company don't say two dollars for their "Restorative Tonic." They say one dollar, and are glad to get it.

If the Miles Company entered into a secret conspiracy with all the other manufacturers of medicines in the United States and named a conspiracy price, a monopoly price, on their products, why, then, it would be a case for the Attorney-General of the United States. It would not be the case we are looking at here.

Here we are defending an absolutely competitive thing—the right of the individual manufacturer, all by himself, in a competitive market, to name the retail price of his own individualized property.

At present he sends that property, his own product, which he himself made, out into the retail market and there sees it used to injure him and to injure and confuse the public in at least three different ways, all equally weird.

I distinguish three families or species of price-cutting. You see all of them every day.

First, there is "common or cut-throat" price-cutting.

This is simply a blind rage among retailers. It can be as bad for them as for the product they are cutting. It killed McLaughlin's "4 X" coffee; but it killed it only after thousands of retailers had been selling it for months without a profit. They had been conveying McLaughlin's "4 X" coffee to the public without charging the public anything for that conveying work. Which is mere madness—a frenzy spreading from one retailer to another—a circular insanity. It condemns itself at sight, and it explains why the mass of retailers are in favor of the one-price system—in order to protect themselves against themselves.

There's no use trying to think that it is prosperity for one section of the public to have another section doing something for it for nothing. That doesn't work.

Just as it is bad for the country to have its labor, or any part of its labor, constantly employed at less than a fair wage, so it is bad for it to have its business, or any part of its business, constantly transacted at less than a fair profit. It is unscientific in principle and demoralizing in result.

McLaughlin's "4 X" coffee disappeared in a landslide of anonymous bulk coffee. The jobbers said to the retailers: "Can you ever get the public back up to paying a reasonable price for '4 X'?" "We can not," said the retailers. "Now on this bulk coffee," said the jobbers, "you can charge a good price. You can charge what your customers ought to pay. There is no standard retail price for it. Suit yourself."

These killings and cripplings of standard products (which the ultimate consumer had bought with eagerness at the regular price) are a direct injury to the public. But the indirect injury is even more important. I call it indirect only because it does not come to the surface quite so soon. This indirect injury is the one that follows on every kind of "unfair competition" in any line of business. It is: One more force, one more artificial force, added to the movement leading toward concentration of capital, toward bigness, toward control by the few.

In the bosom of the second family or species of price-cutting, you will begin to see that force at work.

This second variety of price-cutting is "Vicarious" price-cutting. You cut the prices of well-known products, while you carefully do not cut the prices of many products which are not well known.

For instance, you offer to sell Kolynos tooth-paste at three tubes for forty-six cents. I've seen that particular price several times. A fraction more than fifteen cents a tube. The lowest wholesale price is fourteen and a quarter cents a tube. You are losing money. The public doesn't know that. But it knows that three tubes of Kolynos for forty-six cents is a bargain, and it perceives that you are a wonderful merchandiser.

You take this bargain, this tribute to your merchandising skill, and you place it in your page advertisement in the Sunday paper. Perhaps you place it next to your statements about the values of things which have no established known values—say, your new offerings in fur coats. That wouldn't be a bad idea. If you're a wonderful merchandizer on Kolynos, perhaps you're a wonderful merchandiser on fur coats. Not a bad idea at all. And it pays. The public does actually bite on it.

As for poor Jenkins, back in New Haven, pumping Kolynos into tubes, he's only the manufacturer. Let him yelp. He made Kolynos in order to throw a bargain rose-light on those fur coats.

One of the biggest New York department stores had a sale not long ago of Gillette razors at $1.95. Some more wonderful merchandising. Even with a special price from the manufacturer the store lost more than a dollar on every razor it sold. It might better (scientifically speaking) have given each customer one new silver dollar to persuade him not to buy a razor.

Is that really merchandising at all? Some day the primitive barbarousness of it will appear to us clearly, and we will look at it as we now look at the haggling in the market stalls of Cairo and Damascus.

The only reason for it, manifestly, is to get the consumer into the store and then sell him something else besides. It's not business. It's a guessing game. The wary customer tries to buy only bargains, and make his get-away. The still warier merchant knows that he won't be able to make his get-away without falling into some other purchase. And the size and pomp of the magnificent building in which the thing is done proves that the merchant is right.

The Supreme Court of Washington did not hesitate to take judicial notice of this fact. It said "It is a fallacy to assume that the price-cutter pockets the loss. The public makes it up on other purchases."

I will illustrate those "other purchases next month. At present I only say that a store has no right to shed a glow of borrowed glory on its own merchandising by setting fire to the businesses of standard-product manufacturers.

Recently the advertisement of a Chicago department store appeared in a Chicago newspaper. At the head of it

you will see an interesting statement about the Ingersoll watch. It is to be sold at sixty-five cents.

Farther down you will see that bargains are also offered in wash goods, in silkoline and in gloves. But whose wash goods? Whose silkoline? Whose gloves? I don't know. But these commodities are all said to have been reduced in price from certain higher levels and to be now selling at certain lower levels. That's good. Let it be so. I don't doubt it. But I don't know it straight off, of my own knowledge. I am unaware of the manufacturer and the brands. And I am unaware of the former prices.

How wise then to start off with the Ingersoll watch! The Ingersoll watch at 65c.! There's something to carry instant conviction to the thrifty breast. It will make trouble, of course, for the Ingersoll Company with every other retailer in town. People who paid a dollar for an Ingersoll watch at the store of X. Y. Jones, will go back to Jones and demand a refund of thirty-five cents. They will insult Jones earnestly. Jones will stutteringly but most truthfully try to explain that he himself had to pay the Ingersoll Company more than sixty-five cents in order to get the watch into his store to sell. It won't do any good. They won't believe him.

"Do you think," they will say, as they always say, "that the department stores do business at a loss?" They do not know that doing business at a loss is current approved practice.

In the meantime, the Ingersoll people themselves will be frantic. They will send employees of theirs to your sale to buy back as many of their own watches from you as they possibly can. They will do anything to stop that sale. Never mind. Laugh at them. They do deserve a laugh. Who built up the word "Ingersoll" so that it would inspire interest and confidence at the head of a column? They did. Who owns, in law, the reputation, the good-will, of the word "Ingersoll?" They do. Who's getting the benefit of it right now? You are.

So, by easy stages, you pass into the third form of price-cutting. This in "Incurable or Habitual" price-cutting. You no longer do it just because you got into a quarrel with some other retailer. You no longer do it just for a single sudden sale. You do it as a policy, a steady policy.

At this point the relation between price-cutting and the recent rapid and amazing concentration of capital in the retail business becomes clear enough for anybody.

To do "vicarious" price-cutting or "Habitual" price-cutting in a really statesmanlike and effective way, you must be big. You must be willing to lose money, if necessary, not only on a few articles but on whole classes of articles, or whole departments of your business. And you must convey the news of your bargains to the public by the pageful in a manner so conspicuous and so broadcast as to make an unrefillable dent in the public's mind. In other words, you must go in for losses and you must make these losses expensively and famously known.

But what is this? It is the familiar weapon of mere size against smaller competitors. It is not a competition in commodities. It is a competition in money.

I shall describe the concentration of capital in the retail field next month. The department store, drawing business away from the neighborhood store; the "chains" of special stores, with fifty stores, a hundred stores, several hundred stores, in one chain, under one management; the linking together of these chains; the appearance of chains not merely of special stores but of department stores; the growth of mail-order houses, distributing goods to all parts of the United States from one central city, doing a business — one of them alone—of about $100,000,000 a year.

I do not criticize this movement in itself and I do not criticize the men behind it. I do not attack them. I have been very unfortunate in my life. I have never met any villains. Quite to the contrary. My experience is that if any human institution is broadly thriving, whether it be the chain-store idea or the Socialist party, the men behind it, "on the whole," and "by and large," and "taking one consideration with another," are honest and sincere. If they weren't their consciences would ruin their stomachs, and they and their doings would cease. I have observed the human conscience, especially in its effect on the human stomach, and I have great confidence in its universality and its omnipotence.

I therefore do not question the morality of the concentration movement in the retail field. Nor do I question for that matter, its necessity. But, query: Would it have gone so far as it has if all the surrounding circumstances had been right? And would it keep on going so fast as it does if those surrounding circumstances were made right now?

But let that go over.

Here I have one final question to answer about the one-price system for standard products.

Suppose the Stevens bill, now in Congress, should pass. Suppose, by that means or by any other means, it were made possible for the manufacturer, in interstate commerce to readily bind the retailer to retail his product at one price. Might he not ask an "exorbitant" price?

Yes, he might.

Let the Public Determine Profits.

But he can ask an exorbitant price now. He has a perfect right, always has had, and always will have, to sell his product out of his factory to the retailer at any price he pleases. You can't take that away from him. Nobody can prevent you from selling your hat to your neighbor for a hundred dollars, if you can get it. Nobody can prevent the manufacturer of a safety razor from selling his razor, his own razor, to the retailer for a hundred dollars, if he can get it. The question here is not the manufacturer's profit at all. It is the retail profit. Shall the retail profit be demoralized and destroyed, with all of the injuries I have shown resulting to approved products and to the public's access to approved products?

They say that Mr. Gillette made a great deal of money out of the manufacture of his safety razor. What of it? I was not born with any moral right to own a Gillette razor. I didn't make it. Neither did you. Gillette made it. He gave the world something it had never had before—namely the Gillette razor. I have no idea whether it is a good razor or not. All I know is that it belonged to Gillette, every specimen of it, until he chose to sell it. And I stand for the right of every man, in a competitive market, to take what he has made and to sell it to the public at its worth to the public.

The public doesn't have to take it, if it doesn't want to in a competitive market.

I am for leaving maximum competitive profits to the public itself and not—the only other alternative—to the Government.

Those who think otherwise have a right to their thought. I respect it, profoundly. But I think they ought to think it all the way through to its end, and follow Comrade Hilquitt into a truly logical position, and put a picture of Karl Marx on the mantelpiece, and wear a little red card in their vest pocket. Then we would all know where we were.

After All, Gillette Made It.

In the meantime, if you are bothered by the idea that so many people should have been willing to pay five dollars for a Gillette razor, remember that Gillette did more than any other one man to make it possible for people to buy safety razors for less than five dollars.

Gillette always did have competition. Nobody ever had to buy a Gillette in order to shave himself in an odor of safety. But as soon as Gillette had got well started, there was more competition than ever, twice as much, ten times as much. To-day, with the Auto-Strop, the Durham Duplex, the Gem, the Star, the

(Continued on page 66.)

Some Things Paint Manufacturers Have Done

The Introduction of Ready-Mixed Paints Has Been the Chief Factor in Increasing the Demand for the Painter's Services—They Relieve the Painter of a Great Deal of Manual Labor.

By G. B. Heckel.

THE journeyman painter seldom has direct relations with the paint manufacturer, but the relations of modern society are so close and interdependent that none of us can possibly "live for himself alone." What one of us is or does intimately or remotely affects every member of society.

Lowell wrote:

"When a deed is done for Freedom, through the broad earth's aching breast
Runs a thrill of joy prophetic, trembling on from east to west."

Whether the deed be for freedom or for slavery, the effect is universal. Man is so constituted that he must labor either with hand or brain. Evolution has fixed this necessity in the fabric of our being, because the races and the peoples that did not have the instinct for work have perished from the face of the earth and left no descendants. But while the condition of our life is that to exist we must struggle, it is also a condition that no normal man can be happy while other men are struggling fruitlessly or with inadequate results.

It happens, therefore, quite naturally, that the rewards are for those who make work less burdensome, more effective and more significant.

This is rather a ponderous preamble to a review of the things done by paint manufacturers to ameliorate the labor of the man that wields the brush.

The paint manufacturer, in making these improvements, has doubtless been conscious only remotely of this consequence, but since all that is done affects all and since the rewards are for those that make things easier, better and cheaper, every real improvement in paint products has directly benefited the man that does the actual work.

I have endeavored to show, in my preceding article, that the advertising activity of paint manufacturers has benefited the painter by increasing the demand for paints. I shall now point out a few instances where such demand has been created, as it were, out of nothing.

The instances I shall cite are flat wall paints, enamels and ready-mixed paints —I cite them in the inverse order of their introduction.

The flat interior wall paint is the newest of paint products. As a working proposition it has been with us less than a decade. To-day, something like twenty thousand tons of lithopone are consumed annually in its production. It is made largely out of two materials, both of which were unknown to the father of the youngest journeyman painter—lithopone and China Wood Oil. It required about ten years of costly experiment to learn how to make a practical flatting vehicle out of Chinese oil and more than as much time to learn how to make a lithopone that would serve as a pigment.

The surfaces on the interior of a house are about as ten to one compared with the exterior, and the paint manufacturers have succeeded in convincing the American people that they want the interior painted, that it is the proper thing, the sanitary thing and the up-to-date thing to paint the interior. That idea, as it spreads, will mean more work for the painter, and it is worth remembering that it is a class of work that can be done in the winter as well as in the summer.

The accompanyiny article appeared in the April issue of The Painter and Decorator of Lafayette, Ind., the official journal of the Brotherhood of Painters, Decorators and Paper-hangers of America and should be particularly interesting to Canadian hardwaremen on account of recent discussions regarding the problem of getting painters interested in and using ready-mixed paints.

Is the result as satisfactory as the result obtained by the old method of washing the oil out of keg lead with turpentine? That depends upon the quality of the goods. With some grades the results are far superior. But the important point to remember is that it is an economical, convenient and expeditious method, and that therefore many people can afford it, while few could afford the old method. It lends itself to popularity, whereas nothing could have made the old method popular or common.

Who was first struck with the seemingly obvious idea that if pigments were ground in varnish instead of oil both could be applied in one operation, I do not know; but I do know that the man had the real instinct of progress. Progress is simply the process of making hard things easy and thus putting them within the reach of the many instead of the few. The invention of the power loom and the sewing machine enable us all to have decent clothing—clean shirts. The invention of the ready-made enamel put the costly but cleanly and luminous "colonial finish" into the cottage.

Do you remember how such a finish was built up only a few years ago? It was a paying job for the man who could do it and got it to do. Few, however, "got it to do," because none but the rich house owner could afford to pay for it Now, anyone can afford enameled bath-rooms and kitchens—I have them myself—and another line of distinction between rich and poor is obliterated. My bathroom is as wholesome and as pleasing to behold as "John D.'s" at a fraction of the cost. But for the ready-made enamel the painter that did the work would have been short one job at least; and my case is typical of thousands.

The third item I have selected is ready-mixed paint. I don't know how the journeymen feel about that product; but I know the feeling of the master painters, and if their attitude is any guide, there is feeling enough for a Laura Jean Libbey novel. Whatever may be the feeling, however, the question is worth reviewing, if only to confirm the objections. I think, however, that the opposition to prepared paints, where it exists on the part of painters, is mistaken. The use of paints is to-day almost universal—it is only about a quarter of what it should be; but it is nevertheless large. To-day country houses and farm buildings are generally painted, whereas half a century ago, the finish was generally that supplied by the sawmill.

People think paint to-day even more commonly than they use it. Now, something has also caused people to think of soap, biscuits and baking powder—the agency of advertising. Paint manufacturers advertise and thus make people think of paint in spite of themselves.

Anyone can use prepared paint if he has the time. He cannot use it to the best

(Continued on page 61.)

Current News of the Hardware Trade

Change of Address.

The Geo. H. Saywell Co., hardware brokers, of Winnipeg, have moved from 311 Hammond Block to 123 Bannatyne Ave., E., next to the Merrick-Anderson Company. Their office and warehouse is now combined.

S. J. Frame Opens Office.

S. J. Frame, for the past twenty-one years associated with Jenkins & Hardy, Toronto, has resigned, and will in future do business as trustee and assignee under his own name at 86 Adelaide Street E., Toronto.

War Maps of Mexico.

The Magnolia Metal Co., 113-115 Bank Street, New York, are issuing an interesting War Map of Mexico—14¾ in. x 11 in., which they will be pleased to send to readers of this paper free of charge upon application, while the supply lasts.

Sample Rooms at Toronto.

W. E. Bulmer, hardware importer, recently opened sample rooms at 32 Front Street W., Toronto, where he will carry samples of enamelware, aluminumware, cutlery, brass goods and other lines of hardware. Mr. Bulmer is well known among Canadian hardwaremen, having at various times represented McClary Manufacturing Co., Stranskey & Co., and Geo. Borgfeldt & Co.

New Head of Standard Chemical.

The entrance of further English interests into the Standard Chemical, Iron & Lumber Company, Limited, has resulted in the retirement of Lieut.-Col. A. G. Peuchen as president and the election of Mr. L. M. Wood, of the firm of J. & L. M. Wood. The company manufactures various wood chemicals. It has four factories in Ontario and two in Quebec, and refineries in Canada, England, Germany and France.

Move to Spacious Premises.

Salmon Arm, B.C.—Ford, Tyler & Co. have removed their stock to more spacious premises with plate glass windows and up-to-date fittings, having rented part of a new store where a grocery business is carried on. We also notice a good ad for the fishing department, viz: a large tin fish cut from a sheet of tin, painted and hung outside the store on a fishing rod, and suspended from a spool which with the faintest breeze makes the fish spin round, thereby catching the eye of everyone passing by. The innovation was evolved by a clerk in the employ of Mr. Tyler.

New Agency at Montreal.

The McLellan-Peters Co., a new firm of manufacturers' agents and importers, have opened offices at 305 Read Building, Montreal. They are representatives for the following lines: W. & F. Walker's, Ltd., Liverpool, Eng., liquid disinfectants and blockettes; Price Fire & Waterproofing Co., Poughkeepsie, N.Y., waterproofing for canvas and concrete; T. & R. Boote, Burslam, Eng., plain and ornamental tiles; Rollaway Screen Co., Burlington, Vt., fly screens; Phoenix Metal Tile Co., Brooklyn, N.Y., metal weather strip; I. X. L. structural steel paint; Ceresit Waterproofing Co., Chicago; and Cooper Oven Thermometer Co., Waterbury, Conn.

Sporting Goods Catalogue.

A new spring and summer sports catalogue for 1914 has just been issued by A. E. Bregent, St. Catherine street, East, Montreal. It is a well-illustrated book of 76 pages, exclusive of the covers, and should be of considerable assistance to the trade in ordering sporting goods. It contains illustrations and descriptions of practically everything in the line of baseball goods, tennis equipment, football, basket ball, punching bags, boxing gloves, bathing suits, hammocks, tents, canoes, bicycles, rifles, etc. Information is also included as to parcel post rates, transportation facilities, etc. Other catalogues issued by Mr. Bregent deal with uniforms, fire arms, and fall and winter sports.

Personals.

R. Bartram, of Steffens & Nolle, Ltd., has returned to Montreal after a three months' trip to the Pacific coast.

Harry R. Hale, of Godfrey S. Pelton & Son, Montreal, has returned from a trip through the Maritime provinces.

Among the visitors at Toronto during the week were A. E. Simons, Cannington, Ont.; Wm. Parrot, Collingwood; J. Knowles, Rosseau.

W. J. Sarvis, manager of the plumbing, heating and tinsmithing department of T. Young & Sons, Hanover, Ont., has been confined to his home with rheumatic trouble for the past six weeks.

Lawrence Webster Guild, of the Massachusetts Saw Works, Springfield, Mass., makers of Victor hack-saw blades, was in Montreal this week. It is understood that he will be stationed permanently in Montreal.

Among the buyers from out-of-town points to visit Montreal recently were E. Wodon, of Joliette; Aime Lemieux, of Henryville; Corriveau Freres, of St. Sebastian; J. B. Damon, of St. Philomene; A. Lacroix, of St. Lin, and J. Lapoint of St. Jovite, Que.

Clive Hatch, of the Martin Manufacturing Co., Whitby, Ont.; James R. Cuthbertson, of Canada Steel Goods Co., Ltd., Hamilton; Mr. Gaston, of Joseph Fenton & Sons, Sheffield, Eng.; Mr. Wells, of Heller Bros. & Co., Newark, N.J.; R. M. Harvey, of Wagner Mfg. Co., Sidney, O., were calling on the trade in Montreal this week.

Business Changes.

Moore Park, Man.:—Joseph Potvin, hardware, has sold out to J. Rutley.

Dorchester, Ont.—R. L. Hodgins, hardware, has sold out to Albert Abbott.

Darlington, Man.—Martin and Anderson, hardware and implements, have sold their hardware stock to J. F. Crosby.

Fire Losses.

Belleville, Ont.—The Walker Foundry Co., have suffered loss by fire.

Brantford, Ont.—The main plant of the Canada Glue Co. was destroyed by fire. Several of the outbuildings and the office were saved.

New Firms.

Keyes, Man.—G. R. Thair has opened a hardware store.

St. Celestin, Que.—Guilemette & Mathieu, etc., have registered.

Victoriaville, Que.—Lavigne & Luneau tinsmiths and plumbers, have registered.

BIG BUSINESS IN LITTLE THINGS

Merchants who overlook the possibilities afforded in the sale of small items, will probably be surprised to know that during the month of April the sales of the F. W. Woolworth Company amounted to $6,012,957, against $4,998,887 in April, 1913, an increase of $1,014,070, or 20.28 per cent., and from Jan. 1 to April 30, the sales were $19,611,562, against $17,931,537 in the corresponding period a year ago, an increase of $1,680,024, or 9.37 per cent. When it is considered that the bulk of the goods sold retailed at 5, 10 and 15 cents, it can be easily seen that big business can be secured out of little things.

SOME THINGS PAINT MANUFACTURERS HAVE DONE.

(Continued from page 59.)

advantage, but he can color surfaces with it if that is all he requires.

Now, the man that has the time and the inclination to do his own painting is exactly the man who would use no paint at all if he could not apply it himself. But he is by no means in the majority among those who have been taught to desire paint. The vast majority of those thus interested realize that to satisfy this desire they must employ a painter, and by far the larger proportion of these naturally leave to the painter the selection of materials.

I believe that anyone who will consider the matter without prejudice must realize that the introduction of ready mixed paints has been the chief factor in increasing the demand for the painters' services—just as the introduction of the sewing machine increased the demand for seamstresses.

The second thing to be said, from the painter's point of view, in favor of these products is that where he feels that he can profitably use them, they relieve him of a great deal of manual labor. Machinery, when properly used in the service of humanity, lifts the burden from the shoulders of toil. It places products within the reach of the many, increases demand and thus enlarges the field of occupation.

I am not now arguing as to the quality of prepared paints — there is a wide range in this respect — but for their serviceability on occasion. Every gallon of mixed paint sold increases the demand for painting and thus the demand for painters.

Let Mr. A. in a certain street, paint his house—with the poorest brand of "patent paint," if you choose, applied in the crudest way. No matter what the ultimate appearance of the job it looks good at the beginning and incidentally it makes the houses of Mr. A's neighbors, Messrs. B, C, D, E, F and G, look cheap and shabby, and immediately, if the "price" is forthcoming, the estimable wives of Messrs. B, C, etc., will see to it that their respective domiciles present as good a front as that of Mrs. A, who is "no better than" any one of them.

"So shines a good deed in a naughty world."

Thus we come back to our original proposition that the paint manufacturer, whether consciously or unconsciously, inevitably "plays the game" of the working painter, and plays it perforce incidentally, to the profit of all concerned —painter, manufacturer and consumer.

THE LATE J. R. WILSON.

James Reid Wilson, president and managing director of Thomas Robertson & Co., Ltd., Montreal, died May 11th at the Grand Hotel, London, England, of pneumonia.

A dispatch from London states that Mr. Wilson had been ill but four days, having caught a cold in Glasgow which developed with fatal rapidity. His wife and sister were with him at the end.

The body will be brought to Montreal on the Empress of Ireland.

The cabled news of Mr. Wilson's death was the cause of dismay among his business associates and the hundreds of friends in Montreal who had known him personally and in business life. His connection with many clubs and particularly with the General and Alexandra hospitals gave him a very large

The late J. R. Wilson.

acquaintance and made him generally known and popular.

Only in the last few days was it generally made known that the newest of his beneficiary plans, the construction of a $60,000 nurses' home at the Alexandra Hospital, was almost his last concern before he left Canada for England. Mr. Wilson, with characteristic energy, had supervised the plans for the new home, and was to have presented them to the directing board of the hospital on his return from England.

Born in Glasgow, Oct. 18, 1850, Mr. Wilson was the son of the late John Wilson, member for Govan in the House of Commons. His early education was sought in his native city, where he graduated from the high school. He completed his courses at St. Andrews College, and in 1871 came to Canada.

In Montreal, Mr. Wilson identified himself with the metal business soon after his arrival. He entered the firm of Thomas Robertson & Co., and within five years had advanced to complete charge of the business. Following the retirement, in the same year, of Thomas Robertson, then head of the firm, Mr. Wilson initiated the policy of growth which has distinguished his later career. From a comparatively small beginning, he built up his company to a leading position in the metal trade.

He was married in 1880 to Miss Hallott of Mobile, Alabama, and two sons and two daughters survive, as does also his wife. John Wilson a son and a director of the firm, is speeding on an ocean steamer in a vain attempt to reach his father before the last.

Mr. Wilson was president and managing director of Thomas Robertson & Co., Ltd., vice-president of the Dominion Coal Co., chairman of the Canadian Board of the Phoenix Assurance Co., Ltd., of London, Eng.; director of The Canadian Steel Foundries, The Dominion Steel Corporation, The Montreal Locomotive Works, Ltd., the Montreal Trust Co., the Wayagamack Pulp & Paper Co., Ltd., the E. A. Whitehead Co., etc.

Notwithstanding his many commercial engagements, Mr. Wilson devoted considerable of his time to hospital work. He was for many years intimately connected with the Montreal General Hospital, being for a considerable period chairman of the House Committee. When, a few years ago, the pressing need of an infectious diseases hospital was realized, he, with a group of other well-known Montreal business men, took an active part in the planning and building of the Alexandra Hospital, of which institution he was first vice-president and lately treasurer.

He took a great interest in art, and was an excellent judge of paintings. He was a member of the Council of the Montreal Art Association, and possessed a fine and noteworthy collection of paintings.

Mr. Wilson was also deeply interested in agriculture, and his farm at Lacolle, with its model dairy, barn, waterworks, etc., is one of the most up-to-date farms in the province, and is well stocked with pedigreed cattle, horses, etc.

He was a member of the Mount Royal, St. James, Forest and Stream, Royal Montreal Golf, Royal St. Lawrence Yacht Clubs, and the Royal Thames Yacht Club of London, England.

Wheeling Corrugating Co. Catalogue.

The Wheeling Corrugating Co., Wheeling, W. Va., has issued catalogue No. 313, consisting of 270 pages and featuring the metal products of the company. The catalogue is handsomely gotten up, and contains many half-tone illustrations showing metal ceilings, walls, stair wainscot, corners, moulding, etc.

Letters to the Editor

These columns are open to contributions upon any topic of interest to the trade, it being understood that the views expressed are those of the contributors, and do not necessarily imply editorial indorsement. Names of contributors will be withheld if desired, but name of writer must accompany correspondence as an evidence of good faith.

WEEKLY HALF-HOLIDAYS.

Editor Hardware and Metal:

Within the next few weeks travelers will again be bothered by the weekly half-holiday question. Has there been any organized effort by Retail Merchants' Association or Retail Hardware Association to arrange for a uniform half-holiday, or to publish a list for the convenience of travelers, showing the days on which the various towns and cities observe their weekly half-day closing.

Hardware Traveler.

We do not know of an organized effort having been made to arrange for a uniform half-holiday.. Hardware and Metal has for some years past published a list showing the dates on which half-holidays are observed by various towns and cities. The 1914 list will be published within the next week or two.—Editor.

AGREES WITH WESTERNER.

Digby, N.S., May 6, 1914.

Editor Hardware and Metal,

Dear Sir:—Have just read the letter from the Western Hardwareman from Forgan, Sask., and wish to state that the writer heartily indorses all his sentiments. Not only have we to contend with the catalogue houses, but have the unfair competition of the wholesale houses or of some of them for they are not all alike. We have a case before us just now of a fisherman who wanted a piece of anchor chain and was quoted, by one of these so-called wholesalers, the same price that they would have sold us for. When you add such competition to that of the catalogue houses the path of the Retailer is bound to be thorny. If these wholesalers and catalogue people want to do business in all parts of the country they should, as the Westerner says, be made to pay taxes in the sections they are doing business. This is a bit long winded, but I am with Westerner, head, neck and heels and wished to say so. Thanking you for the perusal of the above, I am,

Hardwareman.

Lime Sulphur.

Geo. E. Roe, Elmvale, Ont.: "Please advise where I can procure lime sulphur for spraying purposes."

Lime sulphur may be procured from Grasselli Chemical Co., Hamilton, or Niagara Brand Spray Co., Burlington, Ont.—Editor.

* * *

Wire-bending Machine.

W. E. Yunker, Kingwood, Ont.: "Please advise where I can secure a hand wire-bending machine."

Machines can be secured from Brown-Boggs Co., Hamilton, Ont.—Editor.

* * *

Display Cases.

Dakin Bros., Digby, N.S.: "Will you please advise us where we can secure display frames like picture frames for showing and displaying tools, cutlery, etc."

John A. Kent, 261 King St. W., Toronto; Cameron & Campbell, Toronto; Walker Bin & Store Fixture Co., Berlin, Ont.—Editor.

Makers of Polishes.

D. Hall Sutherland, Canora, Sask.; "Please advise where I can secure Ronuk hospital liquid, and Cook & Boulton floor renewer."

Ronuk polishes are sold by Ronuk, Ltd., 53 Yonge St., Toronto. Cook & Boulton's renewer is sold by Cook & Boulton, 165 King St. W., Toronto.—Editor.

Cunningham Hardware Co., New Westminster.: "Can you please advise who makes or carries in stock the No. 90 Algoma Empire range?"

Can any of our readers supply this information?—Editor.

Calgary, Alta.—The Excelsior Hardware Co. are opening a new store in the Excelsior Block, 404 8th St., E., Calgary. R. Chamberlain is manager. The firm will carry a full line of builders' hardware, tin and enamelware, stoves, etc.

New Goods Offered Canadian Hardwaremen

WHITE DOVE WASHER.

One of the new lines recently placed on the market is the White Dove hand washing machine, which is being offered to the Canadian trade by the White Dove Washer Co., Dept. B, Cobourg, Ont. The machine is claimed to be of simple and efficient construction. Power is obtained from a 25-lb. balance wheel which is underneath the tub and runs on ball-bearings, making the machine easy to operate. It is also said to be noiseless in running. The handle is fitted with a foot attachment. The tub is strongly constructed and is equipped with an attachment for holding a wringer. Another important feature is the ease with which the top cover of the machine can be lifted on account of the absence of any heavy mechanism attached to the cover. The best quality of material is said to be used in the construction of the machine, which is finished up in white enamel and gold bronze, thus giving it a very fine appearance.

White Dove Washer.

THE "CANUCK" BREAD MIXER.

A new bread mixer has just been completed by Messrs. E. T. Wright Co., Limited, of Hamilton, Canada. The "Canuck" (so named because it is a strictly Canadian product, is made in two sizes, one of four loaf and the other of eight loaf capacity. Half quantity, however, can be made in either machine.

The pail is made of heavy bright block tin plate, and the clamp, stirring rod, cross-bar and handle are of malleable iron, unbreakable, thoroughly coated with pure tin by efficient and up-to-date tinning processes. "Canuck" bread mixers are simply constructed, with a view towards saving time in adjusting, and for the purpose of allowing the operator to keep them in a perfectly clean condition with a minimum of trouble.

Canuck Mixer.

The mixing is accomplished in quicker time and much more thoroughly than by the old hand process. And the hands do not touch the dough at all—a great consideration in favor of absolute cleanliness.

It is claimed not only bread, but also cake, doughnuts, rolls, and anything raised with yeast, can be handled satisfactorily by the "Canuck."

Each machine is fully equipped with a clamp to fasten it to the table, and with a cover; and a booklet of detailed instructions for operating, containing a variety of excellent recipes, is also included.

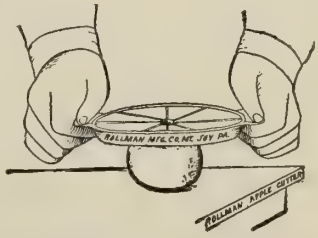
Canuck Mixer.

GREYHOUND GLASS CUTTER.

The Millers Falls Co., 28 Warren St., New York, has placed a new glass cutter on the market called the greyhound glass cutter, No. 300.

Greyhound Glass-cutter.

The cutter has six wheels set in a revolving turret, clamped in place by a set screw. The frame is nickeled and the handle enameled. The cutters weigh ½ lb. per half-dozen, and are packed one in a card-board box.



* * *

ROLLMAN APPLE-CUTTER.

A novelty now being shown to the trade by Saunders & Wainwright, St. Nicholas Building, Montreal, is the Rollman apple-cutter. This device not only cuts the apple, but also digs out the core at the same time. It is claimed to be a very simple, durable and useful tool for general household use. It is especially adapted to preparing apples for baking, and may also be used to cut potatoes for "French fried." The cutter is here illustrated, and shows the apple cut into eight pieces. There is also another model of the same tool which cuts into twelfths. This is said to be a novelty that should meet with a good reception by the housewife who wishes to save time in preparing apples and potatoes.

Rollman Cutter.

Cutter in Operation.

Morinville, Alta.—Caron & Dupins have opened a hardware and grocery store.

Weekly Report on Market Conditions

Statements From Buying Centres on Prices and the Trend of Demand—Full Reports Dealing with Hardware, Metal and Stove Lines.

THE MARKETS AT A GLANCE.

Business with the hardware jobbers continues fair. Paint manufacturers are busy. With the advent of warmer weather there should be a much better demand for spring and summer goods than exists at present. Collections are showing improvement. Conditions in the metal market have not shown much change. Toronto reports declines in quotations on glass and linseed oil. Changes have been made in list prices and discounts on some lines of machine and carriage bolts, etc.

MONTREAL.

MONTREAL, May 13.—Warmer weather has prevailed lately, and this has had the effect of assisting both the jobbers and retailers to move spring lines. Business has been generally satisfactory. There has been an unusual demand this season for small household goods, such as picture wire, curtain fixtures, etc., and it is stated by one jobber that more of these lines have been sold this spring than for many years past. Collections have shown some improvement lately, but there is still much to be desired in this regard.

Metals.

While the metal markets show a slight improvement, there is little to brag about in this connection. Tin, which has been weak recently, has been a little higher the past few days in the London market. Locally the price has been marked down from 42½-43 cents to 41 to 41½ cents. Antimony is unchanged, but the market shows a slightly firmer tone. The price quoted is $8.50. Spelter is still offered at $6. The St. Louis market is a little lower, but London quotations are unchanged. Copper is easier than last week, and New York quotations have dropped from $14.10 to $13.95. The local quotation is down 50 cents, and the price quoted in Montreal is now $16. Lead shows little change in the British market. There have been fractional flurries, and the quotations have advanced from £18 5s to £18 7s 6d. Locally the price has been advanced 25 cents to $5.25 per 100. Pig iron is unchanged.

Lead and Lead Waste Pipe.

There has been a better demand for both lead and lead waste pipe lately. The market is firm, and the quotations of 7½ and 9 cents a pound respectively, with discount of 7½ per cent., are still in effect.

Bar Iron.

The quotation on bar iron is now $2 to $2.05 base, Montreal. The market is a little firmer than at last report.

Rope, Twine, etc.

Business in rope, twine and kindred lines has been very good since navigation opened. There has been no deviation in the price, as previously quoted, and which are as follows:—Pure Manila, 15c; British Manila, 11c; African hemp, 11c; sisal, 10½c; double lath yarn, 10¼c; single lath yarn, 9¾c. For binder twine the prices are:—Best Manila, 650 feet to pound, 13½c; Manila, 600 ft., 11c; standard Manila, 550 ft., 9¾c; standard, 500 ft., 9¼c.

Builders' Hardware.

There has been a fairly brisk and steady demand for all lines of builders' hardware, and with the amount of building work now going on there seems little likelihood of any reduction in the sales of these lines for some time to come. The heaviest sales have been in the cheaper forms of lock sets, but all kinds, except the most expensive, have been moving well.

Changes in Bolts and Nuts.

The list prices of a number of lines of bolts have been changed by the Canadian companies. It is thought that the competition of the American concerns who have been making a strong bid for business lately has been responsible, to some degree at least, for the changes. The lines affected and the new prices are:—

Carriage bolts ($1) list, ⅜-in. dia. and smaller, 70 per cent. off.

Carriage bolts ($1) list, 7-16, 60 per cent.

Machine bolts, ⅜-in. dia. and smaller, 70 and 5 per cent.

Machine bolts, 7-16-in. dia. and larger, 60 and 5 per cent.

Coach and lag screws, 75 and 5 per cent.

Nuts, square, 4½c off list.

Nuts, hexagon, 4¾c off list.

Garden Tools.

There has been a better demand lately for garden tools of all kinds, hose, sprinklers, etc. It is only within the last week or two that any gardening could be done owing to the very backward season. All spring lines have been moving better the last week or two.

Stoves and Ranges.

While stoves and ranges could hardly be called active at the present time, there is a good trade passing in gas ranges and in oil stoves and oil heaters.

Yachting and Motor Supplies.

The demand for yachting and motor boat supplies has started in quite briskly now, as the owners of these crafts are getting them overhauled for the coming season. A number of the retailers are now featuring these lines in their window displays.

TORONTO.

TORONTO, May 14.—During the early part of the week the weather was dull and unfavorable for good business. The result was that retailers noticed a falling-off in the demand for some lines of spring goods. With an improvement in weather conditions there will also be an improvement in business. Toronto Jobbers report that spring business is holding up well, and that they are busy. The principal price changes during the week were declines in the price of glass and linseed oil.

Metals.

The metal markets are in much the same condition as last week, with only a fair amount of business passing. An improvement is noticed in the demand for some lines of iron and steel. The following prices are being quoted at Toronto:—Tin, 35½c to 39c lb.; lead, $4.90 to $5 per 100 lbs.; copper, 15c to 16½c lb.; antimony, 8¾c to 9c lb.; zinc, 5½c to 6c lb.; ingot brass, red, 13c to 15c lb.; ingot brass, yellow, 12c to 14c lb.; half-and-half solder, 24c to 26c lb.; pattern aluminum, 22c to 24c lb.; ingot aluminum, 19c to 20c lb.; acme solder, 19½c lb.; easy wiping solder, 20½c lb.; star extra, 22½c lb.; wire solder, 27c; tinkers' bar solder, 28c lb.; lead wool, 8c lb.

Bar Iron.

No change has taken place during the past week, and Toronto jobbers are quoting bar iron at $2 base, f.o.b., Toronto, and $1.90 base, f.o.b., factory.

Nails, Wire, etc.

Poultry netting and screen wire is selling in fair quantities at unchanged prices.

Wire nails are quoted at $2.10 base, while cut nails are quoted at $2.70 base. Barb wire is quoted at $2.43 per 100 lbs.

Building Materials.

A large number of buildings are now under way, and there is a very fair demand for building materials. Cement is in fair demand at prices shown in current quotations. Roofing felt, 7, 10, and 16-oz., is quoted at $2.10 per 100 lbs. Plain sheething is quoted at 35c per roll; resin-sized at 42 cents per roll; tarred paper at 43c per roll.

Old Materials.

The following prices are being paid, f.o.b., Toronto, on old materials:—

Tea lead, package.....2½c to 3½c lb.
„ „ chest .....3c to 4c lb.
Lead (heavy, pipe, etc.)....3c to 4c lb.
Brass, heavy .....8c to 9c lb.
Brass, light .....7c to 8c lb.
Zinc, heavy .....3c to 4c lb.
Copper, heavy .....10c to 11c lb.

Rubbers, such as old rubber, boots and shoes, according to trim, 5½c to 6½c lb.; overshoes, lumbermen's rubber boots, etc., 5c to 6c lb.; auto tires, etc., 4½c to 5½c.; bicycle tires, 2c to 3c.

Quotations on Furs.

Toronto fur dealers are quoting the following prices for Ontario furs:—Skunk, prime, extra large, $1.50 to $5; muskrats, spring, extra large, 65c; large, 55c; medium, 40c; small, 25c; weasel, No. 1, extra large, $1.50; No. 1, large, 85c; No. 1, medium, 50c; bear, No. 1, extra large, $22; No. 1, large, $17.50; No. 1, medium, $13; No. 1, small, $8; cubs, $2 to $12, as to quality. Mink, No. 1, extra large, $6 to $8.50; No. 1, large, $4 to $7.50; No. 1, medium, $2.25 to $5. Fox, No. 1, extra large, $8 to $12; No. 1, large, $6.50 to $10; No. 1, medium, $2.25 to $5; No. 1, small, $1.75 to $4.

Stoves, Ranges, etc.

Stove manufacturers report that business in gas stoves, oil stoves and summer lines is very brisk, and that an improvement in business has been noticed during the past two weeks. One firm reports that during the past week they have booked orders for a large number of furnaces, and that the future outlook is brighter than it has been for some time past.

Rope, Twine, etc.

There are no new developments in the rope and twine market. Business is showing improvement, and the outlook is brighter than it was a few weeks ago. Toronto quotations are as follows:—

Best Pure Manila.....15c lb. base.
British Manila .....11c lb. base.
African Hemp .....11c lb. base.
Sisal Rope .....10½c base.
Lath Yarn Single ..... 9¾c lb.
Lath Yarn Double.....10¼c lb.

Other lines are shown in current market quotations.

Binder twine prices are:—650-ft. twine, 13½c lb.; 600-ft. twine, 11c lb.; 550-ft. twine, 9¾c lb.; 500-ft. twine, 9¼c lb.; ⅛c per lb. allowance on 5 tons and over; ¼c lb. allowance on 10 tons and over; delivery allowed on 300 lbs. and over.

WINNIPEG.

WINNIPEG, May 14.—Though the past week has been exceedingly busy for retailers, ordering for summer selling is somewhat quiet. Dealers are continuing their policy of securing little more than enough goods to meet the orders which they are sure will come.

The Clean Up, Paint Up week now finished has brought a great volume of buying. It is a little hard to tell just how large was the stimulus given trade, for the goods bought were of course of the class which regularly move rapidly at this period. It is certain, however, that the locl demand for garden tools, seed, paint, lawn-mowers, etc., was larger than expected, and word from the surrounding country indicates that there was a large demand in the smaller places.

Stocking Fencing.

While wholesalers report business quiet, there are some lines which are moving exceedingly well; one of these is fencing. The season has about arrived when farmers will be demanding these goods and stocks are being laid in.

There is also a good call for binder twine and for oils.

Builders' hardware lines are moving much better. Buildings which were started early in the spring are now nearing completion, and dealers are having an opportunity to sell the finishing hardware. In Winnipeg there are a large number of apartment blocks under construction, which will require much of this hardware.

Building is Proceeding.

The building permits for Winnipeg have so far in 1914 established a new record. It has been said that work upon many of the buildings, for which permits were taken out will not be commenced owing to continued tightness of the money market. The building inspector, however, does not think there is much in this rumor, claiming that a large percentage of the buildings for which permits were secured are already under construction, and that there is little reason to doubt that the majority of the work will be carried out.

Heating lines are moving quietly. The stove business has not shown any great improvement as yet. Furnace business, of course, depends very largely on the new buildings, and a number of new houses under construction promises well for this line.

Whether the Clean Up, Paint Up campaign is entirely responsible or not, the fact remains that a great many houses are being repainted this year. This work, added to the decoration of new dwellings, is expected to keep the painters busy all summer, and indications are that the year will be a good one for paints and painters' supplies.

Pelts Being Received.

No price changes have been noted. Credits are still being carefully watched and there is not much change to report in this connection. A number of pelts are being received from hardwaremen. this forming a medium of exchange which enables them to practically secure cash from a certain percentage of customers.

NEW CANADIAN PATENTS.

(Continued from page 56.)

No. 153,306.—Benedict Goldreyer, Ottawa, Ontario, Canada, 27th January, 1914; 6 years. Filed 10th December, 1913. Receipt No. 232,203.

Claim.—1. In a radiator, a section having independent compartments extending vertically thereof, each compartment having a partition extending longitudinally thereof to form looped passages and independent inlet and outlet openings through each of the compartments at the lower end thereof.

No. 153,358.—Robert Washburn, Harriston, Ontario, Canada, 27th January, 1914; 6 years. Filed 21st October, 1913. Receipt No. 230,227.

Claim.—1. In a window, the combination with the window frame provided with suitable guideways, of the upper and lower sashes and a third screen sash slidable between the aforesaid sashes.

2. In a window, the combination with the window frame provided with suitable guideways, of the upper and lower sashes and a third screen sash slidable between the aforesaid sashes and adapted when lowered to closely fit the adjacent side of the meeting rail of the upper sash and when raised the adjacent side of the meeting rail of the lower sash.

SATALOGUES AND BOOKLETS.

Chemically Correct Auto Accessories.

The Northwestern Chemical Co., Marietta, Ohio, has issued catalogue No. 14, describing the "Chemically Correct" line of automobile specialties, also the "Pioneer" line of hydrometers, battery-meters, brushes, etc. The catalogue consists of 44 pages, is attractively gotten up and well illustrated. Copies will be mailed on request.

TALKS OF A SELF-MADE MERCHANT TO HIS CLERKS.

(Continued from page 52.)

like. But look here, young man, do those books have anything in them about John A. Macdonald and Gladstone and Abe Lincoln and Thomas Edison?'

The books touched on modern celebrities luckily and I sold him a set. That deal was an education in itself to me. After that I didn't try to sell the books by talking about people my customers had never heard of before. I gave them a spiel on great men they knew something about—unless I ran up against a school teacher sort of customer with spectacles and that far-away look in the eyes that tells of an interest in Babylonic cuneiform, palimpsests and other useful studies. Then I used to trot out old Caesar and Ptolemy again and give them another airing.

What I'm driving at is this. You must talk to customers in the most direct way you know how. Get your explanations clear in your customer's mind. If you are showing how to run a new kind of washing machine, tell it in the simplest way you can so that the customer will actually grasp the idea. When the explanation becomes clear to the buyer, the feasibility and the worth of the machine become apparent. 'Why, I see how it is,' the customer says, pleased at his own acuteness. 'Why, say, that ought to work fine.' Could you make a sale after the customer had reached that state of mind?

If you couldn't I would advise you to get out of the salesmanship game.

But upon the other hand, if you don't bring the other party to an understanding of how that machine works, he is left in a state of doubt. 'I guess it's alright,' is the most favorable mental attitude he can reach. And he is almost certain to add: 'I wonder if it would work as well as—' And there you are. All your explanation gone for naught.

Talk simply, directly, clearly. Don't use technical terms. Make your explanations short. When you have succeeded in 'getting it over,' quit. After that all that is left to do is to close the sale. To go on explaining it gives the prospect a chance to get away.

Follow that plan, boys, and you will be salesmen in the real sense of the word.

MAKING A STRONG PLEA FOR PRICE MAINTENANCE.

(Continued from page 58.)

Ever-Ready, the Cross, etc., you can buy safety razors at almost any price from the maximum of five dollars down to the minimum of twenty-five cents, or thrown in with a box of cigars.

Well, what's the answer? This:

With Gillette popularizing the safety-first-thing-in-the-morning idea, and sticking (as he did) to five dollars, the opportunity for other men to come along in and sell other razors at other prices was totally wide-open and totally irresistible.

What happened in that case has happened in every other case. The one-price system is a competitive system in every respect. It arose, as I have shown, out of an intense competition between manufacturers of individualized named articles, and it fosters that competition.

The Kellogg Corn Flakes Company is one of the most resolute one-price firms in this country. They do their best to make you pay ten cents, never more, never less, for every package of their corn flakes. Does that save them from competition? Not at all. Just the other way. Since they began manufacturing Corn Flakes, there have been more than a hundred competing brands of "corn flakes" put on the market. Some fifty of those brands exist to-day. You can buy them at various prices, down to as low as four cents a package. The competition at the source, the competition in the factory, gives the public a complete range in product and a complete range in price.

The fact is that when a manufacturer adopts one retail price and makes it known, he debars himself to a large extent from those price wars between manufacturers which have been death to competition.

The Ingersoll firm, now: Its one-price policy is not hidden. I sometimes wish I could read something else out of the window between New York and Washington. The dollar seems to have been invented luckily to provide the American people with a ready equivalent for the Ingersoll watch. The Ingersoll firm owns the dollar as much as George M. Cohan owns the flag. There is no doubt in your mind that the Ingersoll firm intends you to pay one dollar for its watch.

When they first offered a watch for a dollar, there were only two opinions about them. They had gone crazy. Or they were born feeble-minded. But they said "one dollar." And they also said "No more and no less."

I know of a watch which wholesales to retailers at $1.75. In some stores you buy it from the retailer at $2.75. In other stores you pay $7.00—$7.00! And in a third class of stores you pay either of those prices, or anything in between depending on how the retailer sizes you up.

I don't criticize that. It seems that some business has to be done that way.

But the Ingersoll firm thought—selfishly, I do not doubt—that it would be better for everybody concerned if they would sell their watch at one dollar to everybody, everywhere. You might be wise. You might be ignorant. You might be a child. You might be a drunken sailor. You might go for it in person. You might telephone for it. You might know the retailer. You might never have seen him before. It would make no difference. You would pay a dollar. You would never pay less than your neighbor. You would never pay more. All customers would get the same treatment.

At first there was no competition. Then the Ingersoll dollar-watch success evoked competition. A rival appeared.

What could the Ingersoll Company do? Start a price war? Go after this new rival, who was new to the dollar-watch business, and cut his ground from under him at the start by offering the old, well-known Ingersoll Yankee watch at seventy-five cents? And then, with the rival stunned and counted out, put the price back to a dollar?

They couldn't. They couldn't unless they were willing to ruin their whole one-price policy. They could go down, it is true. They could go down below a profit level and lose money, all they wanted to. The trouble would be in getting back again. Their price was known. They had caused it to be known—a uniform price, a universal price. If they went down to another price, that would be known, too, universally. The climb back, in the face of public knowledge, would be a climb of the most difficult possible sort. They preferred to stay where they were.

The old sell-below-cost-for-a-while plan of meeting and throttling new competition is in one world of business practice. The one-price system is in another, entirely.

There are many firms now making watches in the "dollar class." Many of these watches sell constantly at less than a dollar. The Ingersoll Company has no monopoly of its field. Nor has any other one-price firm that I have ever heard of.

I have shown the origin of the one-price system. I have shown its outcome. It was conceived in competition and it begets competition. Competition in quality. Competition in individuality. Every manufacturer putting his mark on his product. Every manufacturer naming his own price, competitively. Every manufacturer making a direct appeal to the public, competitively. No price-jockeying, no price-juggling, in the retail market to the confusion of the public and to the confusion of the only true competition that is possible in individualized named articles—competition between manufacturers.

(Continued on page 68.)

Easier and Quicker Sales

Everything in Nature follows the line of least resistance. The brook, with its many curves and turns, winds its way according to this law of Nature.

Martin-Senour 100% Pure Paint is the line of least resistance in paint selling—and after the first sale, the satisfaction received makes future sales a matter of order-taking.

Purity is the standard when buying White Lead, Zinc Oxide, Linseed Oil, or Turpentine, and purity is the standard of the great majority of people when buying paint.

It is easier — quicker — more profitable to sell 100% Pure Paint to preconvinced buyers than to argue half an hour about the efficiency of a paint that is not 100% Pure.

WALKERVILLE, ONTARIO

Weekly Market Report---Paints

MONTREAL.

MONTREAL, May 13.—The paint trade generally continues very good. The jobbers, with one accord, say business is splendid and in many cases the remark is made that it has never been better. The retailers also report that there has been an increased demand for all kinds of paints, varnishes, stains, brushes, etc. It is expected that this demand will continue strong until after the "Clean Up and Paint Up" week. One of the jobbers in speaking of the large amount of business being done in paints said it had been explained to him that many farmers were painting their old barns instead of building new ones. It is quite evident that more paint is being used this season than for some time past and dealers have a good chance of pointing out how a saving can be effected in brightening up the old buildings with a new coat of paint instead of undergoing the expense of putting up a new structure.

Linseed Oil.

The ruling prices on linseed oil in Montreal have not been changed since last report. There has been a good amount of business and the outlook is bright. Prices are given as follows:

Raw Linseed—
1 to 4 barrels ..... 60c per gal.
5 to 9 barrels ..... 59c per gal.
Boiled Linseed—
1 to 4 barrels ..... 63c per gal.
5 to 9 barrels ..... 62c per gal.

Turpentine.

There has been a scarcity of turpentine on the local market during the past few weeks and some of the jobbers have had to borrow from each other to keep up with their orders. A big shipment is now on its way here and it is possible that prices may be easier, though this is problematical. Quotations at present are:

1 barrel ..... 64c per gal.
5 barrels ..... 63c per gal.

Five-gallon packages, 5 cents advance; packages extra; terms net.

White Lead.

The quotations on white lead have not been changed since last report. The demand has been good, in common with kindred lines, and quotations remain at $8.05 per hundred for ton lots, and $8.25 for less than ton lots.

Glass and Putty.

The docks here are now getting pretty well filled with shipments of glass which are arriving right along from Europe. The prices have not undergone a change for some time and although the market is none too steady no change has taken place here. Putty is in good demand, in all sizes of packages.

Ready-Mixed Paints.

Sales of ready-mixed paints have increased steadily and there seems no reason to believe that the demand will not continue good for some time to come. The Clean Up and Paint Up campaign here is certainly having a good effect and the retailers are taking full advantage of the opportunity to get up attractive window trims and to link their stores up with the movement.

Gasoline.

Prices on gasoline are a little easier than last week. Business has been exceptionally good, in fact about all the dealers can handle. A great many orders are taken during the winter for shipment when navigation opens and just at present these orders are taxing the shippers to the utmost. Prices are now as follows:

Barrels, in wood ..... 23c gallon.
In steel and drums ..... 19½c "
Tank wagon (100 gals.).....19c "

TORONTO.

TORONTO, May 14.—The weather during the past week has been rather unfavorable for painting, and has affected paint sales to a certain extent. A good volume of business is passing but with the advent of better weather there will be a decided improvement in business. The chief features this week in the Toronto markets have been the declines in the prices of glass and linseed oil.

Decline in Glass Quotations.

There has been a decline in quotations on glass at Toronto. The new prices are shown in the accompanying panel and affect 16-oz. and 24-oz. sheet glass. Plate and fancy glass have also been reduced in price.

Decline in Linseed Oil.

In last week's report we stated price-cutting on linseed oil was evident; there has been considerable price-cutting of late and the result has been that the ruling quotations have been lowered 2 cents per gallon. Toronto quotations are now:—

Raw Linseed Oil—
Single barrels .....63c gallon.
3 to 5 barrels .....62c gallon.
6 to 9 barels .....61c gallon.
Boiled Linseed Oil—
Single barrels .....66c gallon.
3 to 5 barrels .....65c gallon.
6 to 9 barrels .....64c gallon.

Oil in less than barrel lots, 7 cents per gallon. Cans are charged at: 5-gal. cans, 50 cents each; 10-gal., 75c each.

Turpentine.

Reports from Savannah indicate that quotations are being well maintained, and as the receipts are not pressing and the demand good, the market is showing signs of strength. Resins are quiet, also pitch and tar.

Toronto quotations on pure turpentine are as follows:—

Single barrels .....65c per Imp. gal.
2 to 4 barrels .....64c per Imp. gal.
5 gallon lots .....72c per Imp. gal.

White Lead.

Quotations on white lead remain unchanged. Less than ton lots $8.40 per 100 lbs.; ton lots $8.20 per 100 lbs.

REDUCTION IN GLASS QUOTATIONS.

A reduction in the price of window glass for Toronto territory has been announced. The prices are now 20% discount of the $4.25 base for 16 oz. glass and 25% discount of the Double Diamond list for stock cases. Cut sized prices 40-10%. The prices on plate glass and fancy glass have also been subject to a reduction ranging from 5 to 10%. The new prices apply on all Ontario territory west of Port Hope to Fort William.

Gasoline and Benzine.

The demand for gasoline is becoming more active. Single barrels are quoted at 21½ cents per gallon; benzine is quoted at 20½ cents per gallon in single barrels.

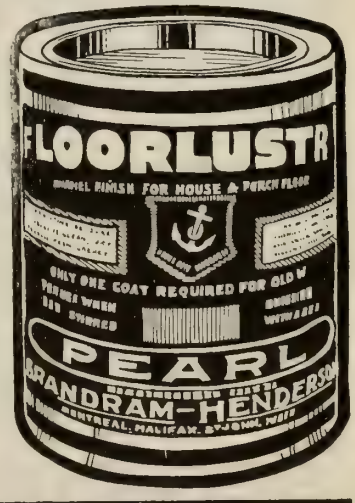
On account of the weather being unfavorable for painting, the retailers have found that the demand has been rather backward. The majority, however, are quite optimistic and expect a big improvement in the demand as soon as warmer and more favorable weather sets in. Retail merchants should make the best of the dull days in hunting up prospects or laying plans for a rich harvest of paint sales as soon as weather conditions improve.

MAKING A STRONG PLEA FOR PRICE MAINTENANCE.

(Continued from page 66.)

I submit that every competitive manufacturer of such articles should be permitted by federal law to bind his retailers against price-cutting. I submit that such a law, spurring competition, is more desirable than any number of laws bitting and bridling monopoly.

The Profit Side of the Ledger



The goods that bring up the profit side of the ledger so that you take pleasure in footing up the columns are the goods you have faith in; goods you can tell your customers to use, feeling certain you are giving them the best advice.

You cannot find a better trade-builder in this class than

FLOORLUSTRE

It has qualities that strongly commend it to the user—a practical merit that makes itself felt to every man who puts it to the test of actual use. The first sale of Floorlustre is never the last. In almost every household there are floors that need treatment, and as Floorlustre is one of the most beautiful and durable of floor enamels, and at the same time one of the easiest to apply, you can see what an opportunity Floorlustre offers to the enterprising dealer.

The enduring successes have been goods of sterling merit, and it is the sterling merit of Floorlustre that makes it so safe and profitable an article to handle.

BRANDRAM-HENDERSON LIMITED

Montreal Halifax St. John Toronto Winnipeg

Current Hardware and Metal Quotations

These prices are for such qualities and quantities as are usually ordered by retail dealers on the usual terms of credit, the lowest figure being for large quantities and prompt pay. Large buyers can frequently make purchases at better prices. The Editor is anxious to be informed at once of any apparent errors in this list, as the desire is to make it perfectly accurate. Retailers desiring to get in touch with firms selling any articles on which quotations are made can do so by writing the editor.

Are You Doing A Good, Profitable Paint Business?

If not, you should find out the reason why. Perhaps you are not handling a profitable line, or perhaps it is a line that does not satisfy your customers. If so, you should make a change.

Jamieson's Pure Prepared Paints

allow you a good profit, and the absolute purity makes satisfied customers and brings repeat orders.

These are the two important points that build up a profitable paint business.

It's easy enough to talk, but action makes the proof. The offer reprinted below has appeared in Hardware & Metal, Canadian Hardware Journal, and The Painter and Decorator. Besides, it has been widely distributed by us in printed form. Yet there has been no response—no one has taken it up. The offer is still open—if there's a wall finish on the market that will compare with Muresco, here's the chance to prove it.

PROOF MURESCO

Offer has no takers

The Offer

MURESCO, "for Twenty Years the Leading Wall Finish," Accepts Challenge. $100.00 Forfeit. We understand that certain Kalsomine manufacturers are making the statement that their Kalsomine will cover more surface, pound for pound, and cover it better than MURESCO. If by buying a quantity of their goods and MURESCO on the open market and having two master painters—who may be selected by both parties—test them out, they can prove above statement, we will pay $100.00 to Sick Children's Hospital.

DEALER

This Lock, Mr. Farmer, is the one used in our "Great West" Fencing

You might possibly get some cheaper fence than ours, but you will look in vain for any better.

Our Fences are made in the West, designed especially for the Western trade, and we guarantee every Rod as to strength and durability.

It is the "Standard Fence" of our "Great West."

Write for our illustrated catalogue and price list.

A Novel Feature of the

MAXWELL
"Favorite" Churn

—and one which has made it popular wherever used — is the

BOW LEVER

No other churn has this lever. Handle can be adjusted to centre, left or right, whichever is desired, or is easiest for driving. The frame is of light rigid steel with bolted trunnions, and the barrel of best imported oak with aluminum hoops. Swings on roller bearings and is exceptionally easy-running and durable. A splendid seller.

Send for Illustrated Catalogue of the "easy-to-push" Maxwell lines.

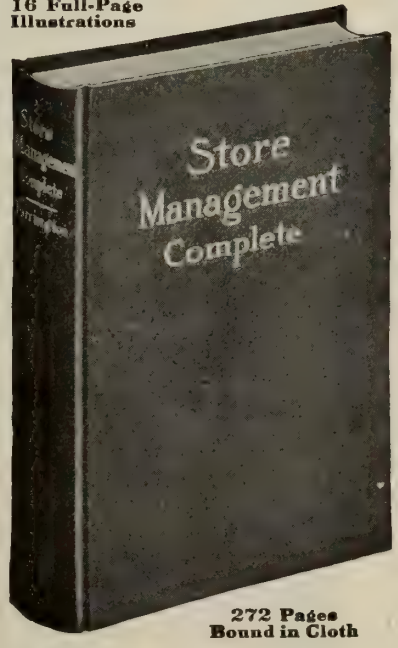
MAXWELLS LIMITED, St. Mary's, Ont.

Do You Want More Money?

OF course you do and are willing to make use of your spare hours in a way that will net you the biggest returns. Many others like yourself have had the same desire to turn their spare time into money and profitable experience. They are now making from $5 to $20 a week, according to the time given.

IF YOU ARE NOT AFRAID OF WORK you can make $5 a week, giving 3 hours a week to taking subscriptions to

MacLean's Magazine



We supply you with all you need to take subscriptions except the determination. We allow a definite, liberal commission on both new and renewal subscriptions.

THE coming months are the most pleasant in the year for the work. If you write at once we can appoint you as our local representative.

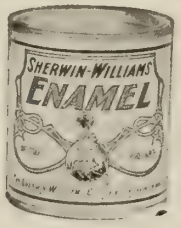
PEOPLE CAN'T GET AWAY FROM IT—

they are continually confronted by S-W Advertising. The result is—people buy more S-W products every year, because they are continually becoming more familiar with S-W quality.



There is a Sherwin-Williams Finish for every purpose.

The "Cover-the-Earth" is the best known paint-trade-mark in the world.

PRATT & LAMBERT advertising and sales promotion brings the varnish buying public into your store. Pratt & Lambert not only supply varnishes of the highest quality, but create a big, steady, profitable trade on those varnishes for you. Pratt & Lambert national magazine advertising is the great general national selling force which reaches all those who can afford to buy high grade varnishes.

Home-builders are reached through the Direct Letter and Booklet Campaign; painters through *Varnish Talks*, the practical P. & L. Painters' Magazine; architects and contractors by means of personal letters on specific jobs, personal calls, costly sample panels and helpful literature, furnished gratis, specifications in the architectural specification reference books and advertisements in the architectural papers.

The desire to buy Pratt & Lambert Varnishes created by all this advertising is diverted to your store by attractive colored Aqua-Types of the same designs appearing in the great national magazines, as well as other attractive store and window display matter, framed panels, printed matter, newspaper electros, bill-posters, motion picture show slides, etc.

Get *your* share of this business in *your* town.

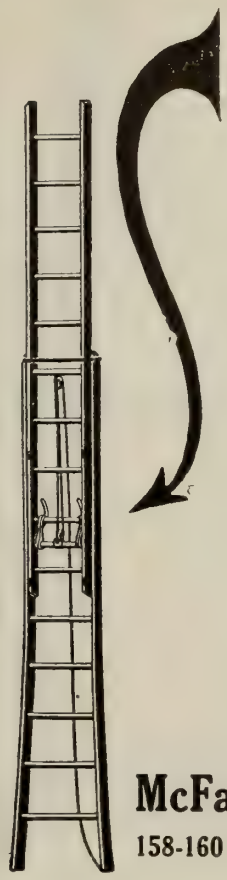
A GOOD MECHANIC IS PARTICULAR

He likes good tools—tools he can rely upon, year in and year out, and this is the reason why the good men all prefer.

STAR BLADES

Star Hack Saw Blades have proved themselves. They are known in the shops and are always in demand. This means business for you, **IF** you carry Star Brand.



Easy sales, good profits and no "comebacks;" those are the things that make the Star such a satisfactory blade to the dealer.

Your customers want "STARS." It would pay you to supply them; also many other unusual things shown in our **New Dealers'** Catalogue, a copy of which we shall be glad to send on request.

MILLERS-FALLS COMPANY

MILLERS FALLS,

Safety First

(OUR MOTTO)

The most reliable extension ladder offered to the trade to-day. Made of clear yellow pine with hardwood rungs. Reinforced with wire let into a groove on the back of the ladder. One of the principal features of our ladder is the heavy malleable iron castings bolted on the sides which have given satisfaction for years. Stock sizes 20 to 40 ft.

Write for catalogue and prices for step ladders, bake boards, skirt boards, curtain stretchers and other woodenware.

GERMANTOWN LAMPBLACKS

Are Recognized Everywhere AS THE BEST

When we originated Germantown Lamp Black at our factory at Germantown. Philadelphia, we little realized that it would become the STANDARD of the trade and in order to market their blacks every other manufacturer would have to use that name or make something better. Special Blacks for Paint, Varnish, Rubber Oilcloth, Paper, Fertilizer, etc.
Look for the red seal on every package. Why buy the "Near Brand" when the best is procurable?

ASK YOUR DEALER.

MAXIM SILENCER

The Maxim Silencer has aroused more interest and received more publicity than any other invention in the firearms field for years. This insures numerous and steadily-growing sales to the dealer who sells it—and makes known to his customers the fact that he sells it.

We help you sell and demonstrate the Maxim Silencer in your store. We furnish you, without charge, with a striking store sign, folders, and other helps. And we advertise persistently in sporting and outing papers, farm journals and other publications which reach rifle owners in city and country.

You can sell a Silencer with every rifle bought in your store—in addition to selling present rifle owners in your territory. Every sale means an **extra** profit.

Ask your jobber; or write to us for full particulars, prices and discounts.

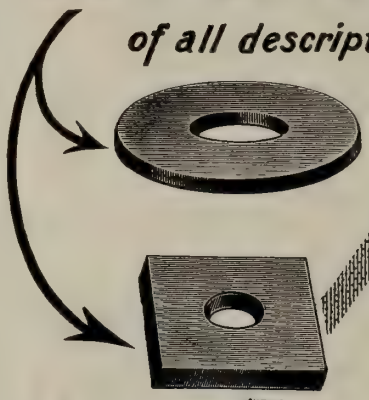
GALVANIZED STEEL TANKS

WAYNE GALVANIZED STEEL TANKS for stock watering are far superior to the old-time wooden tanks.

WAYNE TANKS will stand the roughest usage. Will not dry up and leak in summer or freeze and burst in winter. Always easy to move wherever the supply of water may be.

THERE IS GOOD MONEY in it for you to handle the WAYNE line.



Catalogue and prices furnished on application.

Saves Oil, Time and Labor

A trial always makes a steady user.

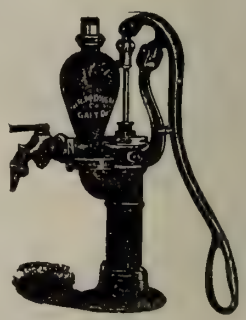
Easy Profit because Easily Sold

No matter in what position the can may be held, the oil is entirely controlled by the operator. Not a drop of oil need be wasted. Oil is forced out by simply pressing on the plunger. The flow of oil ceases the instant the pressure on the plunger stops.

Oiling can be done in one-half the time and with less effort.

The "Cannon" is giving satisfaction to thousands of users.

Drop a card for particulars.



R. E. Bloomer
Keithsburg, Illinois

More-Profit Pumps ---Real Profit

No use to sell a pump that makes trouble for a dealer with his customer.

The trouble is remembered. The cost of repairs is dead loss of time and temper. The dealer suffers.

"Aremacdee" hand and motor metal pumps for force or lift use, every kind, are shown in the big catalogue.

Dealers, ask for prices and terms. Get real profits on your metal pump sales.

The R. McDougall Co., Limited
GALT, CANADA

Efficiency in Business a Matter of Health?

Do you believe in the nationalization of Medicine, so that each person has regular medical attendance?

The proposition is made by a well-known medical practitioner in the June MacLean's Magazine, to nationalize Medicine in Canada. In this article he proposes to have a state system whereby every man, woman and child will have regular medical inspection at a nominal fee. The human body will be thus under the supervision of experts and all defects detected at once, and many later troubles avoided by the regulative and curative processes employed at the time.

The whole suggestion is of such importance that it will be of interest to every person in Canada, and Canadians generally will applaud the enterprise that produces so strong a magazine as MacLean's.

The illustrations are made especially for MacLean's. Each article in the issue has been the selection of a competent staff of editors. Besides this one on the physical side of life there will appear a second efficiency article by Mr. Shepard, of the Emerson School on Efficiency in Business, which is a top-notcher. It means much to every business manager.

Other articles equally entertaining and thoroughly novel are treated by leading writers. The short story features, the special art features, and the Review departments are unusually good. The cover design is another of Coburn's, who has made such a hit with Canadian admirers.

Here are some of the other articles that appear in this issue:

A Week-end Visit to Rideau Hall.
Bungalows—of Many Types.
Boss Bowser.
Donald Brian—Canadian Actor.
Carson—As He Is.
Swiss Guides in the Rockies.
A Maker of Germany.

Send us a postcard and have your name placed on our subscription list.

Subscription $2.00 a year. *Twenty cents a copy.*

LAW

No business man can afford to be ignorant of the laws governing merchandising.

Few, however, have the time to read the many and complicated volumes of the country's laws and statutes, and for the benefit of the hustling business men a concise and understandable book has been prepared. It gives all the necessary laws and information regarding merchandising, including the renting of a store, buying property, collecting debts, etc. This book, the

Digest of Canadian Mercantile Laws

is a ready reference, a valuable guide in daily business, and is saving many dollars.

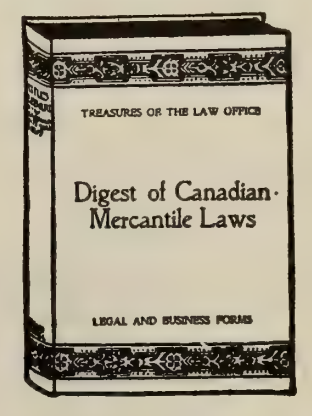
No work published in Canada equals it for business men.

A veritable consulting library on this one line so universally needed.

Based on Dominion and Provincial Statutes and Court Decisions.

Indorsed by barristers, sheriffs, magistrates and conveyancers.

Recommended by the Ontario Institute of Chartered Accountants.



Used by more accountants, bankers and business firms than any other work on the subject. Forwarded direct post free on receipt of price.

Keep the book ten days, and if it is not satisfactory, return it and get your money back. If remitting by cheque, make **same payable at par,** Toronto.

Eastern Edition, Price, $2.00

Special Western Edition, $2.50

To meet the needs of subscribers in New Ontario and the Western Provinces, where land is under The Land Titles System of Registration, an Appendix of 16 pages, containing a synopsis of the Land Titles Acts, has been added to our regular edition, thus constituting a special "Western Edition." Price $2.50.

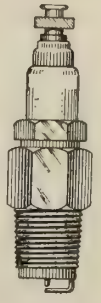
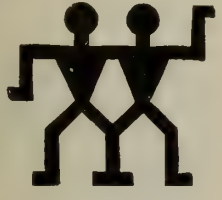
John Wanamaker says that advertising doesn't jerk—it PULLS. He ought to know, and yet some men think that advertising should go against all rules and precedents and jerk them to success with one tremendous yank.

SPARK PLUGS that Canadian Dealers will find very profitable



AJAX SPARK PLUGS



A standard form of Spark Plug construction, using conical type porcelains and best mica insulation. We have made the same goods in the same way for years, and have not found it necessary to change. The sparking points are non-corrosive, and will not disintegrate with heat.

SPECIAL LONG PLUGS
of most improved type

These styles should be carried by all dealers, as they satisfy an increasing demand for certain makes of engines. For Special ½-inch Plugs have an extra long body, admitting of ready wrench manipulation.
Just try these plugs. They'll speak so loudly for themselves that you'll order more.

"KANT SCRATCH" FLY SWATTER

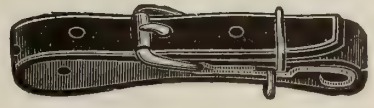
is a durable piece of workmanship. From the rigid metal handle to the swatter cloth, it is put together to give long service.

Its flexibility insures wear, and the felt protection to the swatter cloth protects the furniture or curtains against mar or the ripping of threads. It is 15 inches long, 5 inches wide. The handle is ¼-inch flat plated steel. Standard wire cloth is used. The felt is sewed on in such a way that it is sure to stay.

The "Kant Scratch" at 10c is a sure seller.

Packed one dozen in a highly attractive, eye-catching box.

Felt protects the Furniture etc.



Handle is easy to grip

Andrews

Wire Works of Canada, Ltd.

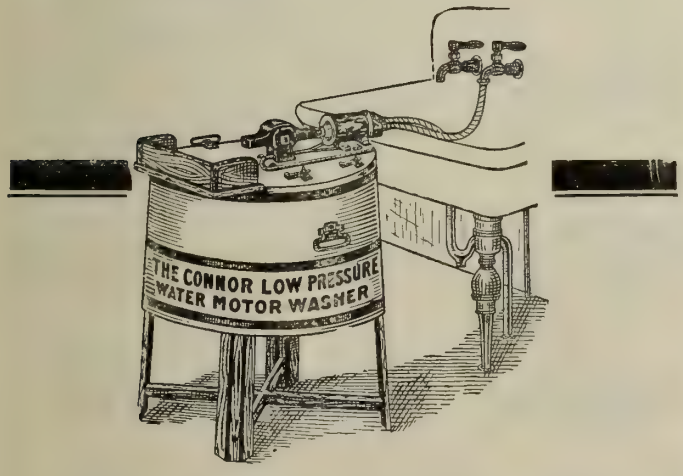
Watford, Ontario

The Handy Hame Strap

To show is to sell

Made of oak-tanned Belting Leather. It's twice as strong as the ordinary harness leather strap and it looks it.

Special hook fastens on to the hame and prevents wear and slipping at this point—Made also in the regular sewed style.



If you want a sample of the leather used in the belting straps, say so, and we'll send it immediately. **If you want samples of Straps, send 5 cents in stamps to help pay postage.**

The distinctiveness of the Griffith quality, the reasonable selling price and the good profit allowance are good reasons why you should stock this strap at once.

GRIFFITH'S HORSE SPECIALTIES

G. L. GRIFFITH & SON

Stratford, Ontario

The Connor Low-Pressure Water Motor Washer

is a "business getter." It operates efficiently on a pressure as low as 20 lbs.—thus overcoming the chief objection to a water-driven washer. Housekeepers need it—and will buy it.

A profitable margin on sales makes this machine "a paying proposition" for you to handle.

J. H. Connor & Son, Limited

Ottawa, Ontario

Dealers—Handle this Fence

YOUR success in the sale of fencing does not depend so much on your sales ability as on the fencing you sell. It's fence service—not price—that brings you customers. Ours is a fence of service—a fence of repeat orders. We have letters from dealers all over the Dominion substantiating these statements.

Peerless Ornamental Fencing

not only protects, but beautifies property as well. Every stay is made of strong, stiff wire that will not sag. Our fencing is made from galvanized wire and in addition, is given a coating of zinc enamel paint, thus forming the best possible insurance against rust. Peerless fence is easy to erect and will hold its shape for years to come. We also build a full line of ornamental gates.

Send for Dealers' Proposition

Get our literature showing many beautiful designs for lawns, parks, cemeteries, etc. Also ask about our farm fencing and gates.

DIRECTORY OF MANUFACTURERS

Hardware and Metal receives, almost daily, enquiries for the names of manufacturers of various lines. These enquiries come from wholesalers, manufacturers and retail dealers, who usually intimate they have looked through Hardware and Metal but cannot find any firm advertising the line in question. In many cases these firms are anxious to secure this information at once. This page enables manufacturers to keep constantly before the trade lines which it would not pay to advertise in larger space.

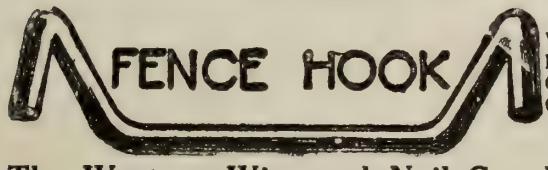
THE "WANT AD."

The "want ad." has grown from a little used force in business life into one of the great necessities of the present day.

Business men nowadays turn to the "want ad." as a matter of course for a hundred small services.



The "want ad." gets work for workers and workers for work.

It gets clerks for employers and finds employers for clerks. It brings together buyer and seller, and enables them to do business though they may be thousands of miles apart.

The "want ad." is the great force in the small affairs and incidents of daily life.

HARDWARE WINDOW DRESSING—THIS is the first book ever written devoted exclusively to Hardware Display. There are 256 pages and over 200 illustrations with full working descriptions. It is the purpose of this book to illustrate and explain how hardware windows may be dressed to the best advantage—how they can be made to sell goods. It is not a theoretical work but a collection of specimens of the best work and ideas of the most expert window dressers in the world. These men have contributed their experience covering the many phases of hardware window display. This volume, therefore, represents the sum total of information on this subject presented as concisely as is consistent with clearness. By following the simple illustrated directions given in "Hardware Window Dressing" any clever clerk can put in good hardware displays at no cost whatever. size 8x11 inches. Price $2.60 postpaid. MacLean Pub. Co., 143 University Ave., Toronto.

DOMESTIC ELECTRICAL WORK, BY WILliam A. Wittbecker. Concise and Practical Explanation for Plumbers and Hardware Dealers, on How to Wire Buildings for Bells, Alarms, Annunciators, and for Gas Lighting From Batteries. The information given is practical, and with a close observance of the directions laid down, any one, though entirely ignorant of electricity, should be able to do the work described. Illustrated with 22 diagrams. Price, in paper, 25c post paid. Price, in cloth, 50c. MacLean Pub. Co., 143 University Ave., Toronto.

HARDWARE STORE BUSINESS METHODS —The authors of the articles in this book are for the most part practical and progressive hardware merchants. The embodiment in these articles of the experience of such able and enterprising men and the suggestiveness of the principles and maxims presented make this volume of infinite value to that trade. The 40 subjects discussed include: Rules and Regulations for the Hardware Store; Hardware Buyer; Good Methods in Stock Taking; Prices and Catalogues; Collecting Accounts; The Merchant and His Employees; Changing Business Conditions and How to Meet Them; Profit Figuring System; Starting in Business; Changing a Credit into a Cash Business, etc. 220 pages. Price $1.10 postage paid. MacLean Pub. Co., 143 University Ave., Toronto.

Toledo Garden Hoes

MADE IN CANADA

Blades are made of high-carbon spring steel, securely riveted to malleable-iron socket. A high-grade Hoe at a low price. Made in four sizes.

CATALOGUE UPON REQUEST.

MANUFACTURED BY

The Adamite Wheel & Mfg. Co.

HAMILTON, ONTARIO

The PULL-EASY Garden Cultivator

IT IS ADJUSTABLE TO ANY WIDTH ROW

This handy garden tool can be used both as a rake and a weeder. Patented slide grooves, secured by thumb screws—allows a width adjustment varying from seven to eighteen inches. When plants are young, middle tooth can be removed, the plants straddled and two rows worked at once. Weighs but four pounds. Indispensable about the yard or garden.

For Sale by all Leading Canadian Jobbers.

THE PULL-EASY MFG. CO.

110 Barstow Street WAUKESHA, WIS.

Extra Good Service

No. 1 Fire Pot

is obtained by using the "C. & L." Gasoline Fire Pots and Torches. Why? Because no expense or pains are spared to make them right. They are the best that experience and skill will afford. We have never experimented at the expense of the user.

The No. 1 Fire Pot has an established reputation for superior quality. It produces an intense heat and will melt a pot of metal and heat a pair of soldering coppers at the same time, if desired.

All leading jobbers will supply at factory price. Send for Catalog—it's free.

Supreme Cutlery

FOR SALE BY LEADING WHOLESALE HOUSES

See how distinct is the difference between the figures of the

feet and the inches. Every RABONE Steel Tape is made on our

Patent Duplex Etching System

of marking, the original and still the best. The feet are black figures on a bright steel tablet, while the sub-divisions are bright figures on a matt background. There is no confusing mass of figures on the Rabone Steel Tape yet

EVERY FOOT IS CLEARLY MARKED AND QUICKLY READ

Rabone Steel tapes sell before all others and give the most satisfactory results because we have been making Tapes, Rules and Levels—*and nothing else*—for 130 years. All this time we have been specialising on measuring instruments and perfecting machinery to produce the best.

WE MAKE MANY VARIETIES FOR ALL PURPOSES.

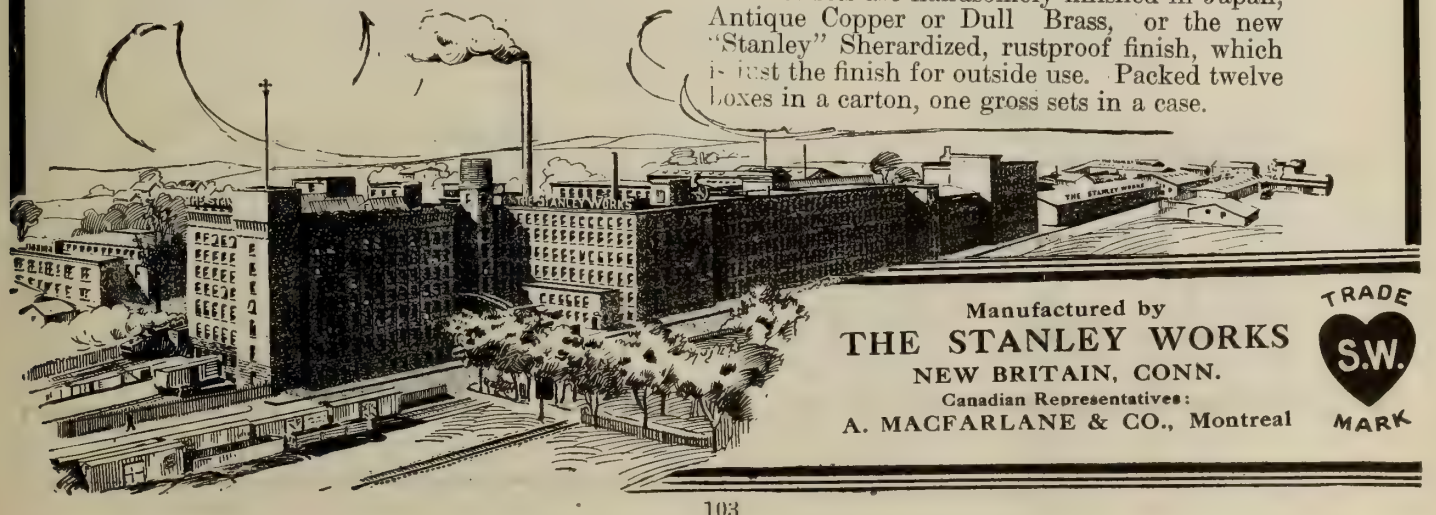
STANLEY'S

Wrought Steel Screen Door Hardware

Set No. 1750

The Doors May Be Removed by Merely Slipping Out the Pins and Are as Readily Re-hung in Spring.

EACH SET COMPLETE
IN A NEAT BOX
WITH SCREWS



DEALERS and BUILDERS alike are PLEASED with the high quality of the hardware and the convenient way it is packed ready for use.

Set No. 1750 consists of two 3 x 3 Ornamental loose pin Butts; one 5-in. wrought-steel pull; one No. 3 high-grade steel-wire spring, greatly superior to the ordinary screen springs; and one gate hook and eye. This is the very best set of screen hardware on the market, but sells at prices comparing favorably with other makes of greatly inferior quality.

Set No. 1752 is less expensive but fully equal to the screen-door sets of other manufacturers. It is made up of two 2½ x 2½ Butts; one 4½-in. pull; one No. 2 steel spring, and one gate hook and eye.

These sets are handsomely finished in Japan, Antique Copper or Dull Brass, or the new "Stanley" Sherardized, rustproof finish, which is just the finish for outside use. Packed twelve boxes in a carton, one gross sets in a case.

Manufactured by
THE STANLEY WORKS
NEW BRITAIN, CONN.

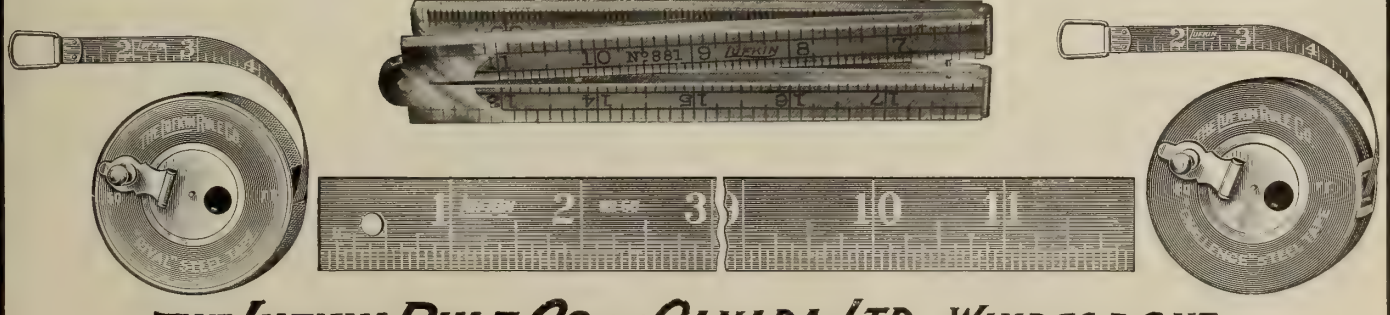
THERE'S MORE SELLING ARGUMENT IN THE NAME **LUFKIN** THAN YOU EVER NEED TO SELL LUFKIN GOODS



LUFKIN Measuring Tapes and Rules

Are Canadian Made and are on sale at practically every prominent house in the country stocking such goods.

THIS IS THE SIMPLE EXPLANATION: Dealers stock the line that will sell and will bring customers back. CUSTOMERS buy the line in which they have confidence.

THE OPINION OF THE LARGE MAJORITY MARKS THE SAFE COURSE.

Let Canada Cement Increase Your Business

Progressive farmers everywhere are building their fences with Concrete Posts. Our extensive advertising is educating them to use Concrete Fence Posts and to demand Canada Portland Cement to insure having the best concrete.

To every customer who buys cement for posts, you can sell, at the same time, all or a large part of the other goods on the above Sales-Slip, but the first item called for will be

CANADA Portland CEMENT

If you sell this dependable brand, it is probable that you can sell the rest of the bill,—but if you do not sell "Canada Cement" you may never know that a fence is to be built.

The above quantities are based on a fence containing 500 concrete posts, spaced 12 feet and requiring 6,000 lineal feet of fencing.

This example shows only one of the many ways in which small orders for Canada Cement bring large orders for other goods.

Write at once for terms and quotations and get your share of the big orders that Canada Cement brings.

"IDEAL ASSORTMENTS FOR RETAILERS"

Most Easily Marketed

1847 ROGERS BROS. MERIDEN B. COMPANY

"Silver Plate that Wears"

The reputation of 1847 ROGERS BROS. WARE, before the public for over two generations, is unquestioned — it is sold with an unqualified guarantee—backed by the most persistent and extensive advertising in the history of silverware.

This is a brand of silverware that has enjoyed established confidence for over sixty-five years, and that is known to your customers as "Silver Plate that Wears"—it requires no argument; it will save time and talk for the dealer; and there is a satisfaction in selling the BEST.

Take advantage of our NEW PUBLICITY PLAN and make your Silverware Department profitable, effective and efficient. Ask your Jobber for our booklet, "Ideal Assortments for Retailers,"—it will make buying easy, also reselling.

Yale Triplex Blocks

A "Line of Steel from Hook to Hook"

Every load-lifting problem, on the farm, in the factory, machine shop, garage, to lift your gas engine or to lift your motor boat out of the water, is solved with a Yale Triplex Block.

"Safety First" in material and workmanship justifies the Yale Triplex Block, and is behind your sales to your customers.

Fairbanks Valves

"Disc Renewed in one minute"

Will remove all valve troubles. They are built of high-grade material, to withstand a great deal more than their rated pressure. The renewable disc feature is unequalled by any valve on the market. The valve stems are packed with Palmetto Twist packing, which will remain soft and perform its function better than any other packing made.

Fairbanks Scales, Small Tools, Automatic Supplies and other mechanical lines are the best the world affords.

Diamond Ware

The charm of **ENAMELED WARE** is because it lends itself to cheery color schemes. The housewife spends many hours each day among her pots and pans and keeps in mind when buying more that she is going to have them staring her in the face for years to come.

Diamond Ware for these reasons is what she wants. Its dainty blue and white colors outside and light finish inside satisfy her demand for style and cleanliness.

Advise **DIAMOND WARE**— for a bright kitchen.

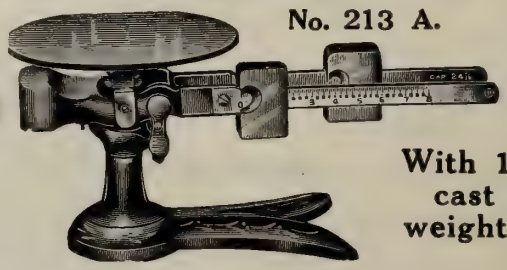
Be the Parcel Post SCALE Man in Your District



There is a very large field and good profit

The Burrow, Stewart & Milne Co.'s new PARCEL POST SCALE is well built and well finished, accurate and absolutely reliable. Each scale is inspected and stamped by Government Inspector.
The operation of weighing is simple, and the calculation of postage easy.
One bar of beam is marked in ounces up to 8 lbs. and the other is marked in 8 lb. notches up to 16 lbs., making in all 24 lbs. While the present limit of weight is 11 pounds it is very likely to increase as it has in the United States and we have made allowance in capacity for this. When rates increase we will supply our customers with **new rate cards,** giving the increase in weight or change in rates.
No loose weights are required. This is an excellent **general utility scale** as well. Will weigh articles of all kinds

The Most Essential Difference in Wilt Twist Drills is Found in the Process by which They are Made

Instead of six or seven separate processes which have been necessary heretofore, **Wilt Drills** are machined complete at a single chucking. The rough stock goes into the automatic machine and comes out a perfectly cut drill.
You can readily understand what that means in accuracy and uniformity.

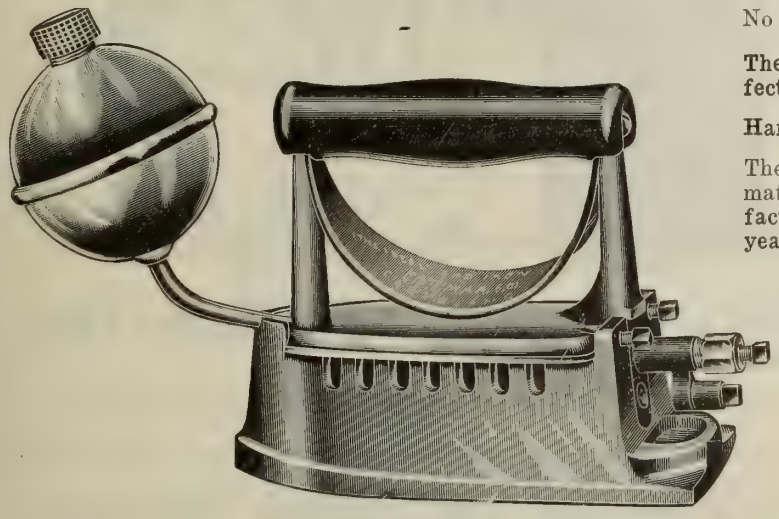
Because of the perfect machining — and the scientific exactness with which they are hardened, **Wilt Drills** will drill more holes of a given size, per dollar of cost, than any other drills ever made.

Every live dealer in Canada should stock up with Wilt Twist Drills. There's sure to be a big demand for them.

The Wilt Twist Drill Company of Canada, Limited

WALKERVILLE ONTARIO

The "IDEAL" Sad Iron



(Self-Heating)

When the "Ideal" is hot enough to iron heavy linens there is but 2½ lbs. pressure on the tank—while every tank is tested to stand 175 lbs.—THIS INSURES ABSOLUTE SAFETY.

Cost of operation is less than one cent per day for a family of five.

A tank of gasoline will burn for four hours.

Heat can be regulated to suit conditions.

No possibility of scorching clothes.

There is no gas, the combustion being perfect.

Handle and operator always cool.

The Ideal is made from the highest grade material. **Burner and Generator are manufactured under the direction of men with 20 years' experience in such work.**

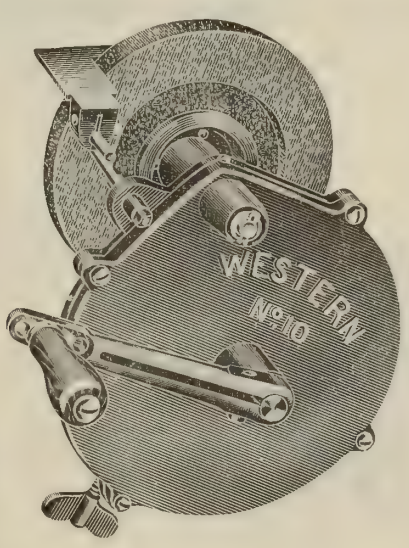
Directions accompany every iron and we guarantee satisfaction if operated according to directions.

Exposed parts are nickel-plated and polished, giving the iron an **attractive appearance.**

You'll find it a big seller. **Write for price.**

THE WESTERN Tool Grinder

Noiseless, Dirtless, Chainless and Easy Running



Every part is made of the finest iron, assuring a long, satisfactory service.

The "Western" has cut gears encased and a high-grade corundum grinder.

It is light (weighing only 20 lbs.)—therefore it is easy to handle.

Packed one in a box.

If you require anything in the line of **Lawn Mowers, Tool Display Brackets, Lawn Sprinklers,** etc., we can supply the kind that are reliable and profitable.

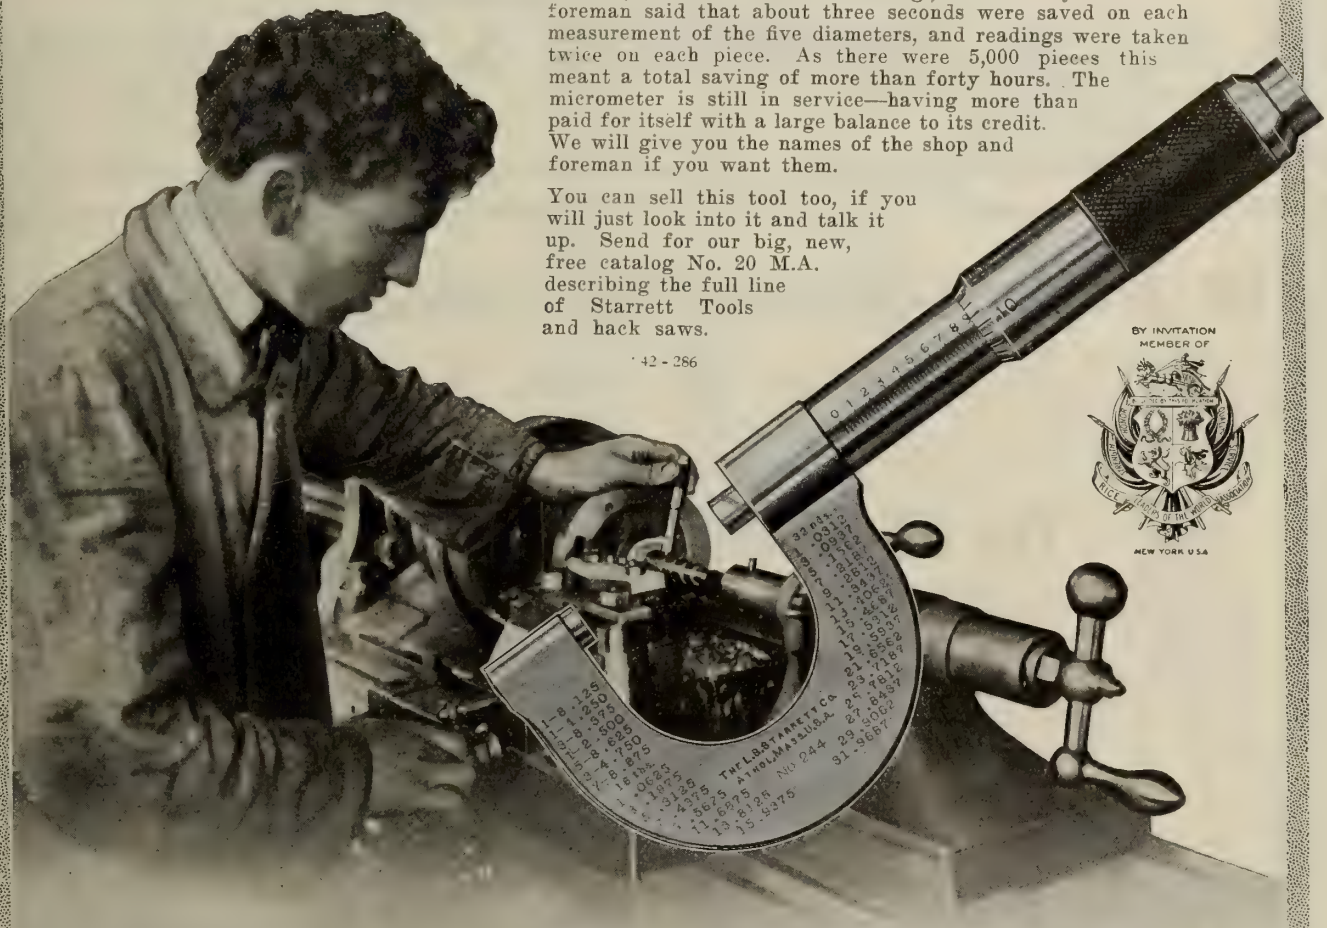
This Micrometer Sold Itself
—and then saved more than its cost

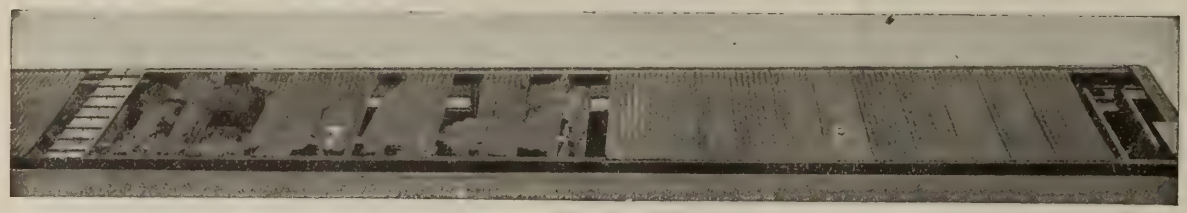
While taking some photographs for advertising purposes in a large machine shop recently the Starrett advertising man saw a machinist using several ordinary Starrett micrometers on a turning job. The piece had five different diameters and there were to be 5,000 pieces like it.



The advertising man called the foreman's attention to the fact that a

Starrett
Quick-Acting Micrometer

would do the measuring in less time than was taken with several micrometers of the usual kind. He explained that pressure on the plunger in the end of the thimble permitted the spindle to slide to its adjustment. After listening to the description of the Starrett, the foreman sent out to a nearby hardware store and bought the micrometer, paying $10.00 for it (No. 204 in Starrett catalog.) A few days later the foreman said that about three seconds were saved on each measurement of the five diameters, and readings were taken twice on each piece. As there were 5,000 pieces this meant a total saving of more than forty hours. The micrometer is still in service—having more than paid for itself with a large balance to its credit. We will give you the names of the shop and foreman if you want them.



You can sell this tool too, if you will just look into it and talk it up. Send for our big, new, free catalog No. 20 M.A. describing the full line of Starrett Tools and hack saws.

The BT Iron-Bound Step Ladder

It is made throughout from the very best No. 1 clear stock. It has wide steps, every one of which is braced with a steel rod. The steps fit into grooves in the sides of the ladder and a galvanized plate binds the steps firmly to the sides. The hinge at the top of the ladder is made of one piece of sheet steel, which substantially attaches the risers to the top and holds the ladder rigid.

Does not its construction show that it's built for long, severe service?

The BT Painter's Step Ladder

is of the same construction and material as is used in our Iron-bound Step Ladder.

The back of this ladder is supplied with rounds, so that a plank can be placed on them for making a scaffold. The rounds are relatively spaced, so that a plank can be supported every six inches.

Illustration shows the ladder with a rope lock. This is the way it is generally shipped, but when it is desired, we will supply it with rigid lock the same as shown on the Iron-bound.

This ladder is also splendidly adapted for use in factory, store or warehouse, the rounds at the back permitting two men to use it at the same time.

We build every kind of ladder that the trade may need, including Roof Ladders, and Fire Ladders of all kinds.

Your inquiries will receive our prompt attention.

Beatty Bros., Limited, Fergus, Ont.

NICHOLSON MADE FILES

You're Known By The Goods You Sell

Sell a man a file that fails to give good service — and you're digging a pit for yourself.

When you give your trade **NICHOLSON-MADE-FILES**—you give them files that you know are absolutely right. You know that each file has been inspected eight times—between every important operation. You know the finished file has been tested on tougher steel than it will ever be used on in actual service. So that when you sell a **NICHOLSON - MADE - FILE**, you're certain it's going to give the utmost of satisfactory service.

No "come-backs" to fight — no excuses to make. Nothing to do but "sell more files"—and take your liberal margin per sale.

The ADMIRAL Furnace

will command a quick-growing furnace trade

For Hard or Soft Coal or Wood

SPECIAL FEATURES:

Large steel radiator giving a quick heat from fuel.

Large combustion chamber with flues 4x24 inches that do not clog up with soot.

Large double-feed doors specially adapted for wood.

Smoke-pipe opening above the feed door which prevents the smoke from coming out of the door when feeding coal.

Gas-tight radiators designed and constructed to provide equal expansion of all parts when heated so as not to open the joints.

The scientific construction of this Fire Pot is such that every separate RIB or SECTION forms a Brace for the other, making it absolutely impossible for any two sections or ribs to WARP OR CRACK at the same place. The corners of the pot being perpendicular permit rapid clearance of ashes, thus giving quick radiation of heat. The top forms a COMPLETE CIRCLE, while the bottom is a PERFECT SQUARE, thus allowing a large amount of grate surface. The "Admiral" Grate is of the triangular operating pattern, each pair of bars being operated independently by the use of a handle applied to the two centre bars. This is one of the most Perfect Grates on the market.

Direct or indirect draft with gas explosion door.

Removable triangular grates.

Large ash pit with tight dust flue.

Give it an opportunity to make good profit for you.

It guarantees pleased users everywhere.

BOSS OVEN

GLASS DOOR

GUARANTEED

No. 750

BOSS Glass Door OVENS

Sold throughout the World. In almost every Country where Oil, Gasoline or Gas is used as fuel, you will find the Boss Oven on sale.

Its tremendous popularity is due to the fact that it is first of all a good and economical baker. We guarantee it to bake or roast satisfactorily on any good oil, gasoline or gas stove, or "money back" without argument.

The "BOSS" is made better than any other Oven. Only the best materials are used. The body is made of Mecca Lustre Polished Blue Steel. The linings of heavy Corrugated Tin Plate, having thick asbestos inner linings throughout.

Its Patented Glass Door, which we guarantee not to steam up or break from the heat, has been a universal success. More than 600,000 of this style are now in daily use.

Many patented and exclusive features are found in the Boss. The new Hinge and Door Support leave the door opening entirely free when Oven is open. No danger of burning the hands or arms by coming in contact with wires or chains.

Large variety of styles and sizes in Glass and Steel Doors are shown in our new catalogue, which will be sent on request. Write for it to-day.

Write to-day for Complete Catalog and prices.

NEW BOSS OIL STOVES

Every Vital Feature in the construction of an Oil Stove has been carefully worked out in the "New Boss." There is nothing complicated to get out of order—nothing hard to understand to operate it properly.

Simple but Substantial construction has been adhered to throughout. The extra wide top gives more room for cooking utensils. The legs are strong cast iron, making the stove very rigid.

Patented High Wick Limits or fingers are provided on the inner combustion tubes which are engaged by the wick when turned at full burning height. These fingers automatically trim the wick when chimney is revolved.

The Intense Blue Flame plays right against the cooking utensil, giving quicker results and using less oil than most other stoves.

FOUR BURNER LOW WITH GLASS TANK

The HUENEFELD CO., 6000 Valley St., Cincinnati, Ohio

There are many features

which have been embodied in the construction of

The BANNER Furnace

which we claim are distinctively superior to nearly all other makes of furnaces. For instance we have a solid cast iron **Combustion Chamber.** There can be no question about the advantage of a cast iron dome over one made of steel. It is more durable, will remain hot and radiate heat long after a steel dome has cooled. It is **corrugated,** thus securing greater radiating surface and allowing for free expansion and contraction.

Just a few of the other leading features:—

Large, roomy ash-pit fitted with an ash-pan.

Four triangular grate bars.

The Direct Draft Damper, which is fitted with an Automatic Gas Damper. Flanged Fire Pots. Made in 5 sizes.

Our catalog contains full particulars. We'll send it upon receipt of a card. Write!

"So far as Stove-Selling is concerned, the Economizer is a greater invention than Wireless"

SAM OVEN.

When it comes to real scientific perspicacity, of course wireless telegraphy is an easy first.

But as an article of general-three-times-a-day-and-all-night-utility, the Gurney-Oxford Economizer gets the women's votes.

And each has its use. I wouldn't go across the ocean on a boat that wasn't equipped with wireless. Nor I wouldn't cook on a stove that wasn't equipped with an Economizer.

And the women that cross the ocean are as one to a thousand compared with those who have meals to prepare.

So from our standpoint, yours and mine, the Economizer has it.

The Gurney-Oxford Economizer saves one ton of coal in six. That's a selling argument *de luxe*. Never overlook that point in selling.

The Economizer is four or five dampers in one. It's a medium for the conservation of time, trouble and expense.

Tell your customers about it. Show them how it works. It's good, profitable salesmanship, because when she knows how it works she won't be satisfied with any stove that hasn't an Economizer fitted to the stove pipe, and NO OTHER STOVE HAS.

Try this out, and see if I'm not right, because like Al Jolsen's cigar lighter, "It works."

Sam Oven,
with the Gurneys.

Vol. XXVI. MAY 23, 1914 No. 21

Many Innovations in New Store of Philbin Co.

The M. Philbin Hardware Co., Montreal, Burned Out Last January, Again Doing Business in a Store That Has Many Novel Innovations—Various Methods of Showing Goods.

Written for Hardware & Metal by M. Philbin, of Philbin Hardware Co.

TO profit by the experience of thirty-four years in the hardware trade and to build a bigger and better business for the future, was the task that confronted me when my store was completely gutted by fire on January 6, last. When the 'all out' alarm was rung in by the firemen nothing was left of the fine stock of hardware but a mass of charred wood and twisted and rusted metal. The fire had its origin in the basement and it made a complete job of ruining stock and fixtures.

On March 19, or just two months and 13 days after the conflagration the rebuilt and remodeled Philbin store was opened on the site of the old one at 362 St. Catharine street west. The store has a frontage of 25 feet, but widens out to 27 feet, 6 inches, about a third of the way back, this extra space being obtained where a stairway which leads from the front to the upper part of the building, terminates. The depth is 72 feet and the ceiling is 14 feet in height.

As far as possible every inch of space in the store has been utilized to good advantage. The fixtures on both sides extend from the floor to the ceiling but

Interior view of the Philbin hardware store, Montreal, Que., arranged by Max J. Lebeaux.

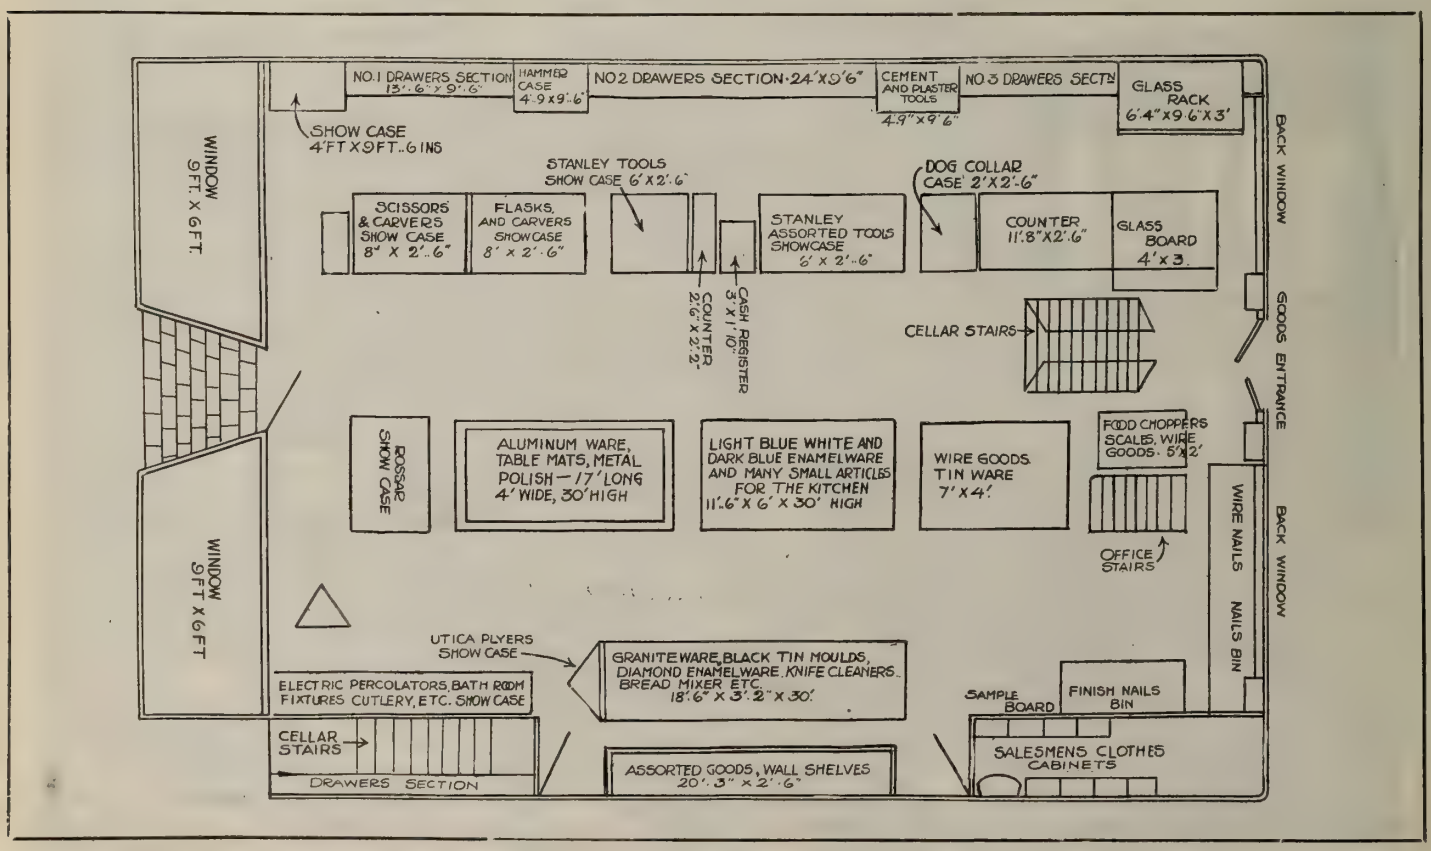
the layout and general arrangement is such that there is no appearance of over-crowding, but rather a comprehensive showing of all the lines that are carried by an up-to-date hardware store.

With the limited amount of space available one of the problems was to show all lines and yet not take up too much room with stock. This was solved by converting the basement into a reserve stock room with all lines laid out conveniently so that anything could be readily reached. A description of this basement will be given further on, but in the meantime a word picture of the main store will probably be of interest.

The entrance is between two windows, each 9 feet 6 inches in width. The windows slope inwards with glass on two sides, as may be noted from the accompanying photograph. In addition to the window proper there are two small showcase windows next to the sidewalk. These were an afterthought. The idea occurred to me that I might just as well have a glass front put in there as to have wooden panels or a thick glass light for the basement. The basement needed artificial light anyway, so the idea of a show window was adopted. I think it would have been an improvement if I had had prism glass put along the inside front of the main window as it would have made the under windows brighter, but that thought came after the window had been finished so it was not carried out. The entry is tiled.

Along the left wall are the shelves and boxes for shelf hardware with high glass-fronted cases, equipped with sliding doors, at intervals. One of these cases, at the front, has a display of saws; another further along has hammers displayed in racks, and the third is occupied by plasterers' tools. The glass rack is situated at the extreme rear. Silent salesmen showcases for cutlery, tools, etc., are placed down this side and serve as counters. The cash register and wrapping counter are about midway, while at the rear of these is a general counter and the glass-cutting board.

On the right are glass-fronted high wall cases for the display of brass and nickel goods, electric utilities, bathroom fixtures, etc. These cases occupy about 21 feet of space. The second section on this side is occupied by shelving for general household goods and in front of it is a large floor fixture for kitchen ware. The rear section is taken up with a clothes room for the employees, and the outer walls have sample boards for garden tools, etc., and nail bins. Additional nail bins are also located across the rear wall.



A silent salesman showcase for razors has its place almost directly in front of the entrance, and back of it are three large tables for aluminum and graniteware, wire goods and smallwares. Food choppers, scales, etc., are shown on the side wall of a stairway which leads to an office built up at the rear.

The office was designed and built by myself, and the total cost was inside $25. It has a framework and supports of iron piping, has hardwood floor and is lined underneath with half-inch sheathing; has a glass partition at one side and the front, affording an unobstructed view of the entire store. From my desk there I can see all that goes on in the store and can note if customers are being properly looked after. It seems almost incomprehensible that such a structure could be erected for less than $25, but I kept a close account of every item and it was within that figure, even including the painting and graining of the woodwork. Or course it has to be taken into consideration that much of the work was done by myself, personally.

The location of the paint department in the store is rather unusual. It occupies the space above the shelf hardware on the right side of the store, there being room for four shelves up by the ceiling. The photograph of the interior which is shown herewith, gives an idea of the manner in which this space is utilized.

Method of Showing Cutlery.

In the base of the front fixture on the right is a unique arrangement for showing samples of cutlery. A series of thin trays made of quartered oak with brass handles on the front and lined with green felt set the goods off to splendid

Plan drawn by Max J. Lebeaux, showing interior arrangement of the Philbin store.

advantage. The trays vary in size, the top one being the narrowest and each succeeding one a little wider. This affords a partial view of the contents of each tray and adds to the display effect. samples of knives, forks, spoons, etc., are laid out in these trays, each bearing a small gummed label with number, cost and selling price. Reserve stocks are kept in the basement. When a customer wishes to see cutlery these trays can be pulled out, placed on a sliding shelf above the fixtures, and an opportunity afforded of selecting the style desired. A choice having been made the goods are procured from the stock room in the basement. This arrangement saves space in the main store and also allows a number of patterns to be shown at one time.

The basement door is situated on the right, just back of the first wall case. On the inside and outside of the basement door, on the walls at the side and on swinging panels attached to the walls are samples innumerable. Take for instance wooden chair seats. instead of showing these singly to a customer they are shown in sets.

Displaying Chair Seats and Brushes.

If a customer asks for a chair seat and is not sure of the size, we take one of these sets, round, square or other shape, as the case may be, and a selection of the proper size can be made. As you will see, these five or six sizes are fastened together with a screw through the centre and half-a-dozen take up only about as much room as one would. A screw eye fastened in the largest one permits hanging them here where they are easily accessible. Each size is marked with price and number and stock is kept in the basement under corresponding numbers.

Shoe, stove and scrub brushes, counter brushes, dusters, etc., of all kinds, are kept in spring holders on the wall. They are easy to get at and there is no trouble with twine loops and hooks, the brushes are just pressed into the holders or pulled out as wanted. These holders are similar to those used for holding brooms. Samples of keys are shown on swinging panels against the wall, also curtain fixtures and similar small goods.

Down one side of the basement stairway are brooms and mops in snap holders, and on the other side of the stairway are small compartments for bolts, nuts and lag screws, etc.

The basement is laid out in two long aisles with cross aisles, 3 feet 6 inches in width. Here the reserve stock and the goods which are sampled above, are kept in orderly array so that anything can be found instantly. Dusters, axe handles, and similar goods are arranged in racks; chair seats have a

Window display in the store of M. Philbin, arranged by Max J. Lebeaux. Showing how lower section of window has been utilized.

section of narrow shelves for the different shapes and sizes; shovels, hoes, rakes, etc., are arranged in racks; window screens and doors have a special compartment, and various small goods are arranged in shelves according to departments, such as nails, graniteware, paints, galvanized ironware and so on.

Displaying Rope.

Garden hose is suspended on reels at the end of one of the long aisles, so that it can be unwound and measured. A unique arrangement for handling rope is installed. The coils are mounted on revolving stands and the ends of the different sizes are passed up to the rear of the main store through holes in the floor. By this means the rope is quickly obtainable in the main store without the sacrifices of space there for it.

The rolls of screen wire are placed on wooden rollers above a bench so that it can be measured and cut quickly. Even the spaces between the rafters, are utilized for stocking mops, brooms, handles, curtain stretchers and similar goods.

It is, of course, difficult to describe all of the many features one sees in the store. I never hesitate to put into effect any scheme that I think may be of benefit. I always carry a small vest pocket note book in which it is my custom to jot down any new ideas I see or think of. If I see a stand or a fixture somewhere that I think might be adapted for some department in this business, or if an idea for something new or different occurs to me it goes down in the little book, and though it may not be used or acted upon at once, I usually find it comes in handy later on. So it is when I am asked for some line of goods that is new, or that I do not carry in stock, a memo is made of it, so it will not be forgotten, for memory is treacherous.

I am a firm believer in the value of advertising. I look upon the store windows as one of the biggest advertisements, and have the displays changed several times a week. I might relate an incident that occurred recently on a Saturday night just after the reopening. Having been out of business for a couple of months and then reopening with a different style of front (in the old store the door was at one side, instead of in the centre), I figured that many old customers would not recognize the new store. I arranged a special display of food choppers and engaged a young lady to demonstrate them in one of the windows. The idea was such a success that a policeman could not keep the crowds moving on the sidewalk and he ordered the demonstration stopped. However, my purpose had been accomplished and I had helped put the Philbin store on the map again, for hun-

HARDWARE AND METAL

VOL. XXVI. No. 21 Toronto, Canada, May 23, 1914 Two Dollars per Year

Profit and the Retailer

DURING the Question Box Discussion at the Hardware Convention at Ottawa last February, one of the questions asked was, "Why is it that with a turnover of $15,000 and a stock of $5,000, under reasonable expense, I cannot make a profit? Where are the leaks?" This question was no doubt from a merchant who was up against the same difficulties that are confronting many other merchants in Canada to-day. He attended the question box session for the purpose of securing information—for the purpose of finding out about the leaks that are common to the hardware trade—and no doubt hoped to benefit by getting pointers from the other merchants present, many of whom have at some time or other been in the same position as the hardwareman who placed the question in the box, and who is endeavoring to place his business on a profit-sharing basis.

It was rather surprising to see the lack of interest shown in this question—a lack so conspicuous that it brought President Occomore of Guelph to his feet with the remark that he believed the question should be considered, and answered in sincerity, in order to give the qustioner all the information possible. Mr. Occomore remarked that this hardwareman knew that leaks existed in connection with his business, and hoped to get some information that would help him to plug the leaks. The question was one that could and should have been discussed at considerable length. Many good points could have been brought out, and every merchant present at the meeting would have benefited. There are many difficulties with which the retail hardwareman has to contend and many perplexing problems confront him from time to time. Elsewhere in this issue is an article, "Standing Up For Profits," by Wheeler Sammons. This article deals with a problem which should interest every hardwareman and is one of a number of business articles which will appear in Hardware and Metal. These articles are for the benefit of the retailers and should prove interesting and profitable to many merchants who are in the same position as the merchant who asked the question at Ottawa.

Sheldon and Salesmanship

SHELDON says that salesmanship consists in selling goods at a profit and Sheldon has given a good deal of thought to the question.

Salesmanship is therefore not cutting prices. It does not mean the selling of goods for 99 cents that cost a dollar. Neither does it mean the selling of an article that costs a dollar a dozen for 10 cents each. When overhead expenses are taken out the profit has vanished.

What Mr. Sheldon means is this: In order that there be the element of "Salesmanship" in the passing of an article from one to another, the seller must have a definite margin of profit above the total cost.

How easy it is for cut-rate drug stores, for instance, to have extensive turnovers! Many dealers and clerks have erroneously got the idea that they are salesmen because they sell large quantities of an article, the regular price of which has been cut in two. Anybody can do that. But when a dealer sells an article at a cent above his competitor he must be classed in the ranks of the salesmen.

The Wednesday Half Holiday

ALREADY there are signs of some opposition arising to the closing of stores on Wednesday afternoons during the Summer months. This is based on the same lines as has met the movement throughout its whole course, a loss of business, a bad impression upon visitors seeing stores closed down, and the inconvenience of the public. The matter probably will adjust itself according to the local situation. In a town where "tourist traffic" is light or a negligible quantity, it is likely that the objections to closing as it has existed will not succeed in a return of the old order of open stores. In a few places where there is an influx of visitors during the Summer afternoons, particularly those on inland lakes, rivers or the sea, there may exist a strong enough prejudice against closing down to prevent a half-holiday or destroy one if it now exists. There undoubtedly is a growing feeling in its favor among the clerks who have enjoyed it so far and those employers who have entered fully into the relaxation afforded. A Barrie store has inaugurated a system that may come into favor as a compromise in some districts: half the staff are given a full holiday on every other Wednesday, the others remaining on duty during the afternoon as well as the morning. The advantage of this system, the proprietor points out, is that the clerks are not deprived of the holiday but receive it in double measure half as often, while the town itself and the country around are still served throughout the afternoon. Where the proprietor comes in under the Barrie system was not disclosed: probably being his own "boss," he could take this into his own hands.

The Business Situation

REPORTS from Hardware and Metal correspondents in various parts of Canada indicate that there has been an improvement in business during the past week, due largely to the fine weather conditions which have prevailed. Orders in many lines are still small and buyers are exhibiting caution, but for all that, the total volume of business passing is quite large. In the metal markets conditions have not changed to any great extent. Paint manufacturers report business as being very satisfactory. Retailers are now doing a nice trade in spring and summer lines. Stove manufacturers, while not extremely busy, are finding a ready sale for summer stoves. Some firms have found it rather hard to secure booking for fall deliveries. Collections are showing improvement and merchants generally are more optimistic than they were last week. The Financial Post in an article on the trade trend says in part:

"We do not anticipate that trade will suffer further contraction. Further inactivity industrially is likely to ensue, because of the steadily accumulating stocks of the manufacturers, despite working short time.

"While we do not anticipate greater trade activity during the next month or two, there is but little doubt that given a normal crop there will be slightly better demand for commodities generally towards the latter part of the year. Meanwhile, however, we anticipate quieter industrial conditions.

"Our Halifax correspondent at the eastern and our correspondent at Vancouver at the western extremity of the Dominion, say little change is noticeable in trade conditions. In both cases the general volume is below that of last year; considerably below at Vancouver and slightly at Halifax. In the central portions of the Dominion the volume of trade remains less than a year ago. No increases are reported except from special causes. Generally speaking, business men anticipate some improvement when the summer production begins to find its way to the market."

Cutting Off the Slow Pays

ONE of the greatest drawbacks to more successes in the retail grocery business to-day, is the giving of indiscriminate credit. This is in many cases due to the anxiety of the dealer to secure as much trade in his community as possible. When an applicant, who has paid cash for a month or two asks for credit, he grants the request without first determining in his own mind that he is going to get the money. This is a system that must be discouraged.

Not long ago the writer attended a retail merchants' meeting in a Western Ontario city, and one of the questions brought up was that of credit and bad accounts. At that meeting, one of the prominent members of the association gave his experiences in cutting down bad accounts, which were worthy of being passed on to the entire trade. Last fall, he decided to cut off some five or six customers who had got behind in their accounts during the summer months. He had been trying to get them to pay up before the winter season came on, but of no avail. The accounts were not very large, but he firmly believed that if he had allowed them to run through the winter his losses would have been very much greater. While he did not sell as many goods, he made as much money, and was minus the worry connected with slow pays and bad accounts. As he himself expressed it "the trouble was, too many dealers were too anxious to get the trade, without giving sufficient thought to whether they would ever get the money or not."

Too much care cannot be exercised in this respect. Few will deny that the credit system is the best, providing there are no bad accounts. The point then for every merchant giving credit to consider seriously is that of picking out the wheat from the chaff. This is where a list of questions comes in handy. Every dealer should consider the point of asking those who apply for credit such questions which will have a direct bearing on whether it is the intention or not to pay the account.

Editorial Briefs

STAND UP FOR your profit.

* * *

KNOW YOUR STOCK and save time.

* * *

THERE ARE SPARE moments, use them to study the stock.

* * *

HOT WEATHER is fly weather. Display that stock of fly destroyers.

* * *

PLANS FOR building up trade during the summer months should now be under way.

* * *

THERE ARE TWO ways at least of increasing the net profits—increase the turnover or cut down expenses. Which will it be?

* * *

THE FAILURE OF THE merchant who keeps a dirty, sloppy store in the indolent, shiftless way, means a ten-strike for progress—his trip to the scrap-heap is for the general good—for the betterment and advancement of the industry he would keep in disrepute.

WHEN THE FAKE advertiser is eliminated the merchant who honors his word will have a better chance.

* * *

ENCOURAGE THE CLERK to read the trade paper. The knowledge he gains and the interest it will evoke will be profitable both to him as an employee and you as the employer.

* * *

WHEN ALL ADVERTISING has been elevated to the standard where all advertising can be accepted as absolute facts, the results from advertising will be multiplied several times over.

* * *

KNOWING THE STOCK does not simply mean ability to produce a certain article without hunting for it, but the good salesman will know all the important points about that article.

INCREASING THE turnover without cutting the percentage of profit or adding to the staff and expenses, should be every merchant's aim. A good provision department will help accomplish this object.

Increasing Business During a Dull Year

Hardware Merchant at Hull, Que., Tells the Readers of Hardware and Metal How He Has Increased His Business This Year — Show Windows Play Important Part.

By Edgar Carriere, Hull, Que., Successor to B. Carriere & Fils.

WHILE it is a well-known fact that building operations have been curtailed, and that business in other lines is more or less dull this year, my business has shown a splendid increase over the corresponding period of last year.

One of the principal reasons for the increase in business is the fact that my prices have been reduced to where they should be, instead of being higher than other merchants, a condition that was apparent in the preceding years. My quotations, understand, are not lower than they should be, for I firmly believe that an article will sell on its merits, and that underselling an article is simply hurting one's business.

My chief aim is to have satisfied customers, as they give my store good advertising, and bring repeat orders and new clients. I have noticed this particularly during the first period of the current year.

While my hardware line is especially responsive, I am always on the look-out for new lines, and have recently taken on a new proposition—namely, a beaver board department, which I must say has helped to increase my profits very materially. I have purchased two carloads of this material within a period of six weeks. This line sells very well, and is ideal for a hardware man, because when customers want it I invariably sell nails, paints, saws, hammers, etc., all of which are necessary in connection with its application.

Not only do I get a nice profit on the board, but also on the other materials.

You will notice in one of the accompanying photographs that I have finished the office throughout with beaver board; this has proven a splendid advertisement. When a prospective customer for this material enters my store I naturally refer him to the office, when he can see exactly the results which can be obtained. Many sales of wall paint are also quickly made by this method of procedure. This style of advertising is half the work in bringing about a sale.

One of the accompanying photographs shows an interior view of my store. You will note that my method is to display everything nicely and neatly, so that a customer coming in can almost see at a glance what he is in need of.
